Dear Friend,

According to the California Bureau of Criminal Statistics, 12,000 adults were arrested for felony marijuana charges in 1972. This compares to 42,745 adult felony arrests in 1971, an increase of over twenty percent. Approximately one of five arrests in 1972 was for marijuana. The cost of enforcing the marijuana laws stagger the mind.

The social cost is phenomenal when one thinks of the lives of those fifty-two thousand people. At best, the charges are dropped but only after expensive bail and lawyer fees are paid. Many of those arrested eventually go to trial and are sentenced to probation, county jail, or state prison. The cost of shattered lives cannot even be computed. Human suffering goes beyond dollars and our current laws go beyond human sense.

In 1972 one-third of the voters in California rejected the insane situation that exists regarding the marijuana laws. Unfortunately one-third of the voters was not enough and Proposition 19 went down in defeat. In 1974 there will be another marijuana initiative. Petition circulation for the new initiative is scheduled to begin on October First.

The necessary papers are presently being processed by the Attorney General’s office. The initiative is entitled The Decriminalization of Marijuana Act of 1974.

The Association to Decriminalize Marijuana is a group including students, attorneys, housewives, street people, and workers dedicated to passing the initiative in 1974. We need your help in terms of money and volunteer work. Money is needed for mailings, office rent, publicity, printing, and the hundred odd expenses that occur in a political campaign. Your time is valuable in doing grass roots work gathering signatures, registering voters and simply talking to people about the issue.

We have two mailboxes at this point, one in the A.S.B. Troubleshooter (behind the Student Services building) and one near Dean Monroe’s office in the Student Services building, next to financial aids. If you have any comments, criticisms, questions, please write! And if you’re too tired to walk all the way over, give your letter to some friendly secretary and ask politely if she or he will drop it in inter-campus mail.

Oh yes, we have a phone, too, and someone is usually in the office in the afternoons. Our extension is 233.

So write ALREADY! Your Editor, Joanie W.

For more information please get in contact with either Larry or Don, P.O. Box 5812, San Bernardino, CA 92412.

We shall not lay claims on being a totally unbiased objective paper, as advertisements, announcements, etc., and is strongly urged to do so! We’re really interested in running weekly interviews with various people on campus (like the one on Karen Newby, for example), covering beats such as administration news (you can uncover some real dillies on this one), faculty and class developments, reporting on new programs, the drama and music departments, clubs, what’s happening in biology, etc., etc., etc.

But I’m telling you, we need reporters!!

You who are interested in seeing what we’re all about, come to our meetings! We gather on Tuesdays around 2:00 p.m. in the newspaper office (in the Student Services building) back in Admissions and Registrars for the time being.)

"I Just Want You To Know I'm Behind You, Spiro... One Thousand Per Cent."

October 16, 1973

Dear Joanie,

On machismo, Chavez said that “it could be best expressed by men helping to raise a stable family rather than through men expressing physical courage... Machismo is caring for another one and... it is boosted by the Chicana women’s submissiveness.”

I’m completely lost! My white middle-class background rises to the fore and sees the very word “machismo” in a negative light. My eyes light up with fury when I read that any positive male quality can be boosted by a woman’s submissiveness. And yet that seems to be what Chavez is saying (last issue of the Pawprint, Community Supports Chavez). Surely Chavez does not mean that the negative aspects of machismo are the result of female submissiveness. Surely he would not lay another trip on our heads about how we are responsible for sexual inequality and the male’s need to dominate not only women and children but even each other. And if he means the positive aspects of machismo (which would vary very much like defined—does it mean, for instance, equality for Chicano men in the white male dominated system), surely even there a woman’s submissiveness could only be a burden in the fight against oppression and capitalist exploitation of us all. At this point, with our present state of knowledge about the male member of the species (be he any color of the rainbow), it seems ridiculous to me to relate any of his behavior (either positive or negative) to women’s and men’s submissiveness. We have so little

(Continued on P. 3 Col. 1)
The High Cost of Breathing

By Tony Weathers

Air pollution's true costs are probably as much as the San Bernardino Mountains are in the summer. You can imagine the deleterious affects of breathing the same air that is killing 75 percent of the ponderosa pines in the San Bernardino National Forest.

Air pollution debilitates our bodies through natural protective mechanisms, making it more difficult to ward off infections, viruses, and bacteria "common cold". Evidence exists that suggests that airborne pollution not only is taking its toll on this generation, but also on generations yet unborn.

Mutations (contaminants that damage intelligence & cause mutations) and teratogens (pollutants that interfere with fetal development causing deformations) are daily damped by the toxins in the air we breathe.

The fertility of human beings may also be adversely affected. When male and female mice were made to breathe clinically produced "smog", a striking decrease in reproductive capacity occurred. Females conceived less often, and when they did, the size of the litter was smaller than average.

Ozone and nitrogen dioxide, the main irritants, were cited as the suspected cause. These chemicals are found in abundance in the atmosphere of the Inland Empire.

The Student Public Interest Research Group (SPIRG) is an idea of Ralph Nader whereby students take action to research, legislate, and litigate in the public interest such problems as smog, reproductive capacity, racial and sexual discrimination, and consumer protection.

Tony Weathers of the SPIRG organizing committee said, "Students have found that riots are counterproductive in achieving meaningful social change, and that they are not productive in achieving their hormone balance. Emphysema is the fastest growing cause of death in the U.S., even though until recently, it was considered a chronic disease of old age. Cancer has reached epidemic proportions.

Reductions in crop yields for farmers as a result of air pollution have been estimated at $300 million per year. But a dollar and cents approach to the air pollution problem ignores significant health implications. Emphymesa is the fastest growing cause of death in the U.S., even though until recently, it was considered a chronic disease of old age. Cancer has reached epidemic proportions.

Statistical studies have shown that urban dwellers with high air pollution have a higher incidence of stomach cancers and cancers of the esophagus, prostate, and bladder.

Smog also has an impact on the weather. Some scientists believe that pollutants prevent the earth's heat from escaping into space and this will eventually result in the melting of the polar ice caps. This so-called "Greenhouse Effect" could raise ocean levels as much as 400 feet, submerging land presently occupied.

Other scientists predict a 'black effect' with the earth's cooling as sunlight is blocked by the increase in air pollutants. An increasing ice in space, snow, and a general lowering in the earth's temperature could be expected. Smog kills and destroys quickly. Yet a patchwork approach to improvement of the air environment has limited action to importing smog-resistant pines from Oregon for the San Bernardino National Forest and half-baked, lack-on emission control devices for auto engines. Russell Train, new administrator of the Environmental Protection Agency, the governmental agency supposed to protect us from further degradation of our air environment, has asked two weeks ago that he would accept delays in automotive emission standards for the I.A. area. Massive citizen action will be required to motivate our governmental agencies and elected representatives to enforce standards that will improve the air quality.

Send a 6 cent post card asking for strict enforcement of emission guidelines as contained in the 1970 Clean Air Act.

CSCSB Onward and Upward

by Patty O'Neill

Exciting plans for the building and beautifying of Cal State, San Bernardino's campus have already been laid out for the year says Dr. J.K. Thomas, Vice President of Administration.

Dr. Thomas stated last week that he and County officials have been working closely on the construction of a 5 acre lake to be built across San Bernardino State campus. The recreational facility, for the use of the public and for the direct use of the college, will be opened next year. The shore will be lined by a sandy beach and a picnic area for the enjoyment of everyone, and it will also be stocked with fish.

The lake will be fed by the San Feale River Project, which runs behind the school and plans are already being made for the enlargement of the lake 1 to 1 acres in the years to come.

Preliminary plans are being drawn up for the building of a new and larger Creative Arts building. Construction on the project will begin sometime next year and will be for the use of the Music and Drama departments. A recital hall seating two hundred and fifty will be added along with an experimental drama theatre. The building should be occupied by the Fall of 1976.

The Administration is proceeding with plans for a College Union building. The Union building will be for the general use of all students consisting of game rooms, T.V. and lounges, according to Dr. Thomas. The College Union should be occupied by '75 or early '76, hopefully.

A new entrance is funded for next year and plans are now set for its construction. The main entrance to the college will be enlarged, making entering and leaving the campus much more effective, says Dr. Thomas. Architects are now studying plans for a meandering stream to run through the campus. The six foot wide, 8 inch deep stream is the first step in running the campus down through the buildings and empty into storage tanks behind the playing fields.

The NATIOnAL POeTrY PRESS

The closing date for the submission of manuscripts by College Students is NOVEMBER 5

ANY STUDENT attending either junior or senior college is eligible to submit his/her verse. There is no limitation as to form or theme. Shorter works are preferred by the Board of Judges, because of space limitations.

Each poem must be TYPED or PRINTED on a separate sheet, and must bear the NAME and HOME ADDRESS of the student, and the COLLEGE ADDRESS as well.

Entries should also submit name of ENGLISH INSTRUCTOR.

MANUSCRIPTS should be sent to the OFFICE OF THE PRESS NATIONAL POETRY PRESS

3110 Selby Avenue
Los Angeles, Calif. 90034
Consciousness Raising

Women interested in Consciousness Raising Group, meet Friday October 19 at 10:00 a.m. at the benches in front of Physical Sciences building, or call 793-3856, or get in touch with the Pawprint office, ext. 233.

A NOW chapter of N.O.W. has formed several task forces to deal with issues relating to women in our local area. You do not have to be a member of N.O.W. to work with these task forces. For more detailed information, contact these task force chairpersons:

- Abortion—Cathy Hendon
- Affirmative Action—Barbara White
- Consciousness Raising—Maureen Glaeser
- Credit—Debbi Steele
- Education (or help fight sexism in our schools)—Nancy White
- Legislative—Sue Diaz
- Publicity—Kathy Klausner
- Rape—Jean Holtz
- Speakers Bureau—Jane Block
- Women in Prison—Maria Cranor

Wood is a pleasant thing to think about. It comes from a tree; and trees grow, and we don't know how they grow. For years and years they grow, without paying any attention to us, in meadows, in forests and by the side of the river—all things one likes to think about. The cows swish their tails beneath them on hot afternoons; they paint rivers so green that when a moon-hen dives one expects to see its feathers all green when it comes up again. I like to think of the fish balanced against the stream like flags blown out; and of water-beetles slowly raising domes of mud upon the bed of the river. I like to think of the tree itself; first the close dry sensation of being rooted; then the last storm comes and, falling, the cold pressure of the earth; then the last storm comes and, falling, the cold the feet of insects must feel upon it, as they make laborious progressions up the creases of the bark or sun themselves in the thin green-awning of the leaves, and look straight in front of them with huge diamond-cut red eyes. One by one the fibres snap beneath the immense weight of the trunk; it falls and of water-beetles slowly raising domes of mud upon the bed of the river. I like to think of the tree itself; first the close dry sensation of being rooted; then the last storm comes and, falling, the cold the feet of insects must feel upon it, as they make laborious progressions up the creases of the bark or sun themselves in the thin green-awning of the leaves, and look straight in front of them with huge diamond-cut red eyes. **Womanspace**

Artist Judy Chicago speaks for herself in this excerpt from the Womanspace journal:

"...I never belonged in the male art world. I was always on the outside of a world that men had brought out of their own needs, shaped from their values, their ideas...and their values and ideas were different from mine. I belonged nowhere...except maybe alone in my studio, But that was not enough. I needed to share my work with the male art world, where my vision...and that could not happen in the male art world, where my visions as a woman were irrelevant.

They did not care about my struggle for identity, for my search for my own sexuality, for my desire to transcend the limited role of woman in which I was confined by the rules of male culture. They did not relate to my need to define my womanhood in my work, to assert my sexuality in my paintings, to say: this is a woman, not your goddesses, and ministering angels. This...is what a woman is...said my paintings, paintings made in the most profound loneliness and alienation. And when I showed them, work of my body and my mind and my womanhood, nobody gave up their mistaken notions of what women are, exchanging their fantasies for the reality provided by my paintings and the work of many women who have been crying out their identities into an empty night...But, all that is over now. Or is it? Will Womanspace succeed? Will women support other women? Will women come forward and find their affirmation, their strength, their identities through the work of their sisters? I feel ashamed. I want to go back to the isolation I have so recently emerged from. Sisters, I ask you...help us, support us, work with us, so that women artists can have their place in the world, can share work with each other, with us, with you. Provide artists with the audience we want...our sisters."

Dropout's Deadline

By Joanie Weiser

October 17th will be an important date for those of us too swamped to stick it out. JoAnn Yon Wald of the Admissions and Records office reminds us that the 17th is the absolute last day to withdraw from classes or from college altogether. The Chancellor has made it a bit more difficult to withdraw by requiring two signatures instead of one on the “off” drop card. You now must join not only to the instructor, but also to the School Dean involved.

Intramural Football
Kicks Off Season

The opening kickoff for the 1973 intramural football season is almost upon us and from all indications, there will be a wide-open brawl to determine who will wind up in the super bowl. The defending champion derelicts have indications there will be a wide-folded, although a few of their younger players are still around. Free agents Jim Caruso and Stan Kielman are negotiating with several of the contending teams for multi-year contracts. As yet, the two all-league performers remain uncommitted.

The hard-luck team of '72, also known as The Cavaliers, has changed their name, in hopes that this will be their year. Led by the Alio brothers, the Cavs were uncommitted. This season '73/74 the Cavs will be known as The Cavaliers, has two all-league performers remain uncommitted, and they have a chance to make the playoffs. The sweet taste of victory, plus some new faces make the Pollacks a team to be reckoned with. Returning veterans include Mark Moreo, Gordon Miller, Mike Stackowski, Terry Parrish and Barry Crone.

In the offensive line, V. Handball

This is for women too. Thursday, Oct. 12 at 3:30 p.m., Rm. P.E. 122.

I. A.S.B. SPORTS COMMITTEE—This is for women too! Thursday, October 18 at 3:30 p.m., Room 72.

II. OUTDOORS CLUB—Most of you missed a great day hike to Devil's Punchbowl on Sept. 26. If you're interested in hiking, camping, backpacking, fishing, bicycling, horseback riding, etc., attend the next meeting on Friday October 12, in the upper commons at noon.

III. SKI CLUB—Will not meet until November, but get ready for trips to Mammoth, Snow Valley, and maybe Brian Head. Also lessons and maybe some extramural competition.

It is rumored that several people missed the meeting for the volunteer tutoring program because of the change in rooms. Whoever you are: Come To THE ACTIVITIES OFFICE, Room 3C, to sign up.

Sexual Inequality
In Intramurals

By Becky White

Intramural sports for women here at Cal State are almost nonexistent. After an interview with Joe Long (organizer of intramural sports for women and men), I was left with some disturbing information.

Money used to finance the intramural sports program is taken from the student body fees paid by all students. The program's cost last year was $2610. However, only $500 of that went for the woman's part of the program and even most of that was used for paying women to keep score for men's softball and basketball games.

This means that women contributed approximately $140 to the intramural program and only $50 was spent on them! I do not blame Joe Long for this as he is just as concerned about how to get more women down to the gym to participate in these functions as anyone on campus, but very few women seem interested.

Women, let's quit paying for the men's intramural programs and get some benefit from the money we pay in. Volleyball and flag-football teams are now being formed. Go down to the gym and sign up. (Bring a friend with you!) If there are any other sports you would like better, just talk to Joe Long down there, he'll be more than willing to do what he can.

Getting into shape this way will be fun, intramural sports for women this year will be published each week from now on.
Intramural Schedule

**WHO MAY PARTICIPATE?**

1. Anyone currently enrolled in regular classes at CSCSB.
2. Anyone currently on the staff or faculty at CSCSB, or

**WHY?**

To provide yourself an opportunity for exercise, diversion from studies, forming new social contacts, and participation in recreational activities.

**NOTE:** Additional activities, particularly for women, will be included if there is sufficient interest.

The merri-Mixers, a group of concerned area residents, are in urgent need of volunteer help with their social and recreation program for mentally retarded adults. Group activities include arts and crafts, bowling, trips, and picnics into the Community, and help with transportation. A compassionate and understanding nature is a must. Hours vary, according to the Activity, usually half a day, starting at 10 a.m.

**The College Plan.**

More than just a cheap checking account.

College Plan is a whole new idea for college students from Bank of America. First off, you’ll get the COLLEGE PLAN CHECKING ACCOUNT with unlimited checkwriting privileges, and no minimum balance requirements. All for only $1 a month, and the summer is free. That’s cheap.

But what else?

**BANKAMERICARD** the universally accepted credit card whose identification feature can help you cash checks even where you’re not known. You can even use it to charge your tuition at state universities. Ask for our Student Application.

**INSTANT CASH** can protect you against bounced checks. When your application has been approved, Instant Cash automatically deposits the necessary funds—up to a pre-arranged limit—into your checking account to cover your check.

**EDUCATIONAL LOANS** available to qualified students. Further information and student loan applications are available at your College Financial Aid Office.

**SAVINGS ACCOUNTS** for almost any need. There’s no safer place for your savings than Bank of America.

**SOMEONE WHO UNDERSTANDS.**

Over thirty of our college banking offices are now employing students as Representatives. They have been especially trained to counsel students on money matters. Your Student Representative understands student problems and can save you time when it comes to solving them. In other offices a Bank officer will be happy to help.

Come in and find out about this unique College Plan Program. It’s a lot more than just a cheap checking account. And no other bank has it.

**The College Plan.**

More than just a cheap checking account.

College Plan available only at:

Sierra Way—40th Office
130-40th St.

**BANK OF AMERICA**

Students may be able to obtain course credit for their participation. If able to be one of our leaders, please contact Pam Brennan or Carolyn Tekaat 883-611-882-1312.
