This Newspaper is brought to you for free and open access by the Arthur E. Nelson University Archives at CSUSB ScholarWorks. It has been accepted for inclusion in Coyote Chronicle (1984-) by an authorized administrator of CSUSB ScholarWorks. For more information, please contact scholarworks@csusb.edu.
Angela Davis Here May 23-24

Angela Davis, noted Black activist and feminist, will discuss "At Home and Abroad: The Struggle for Peace" at 7:30 p.m., Friday, May 23 in the Recital Hall. Admission is $2 for the talk, which will be followed by a reception. The event is free to persons with Cal State, San Bernardino identification. Tickets are available until Wednesday, May 21 at the Special Events box office in the Student Union or by calling Ext. 7943.

Angela Davis currently teaches courses in ethics and women's studies at San Francisco State University, the San Francisco Art Institute and the California College of Arts and Crafts.

In addition to her public lecture here, Ms. Davis will speak at the final session of the university's Cross-Cultural Perspectives workshop, Saturday, May 24. She will address more than 40 faculty members on "Changing Hearts and Minds: Race, Class and Gender." Her appearance is sponsored by the Cross-Cultural Perspectives project grant, Intellectual Life Committee, Associated Students, Special Events Committee, Black Alumni, Black Faculty and Staff, Black Student Union, and the Schools of the Humanities and Social and Behavioral Sciences.

Local Fraternity Denied Campus Recognition

Greek Council turned down a Petition by local fraternity CHI TAU OMEGA on Thursday, May 1. Temporary Greek Council President Elva Benge said the fraternity was denied because of "numbers". Meaning CSUSB does not have enough students of fraternity age to support another fraternity. Elva had the deciding vote in a split decision. Members of CHI TAU OMEGA said the reason was not valid, this campus is growing and it could support another fraternity. "Another quality fraternity would facilitate the involvement of an increasing number of students", fraternity Patron Harold Volkman said.

Activities Director Jeanne Tegnan is looking into the matter to decide if the Administration, or Greek Council has the power to decide how many Greek Societies the campus can support.

The Greek Council meeting was held with only four of the seven representatives, and no faculty advisors present.

CHI TAU OMEGA is a local fraternity founded by Tom LaFer, Derek Givens, Brent Johnson, Kevin B. Varner, Harold Volkman, Kurt Beadlinf, and Mike Allsup. They began in January and have been fighting to become a recognized fraternity.

The Origins of Modern Sculpture

A prominent museum curator for the Smithsonian Institution, Dr. Charles Millard III, will discuss "The Origins of Modern Sculpture" at 4:30 p.m., Friday, May 23 at CSUSB.

Appearing in Room 110 of the Visual Arts Building, Dr. Millard will explain the development of sculpture from the late 18th century to the abstract, formalist works of the 1960s and '70s.

"As Dr. Millard will point out, there is not a heterogeneous progression in the development of modern sculpture," commented Dr. Julius Kaplan, Cal State art professor who arranged the speaking arrangement to initiate a series of art lectures presented by the university's Friends of the Gallery, a new support group for art at the university.

"However, he will identify the theoretical and stylistic ideas that emerge in the works of artists, such as Dauinier, Carpeaux, Degas, Rodin, Picasso, David Smith and Anthony Caro," Kaplan commented.

An active museum professional, scholar and critic specializing in 19th and 20th century art, with a particular interest in sculpture, Dr. Millard has been chief curator of the Hirshhorn Museum and Sculpture Garden at the Smithsonian Institution since 1974. Prior to that he was curator of 19th century art at the Los Angeles County Museum of Art.

Dr. Millard is both an art historian and critic, having written art criticism for the Hudson Review since 1970. He also is the leading authority on Degas sculpture and author of the only major monograph on the artist's work.

He holds a bachelor's degree in art and archeology from Princeton University and a Ph.D. in fine arts from Harvard University.

The Friends of the Gallery has been launched to promote programs and exhibitions of the Cal State Art Gallery. The support group is open to members of the community with a special interest in art as well as university alumni, faculty and employees.

Membership categories include: friend $25, patron $50, contributing friend $100, sponsoring friend $500 and benefactor $1000.

Sponsored by the university's Intellectual Life Committee, Art Department and Friends of the Gallery, Dr. Millard's presentation is free and open to the public. A reception will follow the lecture.
**Penn Holds Up "At Close Range"**

by Michael Heister

You can see the grit. You can feel the sweat. You can even wiff the defensive odors of the beer, and taste the bitterness of the worms. It's all very much alive as existing. Even the bare-breasted shots of the dancers in the strip joint are a complete turn-off, a cold prigraphy that is well worth the amount of money spent on the show and the company of the women who live it. The idea is that you can handle a little blood, a brief shot of a woman's breast, and a lot of swearing. The movie, rated R with good reason, is worth your time and money if you can handle a little blood, a brief shot of a woman's breast, and a lot of swearing.

**Sports Briefs**

**Basketball**

Jeff Ames, a 6'4" senior forward on Cal State's men's basketball team, ranks 22nd in the nation in NCAA Division III free throw percentage according to the final basketball statistics printed in the latest edition of the NCAA News. Ames, throughout the season, shot 85.2% from the free throw line (127-149) and once strung together 28 consecutive one-pointers.

**Publications and Sale of Pacific Review**

This year's Pacific Review, Issue No. 4, the CSUSB literary magazine, is now on sale. It includes fiction and poetry by such well-known professional writers as Sheila Roberts, Sherdor Santos, Philip Dacey, Wanda Coleman, and Giorgio Chierici, and outstanding student work by Diane Arveda, John Charles Horon, Victoria Norberg, Jill Scanlan, T.C. Hannan, and many others. It sells for $4.00, with a student price of $2.00. Copies may be purchased in the Coyote Bookstore or at the Pacific Review office, PL-541.

---

**Library Book Sale**

The Library will hold a book sale on Thursday, June 5, from 9:00 a.m. - 5:00 p.m. Hundreds of used and new books on all topics will be for sale at bargain prices. Although a few "treasures" will be specially priced, most of the books will be sold at $50 each or $50 for large paperbacks, $20 for small paperbacks, and $5 for loose magazines and pamphlets. From 4:00 - 5:00 p.m. there will be a "cleanse sale" of remaining books for $2.00 a bag. The sale will be held at the north end of the basement of the Pacific Review near AV and the elevators. Access is via the stairs to the basement classrooms. All proceeds from the sale will be used to purchase new books for the Library.

---

**RECREATIONAL SPORTS SCHEDULE**

**Co-Rec 3-Pitch**

Co-Rec 3-Pitch will be held on Friday, June 6, from 6:00 - 8:00 p.m. in the Coyote Gym. The following teams will be playing:

- Ranchos
d- Coyotes
- Hawks
- Clouds
- Bulls
- Senators
- Golddiggers
- Knights
- Mustangs
- Renegades
- Bears
- Eagles

---

**Pen's Got It**

Cal State's Gary Oechel is on his way to the NCAA Division III Championships in Extzer, PA. Oechel, a junior from Ventura high School, finished the regular season averaging 75.88 strokes. Oechel will represent the NCAA West Region along with two other teams selected as teams as selected as three other golfers.
"Black & White"

Opens June 5th

"Black & White", an exhibit of 30 black and white photographs will be on exhibit in Gallery II in the Visual Arts Building June 5th through June 27th, 8:00 a.m. - 10:00 p.m. The work represents a collection of photographs made by the beginning photography students in the Art Department during this past quarter, juried by Miss Golgoch, the Photography I instructor. The photographs were taken, printed, and represented as class assignments during the past eight weeks from the theme list of landscapes, textures, reflections, times past and night. The students represented in the exhibit are, Kevin Campbell, David Everett, Michael Guinn, Karen Henderson, Alan Charles Lee II, Bea Noile, Jeni Polumbe, Michael Poole, Charles Rock Jr. and Mark Saldecke.

(Event will be moved to the Commons if it drizzles.)

California State University, San Bernardino
Camp Sigma for 6-12 Year Olds

Mu Xi sponsored this event to raise money for fraternity dues and community and campus projects.

Dr. Robinson also said that he continues in the position until a permanent dean to the University of California at Los Angeles, and administration but their experience in the area of personnel and chair of this committee. The search came to a halt due to the fact that there was no complete consensus among the committee in choosing a candidate to fill the position. Of the three names submitted to the Vice-President, it was found that one candidate was "barely acceptable" while the other two remaining candidates were well received by faculty, staff, and administration but their experience in the area of administration was lacking.

Dr. J.C. Robinson, associate vice-president and dean of personnel and chair of this committee commented that "When there is no complete consensus, a feeling of uncertainty arises and you feel very uncomfortable."

Dr. Robinson also said that he hopes for a more diverse pool of applicants when the position is re-opened at the end of September. "I found that there was a lack of women and minority applicants and I was very disappointed in seeing that," he said.

In the fall, the present search committee held up of Carl Wagner, Francis Berdan, Richard Mons, Gaila Cowan, John Herren, Mike Rodriguez, and student representative John McNay will be replaced. Dr. Robinson will still act as chair of the committee.

Two separate open forum sessions in which the applicants are given a chance to meet the campus community and vice-versa, will still be held.

One session is to be held for administrators and staff and the other is to be held for students. The other session will be held with the last one. The students are very helpful when it comes down to making important decisions like this," Dr. Robinson stated. He urges everyone to attend the sessions.

Delta Sig Brings Smiles at Special Olympics

by Elyond Lawrence

Smiles were the order of the day Saturday, May 10, as the Delta Sigma Phi fraternity went to the aid of the Special Olympics, held at San Bernardino Valley College. The Special Olympics, a day-long event held for mentally handicapped people in the San Bernardino-Redlands area, brought hundreds of people to the Valley College sports fields, including athletes, coaches, and even some Greeks.

The Delta Sig helped out the events as volunteers, helping run events such as track runs and softball throws. Some members helped out by ushering athletes back and forth from their place in the stands to their event sites. Still, others helped with security, working to keep everything flowing smoothly.

The fraternity first arrived in the early hours of the morning, signing up with other volunteers to help with the events. Donning red volunteer shirts to go with their white shorts, the Delta Sigs were ready to go when the opening ceremonies began at 9:30 a.m. The games themselves began at 10, and Delta Sigma Phi went to work — if you could really call it that.

All the while, a certain few Delta Sigs were helping in an even more special way — as they got the chance to make sure every athlete left the game as a winner. Quite simply, they were huggers — people who made sure every athlete got a great big hug as they finished their events. A few Greeks, as one might guess, got to see the smiles up close.

A barbecue was held after the games, so athletes, volunteer, and greek could stuff their face alike. And while the food filled their stomachs, many Delta Sigs left the Olympics with something even better — a happy spirit.
EXPANSION '86 INVEST IN 'U'

FEE REFERENDUM VOTE

Last week's student body fee referendum vote on May 13 and 14 was a success for both the Associated Students and the Student Union. A total of 70% of the voting students were in favor of raising Associated Students fees, while 68% supported the Student Union increases. Once the election results are sent to the Cal State system Chancellor's Office in Long Beach, CSUSB will await approval of the increases. It may take as long as three or four months for approval before the actual increases will be felt by the CSUSB student body. But once the increases are set, improvements will be made in the student services offered by A.S. Additionally, the Student Union will begin saving money towards a new addition to the building.

Overall, the turnout in this recent election was larger than the usual turnout for student body elections. The Associated Students and the Student Union are hopeful that this fee referendum has expanded student awareness of all the benefits available to them. Additionally, it is hoped that students will take advantage of these benefits for a fuller college experience.

How much do you need to go to college?

The most difficult test some students face this fall isn't getting into college. It's paying for it. Because for many students, financial assistance such as scholarships, grants, work-study programs, and family resources don't cover the bill.

That's why Chase offers four different educational loans, with affordable interest rates and flexible repayment plans.*

What's more, you don't even need to have an account with us. Chase makes loans to qualified students and parents throughout the U.S. And we usually process your application within 24 hours.

Complete the coupon or call 1-800-645-8246 for more information and an application, and we'll send you "The Student Guide," a brochure covering five financial aid programs available through the federal government.

We think you'll find it truly educational.*

*Chase student loans include Guaranteed Student Loans (GSL), Parent Loans for Undergraduates (PLUS), Auxiliary Loans to Assist Students (ALAS), and Health Education Assistance Loans (HEAL). Chase is an equal opportunity lender.

- $3.00 Students / Senior Citizens

Reservations can be arranged by calling 887-7452.

INFORMATION MANAGEMENT ASSOCIATION
HEALTH CORNER

We at the Health Center never can resist offering new information on the hazards of cigarettes - and now, too, of cigarette smoke. When we realize that the first study in this country on the relationship of smoking to cancer of the lung first appeared in 1958 - 28 years ago - it is surprising how many people still smoke.

A recent report in The Lancet evaluated the cancer risk of people exposed to cigarette smoke in the household. According to the study, overall cancer risk rose steadily and significantly with each additional household member who smoked over an individual’s lifetime. Investigations also rated cancer risk in individuals who were exposed to household smoke during childhood and adulthood and then for individuals who were exposed to secondhand smoke during pregnancy.

Also, the American Cancer Society has found that children in households where one or both parents smoke have double the amount of bronchitis or pneumonia during the first year of life as children in nonsmoking households. They also have more adenoid and tonsil operations than the children of nonsmokers.

So, all you nonsmokers who are living with and breathing the air of people who smoke, make sure you share this information with them. Also, we are including tips on quitting for those of you who decide that now is the time to take control of your health.

Tips on Quitting

(On behalf of the American Cancer Society)

50% of successful quitters did it cold turkey, while the other 50% quit gradually. The first 48 hours are the most critical for the majority of people. Once you pass that stage, it will be easier each day, so pick the tips that suit you.

* Smoke one less cigarette each day.
* Don’t give up cigarettes - completely. Carry one with you in case of need. You’ll feel the urge, but you’re saving it - permanently.
* Make each cigarette a special decision - and put off making the decision.
* Don’t quit forever - just stop for a day - and tomorrow try it for another day, and tomorrow, and tomorrow.

* Tell your friends and family you’re quitting. A public commitment bolsters willpower.
* Hide all evidence of cigarettes, ashtrays, matches, etc., so you aren’t reminded of your recreation.
* Lay in a supply of chewing gum, cough drops, carrot sticks, etc.
* Nervousness, hunger, etc., are signs of the body’s readjustment. If they’re hard to manage, ask your doctor for help.

Keep in mind the following interesting facts:

- The number of premature deaths caused by smoking in the U.S. is equivalent to 920 fully loaded 747 jumbo jet crashes annually. That’s 350,000 people each year. Can you imagine how concerned we would get and what action we would take immediately if that were to happen? Think about it before you light up that next cigarette.

Look what’s happening in your neighborhood!

CAREER INFORMATION

So You Want To Be A Health Professional!

by Jackie Wilson

Okay, so you desire a career as a health professional, but you don’t know where to go for advice at CSUSB. Your first steps should be to become aware of and make contact with the Health Professions Advisory Committee. This committee works to help students who wish to pursue careers in medicine, dentistry, pharmacy, optometry, osteopathy, podiatry, veterinary medicine, nursing, as well as other specialties in the allied health area.

In addition to this contact, you are encouraged to discuss your career goals individually with members of the committee: Dr. Dennis Pederson, Chair, PS-317, 887-7345; Dr. Daloon Harrington, Bi-311, 887-7384; Dr. Paul Heckert, PS-27, 887-7392; Dr. Diane Butterworth, BI-305, 887-7380; Dr. Mary Patterson, Dept. of Nursing, 887-7346. The Advisory Committee can help you become familiar with many different health careers, provides preprofessional advisement, and since they frequently meet with representatives from professional schools, give you updates on these schools and their programs. Remember to always also consult with an advisor in your specific major to be sure that you are accomplishing your goals in the most efficient manner.

At various times during the year the Advisory Committee holds meetings and workshops. The next one of these, an application workshop, will be held on Thursday, May 22 at 11:00 a.m. in BI-129. It is primarily for students who plan to apply to medical, osteopathic, or dental school for the 1987-88 academic year. Application materials will be available and these will be reviewed with particular emphasis on writing the personal narrative.

When you are ready to apply to a specific professional school the Advisory Committee can also be of assistance. Not only can it be a source of application information (forms, addresses, etc.), but also may be used for the needed letters of recommendation. In fact, medical, dental, osteopathic, and other schools prefer a committee evaluation letter. If you use the committee, you will be asked to complete a personal data sheet. Standardized evaluation forms will then be sent to the individuals from whom you wish to receive a recommendation, along with pre-admission test results, grade averages, and a personal interview are then used by the committee in writing an evaluation letter. This letter and copies of the individual evaluation forms will be sent to each school which requests supplementary application material. Please note that if you wish to take advantage of this service it is important that you contact the committee in a timely fashion and meet the committee work schedule deadlines. This usually means two months before you anticipate needing letters sent to the professional schools.

The idea of such an advisory committee functioning in this manner is appreciated by the professional schools and reduces the considerable work involved in the application and advisory process for students and faculty. You are therefore strongly urged to contact a member of the Advisory Committee if you are thinking of a career in the health profession.

DRESS TO EXERCISE!!

Expires June 30th
Forensics Team Competes in Cool-Off

by Jackie Wilson

On May 3, the CSUSB Forensics team traveled to Rio Hondo College in Whittier for the Cool-Off Tournament sponsored by the Pacific Southern California Forensic Association. This tournament is held at the end of the school year competition. This two-day tournament, an individual event competition, had 28 schools in attendance. There were two categories: Novice division and Open division.

Entrants in the Novice division of persuasive speaking were Eliza McClain, Gail Flathers, and Renee Formulak. John Schaefer and Matt Webster were entered in the Open division categories of Extemporaneous Oral Interpretation, Draw Impromptu Speaking and Radio Speaking. Eliza McClain received a finalist award plaque in Persuasive Speaking for her speech on President Reagan curbing the use of the item veto and a certificate for superior excellence from the PSCFA. John Schaefer received a certificate in excellent performance in Open Division Radio Speaking. He took second place in two of three preliminary rounds. John thanked Dr. David Bennett, telecommunication faculty member for being beneficial in preparation for this event.

Mike Hope, forensic director, had this to say about two newcomers to the team, Gail Flathers and Renee Formulak: "For this tournament we invited two of my Communications 120 students to enter into competition speeches they had prepared for class grades. I could not have been happier with their efforts and preparation for the competition and their excellent work." In both cases, the young women received high marks for their preparation delivery. In the third round of persuasive speaking, Gail Flathers took first place and was also ranked superior in comparison to the other novice competitors.

At the present time, the CSUSB Forensics Team is ranked 23rd of the 46 debate teams in the Southern California area. The PSCFA Cool-Off Tournament concluded the team's competition until the fall. The team will resume in September.

If anyone is interested in having lots of fun speaking on various topics, making friends with a terrific bunch of people, and competing all over the state, please do not hesitate to contact Mike Hope, Forensics Director at the Communications Department CA-187 or at X768S. All majors are welcome.

AS ALWAYS, WE AT THE CHRONICLE ARE TRYING TO IMPROVE THE QUALITY OF YOUR STUDENT NEWSPAPER. YOUR INPUT IS HIGHLY VALUED, AND GREATLY APPRECIATED.

Grade schoolers like new summer program

by Midge Thornton

Some students may think Cal State San Bernardino is going into the child care business this summer when they see kids running around on campus.

Cal State isn't, and those "kids" are going to be their colleagues.

The Office of Extended Education is now accepting applications for 35 to 40 students interested in attending various courses designed to help them get ahead in the game of life.

There is a misconception that extended education is for adults only, Keith Johnson, program administrator, said. Education should always be extended to its full potential throughout life.

Johnson, who coordinates the Office of Educations for Younger Students, is proud of the fact that Cal State's Office of Extended Education is making its resources available to younger students.

The program offered this summer are Computer Camp, Media Production, Self-Defense, and GATE, a program designed for mentally gifted students.

The courses are reserved for 4-8 graders, which is something Johnson is not completely satisfied with. He would like to be able to offer courses to kids of all ages, but he admits that at this stage of the game the Office of Extended Education "can't be all things to all people." The program has not expanded enough to fulfill the needs of all children, he said.

Johnson hopes that the Office of Extended Education will be able to offer something for everyone someday, but realizes that this goal is far from within reach.

The greatest obstacle, he says, is a financial one. "The program is virtually self-supportive and that means we have to look to external sources of funding," he said.

Off-campus programs extend CSUSB's reach

University reaching out to kids, boonies

by Midge Thornton

Cal State's Office of Extended Education is extending its resources to the Cal community and far beyond, literally.

The Office of Extended Education has been providing students from Riverside and San Bernardino counties and desert areas with alternatives to attending classes on the Cal State campus.

The off-campus locations have proven to be a vital component in the reduction of many education throughout the area. Many students, especially working students and those with families, find it difficult to attend courses.

The Office of Extended Education has recognized this need and has made plans to keep the off-campus facilities growing. According to Dwain Ford, program assistant, "the Office of Extended Education recognizes that this need is great, in the community as a whole."

Ford feels that the Office of Extended Education is making a difference, and it has been short-lived.

As for now, the program is going strong on the resources available, and prospects for the future are good. His Office has been flooded with phone calls from students and parents interested in various courses.

The Computer Camp will be a "hands-on" type of course, designed to introduce kids to computers and computer programming. The program will be offered in the mornings for two weeks. Kids enrolled will also be able to use the Cal State swimming pool before they go home for the day.

The media production program will explore the creative and technical aspects of video production. Students will work on a production to be screened on the final day of class.

The Self Defense program is designed as a course to discipline kids' bodies, it's designed to discipline their minds also. The philosophies of Kong and Karate will be emphasized and children will learn how to develop self-esteem as well as respect for others.

The GATE program, which is designed for gifted and talented students, will incorporate activities dealing with computers, science, reading, writing, and math. To qualify for admission, the student must be at or above average and this must be verified through the school's school counselor.

Johnson feels these programs offer kids more than just an education. The programs give kids opportunities to work together with one another, which is a skill they will use throughout their lifetimes.

The greatest obstacle, he says, is a financial one. "The program is virtually self-supportive and that means we have to look to external sources of funding," he said.

Local schools like lottery funds

But money comes with some strings attached

by Elfred Lawrence

As the California State Lottery begins to catch its second wind, more and more California schools are whetting their appetites in anticipation of the incoming funds. And while overshadowed by the prestige of surrounding universities, San Bernardino County's schools figure to be the prime recipients of the lottery money - and are eager to make use of it.

A good example of this is the Fontana Unified School District, which is preparing ways to spend money - despite a concern from its teachers, and signs of a decrease in lottery playing.

With the arrival of the district's first allotment - $761,057 during the month of March - Fontana schools can expect to see results from the lottery's creation in the immediate future.

Fontana officials expect the arrival of the second and third installments (to arrive in May and August, respectively) to bring the total amount of funding for the fiscal 1985-1986 year to approximately $1.5 million - or about $112 per student, according to district business manager Emmanuel D'Souza last year's average daily attendance for the district totaled 15,017 students, with the district's 1985-1986 operating budget rounding off at $48 million.

However, the situation might change.

Recent studies show a shrinking number of Californians playing the lottery, which might mean the initial popularity of the games are beginning to fade. A study by Newsday in late April showed a drop in lottery sales in the first two games; while Game 1 took in $39 billion, Game 2 brought in a lower take of slightly more than $5 billion.

In Fontana's case, will this happen? The departure of a white knight that has just arrived? Not really, D'Souza claims, but it could do a great deal of hindering. He expects the arrival of the 1986-87 fiscal year to bring with it a lower amount of lottery funding - which could drop the rate of $112 per student to $70.

Fontana officials have found problems with the money that is coming in, as well. As is the case with local universities (such as Cal State San Bernardino), a state restriction on the money has brought on difficult limits to the district. The biggest problem is that none of the money can be used for capital equipment or buildings, let alone the costs for any initial construction of such. As it is the case of CSUSB, Fontana's schools are facing a chronic lack of space - and the lottery can't do a thing to help.

This has caused many California schools to protest the restriction, and the state legislature is seriously considering lifting the regulation. At the present time, though, schools and universities will simply have to find other ways to use the money.

Lottery fund-related problems seem to be cropping up on all sides of the district. The Fontana Teachers Association is concerned with the way the money will be spent - especially since the money is not included in salary and benefit negotiations that settled a contract dispute in January.

D'Souza says an agreement is now being worked out between the district, and should be ready for the inclusion of Education approval in the next few weeks.

Teacher's suggestions for use of the funds will be included also. So far, a survey has shown the top suggestions to be:

- Increasing classroom equipment and supplies classroom budgets;
- Developing and improving instruction;
- Hiring new teachers.

Even with all the "side effects," D'Souza is happy, nonetheless, saying the money definitely helps. And even though things show signs of a rather large decrease, he notes that excitement is high in the district for the present.

"The first year, everyone's excited about the program," he said.

Options for use of the money will be presented this month to the Board of Education. Possible uses may include setting up a drug abuse program, giving the money to classrooms, and using the money directly for classroom supplies.
A summer child care program will be offered June 18 through Aug. 22 at the Children's Center for students, university employees and the community-at-large, announced Pam Dortch. The service will be from 8 a.m. to 5:30 p.m., Monday through Friday for children ages 2 to 14 years. Children must be toilet trained and in good health.

Summer Child Care Available

The program will offer full-time child care up to nine hours per day as well as part-time and hourly drop-in service. Ms. Dortch advises interested persons to call the center at Ext. 7724 for information on fees. Discounts are available for individuals enrolling more than one child in the program.

“We will provide lunch and nutritional snacks in the morning and afternoon,” she said. “Our rates are very reasonable considering that a meal is provided.”

Enrollment will be determined on first-come, first-serve basis. Applications are available now at the Children's Center.

Dr. Susan and Tom Meisenhelder have been awarded Fulbright fellowships to teach English and sociology at the University of Botswana in southern Africa next year.

They will leave this summer for a year of teaching followed by travel. Their children, ages six, three and one, will make the trip with them. “We are all very excited,” remarked Tom. “When Susan and I traveled to Nicaragua, we left the children with grandparents. This is the first time we’ll be traveling together and working. I think the Fulbright awards committee saw us as a good deal because they got two for one.”

Dr. Tom Meisenhelder, professor and chair of the Department of Sociology, has been here since 1975. He is active in the U.S. Out of Central America organization and is part of a team of three faculty who received a 1984 Faculty Professional Development Grant to study the effects of the closure of the Kaiser Steel plant.

Dr. Susan Meisenhelder began teaching here in 1982 and now is an associate professor of English. She received a 1985 educational equity grant to write a book on Zora Neale Hurston, a black woman author. She also has been involved in organizing the creative writing competition sponsored by the English Department.

Our Zenith PC Packages are now programmed to save you over $1500!

Choose one of these bundled Z-158 PC today at our special low student prices.

The Zenith Dual Drive Z-158 PC Package

Special Student Price: $1199.00
Suggested retail price: $2777.00

Our Zenith Z-158 PC Packages come equipped with a lot of amazing features. But perhaps the most striking of all are the incredible student savings we've built into these systems.

For over $1500 off the suggested retail price, you get a whole bundle of extras with your Z-158 PC. Including: The Zenith ZVM-1240 12" Non-Glare, High Resolution Monochrome Monitor • The Paradise® PS-215 Video Card—providing high resolution text and monochrome graphics for sale software. 256K of RAM—upgradable to 640K with additional expansion. Z-158 PC • And when you buy the 21.4MB Winchester Hard Drive Package, you get Microsoft® Windows 1.01 as a standard feature!

To get your Zenith Z-158 PC Package at our Special Student Pricing, just complete the coupon at right, and bring it into your nearby Campus Contact today.

May 17, 1986

President Anthony Evans
Administrative Council
California State University
San Bernardino, California 92407

On Monday, Channel 4 News Team members appeared on campus and asked the students to meet with them. It was suggested that there is a correlation between the decision and the fact that the dean is a show dog owner.

In particular, the administration of the NSC, NSU, and BSC find the reasoning behind their decision disturbing and reflective of the students' voices, according to the student newspaper. Previous instances are cited that illustrate the re-structuring of our student outreach services. facilities attempted to involve our student outreach services in minority student programs.

To remedy the future leaders' dog show incident, we ask the council, following:

1. A formal apology to future leaders of America from the Council.
2. The original location reserved for campus facilities to remain.
3. The policy regarding reservation of campus facilities to be reviewed.

W.M.C.A. and BSC feel these requests are appropriate considering the lack of professionalism exercised by the council.

Additionally, individuals representing themselves as members of the Channel 4 News Team have made inquiries concerning this matter. On Monday, they were on campus with a mini-cam and crew.
