ROTC Demonstrates Rappelling Techniques

by Melissa McDowell

A huge green helicopter beats its way through the air over the Pfau Library. Soon you could see camouflaged figures dropping from ropes like spiders.

An Army invasion of Cal State? Of course not. This was just the University ROTC rappelling team out for the day.

What happened October 26 is not an uncommon sight here on campus. Every year for Open House the ROTC program demonstrates rappelling techniques for students and the public.

Many people who came to study on Saturday stopped to look at the helicopter and watch cadets rappel down the front of the library.

"This is the first time we got to rappel from the helicopter," said Alan Horn, ROTC Public Affairs Officer. Before the officers were the only ones allowed.

Horn said all ROTC members rappelling from the aircraft first had to be qualified to do so.

"We went over to the Rialto Airport and used the Sheriff's helicopter rappel tower to practice," he said.

An unplanned event for the day was the surprise bath for Captains

VOICE INPUT COMPUTER TO BE DEMONSTRATED

On Monday, November 18th the Input Technology Corporation will be demonstrating their voice input systems for computers here at CSUSB. This relatively inexpensive addition to a computer allows the user to have hands free for management of papers and it is considered a helpful and fun convenience to those who must use computers often in a business setting. It is the executive's delight. One no longer talks of hands-on experience, but of voice-on experience.

This voice-into computer system is of particular exciting interest to the disabled who cannot use their hands with ease. It is also extraordinary as a tool for the disabled because it allows persons with severely impaired speech to enter data even though their speech is not clear. For the communications impaired person the system functions by programming the voice of the speech impaired person and then responding to it. The system is run by IBM, Apple, Apple II, Apple III, and Apple IIc.

Interested persons from the campus community or any friends from the community at large may attend the demonstration which will be held from 12 noon until 2pm at the Services to Students with Disabilities office in the Pfau Library room PJ 101. The telephone number is 887-7662.
Lecture Outlines Evolution of Sculptures and Paintings

Riverside artist, Timothy Taylor, will discuss the evolution of his paintings and sculptures over the past 10 years in a lecture at 7:30pm, Thursday, Nov. 7 at the Rex Wignall Museum Gallery at Chaffey Community College in Rancho Cucamonga.

Taylor's most recent body of work is on display at the gallery through Nov. 15. The central theme of Taylor's work examines the cycle of life, and offers a view of a creative potential possible in relationships between men and women. Works include 22 lifetime sculptures with paintings and one collection devoted to the installation of sculptures and paintings.

The exhibit, entitled, "In Search of the Elusive Passion," represents 16 months of focused work. This body of work has evolved over the past 10 years during which the artist has dealt with space and the human figure in a variety of ways. The artist has discussed the many levels of meaning his works express—especially the full range of human emotions from self-satisfaction, the desire for public approval and success, the desire to engage in friendships and the basic human need to be included in the surrounding relationships of a family as well as sexual and personal desire.

"This is one of the most important shows for the museum and the school," said Dr. Cliff Johnson, director of the Eucalyptus Room. "The way in which they are interdependent, whether the artist is an emerging artist or a major figure in the world like Tim Taylor," said museum director Virginia Eaton.

Unusual design features of the exhibit include a sequence in which the upper torsos of two divers, a man and a woman, explode from painted pools. As part of their diving sequence, their complete figures are suspended in the space above gallery guests.

Taylor, who has his Masters of Fine Arts from Claremont Graduate School, says he is very interested in creating real and illusionary space.

The artist has used surveyed and other civil engineering techniques in some of his earlier works which have included "One Point Technique," a technique he calls "one point projection." This technique allows a scene to be recreated on an uneven surface which appears as continuous only from one vantage point in the gallery.

Taylor was born in Los Angeles. He received his bachelors degree UC Riverside in 1972 and his Masters of Fine Arts from Claremont Graduate School in 1974. His postgraduate work includes filmmaking at USC and printmaking at Stanford University.

Since 1974 he has exhibited his work at the San Francisco Museum of Fine Art, Downtown; Gallery of Photography, Vancouver; UC Riverside; and the Island Empire Gallery in Riverside.

He has given guest lectures at UC Riverside, USC, College of the Desert in Palm Springs and California State College, San Bernardino. He has taught at Laguna Beach School of Fine Art and Design. He is married and lives in Riverside where he works and has a studio.

NEWS BRIEFS

Special Presentation
A lecture on the insanity defense by Dr. Elta Simon, J.D., Dean of the School of Justice, American University. Former editor of The Sociological Review. Wednesday, November 13, 1985, 12:00-1:30pm in the Eucalyptus Room, University Commons.

Round Table Discussions
Tuesday, November 12, 1985 is the University Commons Eucalyptus Room, 12:00-1:30pm.

Soccer
Cal State San Bernardino's soccer team went into action against Bola College never having had a winning season. This was only regulation time. The overtime goal was scored by Brett Baker. One of last year's leading scorers. This was our best effort so far this season," commented Coach Zuey. It was a total team effort. This week's effort is the result of the team's practice for the coyotes. We wish you well, thanks for a great season.

ALCAPA Welcomes Lee Kinney
The guest speaker for the November 6, 1985, ALCAPA Club meeting will be Lee Kinney. A CSUSB Archaeology Major. Kinney was one of fifteen graduate students from the U.S. and Canada who spent six weeks this summer at Koobi, East Africa as part of a study project directed by the Richard Leakey National Museum of Studies and Harvard University. Kinney was one of the six students who actually conducted the research at Koobi. The program will include a slide presentation and commentary on the paleoanthropology, archaeology and geology at Koobi Fora. The meeting begins at 6:30pm, Thursday, November 14, 1985 at the Student Union Conference Center's program on AIDS in the local community with the likes of "Satan's Angel," "The H-Bomb!" and "Arms Race or Human Race." I'm attempting to get information on the Student Union's plans for AIDS. The Student Union Snack Bar will be held on Thursday, November 14th for a few friends and share some good times and good music!!!

FOLK MUSICIAN TO SING

Mark Levy has been singing to and motivating campus, church, and community populations since 1968. He has toured much of the U.S., as well as Germany and the Soviet Union.

In 1983, he and his wife, Helene Opener, began sharing information and music with audiences from Washington to Florida. Their powerful, honest messages were countered with hostility, other times those disagreeing were actually in search of more information. Helene, a high school instructor, will not be joining Mark on his Southern California tour. Mark's concern is to "take the responsibility for peace back from political leaders," a concern he felt the students of today are the activists of twenty years ago and "we can once again get involved in the anti-nuclear movement."

Mark, who plays a variety of instruments and sings in eight languages, will be entertaining the local community with the likes of "Satan's Angel," "The H-Bomb!" and "Arms Race or Human Race." I'm attempting to get information on the Student Union's plans for AIDS. The Student Union Snack Bar will be held on Thursday, November 14th for a few friends and share some good times and good music!!!

G.L.U. MEETING
The Gay and Lesbian Union will meet Tuesday, November 12 from Noon-12:30pm in Student Services 171. We will be discussing "AIDS Awareness." At 12:30 we will attend the Health Center's program on AIDS in the Student Union SUMP. Students, faculty, and staff are encouraged to be there for more information. Contact faculty advisor Dr. Craig Henderson, Dean of Students Office, 887-7524.

Choosing Your College Major
The Career Planning And Placement Center will be offering a workshop for students on how to pick a college major. This workshop will focus on how to figure out the major which is compatible with your interests as well as your future goals.

You will have the opportunity to determine your Interests, Values, and Skills and evaluate your relationship to available college majors. Further consideration will be given to how various majors fit into future careers and how all majors can be marketed.

Date Monday, November 11 and Wednesday, November 13 Time 6:00-7:30pm Place: Student Union Senate Chambers

For further information contact the Career Planning And Placement Center at 887-7555.

MISSING ANYTHING?
Those having lost personal items on campus during the last month are encouraged to contact the University Police before November 15. Be prepared with a complete description of the item lost and an accurate-as-possible date of loss. Unclaimed items will be sold by the Cal-State Associates at the upcoming campus "Novemberfest." Proceeds will benefit the Foundation Scholarship Fund. Call 887-7555.

R.N. ASSOC. LECTURES
The R.N. Association will be sponsoring two lectures during the month of November.

On November 11, 1985 (Monday), Dr. Patterson will speak on "Legislative Bills and Issues Concerning Nursing," in PS 121 from 12-1pm.

On November 26, 1985 (Tuesday), Dr. Malvadoando will speak on "Benefits of Higher Education," in PS 121 from 12-1pm.

Take the time to come and listen to these two dynamic speakers. Your time will be well spent.

Food Basket Aid
The R.N. Association is sponsoring a holiday food basket drive which will distribute food items to needy families in the Inland Empire for Thanksgiving and Christmas. Collection boxes will be displayed in the Student Union and Library Foyer beginning Nov. 6-Nov-20, and Dec. 2nd-Dec.13th.

Please donate any canned goods, boxed non-perishables and staple items i.e. sugar, flour, rice, etc. Make a needy family holidays brighter by giving.

R.N. members are kicking off the project by trick or treating in the community food items.

Thanks, Cal State Students. We need your support.

The R.N. Association
Steve Heynen and Mike Bailey. During a demonstration, the two men, hanging in harnesses from the helicopter, were dunked in the reservoir behind Cal State.

Master Sgt. Cooley masterminded the plot with the help of the pilots. Both officers were brought back wet, disgruntled but unharmed. Cadets had a hard time keeping straight faces.

Being in a helicopter wasn’t a new experience for ROTC students. The prior weekend, cadets were flying around Camp Pendleton.

It’s called Air Mobile Assault; troops being placed in an area by aircraft. Throughout the weekend, members carried out offense and defense maneuvers with other ROTC cadets in the area.

With senior cadets’ instructions, newcomers attacked and held cited points. Reporter John Pomfrost, from “The Press Enterprise,” was on hand to cover the "battles." His story, along with pictures featuring Cal State ROTC members, was featured in the paper the following Monday.

Evans looks to expansion

by Midge Thornton

Increasing student enrollment and improving campus facilities are two major goals for the 1985-1986 school year, according to CSUSB President Anthony H. Evans.

Evans, a former provost and vice president for academic affairs at Eastern Michigan University, came to Cal State in 1982.

The campus enrollment has increased considerably during the last three years and the president hopes to increase it even further in the future. In order to achieve this, he will focus his efforts toward providing additional instruction and facilities for CSUSB students.

Evans is working towards furthering academic programs over the next few years by providing disciplines in areas such as industrial technology, nutritional science, and speech pathology.

One major concern of Evans is special needs on campus. The state legislature has approved the construction of a new faculty office building. Construction is expected to begin January of next year, but no specific date has been set.

Plans are also in the works to expand the bookstore. The administration will hold preliminary discussions with engineers to consider the feasibility of adding a second floor. In addition, the possibility of adding a larger room to the commons building will be explored.

Evans has developed a 5-year plan to construct a major classroom building. He is aiming for a $5 million project to be completed by 1990, and is now in the process of negotiating with trustees and legislature.

President Evans believes community relations have an important role in promoting CSUSB. A greater community and alumni outreach is part of the administration's efforts to increase the enrollment and graduate more students. Strengthening internal relations and public relations will also aid in financial funding for the many projects planned.

Because the university is expanding so rapidly, new levels are higher than normal. But Evans feels that's healthy and benefit the university immensely.

PLATO now available at the Learning Center

by Jay Ross

Dr. Marian Talley, newly appointed director of the Learning Center, discussed the center, where help learners learn.

The Learning Center, located in the basement of the library, is a Kaleidoscope published weekly by the Department of Communication to augment classroom instruction. Inquiries and comments may be addressed to Kaleidoscope, care of the Department of Communication, California State University, San Bernardino, 5800 University Parkway, San Bernardino, California, 92407.

Congressman stresses changes for new age

by Baine Harrington

Congressman George Brown, D-36th District, addressed the Roundtable discussion group Monday, Oct. 26, on new technology and new educational needs to keep up with it.

Responding to Brown were Dr. Lee Kalbus of CSUSB's chemistry department, and Dr. Jerrold Pritchard, associate vice president of academic programs.

The discussion was held in the Eucalyptus Room of the lower commons, between Noon and 1:30pm.

"A generic problem in our society, is that education is based on specialization. We tend to forget the broader spectrum."

"A generic problem in our society, is that education is based on specialization. We tend to forget the broader spectrum."

Mr. Geane will also work with those students who have medical insurance to assure that the student will get the best possible deal.

If you have special prescriptions that need to be filled, be sure you contact Ms. Geane beforehand, so she has plenty of time to place the order.

The pharmacy is open Monday through Thursday 8:30-12:30 and 1:30-5:00, and Friday 8:30-12:30 and 1:30-4:30.

Pharmacy offers good deal

by Shawa Baker

New students will be happy to learn that prescription and nonprescription medications can be purchased at Cal State's Health Center pharmacy, at discount prices.

Pharmacy services are available for full-time and part-time students. Pharmacist Peggy Geane will fill prescriptions from Health Center doctors or from your own personal doctor at a fraction of drug store prices.

Not only does the pharmacy provide prescription medication at low prices, but it also has a wide selection of over-the-counter medications. The accompanying table compares the prices of a few years back was rejected the quality control theories of Robert Denning. The Japanese were open to new ideas. They were less complacent. Now Japan produces good with high quality control at less cost than we do. According to Brown, America expected to be at the forefront of the high-tech revolution, and is now struggling to stay in the race.---"A generic problem in our society, is that education is based on specialization. We tend to forget the broader spectrum."
Has the SUMP Become A Children’s Zoo?

by Chris Ellis

A big question is being asked by numerous CSUSB students lately: What has happened to our Friday night dances?

Many students expecting to have a good time with fellow students at the A.S. sponsored events have instead discovered the SUMP overrun by undisciplined I.D.s leading many to ask, What students at the A.S. sponsored sight danced should be a little more temperance.

dance right events have instead discovered the insult to injury, our students are and the Associated Students. I am the Associated Students serious Cal

Friday night dances, which brings in outside sums of money from off-campus.

the high school invasion is to raise the Friday night dances. So far, attendance by Cal State Students has averaged only about 45 to 50 per night, and the reason for the low attendance overwhelmingly cited by students is the 200-250 high school students who swarm throughout the Student Union during the dance.

In addition to the problems created at the dances by the underaged kids (slam dancing, fighting, having to check I.D.s in the Pub, etc.) there have been increasing problems with juvenile wandering elsewhere on campus and interfering with students and with other activities taking place such as the Delta Sigma Phi & Alpha Phi Halloween party in the Lower Commons where they continually had to be driven off when a significant number of people attempted to crash the social intended only for Delta Sigma Phi & Alpha Phi members and their guests.

The good news is there may be light at the end of the tunnel. The word going out around is that Friday Nov. 1 will be the last of the high school invasion for awhile at least. Nov. 8 will see the Outer Space Dance culminating Outer Space Week here on campus and that this event will be for Cal State Students and their guests only. Also, A.S. is discussing moving the Section 25 teen-night-club nights to Saturday nights where they will not compete with Cal State Students right to have fun and party in their Student Union.

If They Fail A Class, Kick Them Out!

Dear Editor,

This letter is written in support of the 2.0 minimum GPA requirement for every quarter of academic work regardless of how high the overall GPA is to hold office in any club/organization, and for the Associated Students. I am very happy such a requirement in my school was established jointly by the CSUSB Administration and the Associated Students since Cal State opened for classes in 1965.

This is an excellent policy because we must train for our future careers, and not chiefly to become “party animals.” After all, who would hire you if you have a 1.0 GPA and still get a degree? However, there is one loophole that bothers me: it is possible to fail one class and still get a 2.0 and meet the quarter GPA requirement. For example, all I have to do is get B grades in two of my five unit classes, and I need not care about my third class. That averages out to 2.0 assuming I get “fail” on my third class. I think a new rule should be added to say that no one may remain in any organization/club, or Associated Students Office if he/she fails in any class, even if he/she has a straight A on his/her other classes in any quarter. Such a rule would force student leaders like myself to seek extra assistance in tough subjects, like hiring a private tutor (as in my case for Math 110), visit the Learning Center located in the basement of Pius Library; or better yet, learn to budget our time more for studying.

If I were to fail a class, I would be setting a bad example as President of the Delta Sigma Phi Fraternity and also a member of the Greek System at CSUSB as well. People who are going to oppose my proposal say we all run into tough classes once and awhile. To them, I say the real world after graduation is much tougher. Your bosses that you work for are going to grade and evaluate you daily without your knowledge and any warning. It is far better to prepare for reality right now. To prove I am not kidding, I will seriously consider resignation from the presidency of the Fraternity should I still get a 2.0 this quarter with a “fail grade” in any of my classes. (Of course, I will be gone anyway if I get 1.99 or less).

In closing, I urge you to speak to your Associated Students Board of Directors and ask them to consider such a rule. It is not only good for them to have it, but for all of us too.

Bill Gropp, Jr.
President, Delta Sigma Phi
