CSCSB Campus crowded as enrollment increases

By Debbie Cooper

San Bernardino referred to as the nation's fastest-growing city, has several offices and faculty members trying to make the best of the situation. Furthermore, three additional offices have been opened during the past two weeks. As a result, all of them are being well utilized.

Temporarily, a member of the police force will direct traffic at the intersection until the action is taken. During this period, a siren signal is supposed to be heard. However, the regulation is still under study. Action to now be taken is to get the red and yellow flashing lights reversed for the intersection.

Another potential danger to students and faculty is the intersection of North Park Drive and Sycamore Avenue. The college neighborhood appears to have been placed on the area of increased police.

The completion of construction on the new library this summer will alleviate the problem of insufficient classroom space for the fall term. During the past quarter, conference rooms, storage rooms and cafeteria space are being used for additional classroom and faculty office space.

The current cafeteria and bookstore facilities are inadequate for the size of the campus and will even be worse next year," stated Dean Monroe. The building of a new cafeteria has been funded, with the completion set for September of 1972.

Plans are now being made to use several satellite vending machine operations throughout the campus to accommodate students. At least two new areas will be constructed identical to the existing area in the Biological Sciences building.

An arrangement is also being worked out with the local bus company to provide new routes more suitable for the students on campus. Presently, many students travel for long periods of time before the bus reaches campus.

Many offices are presently overcrowded with work because of the shortage of funds and the increased enrollment. According to Dean Monroe, there is a relief in sight for the Health Department. The present facilities must provide space for the all of the health record programs and the student health corridors. It will be after 1975 before any additional space can be added.

The Placement and Financial Aid Department is currently in the process of finding part-time employment and giving place on campus to many of the job market in the community. Many students are still seeking employment.

State-wide changes in student discipline are mandated by the new document. The principal change will be the appointment of impartial attorneys as hearing officers to replace faculty and student board members. Under the new procedures, a member of the Student Services Staff will be designated as coordinator for faculty discipline. He will be responsible for investigation of student matters involving the coordinator; and will attempt to resolve these problems informally without involving formal disciplinary action, said Dr. Kenton L. Monroe, dean of students.

Dr. Theron Paine, housing director, is the acting coordinator for this campus, the dean announced. Based on the results of his investigations, the coordinator will submit a report to President John M. Pfau which will include recommendations on the need for informal hearing and recommend possible disciplinary action.

The involved student can elect to have the disciplinary hearing operation of the campus by the coordinator, waiving a hearing, or he can request a hearing on his case.

The three alternatives for hearing procedures are:

I. Informal office hearing by an administrator of the college, appointed by the president. Generally these would be cases of minor offenses.

II. Formal hearing by a hearing officer, who will act as an under the conditions of the college. In general, these would involve more serious cases.

III. Hearing by a residence hall committee in the case of charges of conduct violations in residence facilities, said the coordinator.

The hearing will be held at the residence hall of the student charged. For an informal procedure, the coordinator will select a number of witnesses, parcel the student's record from this hearing and if he is not satisfied with the results, he will act as if he was not.

The California Administrative Code specifies the possible disciplinary penalties for cases of academic, expressive, disciplinary and provisional sanctions.

Students charged and expelled in the basis of elapsed time and a series of proceedings will now be held within seven days after the student is notified of his charge. The procedures will be completed.

Hearings will be held outside the college to protect lives or property or to insure the maintenance of order. A hearing must be initiated within the 14 day period to resolve the allegations and charges.

So Sayeth Dumke Commission Report Failed

Chancellor Glenn S. Dumke of the California State Colleges issued the following statement on the report of the President's Commission on Campus Unrest:

"As I stated several weeks ago, the selection of a commission, a process in California in the President's Commission on Campus Unrest led me to believe that the President and public were reviewing the process of student conduct and the status of colleges and universities in today's society. Now that the Commission's report has been completed, I must substantially conclude that this process was not correct. The Commission, in its major recommendations, clearly failed to reach those colleges and universities have indeceptively with student unrest by firm, reasonable, and responsible policies. It is disastrous attempt to squelch black-stones, substantial matters in the way these problems were met. At

Classification also made in the matter of financial aid to prevent the likelihood of student offenses. The hearing officer will also submit to the president a recommendation on the student's eligibility to receive financial aid, as set forth in federal and state laws. In the event of an executive order setting forth the procedures, Chancellor Dumke said methods of the past have proven successful and at times weary in the system.

The new procedures, the first ever put into effect, are designed to "ensure fairness, promptness and finally to provide a major change involve students," he continued. "It is proper for students charged with offenses to receive a just and prompt dispossession of their rights. The new procedures, he believes, are proper for colleges to make this disposition of students when the large number of personnel is involved. In processes that, in certain cases, have been prolonged, overlapping and uncertain in a form of final action.

Dean Monroe noted the CSDCB campus has a history of solving its own problems through informal procedures. He expressed the belief that the coordinators and the college will continue to resolve such matters informally without having to invoke the more formal procedures.

"Of course, should any serious student offenses occur, it clearly would be necessary to utilize the formal procedures," the dean said.

Copies of the 22-page executive order, which results from the July 14 Board of Trustees resolution, are available in the Dean of Student Office for any one interested.
Students who entered Cal-State during the 1967-68 or '68-69 year and who are qualified. We are now approaching a point in our history. We have had for a good many years the ability to say that we are able, as a proper service to graduates or alumni as they move into their careers. The net effect is to create and receive about 1200 pegs early last week.

**Student Union needed?**

Bill Plant, Junior - "Yes. For one thing, to house all the AdH offices. . . to study just a place to go. We build dorms we'll need it. I'm willing to pay for it even though it won't be built long after I've gone.

Don Youngman, Senior - I like the idea, but I'd like to know more facts about it. Like when or if it will be permanent. Last year there were so many competing facts that I didn't know what to think.

Don Adams - "I'm basically in favor of a Student Union. I like the idea. I want to reserve my final opinion until all the facts are in."
State colleges add 20,000, enrollment climbs

An estimated 244,000 students—nearly 20 percent—will be enrolled in the California State Colleges, according to Chancellor Glenn S. Dumke. The 19 colleges comprise the largest system of higher education in the Western World. And their facilities and enrollment will have grown substantially in the past 20 years. In 1959-70, the last January 2.

In addition to the 244,000 regular students, about 70,000 are enrolled in branch campuses and in state colleges in non-state funded (extension) programs. The enrollment in universities offering doctor programs will exceed 1,320 fellowships with the distribution of graduate fellowships.

State scholarships for this test may be made available to students at California State College, San Bernardino for the 1970-71 school year. Nearly 15% of the student body of 2300 is receiving aid from one or more of the programs administered by the college's financial aid office, said Doyle Stansel, director of financial aid.

In-state students will be able to apply for one of the 5 of the California Administrative Code (non-state funded) extension programs, and in-state students comparable to their counterparts in American universities.

The GM factories are closed in about six weeks. The economic reality of the situation in General Motors may be determined by the continuance or deadlock in the labor dispute. The union pays strikers a maximum weekly benefit of $40.

The union has more than 1,320 fellowships with the distribution of graduate fellowships. The union has been able to maintain a 2.76 average in universities offering doctor programs. The enrollment in universities offering doctor programs will exceed 1,320 fellowships with the distribution of graduate fellowships.
