The relationship between art, ecology and population will be explored by an artist and a biologist at California State College, San Bernardino, in a lecture at 12 noon, Friday, Feb. 27.

The lecture-demonstration, sponsored by the halt of Zero Population Growth, will be held in the Lecture Hall of the Physical Sciences Building and is open to the public.

Participants will be William Haney, assistant professor of art, and Dr. John Palmer, assistant professor of biology. Prof. Haney will use slides to illustrate his discussion on the interaction between art and ecology. Dr. Palmer will use slides to discuss the effects of population growth on the destruction of the environment.

The campus group, comprised of both faculty and students, is affiliated with the national organization Zero Population Growth, which is dedicated to slowing down and ultimately stopping increases in the human population. The members believe that many problems such as war, famine, illiteracy, pollution and others stem from overpopulation. Acting chairman of the CSCSB chapter is Fred Waters, senior from San Bernardino.

Minority recruiting held at Davis

DAVIS—An all-day minority recruitment Open House will be held at the University of California, Davis, School of Law on Feb. 21.

Open to all minority students currently enrolled in California universities and transferred to Davis, the Open House seeks to make minority students aware of the importance of a legal education.

The program, which will start at 9 a.m. in King Hall, will provide students and faculty speakers, panel discussions, and answers to questions about the legal profession.

Dean Edward L. Barret Jr. will open the program with an introduction to the law school and a discussion of admission to the law school. He will be followed by Professor Keffie E. Parker who will discuss the Martin Luther King Program. The session will begin at 8 a.m. and last all day. Visits to the University Law Library and the J.D. program will also be made.

The student-run conference will open at 11 a.m., Feb. 25, with an address by Mr. McCloud. tickets are available through the Drama-Music office at the CSCSB campus. The lecture-demonstration will continue Saturday and the next Thursday through Saturday.

Tickets are available through the Drama-Music office at the CSCSB campus. The lecture-demonstration will continue Saturday and the next Thursday through Saturday.

Two top U.N. officials to visit Valley College

Two senior United Nations officials will be guests of the United Nations Organization of Valley College Thursday and Friday.

They are Max Jakobson, Finnish ambassador to the U.N. and recently president of the U.N. Security Council, and Jan Van Wijk of the Netherlands, director of the U.N. Relief and Works Administration.

The two will be guests at a 6:50 p.m. dinner Feb. 20 in the college's Campus Center. They will also appear on the "Twentieth Century Dialogues" program broadcast by Channel 24, the college's tv station. At 11 a.m. Feb. 20, high school and college students will meet in

Music department presents recitals

The Baroque Performance Class will be presenting two recitals on the regular noon musical series of the Music Department on February 25 and March 4 under the direction of Charles Price. The featured performers for the February 25 concert will be Vanni Daniels, Burton Chevingen, Ellis Pottam, Rachel Juke, George Putnam, and Michael Brown performing Telemann's chamber music for voice and instruments. The main auditorium to hear Jakobson and Wijk present two opinions on the survival of the U.N.

On Feb. 21, the United Nations Organization, in cooperation with the Occidental College chapter of the Model United Nations, will play host to the Southern Regional Meeting of the Model United Nations of the Far West. The session will begin at 8 a.m.

Tom McBride was elected campaign chairman for Brown

Tom McBride was elected campaign chairman for Congressman George Brown. He bid for the democratic nomination in the U.S. election. McBride, a student at Cal-State San Bernardino, will head the campaign for the primary election June 2, in both Riverside and San Bernardino Counties.

Tom indicated that he hopes to have Congressman Brown on the island and to have more students might hear and talk with him.

Many area students attended the Tuesday night organizational meeting, including fourteen from the CSCSB campus.

Modern significance projected by "Spoon River"

The salty honesty of Edgar Lee Masters season his "Spoon River Anthology" premiering tonight, Feb. 17. More than 70 small town folk will be portrayed by eight students in the Players of the Fawn Garden, a two-weekend run at 8:15 p.m. in the Little Theatre.

The author, a Chicago layer-turner-post, described his characters as "the brutal, the strong, the arm of the clown, the booser, the fighter, " "Masters had a keen eye for the eccentric and the cantankerous, the wasteful dreamer and the man on the run."

The use of "ironic kickers" ending their monologue, Masters has his characters reveal "the little that is meant by what we thought it had."

Contemporary significance has been added to the 20th century play by Director Amanda Sue Rudinoff through the addition of illustrations, historical footnotes written by Michael Stephen, a cast member.

The production will continue Saturday and the next Thursday through Saturday, February 26 and March 4.

Indian conference set at Claremont colleges

The American Indian: Modern Day Reality will be the focus of a one-day conference that will bring Indian militants, educators, religious leaders, artists and the U.S. Commissioner of Indian Affairs to The Claremont Colleges Thursday, Feb. 26.

The student-run conference will open at 11 a.m., Feb. 25, with an address by Mr. McCloud. tickets are available through the Drama-Music office at the CSCSB campus. The lecture-demonstration will continue Saturday and the next Thursday through Saturday.

During the afternoon a series of panel discussions have been scheduled. Thomas Banyancya, one of the spiritual leaders of the Navajo tribe, who is known to the Hopi for thousands of years. Associate professor Alfonso Ormea, an Indian, currently at Princeton, will speak on "American Indian Religion: A Challenge on our Understanding."

Frank Takes Gun, president of the Native American Church, an Indian religion that uses peyote as its sacrament, is also slated for the afternoon.

In the evening of Feb. 25 some 75 members of the tribe occupying Alcatraz Island will take part in a panel discussion on the significance of the demonstration.

A conference will offer and examine questions about the civil rights and reservation policies on Feb. 26.

Louis R. Bruce, U.S. commissioner of Indian affairs, will open the third day of the conference with an address on April 17.

The American Indian and Governmental Policies Conference will be held at the University of California, San Diego. The conference has been commissioned since last August.

Student elected campaign chairman for Brown

The student-run conference will open at 11 a.m., Feb. 25, with an address by Mr. McCloud. tickets are available through the Drama-Music office at the CSCSB campus. The lecture-demonstration will continue Saturday and the next Thursday through Saturday.

The American Indian and Governmental Policies Conference will be held at the University of California, San Diego. The conference has been commissioned since last August.
As the solutions, Dr. Bengelsdorf also stressed the fact that the carbon dioxide in the atmosphere is rapidly increasing, which could have either of two effects: (1) it could allow the current content and melt the ice caps, thus putting much of the earth under water, or (2) it could cut off sunlight and we would enter an ice age. He said that we have developed tremendous muscle to alter our entire planet.

On the subject of water pollution, Dr. Bengelsdorf pointed out that the Great Lakes comprise 1/3 of all the fresh water on earth, and Lake Erie receives the sewage from four states and one Canadian province. He estimated that we have speeded up the aging of this lake by 15,000 years. He sees the system of self-purification as a matter of exploitation, and "it does not matter whether the exploitation is by corporations or capitalists." We need to adhere to the idea that there is a limit to pollution, as little as possible. Modern technology has permitted us to alter our environment. "We have come to see little of the long-range consequences. He said that the problems created by technological advances cannot be solved by a new technology. "The solution lies elsewhere." He feels that we have used our technology in the wrong way.

Dr. Bengelsdorf concluded his fascinating lecture with some grim, but nonetheless true, statements. "When we see Spacehip Earth. We keep treating our planet as if we had a spare one."

MARLON BROWN, Graduate Student, Secondary Education: "I felt that he was received better than he deserved. The only reason he came on campus was to cause dissent to use it as a campaign issue. It was known that he took pictures of radical looking students. He came across with a number of inaccurate statements. His twenty-minute rambling on his sufferings in the grape fields would have been more effective if he had narrowed it to specific facts. Mr. Harmer is a definite threat, not only to students (whom he feels are not qualified to make decisions), but also to the progress of society in California. God help us if he is attorney general. He is tied up with the ideology of the John Birch Society. It reflects his narrow-mindedness. To Harmer everything is black and white. He picks the most elementary things for issues and does not even bother to get into the roots of problems."

ROGER SCOTT, Freshman: "He lacked control. That man is a lot tall in high heels. He is a pig. There's nothing you can do about that kind of person at all. He told us about how the farmers live, and he was there for four days. Incongruous. He left with both feet in his mouth. I'd like to thank him for not sending me to school. He's unreal. Some day pigs like him will be gone. There has to be a better day. He's a genetic foul ball. He probably is a genetic fetus from Canada."

Letters To the Editor
Open letter to the community

We, the undersigned, students and faculty at CSCSB are concerned about the world's expanding human population. We are concerned about famine, illiteracy, pollution, crime, racial strife and host of other human problems. However, we believe that these many scourges are secondary to, and stem from, overpopulation. In short, the paramount issue facing mankind if the growth rate of the human population.

We are in the process of organizing a San Bernardino chapter of Zero Population Growth (ZPG), a national organization dedicated to slowing down and ultimately stopping increase of the human population. We welcome, as members, all who share our concern about working with us and to our goal: zero population growth. We will employ every legal and ethical means to achieve this goal.

For information please contact: Dr. Richard Goodman, B-305; Dr. Dalton Harrington B-307; Fred Raisier, 4-5985; Charles Nickle, Jr. TU 3-7836.

LEGAL ANNOUNCEMENT

Student Union Election to be held March 4th and 5th for the purpose of electing Student Union Fee payed by all students and 21st. construction and operation of a Student Union Building.

Where: Flag Pole Area
When: March 4th and 5th
8:00 a.m. to 4:00 p.m.
Eligibility: Under State law, only regularly enrolled students are eligible to vote.

Students Speak Out

"Genetic Error" Comes To Cal State

By NANCY SAUNDERS

Last Tuesday Senator John Harmer gave a campaign pitch in P.S. 10. His hour presentation was sparked with False advertising, balloon-popping, sign-waving, and critical jeering. The majority of the people in the audience exposed the whole thing for what it was — a farce. It is my opinion that it is people like Harmer who are preventing this country from getting itself together.

Several students were asked, at random, the following question: "What is your opinion of John Harmer and his "presentation" last Tuesday?"

MARLON BROWN, Graduate Student, Secondary Education: "I felt that he was received better than he deserved. The only reason he came on campus was to cause dissent to use it as a campaign issue. It was known that he took pictures of radical looking students. He came across with a number of inaccurate statements. His twenty-minute rambling on his sufferings in the grape fields would have been more effective if he had narrowed it to specific facts. Mr. Harmer is a definite threat, not only to students (whom he feels are not qualified to make decisions), but also to the progress of society in California. God help us if he is attorney general. He is tied up with the ideology of the John Birch Society. It reflects his narrow-mindedness. To Harmer everything is black and white. He picks the most elementary things for issues and does not even bother to get into the roots of problems."

ROSNAL JACQUETTE, Freshman, Political Science: "I did not like his presentation because he concluded with the statement that he did not care, and he is supposed to be representing the people. I don't think he has information, either. There were several questions asked which he didn't even know the answers to. He really doesn't want blacks or chicanos to get an education. He is racially prejudiced. I think all of those Republicans have something going. They all seem to be the same."

RICHARD GICKMAN, Freshman, Undecided: "He was extremely political with no real regard for the rights and freedom of human beings. He could not stand up under questioning because he did not know what he was saying. He was using gross generalities, and his concepts of facts were images that he wanted to see. Everything he said he gave as truths, but they were false truths. As long as there are people like John Harmer around, the rights of suppressed and oppressed individuals will not be recognized nor will they be given to those people, because Harmer and his kind represent and work for the upper middle class of our society who do not want to lose or risk what they have in order to give the people the rights and opportunities they deserve as human beings."

NANCY SAUNDERS, part of the liberal faction who is intolerant, puts people up against each other, refuses to listen to opposing viewpoints: "It embarrasses and disgusts me that he was even invited to speak at Cal State. He is the advocate of a police state who had nothing to offer but a bunch of beat-around-the-bush bull. He summed up his entire campaign platform when he told Chuck Gray that he really didn't care."
Air pollution conference to be held at smog free Idylwild

One hundred students concerned with the problem of air pollution will have the opportunity to closely examine possibilities for their personal involvement at a three-day conference held at Idylwild, March 6-8, 1970. Sponsored by the Southern California Environmental Coalition, students will consider careers, education offerings, and opportunities for personal involvement in air pollution control.

The conference will be held on the Idylwild Campus of the University of Southern California, and will bring selected students in direct contact with leading authorities in environmental problems. Participants will be chosen by the basis of their concern for environmental quality and their interest in air pollution control work. A student, citizen, or professional.

The Southern California Environmental Coalition will sponsor the conference in cooperation with the National Air Pollution Control Administration. S.C.E.C. is the regional arm of the state wide Student Environmental Conference which is composed of campus ecological, conservation, anti-pollution, and population control groups, throughout California. Delegates will be chosen from all majors and interests, in order to achieve a broad perspective on the problem, and will be drawn chiefly from upper division and graduate levels. An attempt will be made to achieve a balance of students participating in articulation between both sexes. Applications are available on most major, California campuses or can be requested by calling the USC Air Pollution Control Institute at 629-4483, or by writing to the Southern California Environmental Coalition, 1420 West 6th Street, Los Angeles 90048. Deadline for application is February 16.

Parade of junk dramatizes menace

WASTE (Water, Air, Soil Treatment in our Environment) is the name given to a float created by Delta College. It is sponsoring a parade ECOLOGY PARADE OF JUNK (the first of its kind in the history of either parades, ecology or junk) to be held on Pacific Avenue in Stockton, Saturday, March 28, at 1:30 p.m.

The purpose of this parade is multi-functional: to help dramatize the menace of pollution in its many forms to our dwindling natural resources; to involve students in a clean-up campaign; to give the opportunity for6 participation between both sexes. All majors and interests, in order to achieve a balanced view of the problem, and will be drawn chiefly from upper division and graduate levels. An attempt will be made to have fun putting on a parade.

Anyone is invited to design and construct a float consisting of junk, trash, garbage, litter, and/or any type of agricultural, industrial, domestic, or military waste. Prizes for originality, comedy, educational merit, and aesthetic value will be presented. Each float must tell a story or symbolize some aspect of environmental destruction, pollution, waste, or government. Each float must have a photo, drawing, or description of your float must be submitted for approval by the selection committee of WASTE by March 1, 1970, in order to avoid duplication.

Do not travel this Easter — build a junk float.

Students aid in development of chemistry courses

Many experiments being done today by students in G.S. 125 and G.S. 126 are to a great extent due to the influence of previous experiments used in the course, explained Dr. Ralph Petrucci and Dr. Leo Kaltus.

The two chemists give recognition to the students' assistance in an article published in the Journal of Chemical Education, the leading international journal in this field.

They mention by name four students: William Woertz, Michael Tallman, David Randolph and James Bishop. Unique in G.S. 126 is the inclusion of quantitative analysis techniques, normally not attempted with beginning students, which the professors feel is the best way for students to get to the heart of the basic concepts of chemistry, explained Dr. Petrucci.

This innovation resulted from the professors' concern to determine if the students could utilize in a basic chemistry course certain quantitative techniques, which would heighten their interest and their understanding.

"The students have contributed a great deal by showing the faculty what it is reasonable to expect them to do," added Dr. Petrucci.

Worsen, senior chemistry major, worked two sessions with Dr. Kaltus to develop experiments for G.S. 126 (and to a lesser degree for G.S. 125), and recognized for spending considerable effort on the project. He was Randolph and Tallman, also chemistry majors, and Bishop, whose field is political science.

A package of 20 experiments have been developed for students in G.S. 126 to choose from, said Dr. Kaltus. From the variety presented, an instructor or student may select the one most appropriate to his objectives.

Results of this student-faculty research are described in the Journal article entitled "The Stochiometry of Silver Chromate and Basic Copper Chromate: Investigations for the freshmen laboratory." One of the most significant recent developments in the teaching of beginning chemistry, say the professors, is the incorporation of quantitative experiments into the laboratory.

Equally important to them, however, is the fact that students have been involved in developing these experiments and thus in describing the scope of the course.

PROFESSOR HERBERT LAZEROW

Professor Lazerson talks about problems in choosing a law school and the admission process.

His informal presentation will be followed by a question and answer period.

Professor Lazerson has been appointed Assistant Dean of the Law School at the University of San Diego beginning next September. He is a graduate of the University of Pennsylvania, and the Harvard and George Washington University law school as well as a member of Phi Beta Kappa. He has been admitted to the California, District of Columbia, and Kentucky bars, and taught at the University of Louisville before coming to San Diego.

The practice of law requires a combination of rigorous intellectual analysis and practical experience. Potential students can expect the work load to be heavy and the competition keen. Law schools attempt to alleviate the problem of air pollution, and to construct a float composed only of junk floats. The purpose of the parade is to help dramatize the menace of pollution in its many forms to our dwindling natural resources; to involve students in a clean-up campaign; and to give an opportunity for participation between both sexes. All majors and interests, in order to achieve a balanced view of the problem, and will be drawn chiefly from upper division and graduate levels. An attempt will be made to have fun putting on a parade.

Anyone is invited to design and construct a float consisting of junk, trash, garbage, litter, and/or any type of agricultural, industrial, domestic, or military waste. Prizes for originality, comedy, educational merit, and aesthetic value will be presented. Each float must tell a story or symbolize some aspect of environmental destruction, pollution, waste, or government. Each float must have a photo, drawing, or description of your float must be submitted for approval by the selection committee of WASTE by March 1, 1970, in order to avoid duplication.

Don't travel this Easter — build a junk float.
New vistas for the Players of the Pear Garden come alive as Edgar Lee Masters’ "Spoon River Anthology" premieres tonight at 8:15 p.m. in the Little Theatre.

This venture is unique in that it is the first CSCSB drama production to contain music as an important ingredient. It also marks the debut of Mike Stapleton, a CSCSB student, as the composer of an entire musical score.

Stapleton, who wrote nearly 12 new songs for the show, has spent as many as 14 hours per day composing, tapeing, and rehearsing. He also has spent many hours working with Michael Andrews, music instructor, who arranged Stapleton's piano background music.

Nearly all the music will be performed live, with guitars being strummed at various interludes by Stapleton, Burt Chowning and Jerry Hasbrook.

What kinds of music can the theatre-goer look forward to? Stapleton says, "the theme song is a lively, up-tempo number, and I have included a love ballad and five solo numbers. All have a contemporary flavor."

What was the purpose in writing original music for the production? Stapleton reveals that Masters' original work had no musical score. A later adaptation by Charles Aidman did incorporate music; however, Stapleton feels that his own music brings a more cohesive quality to the play than did Aidman's by reflecting more closely the characters themselves and bringing together related people within the play.

He says, "the words attempt to point out to the audience that the people in the play may well display characteristics that they may have themselves."

"Spoon River" is a large group of character sketches with people that are very real — people that you might know," he continues. "The things that happen on the stage could happen to anybody and could be anybody."

Stapleton would like the audience not to think of the actors as being on stage, but rather to look at the stage as if it were a mirror, not a window.

"There are too many characters with too common a bond not to have meaning for everyone," Stapleton concludes.

The production continues tomorrow night and next Thursday through Saturday, Feb. 26-28. Admission is $1.00 general admission.
Know Your Faculty

Wichman Coordinates Psychology Department

By MICHAEL ZLAKET

Dr. Harvey Wichman is the coordinator of CSCSB's Psychology Department. He has held that position since Fall, '69, one year after he came to CSCSB. Dr. Wichman received all of his education in California. In 1957, he received his B.A. degree from Long Beach State College. In 1959, he earned his M.A. degree from the Claremont Graduate School.

His first teaching experience came in 1959 at Bay City Junior College in Bay City, Wisconsin. He taught Psychology and Physiology there for two years.

For the next four years, Dr. Wichman taught at Delta College, University Center, Michigan. It was at that college that he had a very unique teaching experience. The college was a new, experimental, liberal arts college.

The course was taught differently. The second time around, the course consisted of two lectures and two lab periods each week. Each proctor was assigned four students. Students worked in pairs in their own cubicle which contained an operand chamber and a BRB Foringer programming console. The course was broken into molecular learning units and no student could proceed to a new unit until he demonstrated mastery of the current one.

The main topics of the course included an introduction to the methods of experimenting, rudimentary electronics and programming, general laboratory procedures including animal care and handling, the analyst of behavior and professional writing. Two animal species, rats and pigeons, were utilized in experiments and humans were used in two demonstration experiments.

Students who took the course second time it was offered fared better academically than those up enrolled in the first course; however, these students had to produce high quality work to earn a good grade.

Dr. Wichman also teaches G.S. 160, Contemporary Civilization II. This course utilizes the technique of a "simulated society" as a learning method. This "society" meets on weekends; on Saturday, it meets from 9 A.M. to 9 P.M., and from Noon to 5 P.M. on Sunday. The class is divided into four sections at these meetings; there, class projects are carried out.

Dr. Wichman's area of specialization in Psychology is social psychology.

Dr. Wichman belongs to five professional organizations, has written five papers, and has served as consultant or research assistant at several universities.

A hobby that Dr. Wichman has pursued with skill is navigation. He is a commercial pilot, a single-engine and multiengine and instrument flight instructor with the Federal Aviation Agency Gold Seal Award.

One product of Dr. Wichman's work in designing the department's curriculum is the Psychology 310 course, Introduction to Experimental Psychology. The course was first taught according to the conventional methods; then, programmed instruction was applied mainly to the format of reading material. The second time, the course was taught differently. This time, the programmed instruction was applied to the course as a whole. Four students who had taken the course the previous quarter were designated proctors and served as Dr. Wichman's colleagues in designing and teaching the course.

For the next four years, Dr. Wichman taught at Delta College, University Center, Michigan. It was at that college that he had a very unique teaching experience. The college was a new, experimental, liberal arts college.

The course was taught differently. The second time around, the course consisted of two lectures and two lab periods each week. Each proctor was assigned four students. Students worked in pairs in their own cubicle which contained an operand chamber and a BRB Foringer programming console. The course was broken into molecular learning units and no student could proceed to a new unit until he demonstrated mastery of the current one.

The main topics of the course included an introduction to the methods of experimenting, rudimentary electronics and programming, general laboratory procedures including animal care and handling, the analyst of behavior and professional writing. Two animal species, rats and pigeons, were utilized in experiments and humans were used in two demonstration experiments.

Students who took the course second time it was offered fared better academically than those up enrolled in the first course; however, these students had to produce high quality work to earn a good grade.

Dr. Wichman also teaches G.S. 160, Contemporary Civilization II. This course utilizes the technique of a "simulated society" as a learning method. This "society" meets on weekends; on Saturday, it meets from 9 A.M. to 9 P.M., and from Noon to 5 P.M. on Sunday. The class is divided into four sections at these meetings; there, class projects are carried out.

Dr. Wichman's area of specialization in Psychology is social psychology.

Dr. Wichman belongs to five professional organizations, has written five papers, and has served as consultant or research assistant at several universities.

A hobby that Dr. Wichman has pursued with skill is navigation. He is a commercial pilot, a single-engine and multiengine and instrument flight instructor with the Federal Aviation Agency Gold Seal Award.

Our recruiter's handshake is straight from the shoulder. And so is his talk.

He'll neither promise the world nor expect it in return. He's interested in meeting young people with ability and desire. In return he's prepared to offer careers with challenge and opportunity.

AN EQUAL OPPORTUNITY EMPLOYER

Pawprint
Know Your Faculty
Wichman Coordinates Psychology Department

By MICHAEL ZLAKET

Dr. Harvey Wichman is the coordinator of CSCSB's Psychology Department. He has held that position since Fall, '68, one year after he came to CSCSB.

Dr. Wichman received all of his education in California. In 1957, he received his B.A. degree from Long Beach State College. In 1959, he earned his M.A. degree from the same school. In 1968, he received his Ph.D from the Claremont Graduate School.

His first teaching experience came in 1959 at Bay City Junior College in Bay City, Wisconsin. He taught Psychology and Physiology there for two years.

For the next four years, Dr. Wichman taught at Delta College, University Center, Michigan. It was at that college that he had a very unique teaching experience. The college was a new, experimental, liberal arts college prepared to offer careers with challenge and reward. He was interested in meeting young people with ability and desire. In return, he was prepared to offer careers with challenge and opportunity.

Class meetings were not held in classrooms; rather, they were held outdoors.

Dr. Wichman remained a faculty member at that school, on leave of absence at graduate school in Claremont, from 1965 to 1968.

When he came to CSCSB in 1968, he did so for several reasons: the General Studies program of this college, small-size classes, and an opportunity to be involved in designing a new Psychology program.

Students who took the course the previous quarter were designated proctors and served as Dr. Wichman's colleagues in designing and teaching the course.

The main topics of the course included an introduction to the methods of experimenting, rudimentary electronics and programming, general lab procedures including animal care and handling, the analysis of behavior and professional writing. Two animal species, rats and pigeons, were utilized in experiments. Animals were used in two demonstration experiments.

Students who took the course the second time it was offered fared better academically than those up enrolled in the first course; however, these students had to produce high quality work to earn a good grade.

Dr. Wichman also teaches G.S. 160, Contemporary Civilization II. This course utilizes the technique of a "simulated society" as a learning method. This "society" meets on weekends; on Saturday, it meets from 9 A.M. to 9 P.M., and from Noon to 5 P.M. on Sunday. One product of Dr. Wichman's work in designing the department's curriculum is the Psychology 310 course, Introduction to Experimental Psychology. The course was first taught according to the conventional methods; the programmed instruction was applied mainly to the format of reading material. The second time, the course was taught differently. This time, the programmed instruction was applied to the course as a whole. Your students who had taken the course the previous quarter were designated proctors and served as Dr. Wichman's colleagues in designing and teaching the course.

Summer Study in Europe

Two California State Colleges today announced the establishment of jointly sponsored summer study programs in Ireland, Italy, and Yugoslavia, beginning this summer.

In what is the first joint program for overseas summer programs among California’s nineteen state colleges, Chico and Sacramento State Colleges have established four five-week study programs open to approximately 230 students from California and elsewhere.

The formal five-week sessions will be followed by five-weeks of travel and independent study throughout Europe.

Dr. Clyde Enroth, Professor of English at Sacramento State College, will direct the program at St. Kieran’s College, Kilkenny, Ireland. He will teach modern Irish literature. Courses in history and political science will be offered by professors from the Irish universities. Professor Enroth has recently edited three collections of English and Irish literature and in 1964 was a Fulbright Professor in Cairo University, Egypt.

Other centers have been established in L’Aquila, a university town near Rome, and in Bari, a university city on the Adriatic Sea. Courses in economics, art, literature, and political science. They will be taught by Chico State College faculty members.

Total cost of the program, which yields 6 units of college credit, is $725. That includes round-trip air fare, room and board during the five-week session, and flights to nearby cultural centers.

This new program offers American students an unprecedented opportunity to study abroad at a cost which is within the reach of many students. "The program is designed to take advantage of low-cost transatlantic air fares and European dormitory spaces that would otherwise be unused during the summer. The result is an academically rich program at the lowest possible cost to students," said Dr. Otto Butz, acting president of Sacramento State College in announcing the program.

"The program is open to approximately 230 students from California and elsewhere. The formal five-week session will be followed by five weeks of travel and independent study throughout Europe."

Host for the "Twentieth Century" program will be Dr. Austin Hove of the college’s Political Science Department and faculty adviser to the United Nations Organization. Subject of the discussion will be "The U.N. in the 70’s: Forum or Force?"

Reservations are required for the dinner meeting. Tickets are available at Harris’ or by calling the college. Those not wishing to attend the dinner may take part in the program beginning at 8 p.m.

The college’s United Nations Organization was organized to study the U.N. and similar organizations. Dinner proceeds will help defray costs of sending students of the class to the Model United Nations of the Far West at the University of Oregon April 15-19.

**Book Collection Contest**

The Library has a display of Newbery & Caldecott Award Books in children's literature. The Newbery Award was first given in 1922 for the best children's literature. The Caldecott Award was first given in 1938 for the best in illustrations in children's books. The books will be held during National Library Week in April.

The Zeitz & Ver Brugge Book Company of Los Angeles is sponsoring the $100 and $50 book certificates for first and second prize. The third prize is a $25 book certificate from DJ Books in San Bernardino.

April 10th is the deadline for submitting entries. For further information see Jeanette Bernthal, Head of Public Services.

3:30 — 4:30

**All above not pre-registering at scheduled time.**

Students may complete pre-registration at their scheduled time, or at any time after their class or alphabetic group has pre-registered. The last day to pre-register for the spring quarter is March 10.

**Zero Population Club Organizes At CCSV**

Each family, for example, would receive a tax exemption of approximately $600 for the first child and approximately $400 for the second child. If the parents had any more children, the family would then be taxed; for, by having more than two children, that family would be usurping another family's right to have children. On the other hand, the group strongly supports child adoption. The club strongly supports dissemination of birth control information and material to a local, national and international basis. To do this on a worldwide basis, the club supports larges foreign aid appropriations to any country that wishes to limit its growth rate.

The organization supports the liberalization and eventual abolition of anti-reproduction laws. Dr. Goodman noted, however, that this may soon become a dead issue, as the nation's courts are rapidly striking down such laws. Voluntary sterilization of unwanted births, as well as more research on reproductive human physiology, is supported.

One of the goals of the Zero Population Club is to bring about a total cessation of U.S. population growth by 1980, and to do the same for the world by 1990. The organization will use all technical, analytical and legal means to bring this about.

A second goal of the club, which would apply primarily to the U.S., would be to limit each family to the birth of no more than two children. This type of control could be implemented through the use of an income tax exemption.

Continued on Page 10
STUDENT UNION
NEEDED NOW

What?
The college facilities provided by the State can be used only for instructional and instructionally related purposes. A student center for social, cultural, and recreational uses must be provided by students themselves through a Student Union fee.

In the past the ASB was able to obtain use of college facilities for a lounge, the Pawprint, offices, and so on. However, the growth in enrollment, coupled with delays in the construction of new facilities, has resulted in a critical space problem. After this year it may no longer be possible to assign space in college buildings to the ASB for student use.

What and Where?
After careful study the Student Union Committee has concluded that a 15,000 square foot permanent student center would be financially feasible. If the Union Election scheduled for March 4 and 5 passes, the Student Union could be ready for use in the 1972-73 school year. In arriving at this conclusion the committee was concerned with securing the largest permanent building possible at the earliest date.

No decisions have yet been made about assigning the space in the Union. If the election passes, all students will have a chance to help decide exactly what should be included in the Union and how much space should be assigned to each use. For example purposes, some of the things that could be included are: a lounge with fireplace and comfortable furniture; a multi-purpose room with kitchenette for parties, dances, meetings, rooms for club meetings, study groups, etc.; billiards and ping pong; snack bar; TV and music listening; center for ticket sales, check cashing service, etc.; lockers; alumni activities; space for the Pawprint and AS Offices; typewriter room; child care center for married students; duplication equipment, poster making, etc.

Cost?
Payment of the Union fee would begin with the Fall quarter of 1970. For 1970-71 the fee would be $3.00 per quarter. For 1971-72 the fee would be $5.00 per quarter. In 1972, when the Union opens, the fee would be $6.50 per quarter.

The money collected through the fee will be used for a down payment on the building loan; purchase of furniture and equipment for the Union; operating costs; and loan payments (the Union could be completely paid for by about 1972-73).

The Election?
The first step is holding the election. If you vote “Yes” on the ballot you will be authorizing construction of a student union, and you will be authorizing a mandatory student union fee (which cannot exceed a total of $20 per school year) to pay for it. If you vote “No” you will have decided that a student center is not needed at CSCSB badly enough for students to pay up to $6.50 per quarter to get it. Under State law the election passes if two-thirds of the votes cast are “Yes.”

Think about it and vote on March 4 or March 5 (8:00 a.m. to 4:00 p.m., flagpole area).
SCUBA class
explores Laguna

Becoming a skilled skin and SCUBA (self contained underwater breathing apparatus) diver takes time to acquaint oneself with equipment, and conditions outside of the pool. Members of the class offered at CSCSB went for an ocean skin dive trip last Sunday at Laguna. Those who took advantage of the chance at an ocean experience with George Wincey, NAUI instructor and family were Bill Platt, Shirley Brown, Greg Colford, Pat McCombs, Joe Crump, Tim Flilton, and Dee Conley. They experienced such things as visibility was exceptionally good. Visibility was acceptionally good. They found such marine life as sea urchins, barnacles, worm tubes, kelp, starfish, and a small sting ray. Students wore wetsuits and spent about an hour in the water. They experienced such things as being in the salt water with or without a weight belt, filling their mask with water and clearing it, and diving to the depths to view the marine life.

The realm of liquid space opens new horizons for those who spend the time studying before ever entering the ocean. This training builds a strong foundation for a diver. One member of the class commented, “It’s sure a lot better to spend the time studying before ever entering the ocean. This training builds a strong foundation for a diver.”

If you wish to join, you may sign up either nationally or locally. Regardless of which way you join, the dues are the same — $4. If you join the national organization, all of the dues go to it. If you join the local Inland Empire Chapter, half of the dues are kept by it, the rest by the national organization.

For information please contact: Richard Goodman, B-305, Dalton Harrington, B-207, Fred Waters, TU 4-5890.

Basketball Results Slated

Intercollegiate Basketball Results, as of Wed., Feb. 18, 1st place - "Fletcher's Follies" won 4 lost 0 2nd place tie - "Rake's Harrier" "Crowley's Smith brothers" won 5 lost 1 6th place - "Fitzpatrick's Wild Ones" won 2 lost 2 5th place - "Sandman's St. Marys" won 1 lost 2 6th place tie - "Mathew Rebounders" and "Los Mucho's" won 0 lost 4.

Round Robin tournament. After R.R. is over during the first 3 weeks of the spring quarter, they'll have final playoff.

Think Sears...

...for our executive development program

Whether you’re in liberal arts or accounting, in retailing, engineering or business administration—no matter what your field of study—you may be just right for Sears. Sears is a great many people, with a great variety of backgrounds, doing a great variety of jobs, in the dynamic merchandising field. You are not limited to remaining in the line of work you have prepared for in school—unless, of course, you want to—because at Sears the emphasis is placed on developing many talents—talents you perhaps never suspected you had.

Merchandising - Credit Management - Controllers
