Letters

Alaska

Editor:

The youth of this country has an important decision to make. Will they or will they not allow oil into the Arctic of Alaska and the construction of the trans-Alaska pipeline? What they decide will determine whether we continue this downward spiral or our society and its environment or whether we finally turn the country around toward a better tomorrow.

We should not be debating this issue of oil in Alaska. Instead we should be demanding a full scale investigation into why the oil industry has become so powerful. The petroleum industry is undermining national security and threatening our very survival by squandering away resources in its lust for profits.

In less than ten years we put a man on the moon. But in nearly 80 years since the automobile has been on the streets of this country, we still get less than 15 miles to a gallon of gasoline. This is progress? Where are our priorities?

Our mass transit system is on the brink of collapse, yet the oil industry vigorously promotes the highway trust fund. Eighty per cent of all our miles of highways are paved with asphalt. What kind of social responsibility does the petroleum industry practice when it lets our cities strangle themselves just so oil can satisfy its own selfish aims?

But will the young generation follow the same path of apathy that the older generation did? If it does it will be sowing the seed for alienation and a generation

gap far greater than exists today. It too can expect to feel the sting of "hypocrisy" and "hypocrite" flung at it by the next generation and with more profound vengeance.

More efficient forms of energy are being suppres-

sed. Why? Will those concerned about the future of this country win out over greed, or will greed write the final chapters to this planet's history?

What's going on?

A directive from the Chancellor's Office has revised library fees in all State College libraries. Changes will go into effect October 1st. The new schedules are posted at the Circulation Desk, and on display boards of the campus library. Revisions include the following:

Overdues on two-week loans will be increased to 15 cents per day.

Reserve books, and other short period loans, are set at 25 cents per hour or day, whichever applies.

A service charge, subject to annual adjustment from the Chancellor's Office, will be added to fees for lost and damaged books.

For all who return library items undamaged and on time, there will be no problems. For others, inflation will be a fact of life!

Found and lost

By Bob Corderman
Staff Writer

Last year at CSCSB, several unusual things took place. Among other there were: vending machines, that doubled as slot machines; dances, where almost as many people

played in the band -- as danced; and students, who would turn items into the lost and found, but wouldn't pick them up.

The first two problems seem to be improving this year, but College Police are still trying to do away with their large collection of unclaimed merchandise (such as books, clothing, and jewelry).

Located in the heat and air conditioning building, the College Police Office safeguards lost and found articles for a minimum of six months (meaning anything, that was turned in during the spring and summer terms, is still being stored there).

To contact the office, after losing or finding an item, place a call to extension 505.

COLLEGE STUDENTS:
Fight pollution as you work your way through college. Sell Shaklee biodegradable non-polluting products to home and industry. Unlimited sales potential. Call 887-2555 or 883-6917 after Five.

Your Nichols' words

I would like to introduce to you an organization to which you, as students, all belong. I am of course referring to the ASB or the ASSOCIATED STUDENT BODY.

The ASB is a non-profit service organization comprised of students and administered by the officers that you as students elect. The goal of ASB is to provide a wide range of ac-

Your \$6.50 at work

tivities for students in order to relieve some of the academic strain which students accumulate over the term. For those who feel that the strain is not great enough we will offer programs to supplement work.

One of my major concerns stems from the fact that students are not independently wealthy and many times the cost of books, baby sitters, transportation, and the general cost of going to school, will bog the student down to a point of frustra-

tion. That is putting it mildly. Hopefully you will take part in the book exchange each quarter. We are researching the idea of day care on campus and now are trying to set up a baby-sitting pool. This may sound stupid to some, but students can help other students in a co-operative effort to fight college inflation.

Many other activities and services may be offered through the ASB; Sports, Films, Speakers, Dances, Concerts, and all the other items discussed in this article if we get the people to help. If you have any

in the community for various non-profit, service and business organizations. Of the student's wages, the enterprize pays 50% and the college pays 50%. WE have the capabilities of involving up to 25 students in this program, possibly more.

SO WHAT IS S.P.I.C.E.???

S.P.I.C.E. is Student Participation In Community Enterprizes.

This program could be a liason between the college and the community. It is possible that the program could evolve into one that for participation a student could receive academic credit. The college atmosphere is artificial. S.P.I.C.E. could supply the real practical experience that most people do not get at college.

If you are interested in S.P.I.C.E. please attend the organizational meeting at 11:00 a.m. Friday, October 8, in SS-114 or see me as soon as possible.

Breck Nichols
A.S. President

B.M.C.

Down to business

As another school year begins at Cal State the Business Management Club is also beginning a new year. Starting off with a bang, they managed to recruit over 70 members into this most promising group.

The directors of the club have already been discussing some great plans that they would like the members of the club to participate in and benefit from. Some of these activities include guest speakers, field trips, possibilities for job prospects, opportunity to meet faculty and students, and parties.

The new officers which will be working very hard to help the B.M.C. have a good year include: George Roman, pres-

ident; Jerry Klein, vice-president; Bob Newberg, treasurer; Barbara Huss, secretary and Bill Sipola, activities chairman. The club's sponsor will be Dr. Smith.

So, if you are interested in business and would like to see what our club can do for you, come to the first meeting and check us out.

WHAT IS S.P.I.C.E.???

Every year the campus receives federal money to support a work-study program. This money can only be spent to hire students to work on campus. Of the student's wages, 20% is paid by the college, and 80% by the federal government work-study grant.

This year money is available to hire students to work

I need help!!! Envelope stuffers - part-time. \$25 guaranteed for every 100 envelopes you stuff. All postage pre-paid. Send stamped, self-addressed envelope, plus \$1.00 for registration and handling to: Allen King Corp., P.O. Box 6525, Pittsburgh, PA 15212.

Freshmen Orientation - If you want it, here it is - come and get it!

Pink is Beautimous

By **DON LANNON**
Staff Writer

The phone rings.
"Dean of Students Office,"
answers 'Corky' Moffet, the
dean's secretary.
". . . Hercules? Yes.
We still have him, but I
think he's now living under
the bed. He sleeps there,

you know . . . How do we
know he's a boy? Well,
because girl turtles have a
pink shell; boys have a blue.
His was blue."

Dean of Students Kenton
L. Monroe enters, mumbles
something, then leaves.

"I'll have to go. The work
here really mounts up fast.
Call you back later."

So goes the day - like any
other for Mrs. Moffet.

But 'Corky' Moffet is more
than a secretary.

Reads a wall plaque hung
behind her office desk: "In
appreciation of her help and
guidance/ASB, Cal-State,
San Bernardino/1966."

Indeed, to many students
she's not only a friend but

a second mother. "Some-
times I call myself Mama
Moffet," she said.

"When I go to graduation,
I'm almost like a mama
seeing them graduate," she
added.

And 'Corky' has attended
numerous graduations since
her campus debut early in
1964, watching the college
grow from 300 to 2500 stu-
denst.

I've seen change at every
level," she said of the
college, citing "more ad-
ministrators with many dif-
ferent views" as the prin-
cipal cause.

"But even now, we have
constant 'firsts.' I mean
problems with no established
policies for their solution."

She smiled. "Like now-
adays, I can't tell the stu-
dents from the faculty some
times."

Over the past seven years,
'Corky' has pondered the
combined problems of sev-
eral hundred students, AS
officials, **Pawprint** editors,
and faculty members. I've
learned a lot about people
and life as it is today, es-
pecially with the young gen-
eration. And I learn more
every day."

"I like people," she added,
"all people."

Her goal: to provide a
warm, informal, and com-
passionate office atmos-
phere in which any student
can freely discuss his prob-
lems.

"Dean Monroe and I a-
gree. If a student comes
to us with a problem and
needs our help when we've
got a lot to do, then we'll
just take that work home . . .
We're here to help," she
said.

"Retirement? I plan to
work another 10 years."

Not surprisingly, she'll
retire at a time when the
college no longer has room
for such a personalized ap-
proach - a time when she
can no longer "grow as a
person."

| Friday | 8AM -- 5PM |
| Saturday | 10AM-- 2 PM |
| Sunday | 1 PM-- 5 PM |

PLACEMENT OFFICE - UPCOMING RECRUITING DATES

October 19 - San Bernardino County
October 25 - May Company
October 26 - Northwestern Life Ins. Co.

'It looks like a great year!' - Dr. John M. Pfau, president

CCSB fall term:

Enrollment up - Pfau

By Pancho
Assitant Editor

"With enrollment not yet completed, we have more than 2,660 students on board," Dr. John M. Pfau, CCSB president, said early this week.

"This represents an increase of more than 400 students over last Fall's student body," he continued.

In addition to the largest student body ever enrolled at CCSB, the college also has 17 new faculty members, Pfau said. The faculty now stands at 120.

Dr. Pfau said he could see no problems ahead for the school year. "Last year," he said, "I had a feeling that both students and faculty had a 'let down' feeling from the year before. Every college president I talked with during the year had that same feeling. None of us could determine the cause of this feeling, but one theory seemed to stand out. That theory held that many students began to feel some of the confrontation tactics during the previous year had proved counterproductive. Many felt they needed other ways to achieve their goals. They had no sense of progress."

The compact, crew-cut prexy cited trends that started on campus last year pointing up both student and faculty interest in improving problem areas.

"First," he said, "we had wide participation in a recycling of waste products. Then, here at CCSB, we started the carpool movement which has proved so successful that it has been adopted by many schools in Southern California as well as government agencies and corporations.

"This year there is the SPICE program, Student Participation in Community Enterprises. This program, whereby students on campus will work with civil agencies on specific programs such as Operation Second Chance and others, offers a splendid opportunity for students to participate in community affairs.

"These efforts will deal with concrete problems and it is our hope that this kind of approach may spread this year and give both students and faculty a feeling of accomplishment."

One who gives credit where credit is due, Prexy Pfau pointed out that the SPICE program "... originated with Brecht Nichols. Brecht worked with Skip Rush and Dean Fred Roach to finalize the plans for SPICE."

With student and faculty participation in community programs CCSB stands to not only contribute to its surroundings communities, but to involve itself in worthwhile goals.

Dr. Pfau grinned. "It looks like a great year," he said. FRESHMAN

General Studies:

A SICKNESS

BY Keith J. Glaser

General Studies, what is it? That's the question most freshmen ask. The only real answer is that it is a group of courses set out by somebody to confuse the hell out of the students at CCSB. That somebody is whoever decides what courses we need to graduate.

In answer to my own question, the answer you would receive from your advisor is the list of courses we have to take. They are approximately 18 courses that you have to take. You get to choose these out of a big 25. Now isn't that something to think about? Of course you can challenge a few and take placement tests to skip the first or second language course, but this can only bring them down to between 10 and 15 required courses.

For most students, challenging a course is not easy so he suffers through two years of G.S. crap. That's what makes me sick. Out of all of these courses about one year's worth are really necessary. Some people may wonder how I, just a student, arrived at that mysterious figure. It's really quite easy, just go and look at the catalogs for other State Colleges. If you do, you'll find out that all their G.S. requirements can be met in approximately one year's worth of courses. You would also find that there is a wider range of courses to choose from to meet these requirements.

The basic question I now ask is, why are we different from other State Colleges? I have been told that that was the way the school was made, to give a general liberal arts education, but, to be patient, things will change. I now ask, are these courses going to give me a general education? I think not. Most students

would be better off with the one year of requirements and then being able to choose more electives. This is the feeling I get from all of the students I have talked to.

The next question is; that now that I have shot off my big mouth again, what can we do about it? To tell the truth not one hell of a lot. About the only things that can be done are, to get on the senates of this school, both student and faculty, to lodge an official protest and request action be taken, and to voice as much discontent as you can to the President of the school and the board of trustees, using such methods as letters to them and to newspapers.

The methods I suggest may or may not work but you must try unless you like taking a lot of useless courses. To do my share of the work, I will write course reviews again this year as I did last year.

Bad news for freshmen

The Selective Service System has clarified expected policy changes on under graduate student deferments. College students who were enrolled full-time in the 1970-71 academic year will be eligible for student deferments in the 1971-72 school year if they continue to make satisfactory progress in their programs of study, Selective Service officials said. How-

ever, young men who entered school for the first time this summer and those who enroll as freshmen this fall will not qualify for student deferments.

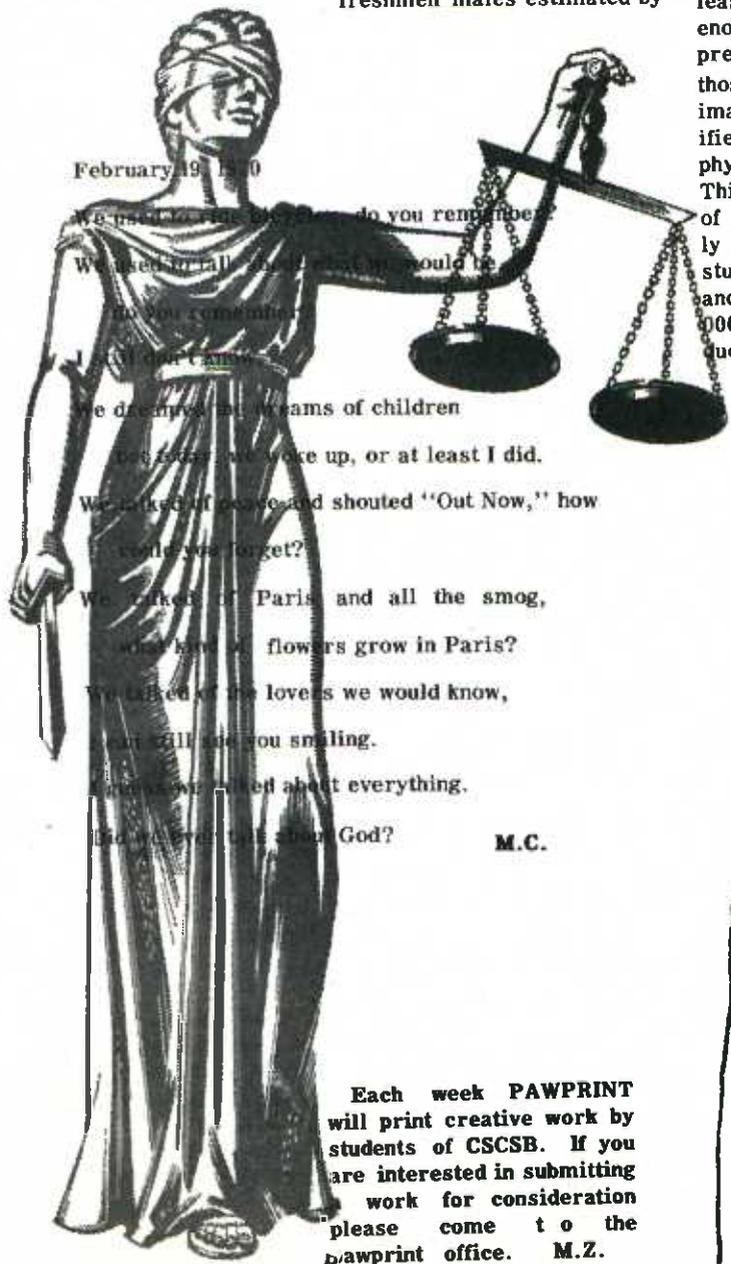

Dr. Curtis W. Tarr, Selective Service Director, said: "Few incoming freshmen students are likely to be inducted in the near future because of the student deferment phase-out. Of the 1,034,000 incoming freshmen males estimated by

the Office of Education, approximately 80% are 18 years old and only 20% are 19 years of age or older. The 18 year olds will receive their lottery numbers in 1972, and they will not be subject to induction until 1973, when draft calls should be low. The 19 year old freshmen received their lottery numbers August 5 of this year and will be subject to induction next year; at least 1/2 should have high enough lottery numbers to preclude their induction. Of those remaining, approximately 50% will be disqualified on mental, moral or physical grounds. This means that a maximum of 50,000 men will be directly affected in 1972 by the student deferment phaseout and one-half of these, or 25,000, will probably not be inducted because of enlistments

in Regular, Reserve or National Guard units, participating in commissioning programs or because of procedural delays.

Dr. Tarr said that college students will not be drafted in the middle of a semester or term. "If called while enrolled, they will be allowed to postpone their induction until the end of the semester, or term. If in their last academic year, they will be able to postpone their induction until after graduation."

Currently, there are approximately six million young men under age 35 with deferments. Approximately 500,000 of these normally lose their deferments during a 12-month period. The largest groups of deferred men are those who have received fatherhood, occupational or student deferments. **PAWPRINT**

February 19 1970

do you remember
 We asked if you should be
 We dreamed of streams of children
 We asked if we woke up, or at least I did.
 We asked if we should shout "Out Now," how
 We asked if we forget?
 We asked if Paris and all the smog,
 We asked if flowers grow in Paris?
 We asked if the loves we would know,
 We asked if you smiling.
 We asked if we should be about everything.
 We asked if we should talk about God?

M.C.

Each week PAWPRINT will print creative work by students of CSCSB. If you are interested in submitting work for consideration please come to the pawprint office. M.Z.

Geritall

Pollution Solution ?

By Jo-Carol Ropp

It was 10:00 A.M. at CSCSB and all the Ecology 300 students were assembling for their first class of the quarter. Linda Wiggleworthy parked her bicycle next to Bill Hogman's old 1950 Cad-

illac and walked into class. She was truly shocked to find Bill in her Ecology class. She hadn't thought that he even knew what the whole ecology movement was all about. He certainly had not been seen at any of the ecology club's activities; the recycling center, the carpool conference, and he kept on driving that broken-down old polluting pig of a car. Her amazement at his presence was mixed with a certain virtuous air as she sat down beside him.

Dr. Saveall came into class then and announced the first day's project. He asked all the students to sit down and list their personal energy consumption for the past year on the basis of miles traveled using pollutant fuels. He listed some statistics of energy consumption in travel on the

board for reference. They ranged from the airplane which averaged 20 passenger miles per gallon (computed from average number of passengers carried) to the car at 30, down to the bicycle whose energy consumption was 0 in terms of pollutant fuels. Dr. Saveall announced that the winner would be the person with the lowest number of gallons of fuel used in the last year.

Linda felt fairly smug as she sat down to write her report. After all, she had

been riding her bicycle everywhere since she became "aware" of the pollution crisis. First she wrote down a big 0 for daily travel. Then she remembered that she had flown to Europe last summer, that was 12,000 miles from Los Angeles to Rome, or 600 gallons. Then there was that flight home for Christmas, 1,000 miles, another 50 gallons, dates in cars, trips into Los Angeles, those added up to another 50 gallons over a year's time. Her total was 700 gallons!

Everyone then turned in their totals. Dr. Saveall's was one of the highest since he had made several flights to professional conferences on the Eastcoast. To Linda's complete shock, Bill Hogman's total was the lowest! Only 260 gallons consumed for the entire year!

Dr. Saveall called on Bill to explain his total to the class. He stood rather sheepishly in front of the class and said that between work and school he drove about 25 miles per day or 150 miles in an average week. He added that he hadn't been able to afford any long trips because he was forced to spend so much money repairing his clunky old "caddy."

A class discussion followed, during which the question was raised as to whether we would have to sacrifice enriching experiences such as Linda's experiences such as Linda's trip to Europe, or even sever

home ties with far-flung families in order to cut down on personal energy consumption and pollution.

Several different solutions

were proposed by the students, from eliminating airline travel entirely (a somewhat difficult thing to do in a jet age), to inventing a new non-polluting form of air transport, (a future possibility). Dr. Saveall summed up the discussion by acknowledging these proposed solutions as possible but probably not practical in the near future. He suggested that students work toward specific goals such as blocking future attempts to revive SST travel, or sponsoring legislation requiring planes to fly at near-capacity seating. He said that our airlines presently flew at from 1/4 to 2/3 seating capacity due to airline competition on the basis of numbers of flights per day.

As class was dismissed a thoroughly chastened Linda Wiggleworthy and a thoughtful Bill Hogman strolled off campus.
