Tips from an Insider: Harvard Professor, Michele Lamont

Interview: A Look Inside the Grant Review Process

“How Professors Think”

Who wouldn’t like to be a fly on the wall during a meeting of grant evaluators to see how the process is really carried out?

Harvard professor, Michele Lamont, had an opportunity to do just that. Through a series of negotiations and many promises of confidentiality, Lamont was able to observe the grant review process from inside several prominent funding agencies and wrote about the process in her new book, “How Professors Think.”

This past summer, Lamont allowed us to interview her about her most significant experiences writing the book. Not surprising, one of the most significant findings Lamont’s research brings to light is that evaluators are greatly influenced by personal preferences. While evaluators maintain a certain level of objectivity and strive to perform unbiased and equal evaluations, they are still human. Personal preference still has quite a large impact on an evaluator’s final decision. Lamont writes, “People define what is exciting as what speaks to their own personal interest, and their own research.”

Project investigators should be aware that a topic determined to be completely fascinating by one humanities professor may not hold the same fascination for a political scientist and therefore, the two evaluators’ scores may be drastically different.

Continued, p.2...

“People define what is exciting as what speaks to their own personal interest and their own research…”

Michele Lamont, Prof. Harvard and Princeton Universities
Panalists paid more attention to certain proposals than others: Accordingly, Lamont stated, “taste-based committees respond enthusiastically to their own areas of interest.” It became obvious to Lamont during her research that some panelists paid more attention to certain proposals than others.

So, what is a writer to do? How should a project investigator create a proposal that appeals across departments and divisions?

Lamont advises, “Faculty need to be extremely clear in their writing. I don’t think they fully understand how crucial quality of writing is…”

Don’t make evaluators struggle. Remember that evaluators may read up to 50 proposals, in upwards of 150 pages each and therefore, clearly expressed objectives can make the reading process of the evaluation a joy instead of a job for the evaluator.

Make proposals a joy to read. Lamont encourages faculty to make proposals a joy for readers to read. Strive to make it easy for the evaluator to know why your ideas are significant to your particular field of study. Chances are the panelist comes from another discipline and could use your help in determining the significance of your plan. Be sure to highlight your expertise, as well as your ideas.

Talk to Program Staff. Grant proposal writers should talk to project staff and program officers, Lamont advises. Lamont describes the program officers as, “The most important actors in the evaluation process…they have great discretionary powers that affect competition outcomes.” A project investigator can get a template of how to frame research for the best possible reception at evaluation from speaking to the program officer. Or, discover what screeners look at for a quick elimination.

Tips from an Insider: continued from page 1

...Faculty need to be extremely clear in their writing. I don’t think they fully understand how crucial quality of writing is...

Michele Lamont, Prof. Harvard and Princeton Universities

Lamont: “The fourth time is the charm! …Revise, revise, and revise…”

Lamont told us, “It is reasonable to the program staff that the project director receives a little feedback – ask for guidance.”

Persistence is necessary. Professor Lamont insists that persistence is necessary and told us, “The fourth time is the charm!” Project investigators need to remember that feedback helps to reframe an argument for the next evaluation. And, every new evaluation helps. Keep submitting, Lamont advises; “Revise, revise, and revise” but don’t give up until you obtain funding!

“How Professors Think” attempts to make sense of ‘standards’ and the meanings given to them. According to Lamont, “making formal evaluative criteria public increases accountability and makes winning democratically available to all (since success depends on the display of technical proficiency, as opposed to a domain of the talented few.)”

Leveling the field. Sharing information about the inside process of grant evaluation only levels the field in Lamont’s eyes. There should be no pretense of complete objectivity when that is a human impossibility. Instead, we should acknowledge and appreciate how emotions are “not corrupting, rather it’s intrinsic” to the process.

Simultaneously, offering the perspective of an insider and an outsider to the grant review process, Lamont brings a unique perspective to her readers. Successful in obtaining funding for numerous grant proposals she has authored, Lamont has also served on many grant review panels as an evaluator herself. A full professor at Princeton and tenured professor at Harvard, Lamont has published over 60 articles and book chapters. Her work spans a wide range from racism, cultural impacts, and health implications, to evaluation. Her valuable perspective, from both sides of the conference table, served the research well in determining, “How Professors Think.”
Did you know that faculty with extramural grants are able to recoup some of their furloughed salary? Faculty whose extramural grants (or contracts) reimburse the university for their salary for Academic Year (AY) effort can increase their wages over current furlough levels by restoring workdays for grant-related activities. In the example above, a faculty member with an extramural grant that reimburses the university for his/her salary for 3 course releases during the AY is able to work and receive pay for 6 more AY days. This amounts to a net overall reduction in pay of 6.1% (vs. 9.23%) given current furlough conditions, without salary-reimbursing grants). Not only that, but given the current economy in the Inland Empire, support for students is more important than ever. Extramural funding – in the form of stipends or hourly wages as research assistants – can provide much needed part-time employment, making it (somewhat) easier for our students to stay in school. Thus, there’s never been a better time to apply for extramural funding! Contact the Office of Research & Sponsored Programs for more information. (x75027)

Assumptions: Academic Year only --- Earn $90,000 for academic year ($30,000 per quarter/$10,000 per course)

**SPOTLIGHT:** “High School Strand in Summer Arabic with Academic Year Continuation, CSUSB” by Terri Nelson seeks to expand its already successful Summer Intensive Arabic Immersion Program by recruiting from local high schools and will accept applications from juniors and seniors interested in learning Arabic. Students in this area have little access to learn languages other than Spanish. StarTalk will make the Summer Arabic program affordable to families in a community unfamiliar with higher education. CSUSB’s Arabic program has grown rapidly and now offers the only B.A. in Arabic in the entire 23 campus California State University system.

SPOTLIGHT: “2009 Summer Workshop for Persons with Visual Impairments” by Sang Nam obtained funding from the Korean National Institute of Special Education for an 8 day, 7 night workshop. The main objective of the workshop was to improve the educational quality for the students with visual impairments, as well as promote collaboration between their teachers and families. One area of focus was on transition, vocational programs from school to adult life and the social, educational, occupational, and psychological implications of blindness in transition. Eleven middle and high school students with visual impairments, along with their parents and teachers actively participated in the 8 day event in July, 2009.

SPOTLIGHT: “RUE Site: Investigations in Combinatorics, Geometry and Knot Theory” by Rolland Trapp. This project seeks to actively involve students in significant mathematical research to increase students’ mathematical independence and maturity, and to encourage participants to pursue careers in mathematics in either academia or industry. The program will advance discovery through actively engaging undergraduate students in mathematical research and strongly encourage them to become active participants in the mathematical community. Approximately, 80% of past students have presented at meetings of professional societies.

NEW NIH GRANT PROPOSAL FORMS DE-MYSTIFIED

☑️ February 2 (Tue), 10:00-11:30am in FO-177
☑️ February 3 (Wed), 1:00-2:30pm, FO-177

This brief workshop will help you learn about recent form changes to be implemented later this month. Significant changes include a shorter narrative with structural changes, and changes to the organization and content of your biographical sketch.

Please reserve your seat at a workshop today through the TRC at http://trc.csusb.edu/
