the Chronicle

**SPECIAL
SUMMER
ISSUE**

As part of our final edition for the 1984-85 school year, the *Chronicle* has interviewed some graduating students in order to collect their thoughts and opinions about the time they've spent at our fair campus.

Name: **Sue Genovese** (Cover page picture)
Age: **22**.
Major: **Marketing**.
Years at CSUSB: **4**.

Describe your experiences at CSUSB - "I feel that CSUSB offers a well-rounded business program. I have had a very positive experience here."

Has CSUSB prepared you for your goals as well as you wish? "As far as that goes, I never had specific goals until my senior year. That's why I came to college. In that sense, I guess it really has."

What are your plans after graduation? "My immediate plans are to stay with my present job in fashion retailing.

Eventually, I hope to become a buyer."

What are some of the highlights for you as a student at CSUSB? "Looking back I suppose I most enjoyed my second year in the dorms. It was a wonderful experience."

How do you feel about leaving? "I'm a little nervous, but I think I'm really ready to graduate."

Is there anything you would have liked to see at Cal State that wasn't present? "I would like to see more social events. Unfortunately, I feel there is a certain degree of apathy toward them. I wish people would realize what a learning experience they really are."

Name: **Carol Camacho**.
Age: **23**.
Major: **Physical Education**.
Years at CSUSB: **5**.

Why did you choose to attend CSUSB? "It was the closest four-year college to my hometown (Blythe)."

Are you satisfied your education at Cal State? "Yes. The P.E. department has a good program, and the teachers are qualified."

What are your plans after Graduation? "I'll come back in September to start my credential."

What are some of the highlights of the time you've spent at CSUSB? "Playing on the (intercollegiate) volleyball team would have to rank number one, but being among the first class of P.E. majors to graduate also ranks high."

What are some of your long term goals in life? "I want to be a P.E. teacher in high school and I want to coach."

Name: **Tina M. Lardleri**.
Age: **24**.
Major: **Theater Arts**.
Years at CSUSB: **3**.

What are your plans after graduation? "I have a tentative job in London. It's not in theater, but it will get me over there close to the theater. I'll be working as an assistant to a fashion designer."

Are you happy with your decision to attend CSUSB? "Yes. As a Theater Arts major, I made a choice to go to a small school with a smaller department because of the individualized attention, which I feel I needed at the time. I didn't want to be a nobody at a large school. Most schools have 200 majors...I don't think you learn anything there except how to be in a cattle call."

What are some of the highlights for you as a student at CSUSB? "Definitely all the shows I've been in have been highlights for me. Living in the dorms could also be considered a highlight, because I made a lot of friends."

Do you have any advice for your classmates that will be staying on at CSUSB? "Do everything you can in this department to make yourself seen and known. All I can really do is give advice for the theater students, because that is the only area I really know about. If you really want to succeed in this department, you should make yourself known. Do Children's Theater, build props. Do anything to get yourself noticed so that later on, people will remember you when their casting. Some people only want to be in the main stage productions, and if they can't do those, they won't do anything. That really stinks."

Name: **John Kennedy Sr.**
Age: **70**.
Major: **Economics**.
Years at CSUSB: **14**.

John Kennedy deserves a special notation since he has attended this school almost as long as it has been open.

What are some of the highlights of your tenure at CSUSB? "Watching the

school grow and recognizing the degree of intelligence of the students of today."

Are you satisfied with your education here at CSUSB? "Oh very. I wouldn't have spent so much time here if I wasn't."

Do you have a favorite teacher at CSUSB? "Oh, I never had any that I really didn't care for."

Are you happy with the Economics department? "Oh yes. I have thoroughly enjoyed them. I had Dr. Charkins for one class and was very pleased, but I've mainly taken classes from Dr.'s Moss and Pierce. I found Dr. Moss and Dr. Pierce to be outstanding teachers, not just outstanding professors; there's a difference. Professors can write books but these men are teachers. They are willing to take the time to make sure their students learn the material."

Do you have any advice for your fellow students that will continue on here at CSUSB? "Never stop studying! It always bothered me to have graduation seem like the end of something, when a degree from college is the beginning of learning. I went back to school to enrich my life, and my children have been picking up degrees from CSUSB to enrich themselves also. You can never learn too much."

Smog Awareness Day Results

The Environmental Action Council would like to thank all members of the campus community who participated in Smog Awareness Day, May 8.

The slightly biased questionnaire was designed to educate, confront attitudes and behaviors, and direct the conflict or commitment toward positive pro-environmental action. The message of persuasion for public demand and involvement was consistent throughout the questionnaire.

It was hypothesized that if Smog Awareness Day met the criteria for positive citizen action, the research design should transform learning into pro-environmental behaviors. Participation that led to further action and commitment exceeded the expected 10%. Of those 158 who filled out an EAC Questionnaire, 62.7% agreed to sign an informal petition to Congressman George Brown, 19.0% agreed to wear a protective mask on campus,

and 18.6% agreed to further contact or joined the EAC, a student organization.

Our sample population was very positive toward the motives of non-violent environmental action groups, about 89% agree. Approximately 84% agree that smog is preventable, and 85.4% agree that smog is responsible for forests dying (acid rain) and respiratory diseases. Another 80% agree that industries should be significantly fined and shut down to induce cleaner methods, and 81.4% would convert their vehicles to alternative fuels (if easily obtainable).

To measure apathy; sometimes I consider moving to another area rather than demanding cleaner air, 50% agree, 34.8% disagree, and 21.5% were undecided. People generally have little or no influence on what industry or government imposes on the public; 46.2% disagree, 32.3% agree, and 21.5% undecided. Toxins in the air and water cause 66.5% to be

depressed and angry enough to demand a cleaner environment. About 67% feel responsible to be involved and make a commitment now, and only 60.8% agree and appreciate the need to reduce their consumption to insure future resources or reduce pollution, 23.4% undecided, and 15.8% disagree.

The Environmental Action Council will contact all those who signed up for membership. We will send a packet of postcards and addresses to all who wish to lobby their elected officials over the summer. We will plan several activities for next year as well. In earthquake zones, do utility poles worry you or clutter your view of the smog? Let us hear from you about what concerns you the most. Call Linda Parnell at 862-5279 for further information.

WATCH FOR STAFF MEETING ANNOUNCEMENTS IN THE FALL!

RAY BRADBURY ON CAMPUS

Ray Bradbury, author of "The Martian Chronicles" and "Fahrenheit 451" plus more than 400 short stories and 15 other novels, will speak at Cal State, San Bernardino Sunday afternoon, June 9.

The lecture, free to the public, is part of the inaugural meeting of the Library Associates, a new support group for the Cal State Library. It will begin at 3:30 p.m. in the Recital Hall of the Creative Arts Building, following a reception at 2:30 p.m. in the Library.

The reception will afford an opportunity for members of the Associates, prospective members and the public to tour the Library and to meet Bradbury, said Arthur Nelson, Library director. Musical entertainment and refreshments also will be available.

Bradbury is now engaged in a project called Ray Bradbury Theatre on cable television. Among his latest efforts are a murder-suspense novel, "Death is a Lonely Business," a screenplay, "Omenemo" written for the producer of "The Empire Strikes Back" and an opera for the Seattle Opera Co.

He formed his own theatre company in 1963 to produce his plays including "The Wonderful Ice Cream Suit," "The Martian Chronicles,"

"Fahrenheit 451," "Dandelion Wine" and "The Wonderful World of Ray Bradbury." He did the screenplay for John Huston's film production of "Moby Dick," starring Gregory Peck, wrote a good many of the "Alfred Hitch Presents" shows and worked with Rod Serling in the development of "Twilight Zone."

Bradbury's collection of poetry and stories have appeared in The New Yorker, Life, Gourmet, Mademoiselle, Charm, Harper's and the New Republic.

He planned the basic scenario for the United States Pavilion at the New York World's Fair and the Spaceship Earth Building at Epcot at Disney World.

The Library Associates is the first community-wide support group for Pfau Library at the University, explained Nelson. The organization is intended to promote the relationship between the university, the Library and the community and to sponsor cultural programs such as exhibits, lectures and other events. It also will be the vehicle for accepting gifts to the Library, both monetary and books or other materials.

Members of the Library Associates will have access to the services and collections of the Pfau Library and will be able to borrow books on the

same basis as university students. They also will have access to interlibrary loans and the data base search service, both at additional charges.

Membership categories in the Library Associates include Cal State student, \$5 per year; single or family membership, \$10 per year; business, \$50 per year and

life member, \$100.

The Bradbury lecture is sponsored by the Associated Students Special Events Committee and the Library.

'85 Admissions Are Up

Cal State, San Bernardino is following a California State University (CSU) system-wide upward swing in admissions applications for Fall 1985.

Overall, the CSUSB campus is up 21% in admissions applications and 33% for first-time freshmen, said Cheryl Weese, director of admissions. Transfer applications are up 21% and graduate applications are up 7%. Fall applications will be accepted at Cal State through fall registration in September.

The 19-campus CSU system has received a 10.8 percent increase overall and a 17.1 percent increase for first-time freshmen. The 134,720 applications received from prospective new students as of April 1,

compared with 121,545 for the same period in 1984.

Most CSU campuses are continuing to accept fall applications in all categories. Exceptions include California Polytechnic State University, San Luis Obispo, closed to all except graduate applicants, and San Diego State University, which can no longer accept applications from beginning freshmen because of overload facilities.

In addition, impacted programs, primarily in engineering and business fields, at certain campuses were closed to further applications early in the admissions period. All programs are still available at CSUSB and the fall application period opens each November.

GSL Processing Excellerated

by Edison P. McDaniels II

The Financial Aid Office at California State University, San Bernardino, has for the past ten months been one of only fourteen postsecondary schools involved in a statewide pilot project to enhance the processing of California Guaranteed Student Loan (GSL) applications. This enhancement has been carried out via an electronic network linking the California Student Aid Commission (CSAC), post-secondary schools, lending institutions, and the CSAC's loan processor, Electronic Data Systems Corporation. The program is called the California Loan Initiation Program, or simply CLIP.

There are several reasons for developing and implementing the CLIP program, but perhaps the greatest benefit has been the marked decrease in the amount of time it takes for a student to

get his or her money from a GSL loan. It has been found that one of the major causes of dropping out of college is the lack of funds. This problem has been at least partially ameliorated by the rapid disbursement of funds under the CLIP program. In the past, it took as long as eight or nine weeks for a student to receive any funds from a GSL loan (at peak times it may have taken somewhat longer). Using the CLIP program at CSUSB, this time has been decreased to just two to three weeks. If the entire system is considered, the average reduction in time between the initial processing of the application by financial aid and the receipt of GSL funds by the student has been about eight weeks. The relatively short period of time now required under the CLIP program allows a student to pay bills and other

expenses in a timely manner and thus make it easier for him or her to stay in school.

A second very important benefit, from both the student's and the school's point of view, is that the school can now follow the progress of the GSL application through the system. This is important in cases where, for one reason or another, it becomes necessary to find out the status of an application. Previously, this required contacting the lending institution, a time consuming process at best. With CLIP, the status of any application can be discovered in slightly more than the amount of time it takes to type the student's name. Thus questions that arise concerning the application can readily be answered. This fact has also allowed the

Dr. Buroker Receives Maximum Research Funds

CSUSB Philosophy Professor Paris-Bound With \$27,500 Fellowship

Dr. Jill Buroker, associate professor of philosophy at Cal State, San Bernardino, will receive a \$27,500 Fellowship for College Teachers from the National Endowment for the Humanities for research in France next year.

A major research award, the grant will support her work in Cartesian thought, to be conducted at the Sorbonne and the Bibliotheque National (the national library of France). She will work with original documents and with leading French philosophers.

Her project, "Perception and Judgement in Cartesian Thought," is an outgrowth of

work done under an NEH summer stipend in 1983. Part of her work will involve study of the relationship between the French philosopher Rene Descartes and the German Immanuel Kant.

Dr. Buroker, in her first year as chair of the Philosophy Department, received a Faculty Professional Development Grant from the university last year to research the paper which became part of her NEH grant application. The grant is the maximum amount awarded under the college teacher fellowship program.

Before joining the Cal State faculty in 1981, she was a

technical writer at Basic Four of Management Assistance, Inc., a systems analyst at McDonnell Douglas Corp. and an assistant professor of philosophy at the University of California, Irvine. She was a Danforth tutor in humanities at the University of Chicago, where she earned her M.A. and Ph.D. in philosophy. Her B.A. is from DePauw University.

To brush up on her French, since it's been a number of years since she was last in France, she's taken up reading French mystery novels. "I'm learning a whole new vocabulary in crime and violence," she chuckled.

Students Can Get A Taste Of Summer

Sun, Fun and CLASSES!?!

A sampling of summer life at Cal State begins with the first of five summer sessions at the university June 20. More than 100 individual courses in most departments will be available at the sessions which vary in length from three to ten weeks.

The summer sessions are an integral part of the campus year-around academic program, providing regular and non-matriculated students a chance to pursue undergraduate or graduate study in one of the university's majors or professional programs.

Also available during the summer sessions are extended education courses

taught on campus and at locations in Barstow, Etiwanda, Hesperia, Palm Desert, Redlands, Riverside, Victorville and downtown San Bernardino. Special programs have been announced for younger students, grades four through high school, offering enrichment classes, and reading and computer courses and a summer debate institute.

Registration for all sessions will be Tuesday, June 18 at the gym. Additional registration for the second and third sessions will be July 22-26 in SS 100. Fees are \$42 per unit payable at registration.

FEDS RECOGNIZE NAT'L SECURITIES STUDIES

The National Securities Studies Program at Cal State, San Bernardino has received a federal award for excellence from the Federal Executive Board/College Federal Council.

The Cal State program, which leads to a special master of arts degree in national security studies, was nominated for the College/Federal Agency Cooperative Program Award by officials at George Air Force Base.

Attending the awards ceremony in Palm Springs were Lt. Col. Peter Hoffman, from the personnel office at George AFB; Dr. Richard Ackley, professor of political science at Cal State and coordinator of the National Security Studies Program; and Dr. Thomas Pierce, acting dean of the School of Social and Behavioral Sciences at Cal State.

The purpose of the award, presented by Harry N. Walters, head of the Veterans

Administration in Washington, is to foster educational programs which will provide maximum relevance and assistance to federal agencies.

Cal State offers its special M.A. in national security studies at George AFB near Victorville and also on campus. The program, which emphasizes international relations and national defense, is especially designed for individuals in the military, the civil service or the intelligence fields.

The Federal Executive Board, created in 1962 by President John F. Kennedy, is composed of the heads of all federal agencies in a given area. The local FEB represents all of southern California. The board coordinates and implements a variety of federal programs. The College Federal Council is composed of the same agency heads plus college and university administrators.

Admin Gets Down to Business

by Greg Timpany

The Board of Councillors to the School of Business and Public Administration held its Twelfth Annual Recognition Banquet on May 31. Approximately 160 faculty, administrators, students, and business people attended the affair.

The purpose of the banquet was to recognize student achievement over the past year. The evening's guest speaker was Mr. Frank Hotchkiss, Director of Planning for Southern California Association of Governments. His topic was "Becoming a World City--

Southern California Style."

Many students received awards during the evening. The Wall Street Journal awards went to Graduate Connie Lao, and undergraduate, Mary Lindgren. Many scholarship awards were presented including the Dauberman/Montgomery CPA Review Course Award to Avinash Shah. Jacqueline Stern was awarded \$500 by the Inland Empire Mortgage Bankers Association. Dana Rivas received \$500 from the Union Pacific Foundation. Finance major John Higgins received two awards totaling

\$1200.

Faculty of the year was awarded to Dr. Barbara Sirotnik for the third year in a row. The selection was made by the student clubs on the basis of her interest in student organizations and activities, and her excellence as an instructor. Dr. Jack McDonnell was also presented an award for his service as chairman of the Marketing and Management Science Department. He is stepping down after nine years as chair of the department.

CLIP/from 3

financial aid offices at the different participating schools to have more control over the application process in general. A corollary of this is that the financial aid office knows immediately whether or not the loan has been guaranteed or rejected, whether a person has any other outstanding GSL loans, and whether a person with multiple loans has surpassed his limit. In the past, this information had to wait until the lender had examined the application, a process that sometimes meant a considerable delay. The benefits of this to the student are obvious.

The CLIP program is specifically designed to test the feasibility of enhancing the processing of GSL applications via an electronic network linking the necessary agencies. Processing of GSL applications on

the CLIP system began in July of 1984 and at the current time there are fourteen postsecondary schools and seven lending institutions involved in the program. The fourteen postsecondary schools are currently handling about 20% of the GSL applications statewide. Among the schools involved are three from the California State University system: Cal State Long Beach, Cal State Los Angeles, and California State University San Bernardino.

The Financial Aid Office here at CSUSB has processed more than one thousand GSL applications under the CLIP program, representing over \$2,500,000 in loans. Funding for the continuation of the CLIP program during the 1985-86 award period is currently being sought through the state legislature. In fact the system has worked so well that the

possibility of expanding the program to additional postsecondary institutions interested in participating is being discussed for the next school year.

CLIP has shown that enhancing the processing of GSL applications via electronic networking is not only feasible, but beneficial to all of those involved. Because of the fact that the schools can find out the status of a GSL application at any time, they now have substantial control over the processing of the applications. The major benefits to students have been considered above, the most important benefit being the rapid disbursement of funds made possible by the CLIP program. Undoubtedly, this is a program that has shown its worth and will hopefully be maintained as an integral part of the processing system for guaranteed student loans.

INTERCOLLEGIATE'S WINNING YEAR

When most universities inaugurate an intercollegiate athletic program, losing teams are the norm for that first year and quite possibly for the first few years. Cal State University, San Bernardino's teams surprised many people when five of the eight initial teams finished with winning records in the first year.

The fall sports of soccer, cross country (men and women) and volleyball got the intercollegiate athletic program off to an outstanding by posting winning records. These fall sports seemed to set the example for the rest of the sports as seven of the eight CSUSB sports posted wins in their very first contest.

The women's cross country team, led by junior Andrea Johnson, cruised through their schedule closely behind with a 8-1 dual meet mark. Charles Sanchez, a junior from San Bernardino, was the top performer for the men's team.

Drawing from CSUSB talent and recruits from the local high schools and community colleges, Coach Naomi Ruderman's volleyball team completed a very successful season with an opening record of 9-4. Senior Joan Bougie, a San Bernardino resident, earned MVP honors on this year's team. "We learned about our competition as well as our own strengths and abilities from last year and I look forward to a very improved and competitive team in the fall," said Coach Ruderman. "We will miss our graduating seniors, their places will eagerly be filled by a young energetic and exciting group of incoming and returning athletes who wish to continue setting 'tradition,'" she added.

Rounding out the successful fall sports season was the soccer team which suffered only two losses enroute to a 11-2 season. The Coyote's two losses were to Southern California soccer

powers Cal Poly Pomona and Biola University. Junior standout Marc Owens was the Coyote's top performer, scoring 12 goals and assisting on seven others.

CSUSB's two winter sports were men's and women's basketball. The men's team started off the season on a winning note by defeating Cal Tech, 73-64. The Coyotes finished the season with a credible 7-17 mark. CSUSB could have easily added a few more wins to their tally as four games were lost by two points or less. Junior center Michael Jackson, a resident of San Bernardino, was the team's MVP. "The season didn't go too bad although I can't be content with seven wins, so we'll continue to work harder," Coach Jim Ducey commented. "We've been making some good contacts as far as recruiting goes. If we end up with the players that say they're coming, we'll be very competitive. It's taken a great deal of time and effort

and I feel it will pay off," Ducey said.

The Lady Coyotes did not fare as well as their male counterparts. A lack of players hindered them all year as they posted a 4-20 record. What the women's team lacked in squad size, they more than made up for in determination and desire. Many players often played the entire game with no opportunity to rest, other than time-outs. Team MVP Sayori Thomas, (see feature article this page) a freshman guard from San Bernardino, was ranked 36th nationally in NCAA Division III with a 19.9 points per game average.

The Coyote men's tennis team, led by the nationally ranked doubles team of Ruben Mendoza and Tim Streck, also completed the year with a winning record as they posted a 10-9 mark. Mendoza, a junior from Walnut, and Streck, a freshman from Azusa, were the first CSUSB athletes to qualify for a national

competition when they were selected to compete in the NCAA Division III national tournament in Lexington, Virginia. As a doubles duo, Mendoza and Streck won their first match before losing in the second round. Mendoza, the team's most valuable player, also participated in singles and won his first match before bowing out of the tournament. Tennis coach Michael Muscare commented, "We should be very competitive at the national level next year with Ruben returning we have the second ranked individual in singles and the top doubles team in the region. Richard Blackey will be returning and if we have a decent recruiting year we have a good chance of doing well as a team."

All in all, CSUSB's first year of intercollegiate athletics was a very successful one. Look for better squads and records from next year's Coyote teams.

CSUSB Student Thomas Among Tops in NCAA!

Sayori Thomas, the top scorer on CSUSB's women's basketball team this season is ranked among the top basketball players in the nation according to final statistics from the NCAA.

Thomas' 19.9 points per game ranked her 36th in the nation in Division III scoring. Only three freshmen

nationwide in Division III had a better scoring average than Thomas, the mainstay of the Coyotes' basketball team in their inaugural season.

Besides leading the team in scoring, Thomas averaged 8.8 rebounds per game, which was second for the team. Her

highest game total for the year was a 30-point performance against Southern California College.

Thomas, a 5'6" guard from San Bernardino, played basketball at San Geronimo High School in San Bernardino prior to enrolling at Cal State.

Health Center Open For Students in Summer, Too

Spring Quarter is almost over with final exams just around the corner. Since this is the final issue of the **Chronicle**, we at the Health Center would like to congratulate all the students who will be graduating on June 15th. To those of you who will not be returning to our campus in the fall, we wish you the best of luck and much success in all your endeavors.

The Health Center will

remain open during June and July, but will be closed from August 5th through September 2nd. The hours will be from 8 a.m. until 4:30 p.m. Monday through Friday. Students who were registered this Spring Quarter and who will be returning next Fall Quarter are eligible to use our services during the summer. Also, those students enrolled in summer session will be able to use the

Health Center throughout the session in which they are registered.

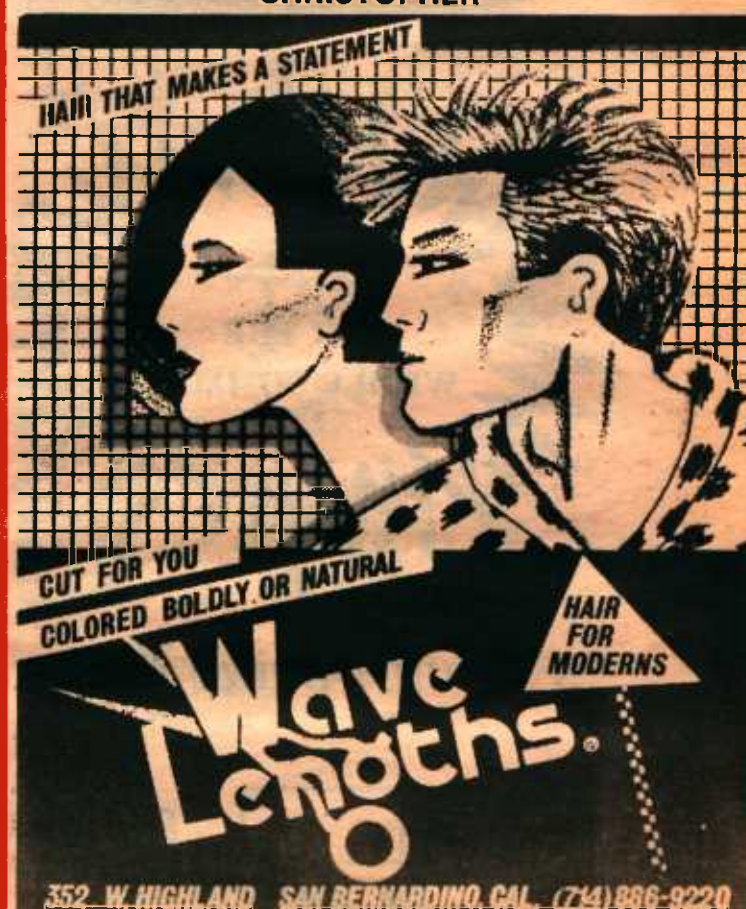

Appointments are encouraged during the summer hours since the staff will be reduced. There will be a pharmacist on duty, so you can continue to receive medications at cost.

Again, have a good summer, and we look forward to seeing some of you in the fall.

Student Gallery Summer Show

The annual Cal State, San Bernardino student art show will open June 5 with a 7 p.m. reception in the Art Gallery.

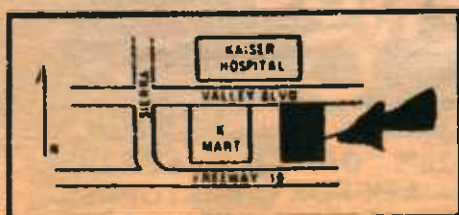

Accepted exhibits will be chosen from among students entries representing all art categories: ceramics and glass, drawing and painting, graphics, jewelry/metalsmith, sculpture, printmaking, photography and wood. Students taking courses in art during the academic year are eligible to submit up to five entries in each medium. Entries were judged by the faculty May 30.

The exhibition will be open to the public June 5 to Aug. 5 and again between Sept. 3 until it closes Sept. 13. Special hours on Commencement Day, June 15 are from 3-6 p.m. for those attending graduation exercises.

Fraternities and Sororities

The Administrative Council has authorized the University Activities Office to develop guidelines which would govern the recognition and activities of social fraternities and sororities on this Cal State Campus.

Fraternities and sororities may now petition to obtain charters of temporary recognition from the Activities Office pending approval of the guidelines.

Representatives from interested student organizations will be meeting with Activities Office staff to develop a fraternity-sorority Greek Council and a constitution.

CSUSB's business fraternity, Alpha Kappa Psi, has long played an active role in student life at Cal State. However, social fraternities, a staple at most universities, have never seriously caught on here.

Currently, though, there are three social fraternities functioning on campus, having obtained interim recognition from the Administrative Council. They are: Kappa Alpha Psi, Phi Beta Sigma, and Delta Sigma Phi.

In addition, the sorority Alpha Phi is in the process of fulfilling the requirements for recognition.

A set of guidelines chartering CSUSB's social fraternities and sororities is currently being drawn up by the Director of Activities, Jeanne Hogenson, and a target deadline for final approval is tentatively set for July 1.

Guidelines and a constitution for the Greek Council should be established by the beginning of the Fall quarter.

Doyle Stansel, Associate Dean of Students and the man in charge of developing Greek life on campus, explained that government of the fraternities and sororities would be under the control of the Greek Council, when it is established.

Any student interested in Greek life should contact the Activities Office for more information.

GREEK COUNCIL

Changes Needed to Meet New Teacher Guidelines

Most of the new teaching credential qualifications adopted by the CSU Board of Trustees are already in place here, according to Dr. Adria Klein, chair of the Department of Teacher Education.

Beginning in the fall of 1986, students at all Cal State campuses will have to be in

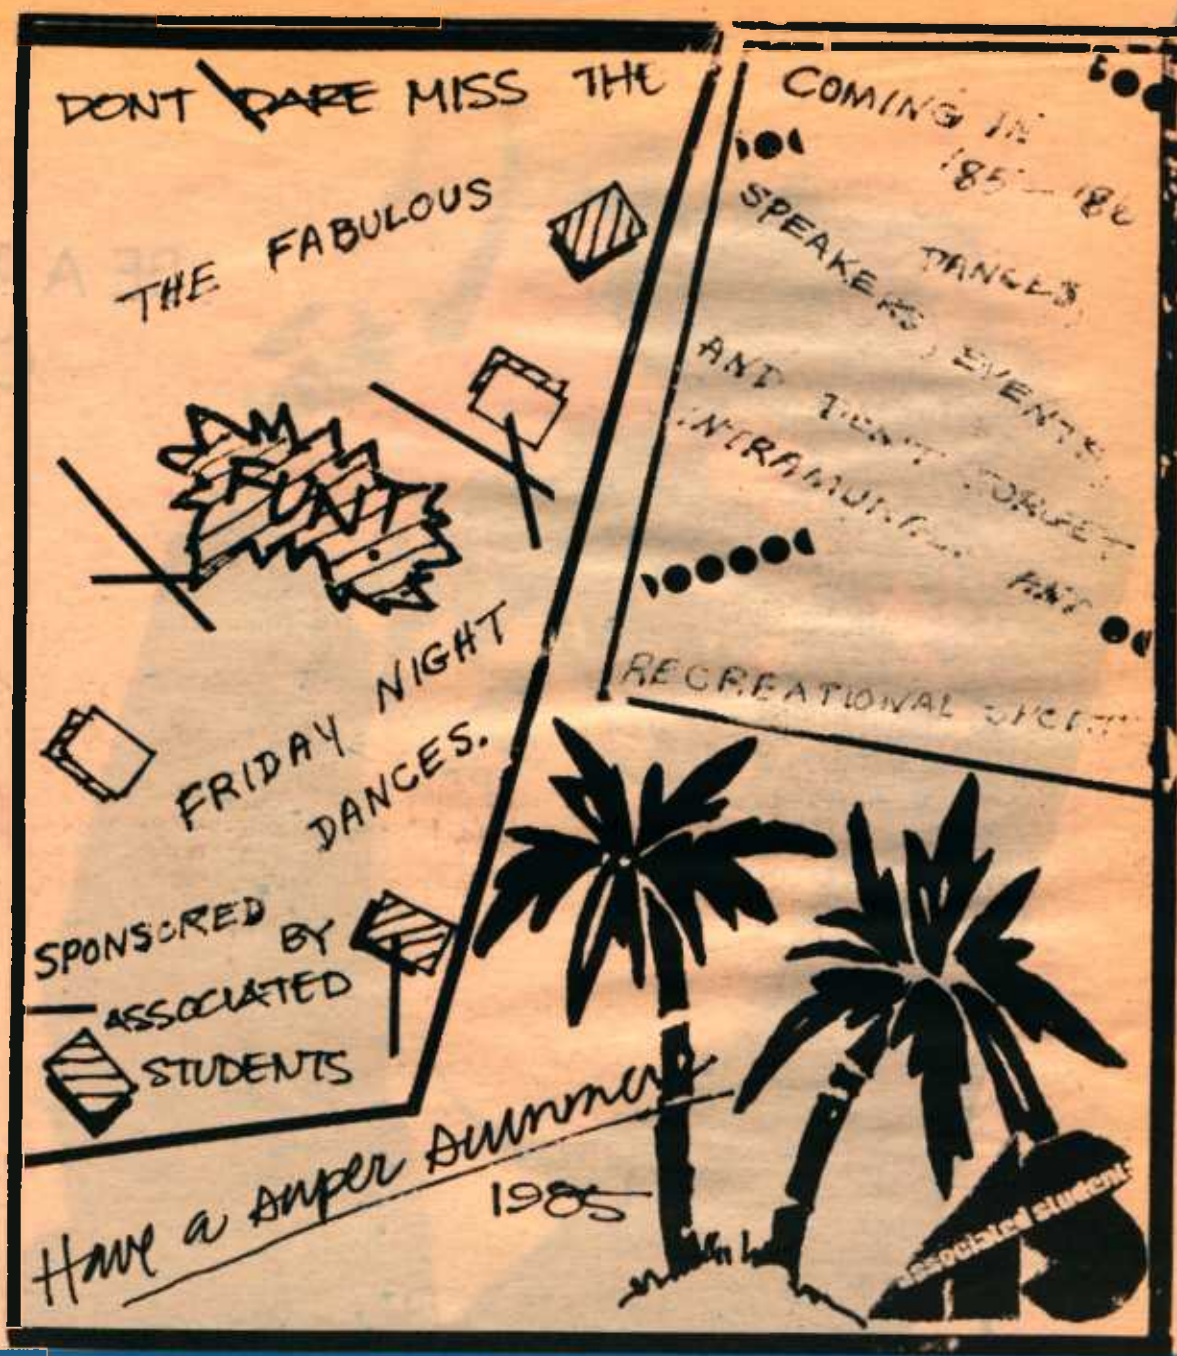

"...top half of their class to enter..."

the top half of their class to enter a teacher education program and later to be recommended for a state teaching credential. They will also be required to demonstrate teaching skills

in addition to subject matter competency. Additional changes regarding physical fitness and personality/character traits were also included in the new standards.

The 19 CSU campuses turn out 6,000 credentialed teachers each year, more than half the state's total output. The new standards are considered minimum for the system and each campus may add to them in order to present challenging, rigorous programs which will attract able students into the teaching profession.

The standards also will permit admission of a limited number of students who do not initially meet the guidelines but demonstrate potential and promise for teaching.

Management Trainee Needed: Individual with executive potential who is seeking management opportunities. The applicants selected will be trained for branch manager of a large growing financial services company. Aggressive, ambitious person with pleasant personality is desired. Good starting salary (\$14,000) and

complete program of employers benefits. Advance according to your ability to absorb training and greater responsibility apply at: Norwest Financial Services 6283 Magnolia Ave Riverside, 684-9081.

Experienced Typist available for all typing assignments (term papers, etc.) Call Pam: 882-6502. 6/5

Counselors: Interns, Licensed Counselors and O.T. needed for part-time positions. Send resume to: Cheryl Walker, Proj. Director, PO Box 3791, Riverside, 92519.

Typing By Cecille: Term papers, thesis, resumes, author's manuscripts, faculty papers, newsletters, letter. Fully computerized, special discount rates for students.

Call 338-4008 evenings and weekends or 886-5361 days.

BE A PART OF THE CHRONICLE'S FACELIFT

JOBS AVAILABLE

The Chronicle will be reorganizing this summer as part of our continuing policy of improvement. Part of the reorganization will be the creation of individual department editor positions, who will be responsible for the gathering of news, and as well as the proper content, of their departments. The four departments will include:

News Editor-Responsible for campus-wide, local and national news stories and features;

Campus Life Editor-Entertainment, art, club news, social events and various other campus activities will be covered by this section;

Sports Editor-Both intermural and intercollegiate are included in this department, which will work closely with the P.E. Department and Intermural Coordinator, Joe Long;

Editorial Editor-Will be responsible for editorial opinions concerning political and social issues that confront CSUSB students on the local and national levels. Would work closely with other editors, since editorial opinions are drawn from a majority of the editorial staff.

All editors would be under the jurisdiction of the Editor-in-Chief, aided by the Executive Editor.

The Chronicle encourages all interested students to take advantage of this unique opportunity. Applications may be obtained from The Chronicle office in the fall.

The Cal State Chronicle Policies

The Cal State Chronicle is published under the control of the CSUSB Media Commission. It is published on a weekly basis for a total of 28 issues less quarter breaks and final exam periods. Contact the office at 887-7497, 5500 University Parkway, San Bernardino, CA 92407, for further information.

Advertising requests should be addressed or directed to the Advertising Manager at the address and number above. Advertising Policy-The Cal State Chronicle accepts advertising in good faith, but makes no warranty, and does not check any goods or services advertised for validity.

The Cal State Chronicle is funded by an annual allocation from Associated Students to cover the costs of printing and expenses. It is distributed free to students and the community. The remainder of the funding is generated by The Cal State Chronicle itself.

Classified ads

Classified ads may be ordered similarly except that such ads for students, faculty, and staff of reasonable length are free.

Additional Paid Positions

Staff Writers - Paid by column inch with possible bonus for investigative reporting. Meetings to be held during registration week. All interested parties are encouraged to apply.

Layout Artists - Experience in graphics (newspaper, other) preferred.

Photographers - Skills necessary. Flexible hours.

Typesetters - If you can type, you can typeset.

All positions are paid. Most, unless otherwise specified, are paid at the current student assistant rate. (Currently, \$4.05/hour) Anyone qualifying for more than one of the above positions is encouraged to apply, as job descriptions are highly flexible.

Pub Board Paid Positions

Advertising Manager - Responsible for generating advertising sales. Would receive a 5% commission on national advertising, and a 20% commission on local advertising. Position starts this summer. Contact the Chronicle for details.
