Solons Make ‘Political Hay’ of Fullerton Play

by Rene Jacober
ASSOCIATE EDITOR

Interesting questions have arisen in connection with last quarter’s presentation of the play, “The Beard” at Cal-State Fullerton. These questions relate both to what is acceptable study and entertainment on the college campus and to what extent should the state legislature interfere with such academic productions.

The play was conceived to have contained so-called unacceptable materials; however, the ASB and the Fullerton drama department defended it. They contend that the play was of experimental nature and fundamental to the educational process.

At the present time, state senator James Whitemore (R-La Habra) is engineering an upcoming investigation committee designed to waste taxpayers money researching “The Beard.” It is a prime example of political interference in the primary purpose of making political hay in conservative Orange County specifically and in the state generally.

The student senate at Fullerton stated that the play, however shocking to a few of those who attended, has been presented previously on at least four major California public and private college and university campuses. The senate also condemned the political interference involved in state censorship on campuses of tax-supported institutions which presents a dangerous threat to the principles of artistic liberty and academic freedom.

John Briggs (R-Fullerton) has stated that “the state legislators cannot continue to take the heat for college administrators throughout California who disclaim authority to act.” He added that the person responsible for the production of “The Beard” is not a tenured faculty member and could easily be dismissed. This also raises an interesting point: if legislators are allowed to intimidate teachers in the educational system, then the teacher will never be an integrated part of the system. They will educate in fear of transgressing established conservative boundaries.

CSCSB AS President Jim Penman has been requested to support the Fullerton Administration’s handling of “The Beard” situation. He has told...

S.F. State and Berkeley Have No Monopoly on Involvement; Cal-State Has Possibilities Also

by Bob Morales

“The only thing necessary for the triumph of evil is for good men to do nothing.” Remember those words? John F. Kennedy did. Carry them with you as you walk the halls of academia. Ten thousand miles away, half a million Americans fight for freedom. “When the last shot is fired and the smoke has cleared, someone will have to answer for the dead. And here at home, in the streets of our cities, we are faced with the real possibility of a civil uprising. With the passing of each day the lines of confrontation are delineated even more sharply, and opposing groups harden into their respective positions. As students become more adamant in their determination...

DIALOGUE—Bob Morales (far right in photo) contends in his article that faculty-student discussions are involvement.

Unruh: University Fee Proposal a ‘Bow’ to Reagan

Assembly Speaker Jesse M. Unruh last week labelled the report of the special University of California Regents committee recommending a $156 yearly increase in student charges as "hypocritical bow of obedience to the Reagan administration.”

Observers in the state college system say that the increase in fees for the University may result in like increases in the state college system.

“The decision of the committee (as reported January 11 in the Los Angeles Times) would have the effect of making the expensive public university in the University of California the fifth country, the State University of most costly public university to New York, now charges $500 to attend in the nation,” Unruh said.

If this report is adopted by the Regents’ committee, only the dully believes that by proposing State University of New York, this 64 percent increase in tuition and fees exceeding the budget figure they are asking for, the Regents University will have combined and will give the Regent’s the tuition and fees exceeding the budget figure they are asking for, the Regents University...
every Friday Night

**TGIF Action on Campus**

If you find Friday nights stale and unexciting after the city ports that seniors interested in Ruber Co. representatives visit, you may want to consider Goodyear’s representations. The College’s 1968 recruiting season will get underway Tuesday when Goodyear Tire and Rubber Co. representatives visit the campus.

Doyle J. Stansel, Director of Placement and Financial Aid, reports that seniors interested in exploring career employment opportunities with Goodyear are invited to schedule an interview time before noon Monday.

Seniors, regardless of major, are encouraged by Stansel to become familiar with the services of the College’s Placement Center.

**Another Car Rallye? MEC Promises Encore**

The Motor Enthusiasts at Cal-State held its first rallye of the year on December 2 and reports plans are now underway for this quarter’s attempt at boggling your mind and tuning on your perceptive faculties.

The first rallye of the year in December was considered a success; there were 15 entries. But club officials say that the turnout was good, considering the other activities slated for the same night: a drama presentation and numerous CIF football games.

Ken Harper, club president, says the next rallye will take a bit more skill on the driver's and navigator's part and added that the club has not yet decided if the rallye will be "navigational" or "average speed." It might be helpful, Harper noted, that potential drivers "bone up on their arithmetic or learn the basics of the slide rule."

The Fall rallye was won by two UCR students, driving (of all things!) a Renault. It is interesting to note that of the four "true" sports cars entered, not one was able to finish in the required time and only one, a snappy red Porsche, was able to finish at all. "It’s not always the car that wins," Harper said "but the driver."

The MEC, as it is known on the campus, meets in PS 104 at 10:30 Tuesday. Dues are $1.50 per quarter.

**Theta Psi Exhibit Courage: Baby Sitting**

Theta Psi Omega, the campus women’s service club, has announced the formulation of a baby-sitting service, available to anyone in the college community.

The names and phone numbers of those members who have volunteered to spearhead new horizons in the problem of "what to do when mom and dad leave" are registered in the office of Activities and Housing, L122A. The college extension number is 264.

**Festival in Solvang’ Movie at City Library Tonight**

Three films will be shown tonight at the San Bernardino City Library, 401 N. Arrowhead.

"Festival in Solvang" shows how a California city celebrates its Danish heritage. "The Sixty Minute Circle" is about urban growth in relation to the transportation revolution from the Atlantic to the Pacific. The third film, "Helen Keller in Her Story," tells of the life, achievements, and methods of this remarkable woman who is mute, blind, and deaf.

LIGHTING SYSTEM
PAINFULLY INADEQUATE

As CSCSB grows, we like to sit back on occasion and poke fun at some of the things that go on around campus by way of discussing the effectiveness of new buildings, or say, renaming the atom-in-motion.

But however, it is not in jest when we must present a situation to the college community which calls for immediate attention.

For the past few weeks, we have observed the students attending night classes using flashlights to light their way to and from the new buildings. Some of these students are regular day students, others can only attend during the evening. Some of the comments that have been overheard about the lighting system from the night students are pertinent and worth consideration.

Let's not court disaster - whether from rattlesnakes or social hour curiosity seekers - who wander around the campus at all hours. These people range from weary travelers who are "on an across-country trek through the desert of the campus" to the college community which calls for immediate attention.

The intersection of state college parkway and kendall drive provides a natural laboratory for the study of high speed vehicular collisions and the resulting effects on passengers. All that is needed is an interested group to gather and interpret the available data.

The job of gathering has been considerably facilitated by the erection of a yellow blinking light on kendall last year which warns drivers to slow down about 20 mph to 85 so that they can get a better look at the degenerate college crowd - and perhaps a hint. This enables the information gatherers to spend less time looking for parts of cars and drivers that otherwise would have been scattered great distances. More time can thus be spent in the study of them. Meanwhile, cscsbs can assure everyone that its new invention, called "the signal," will not get into the hands of the wrong people or social outcasts of any type.

Let's rectify the lighting system to cast more light between the standards. -- WK

While Walking to Class

I got away clean
From the darting Dauphine.
While giving the air
To a corporate Corvair,
I quickly did scamper out of the path
Of a cab-over-camper driving with wrath.

I avoided the fate
Of the girl who was late.
While dodging a tractor
A 'lectric car smacked her.
So I made it class though the sidewalk's a mess,
The kids on the grass weren't so lucky, I guess.

Oh, Dr. Spock

Oh, Dr. Spock,
Say, Dr. Spock,
Advice you gave me was a crock.
You said resist
And throw a rock.

So now you better hope to hell
That they don't put you in my cell.
