February 26th 1986

CSUSB
“Bus Stop,” a comedy about love and loneliness, will be presented by the Theatre Arts Department at CSUSB Feb. 27-28 and March 1, 5-8.

Written by William Inge in 1955, “Bus Stop” is concerned with a group of people temporarily stranded in a small cafe when a bus becomes snowbound. The play was made into a major motion picture starring Marilyn Monroe and Don Murray.

Inge is probably one of our better, but less appreciated American playwrights, in comparison with Tennessee Williams or Arthur Miller,” commented Dr. William Slout, professor of theatre arts and director of the production. “He most often wrote about being isolated, loneliness and the need for love.

The focus is on a nightclub singer of little ability and a Montana cowboy who owns his own ranch.

Another thread of the plot concerns a lonely restaurant proprietor who takes an opportunity to have a relationship with the bus driver. There also is a story line on a jaded professor who likes to pick up young women.

“It is a very moving and funny theatre and I am quite pleased with the balance of the cast and their ability to carry the roles.”

Members of the cast include Marvin Riggins of Blythe; Dagmar Handlos and Michele Smith of Crestline; Deborah Mathews of Rialto; Lonnie LaPointe, David Pavao and Lance Rossi of San Bernardino; and Stephen Steele of Yucaipa. Peter Hughes of Redlands will serve as stage manager.

The winter production replaces the originally scheduled debut of a former student’s work “Halley’s Comet.”

All performances of “Bus Stop” will begin at 8:15 p.m. in the University Theatre, located in the Creative Arts Building.

Tickets are $5 general admission and $2.50 for students and senior citizens. Reservations may be made by calling the Theatre Arts Department at 887-7452 between 9 a.m. and 4 p.m. Monday-Friday.
Volunteers Needed.
The Escape Program, which provides weekend outings primarily for students, is in need of volunteers to serve as advisors for trips planned for spring quarters. Persons would not be paid, but would be free to pay admission to the events. Upcoming activities include trips to the downtown Los Angeles garment district and Catalina Island, a Laker's game and other sports events, and a special "college night" at Disneyland, which will feature a discount admission March 14. Those interested should contact Joe Long (Recreational Sports) at Ext. 7564 or Sandy Weiser (Special Events) at Ext. 7944.

Women's History Week
Cal State's Organization for College Women is sponsoring a week of events celebrating National Women's History Week from Monday, March 3 through Saturday, March 8, 1986 in the Student Union Multi-Purpose Room at Cal State University, San Bernardino. Speakers are scheduled from 12:30 to 1:30 P.M. and include Mayor Erylin Wilcox, City Clerk, Shana Clark, Wilmer Carter, Dr. Judith Rymer, Dr. Dorothy Mette, and Susan Reddy Butler. The Community is urged to attend and admission is free. For further information, contact Lee Ana Overstreet at 820-0272.

World Bank Fights Hunger
by Melissa E. McDowell
What can a bank do for the world's hungry such as the people of Africa? The World Bank, owned by 146 countries, is doing plenty. The World Bank directs its loans to the poorest countries of the developing world with the idea of promoting economic development. The bank's goal is to have such countries become independent, able to afford food, education and medical care. The bank, created following the end of World War II, initially consisted of just one body. Known as the International Bank for Reconstruction and Development, it provided loans at near market rates. In the intervening years other bodies have been added: the International Development Association, which provides loans to the poorest development countries, and the International Finance Corporation, which promotes the growth of private enterprises in developing countries. With a staff of roughly 6,000 people recruited from some 100 countries and an annual lending program of about $15 billion, the World Bank is today the world's largest development agency. Along with providing financial resources, technical assistance and training, it assists in developing countries in such areas as agriculture, industry, education, and health. With headquarters in Washington D.C., the World Bank conducts its business in a number of developing countries, providing assistance and expertise to governments in improving the lives of their citizens. The bank's efforts can be seen in the various loans and grants that it has made over the years. For example, in 1985, the World Bank provided a loan of $300 million to the government of India for the purpose of providing educational opportunities for children. The loan was intended to help children from poor backgrounds gain access to quality education, particularly in rural areas. The bank's efforts are also evident in the development of infrastructure, such as roads, bridges, and water systems. These projects are aimed at improving the living conditions of people in developing countries. The World Bank also plays a key role in helping countries to develop strategies for economic development. It provides technical assistance, advice, and training to governments on issues such as taxation, budgeting, and macroeconomic policy. These efforts are aimed at helping countries to create the conditions necessary for sustained economic growth. In conclusion, the World Bank is a vital institution in the fight against global hunger. By providing loans, technical assistance, and training to developing countries, the bank is helping to create the conditions necessary for economic development and poverty reduction. The bank's efforts are essential in the fight against global hunger.
ARE YOU TAKING ADVANTAGE OF THESE SERVICES?

by Shana McLean

During the academic year, every full-time student on campus pays $20 in Associated Student fees. What is this money devoted to? As with all other campus' A.S. fees, the money is used in numerous ways benefitting the student body. Just a few of these services can be recreational and social activities, student clubs, transportation services, and student publications. As a test of your campus awareness and to insure you the maximum use of your A.S. fees, see if you are using, or would like to use, any of the following student services:

Escape Program

Need to get away from it all? Through the Escape program, you and your friends can watch whales, Lakers, Kings, or Mickey Mouse. How about a hot tub or a relaxing hot tub? While participants pay discount rates, A.S. provides the front money to buy tickets at group rates and put deposits on trips. Check at the Student Union for details.

Emergency Loan Fund

Have you ever had an emergency and needed money fast? Thanks for A.S. students are able to borrow up to $120 for such financial emergencies as buying books, paying fees, or taking care of rent. In ten years, A.S. has donated $20,000 to the Emergency Loan Fund. The Financial Aid Office has all the details.

ILAC

Many times a research project calls for more information than is found in our own Palm Library. Fortunately, the Inland Empire Academic Library Cooperative, guaranteed by Associated Students, allows students to borrow books from UC Riverside, University of Redlands, and 18 other academic libraries. This service is especially beneficial for graduate students.

Committee For Clubs

In 1985-86, Associated Students allocated $2000 for use by the Committee for Clubs in funding on-campus clubs and organizations. Clubs such as Accounting, Marketing, Skating, BSU, and Mecha exist and grow with the help of A.S. Students who are interested in these particular fields are able to learn more about their organization, gain experience, raise money, and have fun, too.

Wide-screen TV

Do you remember the Space Shuttle's very first landing at Edwards' Air Force Base? Many students at CSUSB were able to cheer the shuttle down as they viewed the landing on the wide-screen TV located in the Pub. Associated Students has furnished the TV for students to see video programs, super bowls, world series, or mid-day soap operas. As a relaxing interlude to a busy day, go on to the Pub and see what's on the tube!

In addition to these student services, A.S. also supports the newspaper you are currently reading, the Children's Center, ski rental and camping equipment, publicity for clubs, and many more services. So pay attention to this information and any information to follow, you may be quizzed later...

Black History Round Table

"Civil Rights From A Black Perspective"

Students in the pub relax while watching A.S.'s wide-screen TV.

The second in a two-part panel discussion of civil rights issues will be held at noon, Thursday, Feb. 27 at CSUSB as part of the university's observance of Black History Month.

"The Civil Rights Movement from a Black Perspective" will be addressed in an open forum in the university's Student Union Multi-Purpose Room. The event is free and open to the public.

The session will be moderated by Dr. Mildred Henry, assistant professor of English at Cal State. She brings to the discussion her experience as a Black woman who lived in the south during segregation. A Fontana resident, Dr. Henry joined Cal State in 1983.

Other panelists include Ann Rhodes, supervisor of the Community Services Department for the city of San Bernardino. She is a member of the National Council of Negro Women and the League of Women Voters. A past president of the San Bernardino branch of the NAACP, she remains active with the civil rights group.

Maurice Roberson is former vice chair of the Riverside mayor's Youth Advisory Council and the intercity program director of the Riverside County YMCA. He has lectured on Black literature at San Bernardino Valley College and served as the college's first human relations coordinator.

Alicia Thompson of San Bernardino has been active in many civil rights activities, including desegregation of the community's restaurants. He is treasurer of the Westside Action Group and chaired the city's Black History parade, which was held Feb. 1.

Dr. LeMar Foster is a San Bernardino pastor who worked personally with Dr. Martin Luther King. He serves on the board of directors of the Boys Club and is a member of the San Bernardino Kiwanis.

The panel discussion follows a Feb. 18 panel examining similar issues from a non-Black perspective. Both events have been sponsored by the university's Intellectual Life Committee.

Men’s Basketball Closes Out Season

Cal State University, San Bernardino’s men’s basketball team, 10-14 as of last Tuesday, and riding a five-game win streak, closed out the season last week as they played two games.

On Wednesday, Feb. 19 at 8 p.m., the Coyotes hosted the La Verne University Leopards. Earlier this year, Cal State posted a 79-68 victory over La Verne. In its final game of the season on Saturday, Feb. 22, Cal State traveled to La Jolla for a contest with the UC San Diego Tritons. Tip-off was set for 7:30 p.m. The two teams met on Cal State’s court in late January with the Tritons defeating the Coyotes, 95-76. Cal State posted two victories two weeks ago to extend its team record win streak to five. For the second time this year Cal State defeated Occidental on Feb. 12. Enroute to the 78-66 victory, Cal State’s five starters scored in double figures. Junior forward Edwin Wimby (New Orleans, Imperial Valley) topped Cal State scorers with 19 while Reid Burns (senior, San Diego), Gregg Bujnovsky (freshman, Mission Viejo), Jeff Ames (senior, Pico Rivera) and Mike Jackson (senior, San Bernardino) scored 15, 15, 11, and 10 respectively.

Against Whittier College, Edwin Wimby’s 32 point performance set a new single game scoring record. The old mark of 29 points was held by Coyote teammate Jeff Ames. Wimby also grabbed 11 rebounds to pace Cal State and Mike Jackson pulled down 10 boards. Ames added 24 points in the winning effort while Bujnovsky registered a season high 20 points.

On the year, Ames is the Coyote’s top scorer with 16.5 points per game. He is shooting 86.2% (119 of 138) from the free throw line. Wimby and Burns average 15.7 and 11.6 points per game respectively. Jackson and Wimby lead the rebounders with 6.5 per game for Jackson and 5.7 for Wimby.

Cal State set a single game attendance record as 396 fans were on hand to see Cal State defeat Whittier College as part of Cal State’s homecoming activities.
Cal State's Women's Basketball team wrapped up their 1986 season last Saturday, falling to Cal State Stanford by a score of 52-75. However, the team showed a dramatic turnaround this season, ending with a final record of 17-9, as opposed to last year's 4-20 record.

TENNIS

Only one match was on tap for Cal State's tennis team last week as the men's team played the University of Redlands on Tuesday, Feb. 18 at Redlands. The men's team had two matches rained out two weeks ago. Contests with Azusa Pacific and Pomona-Pitzer will be rescheduled.

Cal State's women's team was able to get its only scheduled match of the week played Feb. 11. The Lady Coyotes defeated NCAA Division II opponent Chapman College, 8-1, and pushed its season record to 3-1, equalling last year's season win total.

GOLF TOURNAMENT

Cal State's golf team began tournament play last week as they played in the Pac Intercollegiate Tournament and the Gary Sanders Memorial Tournament. Scores and placements were unavailable at press time.

The Pac Intercollegiate, hosted by Cal State Fullerton, was a 36 hole event held on Wednesday, Feb. 19 at Mt. View CC. The 34 hole Gary Sanders Memorial Tournament was played at the Los Angeles National CC on Monday and Tuesday, Feb. 24-25.

The Coyotes' record standing 3-3 as of last Tuesday, lost both matches of a double dual with Point Loma and UC, San Diego on Feb. 10. Cal State scored 426 while Point Loma tallied 403 to UCSD's 405. CSUSB evened its record at 3-3 on Feb. 14 as they edged Chapman College 405-406. Junior Gary Oechle was Cal State's top golfer in both matches, shooting a 2 over par 74 against Point Loma and UCSD, and posting a 2 par over 70 against Chapman College.

Last week Coach Greg Price commented on his team's performance so far. "Our team is not playing up to its potential yet; we have a couple of individuals that are playing very well, Gary Oechle is averaging 75.25 strokes while John La Roae (a junior) is averaging 78.86," said Price. "Beginning this week, the team will get valuable tournament experience against some very good teams. There will be NCAA Division I, II, and III teams at the tournaments; hopefully we will finish in the middle of the Division III teams," he added.

the fights,
the talk,
the hurt,
the jealousy,
the passion,
the pressure,
the real world.
Tuck away the best protection against accidents.

James Urata became a part of the Cal State staff in 1963 as building program coordinator and helped develop the Master Plan for Cal State and construction of its initial facilities. In June of 1982, he became acting dean (executive) and in 1983, the director of administrative affairs.

Mr. Urata has spoken to numerous groups about his experience as one of the many Japanese Americans placed in relocation camps during WWII. In the U.S. Army, he served as an interpreter with the Military Intelligence Language Service.

Asked why he decided to retire after 23 years, he said that he wanted to see places he had never seen and devote time to his hobbies while he still had his health. Upon his retirement, he and his wife plan to travel the United States extensively. He would especially like to travel to those states west of California. He and his family will continue to reside in San Bernardino and remain active in the community.

Mr. Urata currently serves on the City Water Commission, the San Bernardino Community Hospital Corporate Board and is president of the San Bernardino Community Scholarship Association.

Mr. Urata sees a bright future for the university in terms of expansion. He commented that "The are now in the position to accommodate for the rapid growth of the institution." During the next few months, planning will continue on the proposed administration building which he has contributed a hand to. The proposed building will be 200,000 square feet and house 103 offices, also containing the School of Education and the School of Social and Behavioral Sciences. The location will be between the library, administration building and the physical sciences building.

Cost will exceed $12 million dollars.

Mr. Urata remarked on his lengthy career here at Cal State saying, "I've enjoyed being a part of a growing institution and I am looking forward to greater things for Cal State. This has been a tremendous experience for me. It's been a privilege working under some very fine supervisors from Mr. Pate to Mr. Evans." Mr. Urata will be very much missed by all.

The World Bank's approaches to the African problem include helping to reshape national policies in a way that ensures greater food production.

For example, the Bank supports reforms that remove artificially low prices for food, which, in turn, will persuade farmers to increase their output. The Bank also supports policies that ensure that farmers can get their produce to market.

Unfortunately, the World Bank is running into Africa's problems that are not confined to mismanaged economies and crisis. Low international commodity prices and the difficulties the bank, as well as others, must still work to overcome.
Dear Mable:
I am married (with no children) and a student at Cal State. I was not able to continue my education immediately after high school because of financial problems. I feel lucky to be able to pick up where I left off. My marriage is a happy one except my husband doesn't want me to go to school, as well as work. I know the obvious solution is to stop working but I can't afford to not work. I have no children and would be so happy one accept my husband's suggestion. I can't afford to not work.

How can I convince my husband to let me do both?

Signed,
Hating Soap Opera

Dear Soap Opera:
Show your husband you can do it all! Prepare your husband a romantic dinner for two at least once a week. That will make him realize he is as important as your work and school. Basically, try to use your "together time" with him more effectively and memorably. See how that works and keep me posted!

Mable

Dear Mable:
My life love stinks. Everyday I like a guy, it seems as if he's moving out of the country, gay, or engaged to be married. I'm over 21 and I've never had a boyfriend. What's wrong with me? I'm not ugly, I dress well, I don't smell and I brush my teeth twice a day. How come guys never pick up on me?

Helpless

Dear Helpless:
It seems to me that guys are picking up on you. However, they are not the right men, being gay, engaged or highly mobile. You should look at those encounters as compliments and realize you are being noticed by men. Try not to get discouraged and have confidence in yourself. Until you feel good about yourself, how can you expect others to feel good about you?

Mable

Dear Mable:
I need your advice. There's a young lady I know and it seems she's playing head games, unconsciously or not. We had dated for about two months. She broke a date that she insisted we go on. While she was with her friends, we had minimal contact. She then kept asking me why I wasn't seeing her. She assumed that I lost interest in her, so when I try talking with her, she clams up. Now she's dating someone in the dorms. Dear Abbey thinks she's madly in love with me, but doesn't know what to do about it. Mable, I need a second opinion.

Confused

Dear Confused:
The opinion of my sometimes sarcastic colleague, Abbey, seems to be a bit misguided. A person who is "madly in love" with someone does not usually date another, or refuse to talk to her sweetie. But just in case there is a chance for the two of you, why don't you try writing her a letter. If she won't speak to you in person, she might respond to a sincerely written expression of your true feelings. Believe it or not, I've had trouble discussing my emotions one-on-one. Letters, for me, have been extremely helpful. Besides, it will give you a chance to purge yourself of this problem. If she declines response, well then she has missed out on a relationship with a caring individual.

Mable

Dear Mable:
I have a friend with an extremely bad temper and a foul mouth. She's usually fun to be around, but she can be like Jekyl and Hyde. I want to be her friend, but how much abuse can I put up with? I've even called the police several times in fear of my health?

What should I do?

Signed,
Quivering in the corner.

Dear Quivering:
If you feel frightened enough to have called the police on several occasions, this person needs help. Try and tell him or her about the benefits of the Counseling Center on campus. It is free to Cal State students. Be careful not to upset or offend this person and be in a public place. Good Luck.

Research Problems? All levels, all areas. Foreign students welcome! Thesis counseling also available. Dr. Arnold, 213-477-8474 11:4 pm. 4/16

FOR SALE: Rossignol 160s skiis, Dana-Fit size 51/2 boots & ski poles. Price negot. Call Valerie or Scott 886-0238. 3/5
For Sale: 76 Toyota truck. X lent condition. New tires, engine, battery & seats. $2200 (3800). Even more desperate to sell. Steve 662-3304. 3/5

Name Broker. Seeking internships? Attention marketing, graphic art & psychology majors. (I've got that list you need to send your resumes to.) Ask for Steve. 682-3304.

Need Mature Individual Immediately: With data processing/key punching experience on IBM 36 system to work Sun.-Thurs. 24-30 hrs./wk. eves. Salary negot. Carson Medical Mgmt. Inc. Call Timothy or Beverly 881-2585. 3/5

The following part-time jobs are available at the time the Chronicle goes to press, however, we cannot guarantee that they will still be available at the time the newspaper is read. Additional jobs come in every day and are posted daily, so check the part-time job board in the Career Planning and Placement Center, SS-116.

Photo Model: Female student who is 18 to 28 years of age is needed to work as a photographic model for portraits and fashion on afternoons and weekends. The pay will depend on previous experience as a model. $61

Child Care Worker: Student with experience caring for children is needed to care for children while their parents are in group counseling on Tuesdays and Wednesdays from 5:45 p.m. to 8:15 p.m. The job is in Grand Terrace and the pay is $4.50 - $5.00 per hour. $58

Telephone Marketing Representative: Aggressive and professional person is needed who has excellent communication skills to do outside and inside sales. Position also involves phone soliciting and pays at a base rate with commission at 8%. Experience is helpful but not required. $60

Assistant Swim Coach: Student with WSI badge and some experience in coaching swimming is needed to coach for competitive swimming two hours a day on Monday through Friday from 5:00pm-7:00pm in Grand Terrace. Position pays up to $500 a month depending on experience. $57

RAPE CRISIS SERVICE

Local: 882-5291
County: ZEnith 7-5291
Local performer Kirby Garrett will be bringing his "sing-along" style of music to the Cal State, San Bernardino pub tonight. Garrett, who will be at the pub from 9-11 pm, is making his return engagement as a part of the Student Union's efforts at bringing local entertainment to the pub. Garrett will be performing such old favorites as "Bad Moon Rising", "Light My Fire", and "Take It Easy".

So don't be a "Herb" - come to the Pub for a night of singing along to some oldies but goodies!

Want a trip to Hawaii? Let's see your rear end.

If it's got an In-N-Out Bumpersticker on it, you're half way there. Because the 6th Annual In-N-Out Bumpersticker Sweepstakes is on! Just head on over to In-N-Out, grab a bumpersticker, put it on your car, and tell your smiling server to sign you up.

We'll be giving away up to 70 Hawaiian holidays for two, including airfare and 6 nights at a great hotel. Complete contest rules and entry bumperstickers are yours for the asking. So if you want to win a trip to Hawaii, get your rear in gear.

Arizona Competition For Forensics Team

by John Purcell

At a recent Western Speech Communications Association Convention held in Tucson, Arizona, CSUSB was represented by members of the Coyote Forensics team. Entered in the Junior Varsity division of debate were John Schaefer and Steve Kemp. According to Dr. Fred Jandt, who was present at the convention, the competition was extremely keen with schools being represented by their strongest teams.

Kemp and Schaefer posted a 2-4 record but came out of the tournament with insights into this semester's debate topic—whether or not membership in the United Nations is beneficial to the U.S.—that should improve their performance in upcoming tournaments. Said Kemp, "we saw some of the best competition at this tournament and we'll benefit from it."

Kemp and Schaefer, along with other members of the Coyote debate team, will represent CSUSB at two back-to-back tournaments. The first will be at CSU Fresno from Feb. 21-23 and the second will take place at Biola University in La Marada on Feb. 28 and March 1.

FOR SALE!

Vector Graphic Model 2600 with two capacity floppy disk drives 630K each, CP/M, Wordprocessing, Spreadsheet, Accounting Software, etc. Minimum Bid $600

Vector Graphic Model 4 with one 5M fixed disk and one high capacity floppy disk drive, CP/M, Wordprocessing, Spreadsheet, Database software, etc. Software includes dBase II. Minimum Bid $900

Computers may be inspected in the CSUSB Bookstore. Contact Bookstore for details, 887-7515

"ANTI-OSCARS"

by John Purcell

Let's get right into my special awards of the worst in filmmaking this past year—the Anti-Oscars. We might as well start off by giving Sylvester Stallone all of the awards he has worked so diligently to earn. Here's the list:

Worst direction, Rocky IV; Worst acting, Rocky IV; a special award for single-handedly starting the most ridiculous—and at the same time most profitable—trend in Hollywood, the mindless, senseless, brutal, more-dead-bodies-than-you-can-count film, Rambo: First Blood Part II; Best contribution toward maintaining high tensions between the U.S. and U.S.S.R., Rocky IV and Rambo—Can you imagine Stallone as our ambassador to the Geneva Peace Talks?; and worst case of nepotism in filmmaking, (last year he would have gotten this one for allowing his equally untalented brother Frank to do a song for the Staying Alive soundtrack,) this year he gets it for casting his wife Brigit Neilson-of Red Sonja infamy—in Rocky IV. Last and certainly least, let us not forget the award for worst film of 1985, Rocky IV.

If Stallone ever wants to be respected as an actor he should try playing someone who is a rational thinking human being. If he just wants to make money he doesn't need any advice from me.

The award for worst actress goes to Sigourney Weaver for her lack of performance in Volunteers, the comedy that gathered the best collection of names in 1985 but still wasn't funny. I'd like to see Sigourney play a serious role. She did a good job in Ghostbusters and there must be a script out there for her with a good character.

The soundtrack that came closest to driving me insane, though it was from one of the year's best films, was Agnes of God. The five worst films of 1985 were:

1. Rocky IV
2. National Lampoon's Vacation
3. Volunteers
4. Weird Science
5. The Terminator
Dr. Doane Writes on Changes

by Cherrlyn Eller

Thinking about changing your major? You're in good company. Like Dr. Margaret Doane, associate professor of English here on our campus. She received her B.A. in Social-Psydidogy, but went on to get her Ph.D. in English.

Why the change? Or is there actually a connection between the two? Dr. Doane found that "English offered more opportunity to put things into action." She found her study of Social-Psychology to be mostly theory. Whereas English provided situations for putting theory into action. She integrated her background of Social Psychology with English in doing her Ph.D. dissertation, which she wrote on the nature of evil and innocence in one of Robert Browning's works.

She has written articles about Browning and about her favorite author Willa Gather. Again, there is an integration in Dr. Doane's background studies. Her interest in these two authors generates from the way they deal with the narrative voice. That is, both Browning and Cather assume the same thing about their main characters. Their characters are kept from self-knowledge and become calloused toward others; their characters build constructs which keep them from self-knowledge.

When asked how she felt about the psychology of Willa Cather - that everything costs - Dr. Doane said, "I hope not!" Rather she believes it is possible to have different intensities at different times; that one aspect of life does not have to be gained at the loss of everything else.

Though Dr. Doane made a change in her area of studies, she had always had teaching as her goal. At first, because she was quiet and shy, she lacked confidence about it. But the award last year for the Most Outstanding Teacher at CSUSB showed her goal was well directed. It is a goal that continues, as she would like to be remembered for her teaching and for "seeing students as people." Her goal to teach and her concern for students is not limited to our campus. One of her outside interests is teaching skills to "bag ladies" here in San Bernardino.

In addition to her interests in teaching and students, she is currently involved with the writing of May Stewart Doane, an author of children's literature about pioneering in Wyoming. This interest stems in part from the fact that this author was the grandmother of Dr. Doane. Her grandmother's writings were well accepted when published and Dr. Doane would like to bring them into more prominence.

Dr. Doane is an enthusiastic teacher with a great sense of humor who considers her students to be her friends. If you are thinking of changing your major - why not try an English class with Dr. Doane. Go for it! Yes folks, once again, Delta Sigma Phi has invaded the tranquil pages of The Chronicle to let you know of the events and happenings going on lately. And are we busy? Can we talk here?

Last weekend saw a hearty band of Delta Sigma Phi heading over to a party held by UCR's Kappa Alpha fraternity-followed Saturday night by a barbecue/party thrown for the active members by our first-class pledges. Busy? You might say—but hey, it's fun! In fact, Saturday, March 1 will see Delta Sig holding a car wash on the corner of Sierra and 40th (at the Union 76 station) from 9 a.m.-3 p.m. So come on over—and get a state-of-the-art washing of your favorite vehicle for a mere $3! And while you're there, find out a little more about Delta Sig—the leader in Coyote spirit.

Meetings are Thursdays in the Senate chambers at 6 p.m., and we'll more than likely have something going on every week. Take a look at Delta Sig—and take advantage of this special offer...You won't get a Ronco "Tomato Twaddler," and you won't get a free combination toenail-trimmer/pickle slicer—but you will get a college experience and a feeling of brotherhood that will last you a lifetime.

So check into Delta Sigma Phi—the fraternity that boldly goes where no fraternity has gone before.

A Delta Sigma Phi Car Wash

by Elron Lawrence

Something exciting is going on at Cal State, San Bernardino—a force greater than mere mortals can comprehend. It's legendary, yet easy to grasp—traditional, yet as modern as Jim McMahon. Are we keeping it a secret? Of course not! It's Delta Sigma Phi!!

Why take a chance on grad school exams. So if you need a refresher class, or even if you're fresh out of college, why not try an English class with Dr. Doane. Go for it!
YOU WANTED TO KNOW ABOUT UFOs

Continued From Last Week's Issue

A second F-4 was launched, and when he came within 25 nautical miles of the object, the object began to move away at the same rate of speed as the jet, staying 25 nautical miles away. He had acquired a radar lock-on and the blip was the size of Boeing 707. It could be seen, but it did appear to have several flashing strobe-like lights that flashed so rapidly that they appeared to be visible simultaneously. They were arranged in a rectangular pattern and were in alternating blue, green, red and orange colors. Later, a second object appeared to emerge from the first and shot straight toward the F-4. The pilot attempted to fire a missile in self-defense, but his weapons control and communication lost power the instant he hit the "fire" button. He made a hard evasive turn. The original object "fell in trail" about 3-4 nautical miles and the second object cut to the inside of the F-4's turn and returned to the original object and accomplished a "perfect repeat".

The point of revealing all these specific examples to you is that these are just a small sampling of the large amount of evidence that Robert Hastings had to present on the evening of Nov. 7, which in itself was only a drop in the bucket compared to the huge amount of information concerning UFOs that the U.S. government still has clamped under a tight lid of secrecy. Around the world, especially in the NATO countries, a similar policy of secrecy about UFOs is maintained. Only Brazil and Argentina seem to be at least a little more open about it, where numerous reports of sightings have been released for public scrutiny.

The Zenith Z-138
Transportable PC

This leads to Robert Hastings' whole reason for his research and lecturing on the government's cover-up of UFOs—it is urgent that the government discontinue its policy of UFO secrecy and public debunking. While the vast majority of reported sightings do turn out to be man-made aircraft, natural phenomena, or deliberate hoaxes, the remaining 5-10% still add up to an enormous number of unexplainable phenomena that have accumulated over the years and that have caused obvious concern at the highest levels of the U.S. intelligence community, as the de-classified information has shown. In addition, Mr. Hastings pointed out that because of the government's obviously successful debunking campaign, at least 1 out of 10 people who experience a UFO incident never report it for fear of ridicule. Aircraft, balloons, natural phenomena, and deliberate hoaxes add up to a potentially huge number of actual sightings. Robert Hastings stressed that it is important that the American people pressure the government to lift the lid of secrecy off the subject of UFOs. Whatever they are, the public must be prepared to accept their reality because, he predicts that sooner or later the dam is going to break, there will be an incident (or incidents) that Uncle Sam will not be able to keep "under wraps" and the public will know they are real.

Although it cannot constitute proof that UFOs are extraterrestrial in origin, the de-classified evidence revealed by Robert Hastings does strongly suggest such an origin. 1 It cannot be denied that the actions that the objects were observed to take indicate some kind of intelligent control (especially clearly evident in the Iranian incident). 2 They had a strong affinity for nuclear weapons laboratories, test and launch sites, nuclear and conventional power plants, and areas of advanced aircraft testing. 3 They execute maneuvers that would destroy conventional aircraft, and travel at speeds and altitudes that far exceed the capabilities of either U.S. or Soviet technology—therefore they cannot have possible originated from either country. As indicated by the 1950 FBI document, the government may have in its possession, physical evidence recovered at the New Mexico radar site and elsewhere that may be proof that strange objects do originate from outside our Earth. 5 Ask any Las Vegas oddsmaker what the odds are that our Earth, orbiting a star we call the Sun can be the only planet orbiting one of 100-400 billion stars in one of 10-400 billion or more galaxies in the Universe, could be the only planet inhabited by an intelligent form of life.

Sooner or later, the human race will have to come to terms with the possibility that it is not alone in this grand Universe. Robert Hastings' startling revelation of evidence from the highest levels of the U.S. intelligence community of the reality of UFOs and its cover-up of their reality may or may not serve to rouse the American public out of its apathetic stupor, but it may have served to greatly broaden the horizons of at least a few individuals who have previously occupied their minds with such trivial (by comparison) terrestrial items of concern (except possible the military arms race which even the pilots—if they which even the pilots of the UFOs seem to be interested in)

When Total Performance is the only option.
Upcoming Blood Drive

The University's Blood Drive will be held on Thursday, February 27th, from 11:00 until 4:00 in the lobby of the Student Health Center. The purpose of the Blood Drive is to replenish supplies in the campus Blood Reserve Fund. This fund was established so that there would always be a supply of blood available for any student, staff or faculty member, and their dependents, should the need arise.

Donating blood is actually a very simple process. It takes about 45 minutes from start to finish; this includes the refreshment time afterwards. Do Not Fast prior to donating. Just a reminder: It Is Impossible To Get AIDS From Contributing Blood! All donors will receive a coupon good for one free small soft drink at the Snack Bar in the Student Union, courtesy of Food Services. An intramural t-shirt and hat will be presented to two lucky donors. Also, the Blood Bank will be giving out "blood drop" pins to all first time donors. Anyone who donates three times this year will receive a Blood Bank t-shirt.

What Good Is A Blood Donor? A blood donor is good for people who go through windshields and red lights...or somebody with leukemia...or daredevils...or little kids who manage to uncap a bottle of something poisonous...or new mothers needing transfusions...or victims of violence...or somebody being operated on...or people who are badly burned...or for someone having open heart surgery...or barefoot kids who aren’t careful...or for all the people who are in a lot worse shape than most people you know. A blood donor is good for life!!

Free Dental Screening On March 5

Students from Loma Linda University School of Dentistry will be on campus Wednesday, March 5, to screen for prospective patients for the Western Regional Dental Board and the California Dental Board. Each spring, as senior dental students finish academic and clinical requirements, they must take the state or regional board for the state in which they wish to practice in. These boards require that the students perform certain dental procedures on patients at no charge to those patients. The screening for these boards takes about 15 minutes and includes a brief medical history, x-rays, and an intra-oral examination. Patients that meet the rigid requirements of the Board of Dental Examiners will be asked to participate in either the March 23-27 Western Regional Dental Board, or the May 13-17 or July 13-17 California Dental Board. The patient should expect to be at the dental school for one morning or afternoon. But the time spent should be worth it. Dental students are looking for patients who either need a tooth filled, their teeth cleaned, or a gold crown. If the same work was performed in a dental office, fees would be $45, $65, and $350, respectively.

The Health Center encourages all interested students, faculty, and staff to participate in this free screening on Wednesday, March 5. Dental students will be in the Upper Commons, Room 219, from 11:00 to 2:00 p.m. They will move to the lobby of the Student Union from 2:00 to 4:00, and then will be back in the Upper Commons, Room 219 from 4:00 to 6:00 p.m. If you need further information, contact Dorinda in the Student Health Center, 887-7641, or call Charles McKelvey at 824-0030.

Committee sets guidelines

Animal experiments monitored

by Shawn Baker

"Drawing from a board of various professionals will give the issue a broader view."

The committee will ensure that procedures with animals will avoid or minimize discomfort, stress, and pain to the animals. The committee will also require experiments done with animals to be the only alternative. All experiments including animals will have to pass the boards approval and standards set by the federal government.

Dr. Fehn would like to use an alternative to animals in experiments, but while scientists can find a suitable one, he is required to still use animals for experiments for diseases, and to further understand the human body.

"Animals must be used for research, for the advancement of mankind," Fehn said. "Cells interact with each other, you can't isolate one cell and understand how the body functions, you have to look at the whole body and study the way the cells interact with each other."

The science program at CSUSB had already adopted fairly strict rules regarding the animals they use in their research experiments. Each student is required to fill out a form stating what they are going to do, and they have to explain in detail what other methods they tried before resorting to use of an animal.

The students who are involved in the experiments are upper division biology majors, and students doing graduate work.

Opinion: transcript evaluation perplexing

It is amazing that a school the size of CSUSB can have so many problems evaluating transfer students transcripts. At many, if not most, other colleges this process will take no longer than a month or two. But why is it that at Cal State San Bernardino it can take as long as seven months to evaluate and process a transcript? This was the length of time it took to receive mine.

Yet, from talking with other students, I found that my situation is the rule, not the exception. In September, I attended the orientation program the school recommends for its incoming students. At one point in this class the students were asked how many had received their evaluations. Out of at least 100 students (which said they were transferring), only a very small handful had received them. Then, to the great displeasure of the class, we were told not to expect them for another four to six weeks. For myself, this was approximately two months after I had first been told to expect it within two weeks. Little did I know that September that I would still have four months to wait—not four weeks.

So those who had not received their transcripts by September had, in effect, register blindly for classes. At a result, one could safely assume that many took classes they did not need. How were we to know, with any certainty, which of our classes had been accepted and which were still required of us? My many phone calls to the school failed to obtain an answer to this question. The response often, if not always, was "we've just swamped with transfers."

But is this an acceptable excuse for putting students in this position? One wonders how colleges many times the size of CSUSB can survive the onslaught of transfer students every quarter or semester.

Then, in November, another problem arose. I was told that in order to receive priority for registration, I needed to file a grad check. My evaluation had still not arrived, and without it I had no way of knowing I was eligible. But yet, the university expected me to file one. This was a no-win situation for me, and probably other students as well. How can the university expect its students to take the necessary steps toward graduation without giving them the information that is necessary to do so?

Finally, seven months after having been accepted I received my evaluation. This was just in time for the winter quarter and second quarter at CSUSB. On the bottom of the evaluation I noticed something interesting. It was a note stating that all inquiries concerning the evaluation must be made within the students first quarter of attendance. I hope for all concerned they don't take themselves seriously on this.

So, if you are currently waiting for your evaluation, I suggest you question the school about the cause of any delay you may be experiencing. Through this, maybe the administration will come to understand the position of the students, and take steps to remedy the problem. This situation needs to be corrected soon, so that this university can continue toward what appears to be a bright future.

Thomas Thompson, Alta Loma
PLEASE LEAVE US ALONE

Dear Editor,

I have been to many concerts in my time, and I consider myself quite educated in the world of music. Most of the groups I have been to have been to a wide variety of concerts including INXS, Iron Maiden, Quarterflash, Zebras, Ratt, Midnight Oil, Channel Three, Sammy Hagar, Bon Jovi, and many others. To get to the point, at every concert I have ever been to, there have been various religious groups there telling me I will go to (Their) Hell if I attend these concerts. They sometimes carry bloodied crosses and always pass out their biased literature. I don't go to their concerts and try to change their way of thought in my way. So why should they come and try to indoctrinate me into theirs? I attended a concert that had various religious groups standing across the street with megaphones shouting out prayers, that we poor souls might not be lost inside. I find that a bit extremist. They attend these concerts and pass out stickers looking for donations. I can just imagine them saying "Well, If We Can't Save A Soul, We Might As Well Turn A Quick Buck. Rogen Needs A New Tour Art." What I have never understood is why would someone spend money on a concert ticket and then go to the show only to be told they were going to go to hell, then leave because of someone's religion threat. People do not go to concerts to drive back home ten minutes after they get there. Just think of what the opposite might be, if some extremist fans on the other side of the spectrum went to one of their concerts (Their Concerts Being Any Music That These Various Religious Groups Attend), and pass out literature, think what would happen. Why do they bother us. I Really Don't Know.

Kal Pharoeh/Michael Gunn

It's Only a Matter of Time

Dear Editor,

The seemingly unanswerable capacity for cruelty that members of the human race exhibit towards others of its own kind is mind-boggling. On every scale from the individual to the international, cruel behavior is a way of life. However, we have entered an era where cruelty should not and can no longer be accepted. The streets of our cities have become the proving grounds for weapons of ever increasing deadliness and destructiveness. The media air waves have become cluttered with violence and cold-bloodedness at an exponential rate. And at the international level, the stockpile of nuclear weapons capable of erasing all life off the face of this planet several times over. And at the international level, the superpowers have amassed a stockpile of nuclear weapons capable of erasing all life off the face of this planet several times over. If the human race does not begin soon to abandon its preoccupation with cruelty and violence on every scale from the individual to the international then the only future it has to look forward to is a nuclear ball of fire. It's only a matter of time...

Sincerely,
Chris Elks
