October 30th 1985

CSUSB
Chancellor Reynolds, Trustee Brophy, Distinguished Guests, and Friends...

"I came to this college for many reasons, but the most important one was the chance that here we might build a really first-class undergraduate institution. There are very few of them in this country, and only two or three west of the Mississippi. Perhaps, just perhaps, it would be possible to do it here.

We won't know for years if we have succeeded. But what is important about this first year is that we have not failed. For a college, failure is immediately obvious; the mediocrity of a mediocre institution is unavoidable.

But success and quality only emerge slowly: a faculty of competence and occasional distinction, a student body with serious intellectual concerns, an academic atmosphere in which the life of the mind is respected and often pursued.

We have begun as well as anyone could expect, and far better than many people would have dreamed. But five years from now we will know if we can stand proudly with the few great colleges."

This statement was written in 1966 at the close of the first academic year at Cal State San Bernardino.

The author had a vision for this university. He saw its potential. He envisioned the myriad of possibilities which existed. The author is Dr. Edward M. White, one of the first faculty members at Cal State. Today, in this moment of reflection, we see that this vision has indeed become reality.

Twenty years ago, Cal State College, San Bernardino consisted of 293 regular and limited students.

Five weeks ago over 6,400 enrolled at Cal State University, San Bernardino.

In 1965, this campus had three buildings, 32 faculty members, and six bachelors degrees.

Today this campus has 24 buildings, 254 faculty members, 39 bachelor degrees, 9 masters degrees and 14 teaching credentials.

We are proud of how far California State University San Bernardino has come. Yet we are not satisfied. We continue to expand our vision as goals are accomplished...we must persistently pursue the goals of growth and prosperity envisioned by Dr. White and all his colleagues years ago.

Since day one, over 42,000 students have come to this institution. I am proud to represent them today. I would like to express our most earnest congratulations to all who have worked so diligently toward this milestone—our twentieth year of academic excellence.
What Does Placement Testing Mean to Me?

**by Jackie Wilson**

The EPT and the ELM. Do these abbreviations sound foreign to you? If so, they really should not. Well, at least they should not after you are given a rundown on what they are and what they mean to you.

The EPT (English Placement Test) is a test required of all college freshmen and sophomores. The purpose of the test is to identify any reading and writing skill deficiencies so that they can be remedied early in your college career.

You may be exempt from the EPT if one of these reasons apply: 1) satisfactory scores on the CSU English Equivalency Exam; 2) scores of 3.4, or 5 on the English Composition Exam of the College Board Advanced Placement Program; 3) a score of 600 or above on the College Achievement Test in English Composition with essay; 4) a score of 500 or above on the SAT-Verbal section; 5) a score of 23 or above on the ACT English Usage Test; or 6) proof of an acceptable four-quarter or three-quarter unit course in English Composition with a grade of C or better. If you may be exempt, the test will bring proof of exemption such as SAT-Verbal scores to the Admissions and Records Office. An evaluator will make the final decision on exemption.

The test contains multiple choice questions that measure reading, ability, sentence construction, logic, and organization in addition to a 45 minute essay on a specific topic.

In order to register for the EPT, you can pick up an application at these places: Admissions and Records Office, Center or the Counseling and Testing Center.

The deadline for the EPT is November 30, 1985. Registering in advance is important so do it early! All students who must take the EPT must take it during their first two quarters of enrollment on campus. There is no fee for this test.

If you find that you do pass the EPT with a score of 150 or greater, you will not be required to take the CSU English Test. If you have a score of 142 or above, you may enroll in English 100; a score of 141 or below, you must enroll in English 99.

The ELM (Entrance Level Mathematics Test) is required of all undergraduates and all students who are subject to the 1983-1984 or subsequent Bulletins. This test is designed to identify any potential math competence problems early in your college career.

Those who are exempt from this test must have the following scores on one of these tests: 1) a score of 3 or above on the College Board Advanced Placement Math Test (AP Exam) or the ACT; 2) a score of 50 or above on the SAT-Math section; 3) a score of 20 or above on the ACT Math Test; 4) a score of 520 or above on the College Board Math Advanced Placement Exam; or 5) completion of a college course that satisfies the General Education Breadth in Quantitative Reasoning of the CSU campus to which they have transferred with a grade of C or better.

Unlike the EPT, the ELM must be passed in order to take any math courses for credit. In order to prepare for this test, you can review high-school algebra and geometry books, get help in the Learning Center, or acquire an ELM preparation text and Workbook at the bookstore.

The deadline for the ELM is November 30, 1985 and you may register at the same places as you would for the EPT. The fee for the ELM is $7.00.

Both of these tests are very important. They put stress on language and writing as well as math skills which is very strong when it comes to your coursework here at CSUSB. So again, register early and review appropriately for each test.

**Job Interview Workshop**

All students and job-seeking alumni are invited to take advantage of a series of four job in interviews workshops sponsored by the Placement and Counseling Centers beginning Tuesday, October 29.

" Asserting Yourself in the Job Interview" will focus on interview techniques through the use of videotaping mock interview situations. The group workshops will be held from 3:45-3:00 p.m., Oct. 29, 30, Nov. 5 and 6 in the Counseling Center, PS 227. Registration is not required and participants may attend any or all sessions.

Scholarship Available

Full-time sophomore students seeking a career in government or eligible to apply for a 1986 Harry S. Truman Scholarship, which covers eligible expenses up to $5,000 annually for the junior and senior years, plus two years of graduate study.

Two students may be nominated from Cal State, San Bernardino. All students are eligible to compete for 105 national scholarships which will be awarded in April. The deadline for applications is Dec. 1, but interested students will need to make an appointment with Dr. Carol Gross (Political Science) between now and Nov. 11. She is the Truman Scholarship faculty representative and can be reached at Ext. 7238, AD 130.

**FILM SERIES BEGINS**

The university’s popular foreign film series begins, starting as part of the 20th anniversary celebration, will resume Saturday, Nov. 2 with the showing of the Mexican film "Macario," the free program will begin at 7 p.m. in the PS-10 Lecture Hall with a discussion. Following the film, Dr. William Clark, professor of Spanish. The hour-long film is based on a short story by Mexican author Ernesto Sabato. The Mexican peasant whose life-long dream comes true with surprising consequences. The film is in Spanish with English subtitles. A reception will follow the film.

**NEWS BRIEFS**

**HEALTH CORNER**

**FOOT WARTS**

Why are plantar warts on the bottom of the foot so difficult to cure?

Warts on the bottom of the feet can be particularly difficult to cure. The skin is very thick and the warts grow deeply into it. Furthermore, we have no specific effective treatment against the basic cause of warts, namely viruses.

The only treatments available must try to destroy the skin tissue in which the virus is growing as a wart. Unfortunately there is no effective treatment for a plantar wart that is both practical and effective. It is generally difficult to apply. Different types of treatment include excision, burning them off with an electric needle, or applying a strong acid and several times to destroy the involved warts. Even after this is done, the wart may return.

Therefore, you should discuss the different modes of treatment with your doctor and the two of you decide which one you want to try.

**HEALTH TIPS**

Smoking of clove cigarettes is dangerous to your health.

Several cases of severe illnesses possible associated with smoking clove cigarettes have been reported to the Center for Disease Control in Atlanta, GA. Signs and symptoms of hospitalization included pulmonary edema and bronchospasm. Milder symptoms of non-hospitalized patients included nausea and vomiting, angina, increased incidence of respiratory tract infection, e.g., bronchitis, increased incidence of chronic bronchitis, increased incidence of asthma attacks, dyspnea, chronic cough, and epistaxis. "Blood-streaked sputum have been reported with particular frequency." (Morbidity and Mortality Weekly Report, May 31, 1985).

Live D.J.!
The Spanish faculty of California State University-San Bernardino will sponsor a seminar entitled, “Spanish: What’s in it for Me?,” on Wednesday, November 6 at 3PM in the lower commons. The seminar, open to all students and faculty of the university as well as the San Bernardino community, will address the importance of knowing how to communicate in Spanish and the rising economic and social significance of Hispanic culture in southern California. Speaking at the seminar will be Dr. Stella Clark, interim Dean of the School of Humanities and Public Administration; Dr. Ernest M. Betnal, Professor of Education; and Dr. Fred E. Jandi, Chairman, Department of Communication. The Department of Communication will also present a video program on the role of Spanish in television as well as discuss a new course on Spanish media programming to be offered in the winter quarter. At the conclusion of the seminar, those in attendance will be able to question the speakers or members of the CSU-SB Spanish faculty concerning the present and future course offerings in Hispanic studies, including proposed courses of studies in international business and communication. Light refreshments will be served.

the Lord created heaven and earth.

Give us 7 days, and we'll get you your Guaranteed Student Loan.

Within seven days after Educaid receives your correctly completed application your GSL check will be on its way to you. See your FAC and ask for Educaid or call us and we'll send you an application.

BONUS!

GSL's from Educaid are not only a lot faster, but a little bigger. Educaid's insurance premium is less (0.75%) than that charged by most other California lenders (1%). You get a little more money to apply toward your education.

CONTACT:

1. Patient with your financial aid officers. We are pre-approved.

2. Student work or part time is not considered in the 1500 sequence.

3. Need not only is based on federal forms for 1979-80 but is also determined by previous years or the 1980 return.

4. Grants may be based on 120 days or 150 percentage, whichever is less, or one third of the fall period.

NOTE:

In 7 days...

the Lord created heaven and earth.
"UFOs: The Hidden History" is a 90 minute lecture and slide show concerning a U.S. Government cover-up of UFOs, and is based on previously classified CIA, FBI, and Air Force documents which have been secured via the Freedom of Information Act by several UFO researchers. This presentation will be held November 7th at 7:30pm in the Recital Hall. Admission is free.

In a nutshell, what these documents indicate, beyond a reasonable doubt, is that UFOs do indeed exist—and despite public denials by official government spokesmen over the years, these mysterious objects are of the greatest concern to the highest levels of the U.S. Air Force and the intelligence community.

Further, a number of these documents refer to UFOs repeatedly violating highly sensitive airspace over nuclear weapons laboratories and ICBM sites. Other documents concern attempted aerial intercepts of UFOs by military jet aircraft. So far as is known, all of these attempts have been unsuccessful.

One FBI memorandum, dated March 22, 1950, and directed to J. Edgar Hoover, reports the apparent secret recovery by the Air Force of three UFOs which crashed in New Mexico near "a very high-powered radar set-up".

The memo states that aboard the craft were "bodies of human shape but only three feet tall", and goes on to say that Air Force investigators believe "the radar interferes with the controlling mechanism of the saucer". This memo is one of approximately 400 FBI documents obtained through the FOIA, by Dr. Bruce Maccabee, an optical physicist working for the U.S. Navy. The majority of CIA documents now available to the public were first obtained by W. Todd Zechel, a former National Security Agency (NSA) employee, and founder of a UFO research group called Citizens Against UFO Secrecy (CAUS).

Hastings an independent UFO researcher and lecturer, says that his interest in UFOs began in 1967 when he was present at an air traffic control tower on Malmstrom Air Force Base, near Great Falls, Montana. "Five UFOs were tracked on military radar," he recounts, "and for a half-hour period they hovered over nearby ICBM sites, violating sensitive air space. Then they flew off at an estimated speed of 5,000 mph, far beyond the capability of any conventional aircraft.

Since that time, he has devoted much of his energy to researching UFOs and trying to cut through the "shroud of secrecy that surrounds government research into the UFO phenomenon. Hastings believes the government should be forced to open all files on UFOs. "I guess you could say that I'm a political activist," Hastings says. "The intelligence community is the chief repository of information on UFOs, and I am taking a politicized approach to getting that information out in the open, challenging the ongoing problem of government secrecy."

"There's an abundance of hard evidence at this time of an ongoing cover-up. I believe the government's policies are very shortsighted to keep the public totally in the dark regarding seemingly vital information that affects not only Americans, but the entire human race.

Hastings, a photographer and filmmaker, spends about four months a year on the road, lecturing on UFOs and pressing for release information from government files.

"I'm not on a romantic quest," he insists, "and I've got no illusions about changing government policy. "Basically, I'm intensely committed to getting the facts before the public. I believe we are on the threshold of an extremely exciting period in the history of mankind. Only time will tell."

NOMINATIONS OPEN FOR OUTSTANDING PROFESSOR

Each year, the CSU system selects two professors from among the faculty of the participating campuses to be named Outstanding Professors of the Year. The persons selected receive a substantial cash award and a certificate of recognition. This year, each local faculty member will also receive a cash award. Faculty at CSUSB will be participating for the sixth consecutive year. Last (1984-85), Dr. Richard Rowland was the nominee from CSUSB.

Any member of the university community (faculty, staff, student or alumnus) may nominate a tenured-track professor (any rank) or administrator who holds faculty status. Because the primary criterion used in selecting the Outstanding Professor is superlative teaching, student and alumni participation is particularly encouraged by the Selection Committee.

Complete statements of nominating criteria and procedures and all necessary petition forms are available at department offices, at the Circulation Desk of the Library, at the office of the Associated Students, at the Student Union Information Desk, and at the Alumni Office.

The deadline for the submission of completed nominations is 4:30 p.m., November 6, 1985, at the Faculty Senate office, BH-21; so if you are interested in seeing a particular faculty member nominated, timely action is advised. Questions may be directed to members of the local Selection Committee. They are: Dr. Michael Tredick, Administrator; Lee Porter, Education; Jennifer Randlay, Humanities; Peter Williams, Natural Sciences; Michael Weiss, Social & Behavioral Sciences; J.C. Robinson, Administrative Representative; Helga Lingren, Alumni Representative and Chair; Sandra Boyd, Associated Students Representative.
MEETINGS
--Associated Students will be meeting from 10:00AM-Noon in the Student Union Senate Chambers.
--The Pep Club will be meeting from Noon-12:00PM in P.E. 129.
--The Cal State Organization for College Women will be meeting from Noon-1:00PM in the Student Union Senate Chambers.
--Black Student Union will be meeting from 1:00PM-2:00PM in the Student Union Senate Chambers.
--The Latter-Day Saints Student Association meets from 1:00PM-2:00PM in Student Union Room A.
--Baha'i Club meets from 1:00PM-2:00PM in Student Union Room B.
--Greek Council meets from 2:00-4:00PM in Student Union Rooms A and B.

SPORTS/LEISURE
--Aerobics from 5:15PM-6:15PM in the SUMP. 887-7498.
--The Serrano Village Halloween Carnival will be held from 7:00PM-1:00PM in the Serrano Village Quad. There will be a haunted house, seance room, photo-booth, etc. All tickets under $1.00. Students are encouraged to come in costume.
--Woodsmen Anonymous will be playing circus from Noon-1:00PM in the Student Union Senate Chambers.
--Volleyball Club will be playing in the GYM, 8:00PM.
--Delta Sigma Phi is having a children's Halloween party from 1:00-3:00PM in the Children's Center.

MEETINGS
--Associated Students will be meeting from Noon-1:00PM-2:00PM in Student Union Senate Chambers.
--Toastsmasters Club meets from 2:30PM in Student Union Rooms A and B.
--Campus Crusade for Christ meets from 7:30PM-8:30PM in CA-139.

SPORTS/LEISURE
--Intramural Flag Football at the football fields from 1:00-6:00PM.

WEDNESDAY, NOV. 8

MEETINGS
--R.O.T.C. Coyote Company meets at 6:30AM in the Student Service Atrium.
--Yamaha Sigma (Biology Club) meets at 9:00AM in Bio-301.
--Psi Chi (Psychology Club) meets from Noon-1:00PM in PS-207. Call 887-7226.
--M.E.C.H.A. meets from Noon-1:00PM in Student Room B.
--The Information Management Association meets from Noon-1:00PM in S.U. Room A.
--Alpha Kappa Psi meets from Noon-1:00PM in the Alder Room.
--Nursing Alumni Chapter meets from 5:00-6:30PM in Student Union Room A.

SPORTS/LEISURE
--Intramural Basketball from 2:15-4:00PM in the GYM.

SATURDAY, NOV. 2
SPORTS
--CSUSB Women's Volleyball vs. Biola, Here, 2:00PM.

MEETINGS
--Associated Students Special Event Committee meets from 8:00AM-9:00AM in the Student Union Senate Chambers.
--Associated Students Board of Directors meets in the Student Union Senate Chambers from 9:00AM-Noon.
--The Committee for Clubs will be meeting from Noon-1:30PM in the Student Union Senate Chambers.
--International Students Association meets from Noon-1:00PM in PS-227.
--Hispanic Faculty & Staff meets from Noon-1:00PM in Student Union Room A.
--Latter-Day Saints Association meets from 1:00PM-2:00PM in Student Union Room A.
--The Accounting Association is having a membership meeting from 4:00PM-5:00PM in Student Union Rooms A and B.

SUNDAY, NOV. 3

MEETINGS
--Sigma Chi Omicron Fraternity meets from 4:00PM-5:00PM in Student Union Room B.
--The Public Administration Association meets from 5:00PM-6:00PM in the Student Union Senate Chambers.
--CSUSB Alumni Board Meeting will be held from 6:30PM-8:30PM in the Student Union Senate Chambers.
--Alpha Phi Sorority meets from 7:00PM-9:00PM in Student Union Rooms A and B.

LECTURE
Dr. David Bellis, CSUSB Public Administration Department, will speak on "Political Reform in a Corrupt City", from 5:00PM-6:00PM in the Student Union Senate Chambers.

SPORTS
--Intramural Basketball from 2:15-4:00PM in the GYM.

FRIDAY, NOV. 1

MEETINGS
--Associated Students will be meeting from 10:00AM-Noon in the Student Union Senate Chambers.
--Toastsmasters Club meets from 2:30PM in Student Union Rooms A and B.
--Campus Crusade for Christ meets from 7:30PM-8:30PM in CA-139.

SPORTS/LEISURE
--Intramural Flag Football at the football fields from 1:00-6:00PM.
--Associated Students Dance from 9:00PM-1:00AM in the SUMP. Admission is $1.00.
As a Marine Officer, you could be in charge of a Mach 2 + F/A-18A, a vertical take-off Harrier or one of our other jets or helicopters. And you could do it by the time you're 23. But it takes a special commitment on your part. We demand leaders at all levels. We teach you to be one. If you're a freshman or sophomore, ask about our undergraduate officer commissioning programs. If you're a junior, check out our graduate programs. Starting salaries are from $17,000 to $23,000. And you can count on going farther...faster.

Go farther...faster. We're looking for a few good men.

White Nights

by Elieor Lawrence

Michael Baryshnikov makes his acting debut in "White Nights", a movie about a defecto's struggle for freedom, opening November 8th.

"White Nights is the story of a ballet star, Kolya Rodchenko (Baryshnikov), who has defected to the West and finds himself accidentally dropped back into his Russian world after his plane crashes near Siberia. He is pressured by the KGB and their Col. Chaiko (Jerry Skolimowski) in their attempt to use him as a symbol of the repentant, returning defector. In his effort to regain his freedom, Kolya becomes involved with an American expatriate (Gregory Hines), a Russian translator wife (Isabella Rossellini), and his former lover and ballet partner (Renee Mariner).

Directed by Taylor Hackford, the movie will boast an impressive soundtrack, featuring artists such as Chaka Khan, Roberta Flack, Robert Plant, Nile Rodgers, Lou Reed, John Hiatt, David Foster, and David Pack. The film's title song, written and performed by Lionel Richie, and "Separate Lives," a duet with Phil Collins and Marilyn Martin, are already climbing the top 40 charts.

Produced by Taylor Hackford and William S. Gilmore and directed by Hackford, the screenplay by James Goldman and Eric Hughes, is based on a story by James Goldman.

Fright Night?

It's a very dark and gloomy night. The only light that light your path is from the rays of the moon peering through the clouds. It's getting very cold so look for some shelter. Finally, you see an old shack and you slowly walk in. The door slams shut behind you. You try to open it, but it's no use. You're trapped! Then all of a sudden, you begin to hear noises and light begin to flicker on and off. Heavy breathing begins to echo through the shack. You run into the darkness without knowing your destination. Finally, you see an opening. You've escaped the terrifying Haunted House on Topay.

This is only one of the many attractions and activities that will be going on in Serrano Village on the night of Halloween. There will also be a seance room, the infamous Waterman jail, a whipping booth and food and refreshments. Plus to unwind from all of the tension built up from being scared, Serrano Village will sponsor an alley dance. Everyone is welcome. It's going to be a fun and exciting night!

Victor Uribe, Program Coordinator

For more information contact your Officer Selection Officer, Capt K. J. Nally, by calling collect (213) 298-6235 or 298-6238.
COMMANDO REVIEW:

LET'S HERE IT FOR ANOTHER CHEAP RAMBO RIP—OFF

by Steve Karen

If you're the kind of person who enjoys mindless fast-paced violence, then Arnold Schwarzenegger's latest movie Commando is just for you. With little or no plot, Commando is an insult to the intelligence of grade school students, and the plot has holes bigger than a hoola hoop.

Schwarzenegger plays ex-commando leader Col. Matrix, who only wants to lead a quiet and peaceful life with his young daughter, out in the middle of nowhere. From the horizon, a group of Army helicopters suddenly approach his home. Upon landing, General Kirby (Matrix's ex-C.O.) sternly warns Matrix about terrorists who are killing Matrix's ex unit veterans, and that they may be after him. Leaving Matrix with two guards, Kirby and his helicopters then disappear.

Leaving Matrix with two guards, suddenly Matrix's daughter, who put madness into music. And features his original band, The City Stickers.

Spike Jones—This 1950's series stars the wacky man who put madness into music. And features his original band, The City Stickers.

Audiophillis—NCTV's music concert series spotlights Phil Collins, Eddie Money, Joan Armatrading, John Waite and more.

The Adult Cartoon Show—From the archives of the Museum of Cartoon art. Featuring classic faves like Betty Boop, Bugs Bunny, high tech animation and international selections.

Uncensored—This engaging documentary series explores issues such as capital punishment, child abuse, and U.S. sponsored elections in El Salvador.

The Walter Winchell File—Another 1950's classic. Hard hitting stories from America's number one newspaper columnist.

New Grooves—The most progressive mix of music videos anywhere, hosted by Meg Griffin. Based on reported airplay from over 150 college radio stations, clubs and record stores.

Tune in to Campus Network's National College Television on your campus channel or in TV lounges, National College Television. WHAT A RELIEF!

Brought to you by

Student Membership includes:

- Unlimited co-ed aerobics
- Computerized Lifecycles
- Saunas & jacuzzis
- Open 24 Hours everyday*
- Super lines of Nautilus equipment
- Full locked shower facilities
- Personalized nutrition program
- Guartanteed annual renewal
- Membership valid at all 18 locations

SPECIAL STUDENT OFFER

2 Years

$119

$139 W/Racquetball

Bring this ad for one complimentary workout!

Must show student ID at time of enrollment to qualify for this student offer.
Choosing a long distance company is a lot like choosing a roommate.

It's better to know what they're like before you move in.

Living together with someone for the first time can be an "educational" experience.
And living with a long distance company isn't any different. Because some companies may not give you all the services you're used to getting from AT&T.
For instance, with some companies you have to spend a certain amount before you qualify for their special volume discounts. With some others, voice quality may vary.
But when you choose AT&T, there won't be any surprises when you move in. You'll get the same high-quality, trouble-free service you're used to.
With calls that sound as close as next door, Guaranteed 60% and 40% discounts off our Day Rate—so you can talk during the times you can relax. Immediate credit for wrong numbers. Operator assistance and collect calling.
So when you're asked to choose a long distance company, choose AT&T. Because whether you're into Mozart or metal, quality is the one thing everyone can agree on.
Reach out and touch someone!

AT&T
The right choice.
Hacker's haven holds hope

Kick computer confusion

by Kerri Hawkins

You don't have to be a hacker, or even know what one is to use the Computer Center at California State University, San Bernardino.

All students and faculty with valid and current identification cards may use the facilities, and visitors to the campus may access the computers on a non-interference basis.

The Computer Center is located in the basement of the Library and is accessible through the terminals located throughout the campus. The Center is available for use on a 24-hour basis, and classes and demonstrations have not been previously scheduled.

Rooms in the Biological Science, Physical Science, Student Services, and Administration buildings are wired to the Center and are also available to students and faculty.

Users of the Computer Center have access to three distinct time-sharing systems, which allow users at different locations to use the same computer at the same time.

The first system, the PDP-11/44 minicomputer can be used for learning BASIC and PASCAL and for various computer-assisted instruction (CAI) packages. The larger second and third CYBER systems are used for programming in FORTRAN, COBOL, PASCAL, and for data retrievalernal or CAI simulations.

In addition to the three systems, the Center also has six microcomputer labs, complete with IBM PC, IBM XT, Apple IIe, and Apple Macintosh computers.

Instructional use of the computer systems at CSUSB is free, but students and faculty must obtain "Timex" before they have access to the system. An account consists of a number and a password, and provides protection for both the system and the operator.

Passwords should always be kept secret and account numbers should never be loaned or given away.

Application forms to open an account are available from the Instructional Support Staff. The user should wait 24 hours for processing new accounts before using them.

A CLP enrollment up, activities expanded

by Dan Williams

The American Culture and Language Program has a new director this fall, enrollment has increased, and so has the number of projects and activities being planned by the department.

Linda Chaffee, who was recently named director of ACLP, is ready to undertake a full calendar of events scheduled for this quarter. ACLP students have already experienced the excitement of Knott's Berry Farm.

Chaffee worked for the Saudi government, through Loma Linda University, tutoring Saudi students in medical English. She came to

Cal State in January 1983 as a teacher in ACLP.

The ACLP is an intensive English program designed for international students at all levels. It is five months to bring the students' English up to college level, and serve as a "melting pot" where they can share experiences with other students from various countries.

The ACLP was established in the fall of 1982, and has doubled in size to the present enrollment of 42 students. Chaffee said the goal of the program is to have an enrollment of 80 to 100 students.

Chaffee's main priorities are marketing the program, especially in Europe, and acquiring more housing for the international students. One of the current housing projects is an "International House", which would be similar to a dormitory for foreign students, located off-campus.

The present 42 students represent ten countries, including Japan, Taiwan, Indonesia, Korea, India, Venezuela, Jordan, Saudi Arabia, Taiwan, and Peru.

One of the main goals of the program is to help the students pass the TOEFL's (Test of English as a Foreign Language) which all the students are required to pass in order to stay in this country.

Campus coyotes clean up act

by Dan Williams

Jim Urana, head of plant operations, and his crew have had their hands full recently dealing with animal problems. First it was rabbits devouring the grass and foliage, now it's coyotes who aren't potty-trained.

The rabbit problem is one that the grounds maintenance workers may have to live with, but the coyotes created a situation that--most agreed--had become unbearable.

The psychology department currently houses seven coyotes in an 80-foot square research compound at the north end of the campus. The coyotes are kept in kennels at one end of the compound, and until now they were merely herded into an open hole behind the pen. Needless to

say, this was neither pleasant to the senses or very sanitary, so Urana recently acquired an old, 500-gallon water tank from the city water department to help "clean up" the problem.

The tank will be buried so that maintenance workers can simply hose or sweep the waste into it, and it will then be pumped out periodically, ridding the university mascots of their plumbing problems.

The urgency of attending to the matter increased recently with the emergence of animal liberation and "International House", according to Dr. Stuart Ellins, the psychology professor who is in charge of the coyotes.

"We've never had a problem with this, but we want to be sure there's no cause for one in the future," Ellins stated. The compound is visited regularly by a federal inspector.

The coyote research compound was built on campus in 1977, and is used by Ellins and his students for experiments in predatory and food behavior. Ellins has proved the theory of food aversion, which means that when an animal, such as a coyote, continually eats something that makes it sick, it becomes conditioned not to eat it. He did this by offering the coyotes chemically treated chickens. After a period of time, the coyotes started rejecting all chicken, treated or not.

Ellins' students are currently experimenting with place- aversion, which could keep coyotes from inhabiting urban areas, and they hope the coyotes will teach these behaviors to their pups.

Extended Ed geared for working people

by Blaine Harrington

The Office of Extended Education is striving to make learning more accessible to the adult student at Cal State San Bernardino.

In its 16th year, Extended Education offers credit and noncredit courses, special sessions, weekend workshops and conferences, all with the working person in mind.

More than 9,000 people take part in the Cal State Extended Education programs each year. Students range from professional people updating career skills to people at college for the first time.

The Open University program allows members of the community to take regular university courses, without going through the standard admissions process.

Extended Education is serving the adult student at Cal State San Bernardino, with classes being offered in downtown San Bernardino, Loma Linda, Azusa, and on campus.

The Achille Lauro Hijacking: THE LAST STRAW?

by John Purcell

When the four F-14 Tomcat fighter planes were scrambled from the U.S. Carrier Saratoga on October 10, the sole objective was the capture of the Achille Lauro hijackers. The capture was a rare victory for the U.S. over terrorism.

Perhaps the most important factor in the nation’s success was the timing of the event. Occurring while the memory of the hijacking of the TWA Flight 847 was still somewhat fresh in the minds of the American people, the Achille Lauro hijacking also served to remind Americans of the Beirut Massacre and the Tehran nightmares.

Each of these acts of terrorism incensed Americans not only because of the discernibly deadly acts that were done to our citizens, but also because of our inability to react. The frustration of a continuing inability to deter terrorism bloomed like the beam of a lighthouse during the Achille Lauro incident. America’s desire to lash out at the scourge of terrorism was evident in the flurry of overzealous statements made by various members of the President’s administration. It also showed in the President’s unwillingness to wait for a radio line to be secured from Air Force One to Secretary of State George Schultz’s plane. The President chose, instead, to speak to Schultz on an open line.

Locally, the feeling that this particular incident was the final straw was seen, or rather, heard on a radio broadcast by the usually staid rock station KOLA radio station, which issued a blustering attack at the President for his failure to take action—the broadcast came before the capture of the hijackers against the hijackers—against the hijackers. Calling the hijackers cowards and “low-life creeps,” KOLA called for an end to the talk and a start toward ending the problem.

America cried for justice. The American people stood up and said, “Enough is enough.”

The capture of the hijackers was a victory for America, but it is one which could lead to another string of losses to terrorism. The swell of patriotism that follows such a victory may last for a considerable amount of time. But it will fade away. This single victory will not end the threat of terrorism. This victory can, however, be a turning point in the war against terrorism. It can also be one which leads to further terrorist victories. The key factor will be the reaction of the American people the next time an American citizen is taken hostage.

How many attacks will it take until we again say, “Enough is enough”? How far will we go to see that justice is again served?

A WARNING TO STUDENTS

The California Student Aid Commission has issued a warning to parents and students about insurance companies using student loans to entice prospective clients into purchasing insurance policies. This marketing scheme, which has already been the target of criticism in other states, has surfaced here in California.

Its basic feature is to package an insurance policy with a conditional commitment for a Guaranteed Student Loan from the insurance company. The implication is that the purchase of an insurance policy will make it possible for the student to borrow a student loan which he/she might not otherwise receive.

Arthur S. Marmaduke, Director of the Student Aid Commission, explains that parents and students do not need to buy expensive life insurance policies in order to gain access to federal guaranteed student loans, regardless of the claims of insurance agents. California students already enjoy ready access to the student loan program through over a hundred banks, savings and loans, and credit unions that participate in the guaranteed student loan program, says Marmaduke.

Marmaduke emphasizes that the insurance companies involved have no connection with the State Guaranteed Student Loan program. Instead, the loans offered by the insurance companies are administered by a private corporation that is located out-of-state.

The California Student Aid Commission is located at 8550 University Parkway, San Bernardino, California 92407. 

The Cal State Chronicle is published under the control of the Cal State Media Commission. It is published on a weekly basis for a total of 28 issues less quarter breaks and final exam periods. Advertising space is available to advertisers on a first-come, first-served basis. The Cal State Chronicle is published on a weekly basis for a total of 32 issues less quarter breaks and final exam periods.
