Students at the California State Colleges and the University of California probably will pay tuition increases beginning Jan. 5, according to Professor William Trombley, Los Angeles Times correspondent. Basing the conclusions on recent public discussions of the tuition issue and interviews with members of the UC Board of Regents, Trombley claims that the debate is over and the only questions remaining are how much the tuition will be, what the money will be used for and whether it will be called tuition or will continue to be known as a registration fee.

Only the regents can impose tuition at the university. If they approve tuition, the State College Board of Trustee’s expected to follow suit. Even if the trustees refuse, the legislature has the authority to impose tuition at the state colleges.

The tuition debate began three years ago when Gov. Reagan was elected. Shortly after taking office, the governor proposed tuition for the state colleges and the University of California. Following several months of debate, the regents voted down the proposal, 14-1, on Aug. 31, 1967. Regents who supported the governor in the 1967 vote and are still on the board include Philip L. Boyd, John E. Canaday, Allan Grant, Mrs. Randolph A. Hearn and State Supt. of Public Instruction Max Raffety.

In addition, the chancellor has appointed four regents who favor tuition. They are W. Glenn Campbell, Robert O. Reynolds, Dean A. Watkins and William French Smith.

Survey Influences Cafeteria Changes

In response to student requests, a number of changes are being implemented in the cafeteria service, effective immediately, according to Jean Atterbury, cafeteria manager.

Fees Increased

Effective here next quarter the cost of the material and services fee will be raised from $40.50 to $43.00, an increase per student of $2.50 and for the college about $4,300. Where will this money go?

The only concrete information the chancellor gave was that $5.00 of the $2.50 increase will go to the Health Center. This was stipulated by the California State College Board of Trustees.

Edward N. Reiman, director of publications, after searching through press releases from the Trustees, concluded that the money increase will go to the Dean of Students office to make up for funds that had been withdrawn from that office.

Power Volleyball Exhibits Tonight

A CSCSB volleyball team will compete this evening in the gymnasium in a preliminary match of a power volleyball exhibition.

The campus team will play against a March Air Force Base team at 7 p.m. before the featured UCLA Bruins’ Volleyball Team versus Cisco’s Volleyball Club game.

These teams are national contenders presenting Olympic, All-American and international stars. The UCLA team, finishing second in the college division of last year’s national tournament, has this year already defeated UC Santa Barbara’s team, last year’s champions. The Cosco is an excellent volleyball club from Manhattan Beach; they placed third in the open division of last year’s tournament behind the Los Angeles YMCA and the Olympic Club of San Francisco.

Players on the Cosco team are: Bob Stretch, Tom Devine, Bill Trumbo, Mike O’Connell, Tony Green, Ed Phipps, Skip Fletcher.

Doors open at 6 p.m. Admission is $1.50 for non-students and $7.50 for students. A drawing will be held for a free volleyball.

FRACTURING for the Christmas concert are: pianist Jane Meagher, left, andright, Bernice Massay, Burton Chowing, Joseph McKee.

A concert of Christmas music will be presented at 8:15 p.m. this evening in P.S. 10 by the College Chorus and Madrigal Singers.

Joining the students in the concert will be the piano of pianist Jane Meagher of San Bernardino and Luci Buchman, Claremont High School senior who is an accomplished harpist.

The chorus and singers are under the direction of Michael Andrews, instructor in the CSCSB music department.

The Madrigal Singers will be heard in “O Magnum Mysterium” by two composers, a motet by Thomas de Victoria, 16th century Spanish choirmaster, and carols by the contemporary English composer Peter Maxwell Davies.

Luci Buchman, a finalist in a national harp competition in New York City recently, will join the women’s chorus in “A Ceremony of Christmas Carols” by Benjamin Britten. Soloists will include Gall C. Haggard, Farris Drake and Jackie Thompson.

Junior music major Ellis Potter will direct the chorus in six Christmas carols representing different countries. Miss Drake, a freewheeling black conference pianist, will be soprano soloist. Accompanist for this portion of the program will be Dennis Dotycker, a seasoned music major.

Excerpts from “The Childhood of Charlemagne” by the English French composer Hector Berlioz, will conclude the program. Mrs. Meagher, a prominent organist and pianist who has done considerable work with the San Bernardino Civic Light Opera, will appear with the chorus in this song of the title role.

Students in solo roles will include: Bernice Massay as Mary; Joseph McKee, tenor; Burton Chowing as Joseph; and Joseph McKee as the father of a family.

Little Theatre

Students to Direct Plays Dec. 12

A college of one-act plays and sketches directed by drama students will be presented next Friday, Dec. 12, in the Little Theatre.

The program, to be given only once, begins at 2 p.m. There will be an evening break at approximately 5 p.m. and performances will continue starting at 8:15 p.m.

The plays and sketches offer a wide variety of fare ranging from the dramatic writing of Tennessee Williams and Philip Merivett to the realistic sketches directed by drama professors and the philosophy of Jean Paul Sartre.

The program marks the first time CSCSB drama students have directed full-length productions as part of their classwork.

Students faculty and staff are invited to attend the productions. There will be no admission charge.

Trustees, Regents May OK Tuition for Next Fall

Students at the California State Colleges and the University of California probably will pay tuition increases beginning Jan. 5, according to Professor William Trombley, Los Angeles Times correspondent. Basing the conclusions on recent public discussions of the tuition issue and interviews with members of the UC Board of Regents, Trombley claims that the debate is over and the only questions remaining are how much the tuition will be, what the money will be used for and whether it will be called tuition or will continue to be known as a registration fee.

News Briefs

S.F. Mime Troope Runs Vacation Workshop

The San Francisco Mime Troope, long time thorn in the flesh of California College administrators, has announced a two-week "Radical Theater Workshop" to be held at San Jose State's Experimental College over the Christmas holidays. The full-time open enrollment course, which will run December 22-January 3, with Christmas and New Year's off, will cover both theory and practice of radical theater, including according to the announcement, "constant struggle with the question, how should art be political; six hours daily of classes in acting, mime, acrobatics, people's music, street theater forms, and short notice creations; outdoor experiments and original inventions."

The Troupe hopes to attract students actively interested in both theater and politics, who will start (if they haven't already) "guerrilla theaters" on their own campuses. Registration fee is $40; living accommodations are available. Applicants should write: Doreen Busman, Director, Experimental College, San Jose State College, San Jose, California, 95114.

Christmas Dance Scheduled During Dec. Vacation

A Christmas dance, sponsored by the Activities Committee and the Alpha Phi Omega Club, will be held during the Christmas vacation in the campus gymnasium. Featuring the music of a Los Angeles group, the Salvador Band, the dance will take place, December 19, from 9 p.m. to 1 a.m. Admission is free to CSSB students who show identification and for others for $1.25 per couple. Refreshments will be served.

State College Application Fee Increased $10

A $10 increase in application fees for students seeking to enroll in The California State Colleges will go into effect February 1, 1970, according to David Kagan, state-wide coordinator of admissions services.

The increase, which brings the fee to $20, is necessary due to increased cost in the processing of applications, and the scarcity of appropriated funds, Kagan said.

The increased application fee was approved November 25 by the college system's Board of Trustees.

Cal State Colleges to Admit 4,500 More Students

The California State Colleges will admit an estimated 4,500 more students during the 1969-70 academic year than provided for in the college system's budget. Chancellor Glenn S. Dumke announced today.

The Chancellor issued the following statement:

"We are pleased to report that the enrollment figures for the fall term are higher than expected. This has allowed us to admit an additional 4,500 students, which brings the total to approximately 77,500. The increase in enrollment is due to a number of factors, including an increase in the state's budget for higher education and a continued effort to attract more students to our institutions."

Oscar Jackson Named New Personnel Head

Oscar C. Jackson, Jr., who has been working most recently with the employment of minorities and the disadvantaged, has been named the new personnel officer for California State College, San Bernardino.

He came to the CSCSB from San Diego where he has been with the Citizens Interracial Committee since June. His responsibilities were in negotiations for equal hiring opportunities and in community relations.

Prior to this, Jackson spent six months with the Watts Labor Community Action Committee of Los Angeles, working primarily as a counselor in a program disdruagstrated and minorities for a training program established by the federally funded committee at Camp Saguaro.

Jackson spent seven years with the Department of Employment, working in the offices in San Diego, San Bernardino, Santa Ana and Los Angeles. He was manager of a unit in San Diego from 1967 to 1968.

An Army veteran, Jackson received his bachelor of science degree in sociology from the University of Utah in 1956.

The personnel officer is responsible for the recruitment and training of non-academic staff for the colleges.

EARN MONEY WHILE AT COLLEGE

Wanted: A campus representative for a large tour operator. Specializing in student/faculty trips, charters, etc. Please phone 213-272-8423 for details.

People's Lobby Runs Second-wind Race

For the last few weeks students and community members of San Bernardino and Riverside counties have worked to obtain signatures required to get two anti-smog initiatives on the California state ballot. At the same time others throughout California were doing the same thing — obtaining signatures of registered voters and working at the long job of registering each precinct with each signature.

One of the People's Lobby coordinators, Bill Maddox, gave the following report on the anti-smog work. The People's Lobby initiative drive is beginning a second-wind attempt toward getting the anti-smog initiatives on the ballot. Apparently Los Angeles coordinators of the drive did not work as hard as they had expected to in getting their quotas of signatures; thus, the whole state-wide effort is getting a 60-day extension in order to obtain more signatures for the November, 1970, ballot.

Five hundred five thousand signatures are required to get the white initiative, the constitutional amendment guaranteeing a pollution-free environment, on the ballot. On the green initiative, the annual five-year program of legislation scaling pollution down to a one percent level, only 350,000 signatures are required.

A rough estimate of signatures gathered on both initiatives throughout the state sets the number around 350,000. In San Bernardino a total of 13,409 signatures were gathered and precertified before the November 20 deadline. Riverside County collected around 9,000 signatures.

Deadline for submitting the supplemental signatures is January 26th. Although our area did meet its expected quota, the state-wide organization is asking our area to gather another 6,000 signatures.

I would like to give special thanks to all those who helped so much in getting the work done, both gathering and precertifying the signatures. At one time we had over 20 people working through the day in the cafeteria precincting signatures, with other people working throughout the day and night for a week in Riverside.

If this work is to be fruitful towards ending smog, we will need even more help, and we have definitely established the feasibility of getting enough signatures. If you are interested in helping in the drive now, please contact Tom Renzi in P.S. 30, ext. 238 or 255. We need your help.

Book Review

"The Andromeda Strain"

By CORINNE SCHNUR

"The Andromeda Strain" by Michael Crichton (Knopf: $5.95, 1969).

The criterion for a good science fiction yarn includes a tightly-woven plot which completely absorbs the reader, and Michael Crichton has done this commendably. A plot which is well-developed, a small desert town, Piedmont, Arizona, population 52, is the landing spot for a space probe returning to Earth after collecting foreign microorganisms. Two men are sent to retrieve the missile and radio contact is ominously cut off between the men and home base. Aerial photographs reveal the grisly fate of Piedmont: population obliterated, bodies sprawled all over the street.

The missile is taken to a Nevada research laboratory, where a team of scientists begins the painstaking and dangerous work of probing into the missile. How they discover the microorganism Andromeda and the steps they take to prevent its spread, make the story an exciting one.

The problem with the novel, and this may be a prevalent problem in science fiction, is that the characters are black-and-white. Crichton sets them up to make "mistakes" throughout their research which frustrate their attempts to solve the mysteries of Andromeda. The "dark horse" of the science team, a surgeon named Dr. Hall, becomes a white knight or super-hero who saves the world again (morally reconstituted — not through his intelligence or creativity, but because of his hyperactive adrenalin glands).

Ultimately, the novel ends where it might well begin. Because Crichton is concerned with proving his hypothesis that man is ultimately doomed through the lack of foresight and thoroughness, the scientists are not allowed to do what is really their job — to control and prevent the spread of the Andromeda strain. We are left with the feeling that Andromeda is still floating around, and the earth as well as the universe is helpless to do anything about it.

Cafeteria
(Continued from Page 1)

Saga Food Service is wholeheartedly backing Mrs. Atterbury's efforts to respond to student requests, reports Fedele Bauccio, district manager, who was on campus last week to study proposals and meet with the college's Cafeteria and Bookstore Committee.

Students responding in the opinion survey requested more hot foods, more filling foods, and different sandwiches. The consensus seemed to favor hotter hamburgers and french fries and better coffee.

In answer to protests about cluttered and unclean tables in the dining areas, the food service is hiring another bus boy for the peak periods.

"We are pleased with the response to the survey, which drew an honest feedback from the students," reported Bauccio.

Students appreciated efforts by Saga Food Service to meet as many serving lines and to all to the commendation of faculty and students," reported Bauccio.

"Get rid of the bees in the educational: "I probably wouldn't go because I am married, but for other places all over the world you can go on TWA. And as an added option at no extra cost, we'll throw in a chance for you to fall in love.

"none of that 9 to 5 jazz, first of all. Good coin, second of all. And third of all, lots of time off to do what you want to do. And as an added option at no extra cost, we'll throw in a chance for you to fall in love. With all the people you'll meet. Or all the fantastic places all over the world you can go on TWA. Depending on the temperament of your boyfriend, of course.

"Call the Placement Center for an interview appointment with Judy Selvius, TWA Hostess Recruiter. Make a decision. We probably won't be here again this year."

Kadyk Returns After Completing Training Program

Walter S. Kadyk, director of the College Police at California State College, San Bernardino, has completed the 10-week intensive training program at the Southern California Peace Officers Academy.

Senate Discusses Yearbook Plans

Last week the Senate discussed the Yearbook, and with certain stipulations allocated the necessary funds from the Retained Revenue Fund. Also discussed was possibility of discipline representation on the interview.

Interviews

Students Rap on Coffeehouse

NANCY SAUNDERS
Several students have expressed a sincere interest in the establishment of a community coffeehouse to be located on Mt. Vernon St. in San Bernardino. A building has been acquired and work is currently underway to prepare it for opening. The basic idea is to provide a place for people to congregate in a relaxed, comfortable atmosphere. Students were asked at random if they thought the coffeehouse is a worthwhile project and if they would be interested in going to such a place.

SUSAN HALSETH, graduate, education: "I probably wouldn't go because I am married, but for others the place would be relaxing and a good chance to meet people. It would be nice for new students, especially, to get to know people. Entertainment would be enjoyable, if possible, like guitar and folk singing. I really think it would be a good idea. If there are enough people interested it could work, but otherwise it might fall flat on its face."

JOHN PEREZ, freshman, sociology: "Yes, I think it is worthwhile and I would be willing to go due to the tranquility offered to all within its open doors. In essence it uses a colloquialism with a beautiful requirement for employment as a college police officer at CSCSB. Kadyk is the fifth man in the department to take the training. The academy, operated by the Riverside County Sheriff's Department and Riverside City College, is open to full-time peace officers from various agencies. In his class of 36 men, Kadyk was the only college police officer. The newest member of the force will enter an academy in January. The academy program certifies its graduates under the regulations of the State Commission on Peace Officers Standards and Training. The 400-hour course requires full-time participation for the 16 weeks.

Kadyk, a graduate of Cal State San Bernardino, has been with the CSCSB police for more than a year and a half, serving as director since last December. He earlier had experience as a reserve deputy with the San Bernardino County Sheriff's Department and as a reserve officer with the San Bernardino Police Department.

Mike Ross, under Old Business, explained and read the new changes on the Publications Board Code.

December 1, 1969, Report: It was reported to the Senate, from the Yearbook committee that because of so many coming quarter break, it would be impossible to obtain enough advanced sales to finance the yearbook. The committee decided to cancel all plans for the Yearbook this year and, hopefully create one for next year. Marlin Brown then discussed the meeting he attended Monday in Sacramento with Governor Reagan. (See separate article.)

The proposed Community University Coffee House was then discussed. Thomas McBride spoke on the subject and requested that the Senate Committee on the Community University examine the item and then by the next Senate meeting vote on a transfer of funds for financing the Coffee House.
Environmental Problems Is Main Study of U of Wisconsin

by MALCOLM G. SCULLY

GREEN BAY, Wis. - The University of Wisconsin at Green Bay is located on a windy bluff above the bay where, as children, many of its students swam. Now the waters of the bay are too polluted for swimming.

The university, however, has defined problems such as water pollution and the ecological crisis in general, as its central concern. It is the only U.S. legislature in 1965, the new campus located on the site above which many of its students swam.

Now the waters of the bay are too polluted for swimming.

The university has incorporated four campuses in 1965, the new campus located on the site above which many of its students swam. Now the waters of the bay are too polluted for swimming.

The university has incorporated four two-year centers — with the main campus located on the site above the bay. Thus far, three buildings have been erected there.

With about 3,000 students and 250 faculty members at all four branches, the university inaugurated an interdisciplinary academic program this fall, organized around the theme, "Man and His Environment."

HAS 4 "THEME" COLLEGES

The university does not have a traditional structure — a college of arts sciences with graduate and professional schools. Instead, it has four "theme" colleges — the college of environmental sciences, the college of community sciences, the college of human biology, and the college of creative communications.

Each college is a composite of the various disciplines that can be applied to its specific set of environmental problems. The area of community sciences, for instance, includes anthropology, economics, geography, political science, psychology, and sociology.

Students do not "major" in one of the traditional disciplines. Instead, they "concentrate" in areas related to environmental problems. In the college of environmental sciences, for instance, concentrations include "environmental control" and "ecosystem analysis."

In the college of community sciences, they include "urban analysis" and "modernization processes."

LIBERAL EDUCATION SEMINAR

In each of his four years, a student is required to take a liberal education seminar, which is also focused on a project or problem related to the environmental crisis. In his sophomore year, the student will focus on the northeastern Wisconsin region and spend some time off campus. In his senior year, he will focus on a different culture.

Many juniors will spend as much as a semester living the life of the people they are studying.

The university's chancellor, Edward W. Weidner, former director of the center for developmental change at the University of Kentucky, said the Green Bay campuses have been organized naturally from the legislatively established mission of the university — to be of service to its region.

"The survival of the region and of the world depends on the solution of environmental problems," he said.

In addition, Mr. Weidner believes that making workable environmental problems the focus of undergraduate, liberal education at the university will improve liberal education. "Too often," he said, "liberal education has not made dramatic the imperative need for using the knowledge that we already have to solve problems of the world."

In cases, he added, since liberal education has not made clear the means of communications was a powerful voice in college and political problems.

Other alternatives were discussed as student representation on the Board of Trustees or on committees, but it was realized that this would be token and the budget committee was the best approach.

At four o'clock we met with Governor Reagan and basically discussed the possibility of establishing a student advisory council. The Governor stated that he would firmly support the institution and continuation of this council. He felt that a direct means of communications was a healthy need and that the council would be the best approach. He encouraged students to familiarize themselves with the budgeting procedures and offer suggestions which he promised would be respected.

His main concern however was one of communications. He spent considerable time discussing the advantages of heading off rumors before they start and offered his office, or himself, if necessary. He distributed budget information in answer to previous questions posed to him at an informal meeting held two weeks ago.

My impression was that the governor was sincere in his effort to open communications with students, however, a lot of questions remained unanswered. Generally, the students were poorly organized and basically ignorant of the issues discussed. Additionally, they were not united among themselves and showed this at the meeting.

He expressed confidence in the students' capacity to solve problems if lessons learned are applied in the educational process. Another meeting with Reagan is scheduled for January 20th, hopefully a more united front can be presented. If there are any students interested in studying the budget information I received and making suggestions please contact me.

Reagan - Students Meet, Discuss Finance Problems

Marvin Brown, ASB vice-president, recently attended a state-wide meeting of California State College and University of California students interested in establishing a student influence on campus decision-making. The students met with Governor Reagan to discuss their ideas.

The following is Brown's report on the meeting with Governor Reagan.

Last Monday I attended a meeting in Sacramento with a group of interested students who desired to have some decision-making capacity concerning the College-University budget. It was felt by the students that with some or at least consultation on budgeting matters we would have a more powerful voice in college and political problems.

Other alternatives were discussed such as student representation on the Board of Trustees or on committees, but it was realized that this would be a token and the budget committee was the best approach. At four o'clock we met with Governor Reagan and basically discussed the possibility of establishing a student advisory council. The Governor stated that he would firmly support the institution and continuation of this council. He felt that a direct means of communications was a healthy need and that the council would be the best approach. THE CALIFORNIA STATE SCHOLARSHIP and Loan Commission reminds high school seniors and college students that the postmark deadline date for the filing of California State Scholarship applications is December 10, 1969.

Six thousand twenty-three new scholarships and loan awards were granted to students who met the eligibility requirements. Approximately 5,000 of the awards were based on academic excellence, 500 were based on need and 500 were based on both academic achievement and need.

**Vietnam Already a Bloodbath**

To the Editor,

Recently President Nixon went on television to justify his position on Vietnam. Out of this appearance came the President’s argument against the immediate withdrawal of U.S. troops. Perhaps the most essential part of the President’s argument was the belief that an immediate withdrawal would precipitate a widespread slaughter on the part of the National Liberation Front. It is rather interesting to note Nixon’s fear of bloodshed when as of now 300,000 American casualties have been recorded since 1964, making this war the third most costly foreign war in our history. Estimates indicate that by April 1970 our casualty total will surpass that of World War I. The American losses mention nothing as compared to the Vietnamese who have lost over 600,000 killed and incalculable numbers wounded as a direct result of our involvement there. May I suggest to President Nixon that this in itself is a slaughter.

Why have reports of an atrocity committed in South Vietnam, not by the Viet Cong but by American troops, An American company, operating at half-strength and battle-worn, allegedly entered a Vietnamese village in Viet Cong territory and systematically executed the inhabitants, women, and children. This action cannot be justified by any means. It serves as an illustration of the situation of warfare, the horrors which war brings and an example of why wars must end since Vietnam makes us like a cancer spreading its tumor throughout America; illustrating America’s ill’s and shortcomings, dividing old and young, and separating emotion from reason. Pershing is true, as the extreme radicals would have us believe, maybe we are a nation no better than Hitler’s Germany; a nation suppressing dissent, fighting an illegal and immoral war, and purporting to defend democracy but in actuality supporting dictatorships in the name of anti-communism. Have we forgotten our quest of freedom in a call for poetic obedience? If so, then God help America.

ALAN COFFEEN

**Announcements**

**A N A S B OFFICE SECRETARY, Diana Knapp, will be in ASB office, in the HAF building every school day from 1:45 p.m.**

**SECOND FLU SHOTS are available to all students, free of charge, starting December 1st and lasting until December 17th in the Student Health Center (A-117) at the following times:**

Monday, Wednesday, Thursday and Friday - 11:30-3:30, Tuesday - 10:00-12:00.

John Thwing Rides Again

A small country 12,000 miles from here bordering China, Laos, Thailand and Cambodia. Its population is 14,000,000 and its economic structure lies primarily in agriculture. Why have four presidents committed some $90 billion dollars of our money and nearly 40,000 of our soldier’s lives defending this country? Why are we interfering in a “civil war” in another country? Why do the Communists continue these wars? Why do they want it? These are all good questions and deserve answers.

First, it is not a civil war within a country but rather an act of Communist aggression to take over South Vietnam as they have done in the North. Our position in this war is clear and cannot be limited. We are not fighting for territory. We are protecting South Vietnam from being taken over by the Communists. We are giving the Vietnamese freedom like you and I enjoy daily.

Second, the Communists want Vietnam as another Communist satellite. From there it will enable them to take Cambodia, Laos, Thailand, and Malaysia. This will give them Southeast Asia.

Third, the Communists are losing the war in Vietnam but they still remain... Why? Their hope lies in the separation of loyalty they have created in America. That’s right — the anti-war speeches in Congress, defeatist editorial in newspapers, and campus protest from students. Groups like the "Students for a Democratic Society" (SDS) who inter-organizational secretary, Bertram Doleh stated, "the underlying purpose of the rallies, marches, vigils, and other anti-Vietnam war protests is to open up another front in the United States to speed up the complete defeat of U.S. forces." Groups like the "New Mobilization Committee to End the War in Vietnam" whose aims are infiltrated by Communists, some of which have been identified by the Washington Post as David Dellinger who said in a May 6, 1969, speech, "I am a Communist, but I am not the Soviet-type Communist." — Arnold Johnson, public relations director and legislative representative of the Communist Party, U.S.A. — Irving Gancz, who has served as a member of the District Council, Southern California Communist Party — Sydney M. Peck, a former state committee member, Wisconsin Communist Party — Donny Rials, of the Chicago branch of the International League for Peace who has been identified in an sworn testimony, May 5, 1969, as a Communist Party member. Yes, it is people like these who are organizing anti-war demonstrations nationwide. It is closing... let me ask you, is this what you want to identify with? Is this what you want for the South Vietnamese? Is this all you think of your country? 40,000 young soldiers have died in Vietnam for freedom. They certainly don’t want war.

John Thwing

**Bloodtextbooks, will be explained to the secondary teachers by representatives of three major publishing companies. Discussion leaders will represent the points of view of the authors who reviewed the chemistry study programs.**

Two technical lectures will occupy the morning for the university and college professors. Dr. Milton Bander from North American Rockwell’s Science Center will discuss the origin of matter. The variability professor from Cal State, Los Angeles, Dr. T. F. Orak, will lecture on Carboranes, cage compounds of carbon and boron.

**Good If Efficient?**

Often,benefactors of American pragmatism, we assume something is good if efficient. The draft has been made efficient. Yet, who, listening to the reading of birthdates last Monday night, did not feel the terror of the great machine; who did not see the burning inconsistencies of a government which plays casino games with young lives in order to support a man-power war-capability outside the United States of more than 1.5 million men while sitting hearily at the feeding table saying thanksgiving, peace on earth?

Who would have suspected that the war would have brutalized us so, cause so much disharmony among us?

The draft must be strongly, consistently and according to every person’s conscience, opposed.

**Chemistry teachers to Meet Here**

Approximately 50 chemistry teachers from high schools, colleges and universities throughout southern California will meet Saturday (Dec. 6) at California State College, San Bernardino.

The conference is a quarterly meeting of the Southern Section of the California Asso. of Chemistry Teachers.

Two simultaneous sessions will be run during the morning, explained Dr. James Crum, CSGB professor of chemistry and coordinator for the meeting.

New approaches to teaching high school chemistry, now being incorporated in the latest
