My Experience

The way my life has changed during the COVID -19 pandemic is that most of the activities that I used to do in person I am now completing online. I have been able to focus more in my classes and invest more time in each one of them. Due to the pandemic, we are having distance learning and that allowed me to enroll in more courses so I can complete my education at the end of this term. I have been having a great experience with distance learning so far. On the other hand, I feel that it was very challenging to stay at home and have all the responsibilities in one place. I think technology has played a big role during this time. I remember that at the beginning of March I did not know how to use zoom and I had to learn and develop that skill to be able to effectively accomplish my goals. My workspace looks great and that is where I spend most of my time now. I have a dark wooden desk, a computer chair, an ELMO I use as a lamp (and my wife uses to teach online), and a paper organizer. I stay connected with the campus community through social media.
