ASB runs record Agenda

By Ray Byers

Expediency was the word when the ASB Senate met last Tuesday. The Senate went through one of the largest agendas in recent memory, in record time.

This was due largely to the fact that the Senate didn't meet Feb. 22 and had items from two weeks to go over. However, by doing away with trivial conversation and sticking to business, everyone was heard from and each item was taken care of in the allotted time.

Christie Heslep, last year editor of the *Prickly Pear*, and John Neiuber, appeared before the Senate requesting funds to publish the *Prickly Pear* for 1976-77.

The *Prickly Pear* is the literary magazine of CSCSB and publishes selected poems and stories by the students and faculty of the college.

Last year, 1,000 copies of the *Prickly Pear*, which contained 32 pages, were published at a cost of \$790. With inflation in all phases

of the endeavor, the same number of pages and copies will cost \$1,000 this year.

Heslep petitioned the Senate to allot \$1,260 for this year's *Prickly Pear* to allow publication of forty pages; four additional printed pages and four pages of illustrations, which it is hoped will be prepared by the schools art students.

Mike Hughes, president of the Inter Organization Council (IOC), spoke to the Senate in regards to changes in the IOC

constitution pertaining to establishment of a council quorum.

Earlier in the quarter, the IOC members attempted to make changes on their own and the Judicial Board suspended and nullified action taken by the council and placed the Council on informal probation until the constitution changes were approved by the Senate. The request was sent to the Rules Committee, with a request for expeditious action and a report to

the Senate next week.

The Senate, upon recommendation of the Appropriations Committee, voted to increase the scholarship stipend for the ASB President, Kevin Gallagher and Vice President Fred Deharo, \$75 a quarter. This will now bring the stipend to \$275 a quarter for each officer.

The scholarship increase has been under discussion and consideration by the Appropriations Committee for several weeks. The increase in the subsidy was recommended some time ago due to the increased responsibilities of the respective positions. Both Gallagher and Deharo have put in many additional hours, over preceding quarters, attending to their duties which have increased, presiding at meetings and performing extensive travel while attending to the school's legislative program.

Deharo gave the Senate a synopsis of the happenings at the last meeting of the Student Presidents Association (SPA) and reported that ASB President Gallagher has been nominated as vice chairman of the SPA to replace the incumbent, who is moving into the presidents position, due to the resignation of the current president.

The chancellor, Deharo said, has proposed an additional fee of \$10 a year be imposed on California State University and College students, to be collected quarterly. Many of the student presidents, including Gallagher, are opposed to the idea.

Deharo reported the Writing Skills Test the Trustees wanted administered to all incoming freshmen is losing steam and with a few more obstacles thrown in the way of the program, it will probably die out.

The Campus Police Force is now fully staffed and will be in a better position to more adequately monitor all the campus parking areas for violations and issue tickets, Deharo said.

The tickets issued by the Campus Police in the past have generated about \$500 a year in revenue. Business Manager Leonard Farwell told Deharo that the auditors feel that with the number of vehicles currently on campus, more revenue should be produced in the way of fines.

The Senate in other action voted to allot \$350 to the Physical Education Department, to be used in hiring a student assistant to monitor and take care of the handball courts at night.

Also approved was the transfer of \$100 to the bad check account to cover a check written by a student with insufficient funds to cover it.

A motion was sent to the Appropriations Committee for their recommendation on a request for \$75 to construct three suggestion boxes.

Senator Rick Napier, chairman of the committee to establish the suggestion boxes, said the boxes could be made available approximately three weeks after the money is approved, and will be placed at the Administration Building, the Library and in the Commons.

The Senate members feel the suggestion boxes will be of great benefit in helping the students make their desires known to the Senate.

Jim Gallen, John Atkinson and Marta Lopez were not present at the meeting.

VA tries to ease paperwork

The Veterans Administration has moved to relieve most schools from complex reporting requirements set by a recent law designed to prevent abuse of the GI Bill.

The legislation, the Veterans Education and Employment Assistant Act of 1976 (PL 94-502), contained reporting requirements designed to weed out courses that have occasionally been employed by unscrupulous operators to defraud veterans using their GI Bill benefits.

In general, the Act required schools to limit veteran enrollment in a course to no more than 85 percent of the total. This and the law's other monitoring requirements would have required schools to keep far more detailed student attendance and course administrative records than most do.

"Because a number of schools in California and across the country have experienced difficulty in complying with the reporting requirements of the law," John G. Miller, director of the Veterans Administration Regional Office in Los Angeles, explained, "the VA has authorized a waiver of the requirements in cases where a school certifies that no more than 35 percent of its students receive VA educational assistance."

Miller stressed that the waiver applies only to a school's total enrollment.

"Schools must continue to report to the VA on specific courses of study where the percentages of VA-supported veterans enrolled in those courses is more than 85 percent of total enrollment in the course," he said.

The VA is the source of the largest amount of federal aid for the nation's college students, providing some \$5 billion a year in student assistance. According to Director Miller, 157,590 students attend 1,127 California schools under the GI Bill. Their VA educational and rehabilitation benefits amounted

to \$821,692,000 last year.

"With that much money going to that many people, there is always a potential for abuse," he said.

Primary areas of abuse have involved students who enroll in college simply to qualify for veterans benefits, receiving their monthly checks and failing to show up for class. Daily attendance checks are a thing of the past at many schools and this has added to the VA's monitoring difficulties.

According to Miller, there have also been a few schools around the country that have lured

veterans to enroll, openly admitting that tuition dollars, not class attendance was what really mattered. Some schools have gone so far as to establish meaningless courses and special programs for veterans and then filling them entirely with GI Bill recipients.

"This legislation was an attempt by Congress to deal with these and other abuses," Miller explained. "The VA will continue to search with the schools for ways that will protect the taxpayers' investment and the veterans' benefits without disrupting the schools, them-

selves, with overly burdensome and expensive administrative requirements."

The VA also waived the requirement for the current school year that students receiving Basic Education Opportunity Grants and Supplemental Educational Opportunity Grants be counted when a school must make a course-by-course computation of federally funded students.

These grants go to students from low income families and are administered by the Department of Health, Education and Welfare.

Mental hospitals lead to 'career of madness'

How mental hospitalization can lead to a "career of madness" will be discussed by sociologist-author Thomas Scheff at Cal State, San Bernardino Wednesday evening, March 9.

The public is invited to attend the free lecture by Dr. Scheff, professor of sociology at the University of California, Santa Barbara, 7 p.m. in Room 104 of the Lower Commons.

Titled "Labeling Madness," the talk will cover the effects of public and professional attitudes on the behavior of mental patients.

Scheff's position is that our

very reactions to social deviance may contribute to and stabilize the deviation, according to Dr. Donald Caetano, assistant professor of sociology, who is arranging the lecture.

The speaker believes that hospitalization can be harmful because it socializes the patient into a life of dependency, lack of responsibility and madness, Caetano says.

"Scheff would agree with the famous anti-psychiatrist Thomas Szasz's position that just as the people of the middle ages sought to control an imaginary witchcraft and in so doing created

witches,

"So modern man seeks to control mental disease and simply creates mental patients."

Scheff was a consultant to the California legislative subcommittee on mental health services, whose report, "The Dilemma of Mental Commitments in California" was instrumental in the passage of the Lanterman-Petris-Short Community Mental Health Services Act.

This act set up local community mental health services on the premise that community-

based treatment was best for the mentally ill and hospitalization should be used only as a last resort.

Scheff also served as consultant for the Governor's Advisory Mental Health Committee in Wisconsin and for the Joint Information Service of the American Psychiatric Association and National Association of Mental Health.

The sociologist is the author of the 1966 book, "Being Mentally Ill: A Sociological Theory" and "Labeling Madness" published in 1975.

Family planning underway

A new family planning program is underway at CSCSB's Student Health Center. In connection with Family Planning of San Bernardino Health Department, a more comprehensive type of birth control program is being instituted on this campus.

Under certain eligibility requirements, individuals may receive Pap smears, if appropriate, and birth control materials free of charge. Treatment for infections is also included. Those currently enrolled on MediCal should bring

along a P.O.E. sticker.

Individuals will be asked to fill out certain forms which include a medical history, financial statement and statistical sheet. All such information will be held in strict confidence.

Services also include an automatic check for gonorrhea.

Clinic will be open Tuesday and Wednesday from 1 to 4 p.m.

Those requiring the above services or counseling concerning pregnancy or abortion should call the Clinic at 887-7218 or drop by AD-117.

New vet coordinator

Tim Tucker is the new veteran's affairs coordinator at Cal State, San Bernardino.

Tucker, a resident of San Bernardino, earned a B.A. degree in psychology at the University of California at Riverside in 1972 and the M.A. degree in education with a counseling emphasis from Cal State in 1975.

Tucker also served as a personnel specialist in the U.S. Army in Vietnam July 1968 through February 1970.

He began work March 2, succeeding Hank White, who left the college in January.

In addition to answering questions about Cal State and GI

benefits, Tucker says he is available to counsel veterans.

"Veterans also need to know that they can lose their benefits if their average drops below a 2.0 (C) and that they are eligible for up to \$65 a month for tutoring from the Veterans Administration to keep their grade-point average up," Tucker said.

Enrolled veterans should also let Tucker know if there's a change in their student status, he said.

Persons interested in information on GI benefits for students can call Tucker at the Cal State Veterans Services Office.

Notice

The Campus Police will be disposing of unclaimed lost and found items from 1975-76 academic year. Any students wishing to claim or check on lost items should check with campus police at 887-7555.

Feminist news: women in gov't, art; grantswomanship

By Sydne Moser-James

Women's Art: Persons interested in women's art can write to the Women's History Research Center, 2325 Oak Street, Berkeley, Calif. 94708 for an annotated directory of women in the field of visual arts, *Female Artists Past and Present*, 1974, ed. Vicki Lynn Hill. The cost is six dollars.

California Women in Government: The California Women in Government is a statewide organization concerned with the development and advancement of professional women in administrative positions. It is a group of professional women working in administrative, managerial, and supervisory positions in government and quasi-government agencies in areas including (but not limited to) planning housing, general administration and public works in federal, state, local and regional government.

Earn psych credits at your own pace

By working at your own pace, a person can take three psychology classes in one for 15 quarter units of credit during spring quarter at Cal State, San Bernardino.

And he-she doesn't have to attend class or lectures or take a mid-term, according to Dr. Kathy Pezdek, assistant professor of psychology, who sponsors the course.

The class, Psychology 388, is an independent study course. Students are given a study guide and list of textbooks for the three basic courses covered: Introduction to Psychology, Advanced General Psychology and Methods of Psychological Inquiry. The guide contains mini-quizzes which are good preparation for the final exam, Dr. Pezdek said.

The course enables psychology majors to get three introductory classes out of the way at one time. It is also a good brush-up course for persons preparing for the Graduate Record Exam required for graduate school and is ideally suited for any student who works during the day and cannot attend classes.

Students may meet with Dr. Pezdek for several optional discussion sessions or consultation when they need it. The final exam will be given in two three-hour segments from 7 to 10 p.m., June 14 and 15. Since the entire grade depends on this exam score, the course is not recommended for persons who do not do well on tests.

The class will also be offered in summer session. Dr. Pezdek recommends it for students who would like to get their prerequisite psychology courses out of the way before fall.

To register for Psychology 388, a student must be enrolled at Cal State. Dr. Pezdek or the Psychology Department (887-7226) can provide more information.

California Women in Government sponsors conferences and workshops designed to enhance the skills of professional women and increase communication with professional women in different jurisdictions, agencies, and areas of expertise. They maintain a computerized data-recourse bank for use by women seeking the skills of professional women. Student membership is five dollars and is open to any person who is pursuing a professional career in government or government related activity in the State of California. Submit applications for membership to California Women in Government, 311 So. Spring St., Suite 435, Los Angeles Ca. 90013.

YWCA Women's Center lectures: Don't forget the Wednesday 7-9 p.m. lectures held at the YWCA 566 No. Lugo Ave., San Bernardino. Call 889-9536 for up to date information on speakers and topics.

The YWCA is also looking for volunteers for its **Big Sister Program**. Volunteers work about three hours a week with community girls who need friendship and emotional support. Contact the "Y" Youth Director for more information.

The **Woman's Building**, 1727 No. Spring St. Los Angeles has the following programs scheduled for this next week: Saturday, March 12, One day workshop: **Art Criticism**, Sandy

Ballatore; **Grantswomanship**, Michelle Kort, 10 a.m., \$18 - \$16 members. Friday March 11: **Video Series**, Sheila Ruth and Jan Zimmerman, **Signed by a Woman**, a perspective on California women's art; interviews with 15 different artists, groups, and critics. Call 213-221-6161 for more information.

Next week's column will have information on the Commission on the Status of Women and on more local programs and events.

Persons having any information on women's activities, programs, or happenings are urged to contact Sydne at the PawPrint office.

Sex differences discussed

Sex differences in attitudes, interests, values and personality will be discussed at Cal State, San Bernardino Monday, March 14 by two psychologists who have been researching the topic for several years.

The public is invited to hear the presentation by Dr. W.T. Plant and Dr. Mara Southern from San Jose State University, at 3:15 p.m. in LC-500.

Presented under the psychology colloquium series, the lecture is sub-titled "Much Ado About Little," said Dr. Les Herold, associate professor of

psychology at Cal State, who arranged the program.

Plant and Southern currently are on sabbatical leave from San Jose State, touring and discussing the research which they have published and their ongoing work. He added: "They have collaborated for several years on this research and are very knowledgeable."

Plant, professor of psychology, and Southern associate professor and university testing officer, both earned their Ph.D. degrees from Stanford.

Chamber orchestra plays Bach, Stravinsky, Mozart

Works of Bach, Stravinsky and Mozart will be performed by the Cal State, San Bernardino chamber orchestra Sunday, March 13.

The program will begin at 7:30 p.m. in PS-10. Admission is \$1.50, with children and students with identification admitted free.

Dr. Richard Saylor, music professor, is the conductor.

Solosits in Bach's Brandenburg Concerto No. 4 will be Candice Mitchell of San Bernardino and Sarah Nesbit of Rubidoux on flute, Carol Cheek of Loma Linda on violin and James Teel, San Bernardino, harpsichord.

An afterglow of the melodic material in the Bach concerto will be heard in Stravinsky's

"Concerto in E Flat," also known as "The Dumbarton Oaks Concerto."

Stravinsky was very involved with the Brandenburg Concertos at the time he wrote his 1938 composition and the first theme in particular is based on Bach's style, Saylor says.

The orchestra will play Mozart's Symphony No. 41, nicknamed "The Jupiter," the composer's last symphony and regarded as one of his greatest.

"It has a poignant and beautiful second movement and an extremely complicated finale, which displays Mozart's contrapuntal prowess. Some feel it's the most satisfactory conclusion ever written," the conductor says.

Mark Wenzel does his comic mime act to warm up the audience before The Association performs. Photo by Kerry Kugelman.

Cal State offers similar comprehensive courses in interdisciplinary studies (general education requirements),

sociology and criminal justice. Information is available from the appropriate department.

Serrano Village

House resourcepersons needed

Information about applying for House Resource person (H.R.) positions in Serrano Village for the 1977-78 academic year is now available. Any current Cal State sophomore, junior, senior or graduate student not on academic probation who has an interest in helping people and who would enjoy being a leader in a group living situation is invited to pick up the "Job Description and Selection Sequence" from the Housing Office, Mojave 112, between 8:30 a.m. and 5 p.m. any weekday until March 14.

The duties of the H.R. vary from everyday tasks of posting notices and locking doors at night to the more serious responsibility of making emergency decisions or dealing with an emotionally distraught resident. Further

details about qualifications and job responsibilities may be found on the Job Description and Selection Sequence. Any further questions may be found on the Job Description and Selection Sequence. Any further questions may be directed to Dr. Henderson at the Housing Office or Laraine Turk at the Housing Office or Activities Office.

Remuneration for the H.R. position is room and board in an extra-large single room in the

Each H.R. is responsible for 35-40 residents in one of the 8 houses in Serrano Village. A variety of lifestyles is provided for in the Village. There are four coed houses, one all female house, one all male house, a coed upper-division Quiet House, and a coed Consideration House.

ATTENTION NIGHT STUDENTS!

ASB has started an Evening Services office in PS-22, the PawPrint office.

There will be free coffee and tea. Also, all ASB Bulletins and other literature will be available there. If you have any comments or suggestions about anything on campus, this is the place to leave them.

The Evening Services offices will be open from 5:30 p.m. to 9:30 p.m. Monday through Thursday.

See you all there!

PAID POLITICAL ANNOUNCEMENT

Elect
Richard Bennecke
Mayor - March 8
'A change for the people'

News

Applications for enrollments now taken

Applications still are being accepted for the spring quarter at Cal State for all undergraduate degree programs and all graduate programs except the M.S. in clinical psychology.

Prospective students whose application forms are received at the college by 5 p.m., Friday, March 4 will be given a regular priority number for registration. However, new students will be accepted through the spring registration period, which is March 30 and 31, Ms. Weese said.

Applicants submitting their papers after March 4 must make an appointment to see Cheryl Weese, admissions officer and will register for classes in the last period on March 31. Ms. Weese urged students interested in attending Cal State this spring to submit their application forms (and \$20 fee) immediately. Transcripts from prior colleges or high schools can follow, she said.

How to teach adults class offered

Ways of presenting subject matter for adult students will be discussed in a three-weekend course starting March 18 in Palm Desert. The class, sponsored by the Cal State, San Bernardino extension office, is required for the renewal of the adult education credential under the Fisher Bill.

Meetings will be held from 6 to 9 p.m. to 4 p.m., Saturdays, March 18-19 and 25-26, and April 15-16 in LA-3 at College of the Desert.

Organizing course work, classroom management, audio-visual materials, participatory activities and evaluation procedures will be covered by the instructor, Bill Brown, adult education administrator for the Coachella Valley Unified School District.

Cost of the class, which gives three units of extension credit in education, is \$66.

A free bulletin with information on this course and others offered this spring in the Coachella Valley may be obtained from the Cal State Office of Continuing Education, 5500 State College Parkway, San Bernardino, 92407. The phone number is (714) 887-7527.

Mid-term high school graduates or seniors also may enroll for classes at Cal State. Ms. Weese can explain the provisions for dual enrollment by seniors.

Special assistance for veterans recently discharged or those getting an "early out" to attend college is available from Rick West, the Veterans Administration representative on campus.

Individuals uncertain about

their prospects for attending college and wishing some one to talk to are encouraged to contact the Center for New Directions in the Student Services Building. Informal counseling is available there without the necessity of first enrolling in the college.

The Child Care Center and the Infant Care Center will continue to serve Cal State students this spring. Pre-registrations are being accepted now. Children ages 2 to 12 are cared for at the

Child Care Center at Kendall School, a half mile from campus. The Infant Care Center, located at the College Dale Baptist Church, near the school, can accommodate infants from three months to two years. Both centers are open from 7:45 a.m. until 6:15 p.m., Monday through Thursday, and 5:15 p.m., Friday.

Registration forms are available from the dean of students office of the Student Services Building. Fees are

based on sliding scales for qualified students. As a special service to students, child care will be available during spring registration March 30-31. Parents may leave their infants or youngsters in room 129 of the Physical Education Building during the time they are completing their registration in the gym. There is no charge for this special service which is available from 10 a.m. to 6 p.m. on the two days.

Small business class offered

Owners of small businesses in the community will have a chance to compare problems and solutions in a Cal State, San Bernardino course starting April 4.

The small size of the class will permit exchange of ideas as well as questions relating to individual problems, says Dr. Jack McDonnell, chairmann of the Department of Business Administration within the School of Administration at Cal State.

The class will meet from 8 to 9:30 p.m., Mondays and Wednesdays, in Room 293 of the Library Building.

Instructor will be Ronald Jensen, assistant vice president of Santa Fe Federal Savings and

Loan Association. Jensen earned his master's degree in administration from the University of California at Riverside. He is president of the Tri-County Chapter of the Institute of Financial Education and is on the institute's national education committee.

Management, acquisitions, location, legal considerations, finances, taxation, labor relations, pricing policies and determining a target market are among the topics to be covered.

The course is being offered for the first time by the college as an aid to local business owners, McDonnell says. Others who might benefit are those planning to open businesses in the future

and professional persons in small offices, the chairman continued.

The course, Administration 442, is part of the regular curriculum, but is available to those not enrolled at Cal State through an "open college" policy. The course fee for persons not registered at the college is \$110. These students are urged to call the Office of Continuing Education to reserve a place in the class in the event it should be over-crowded. Regularly enrolled Cal State students have first priority.

Individuals wishing further information on the course are invited to call Dr. McDonnell at the college, 887-7711.

US, Soviet Navy compared

Captain James W. Kehoe, Jr. U.S. Navy of the Naval Ship Engineering Center, Hyattsville, Maryland will be a guest speaker in Dr. Richard Ackley's American Foreign Policy class at 3 p.m. Wednesday March 9 1977 in LC-5.

Capt. Kehoe, a specialist in Soviet ship design, will deliver a slide presentation comparing U.S. and Soviet warships in general and on the new Soviet aircraft carrier, Kiev, in particular, emphasizing military capabilities and limitations in supporting foreign policy.

Capt. Kehoe has been engineering officer of the aircraft carrier USS Wasp (CVS-18), and commanding officer of the destroyer USS John Pierce (DD-753). He is the author of several articles on comparative ship design and his forthcoming trip to California is to present a briefing on the Kiev to the Rand Corporation in Santa Monica.

All interested persons are invited to Capt. Kehoe's presentation.

Clean Air meet

Clean Air Now (C.A.N.) will be holding their monthly general meeting in the second floor Board Room of the Riverside City Library, 3581 7th Street, on March 15, 1977, at 7:30 p.m.

Committee reports will be given and progress will be noted with respect to legislative action, memberships, etc.

Clean Air Now is a non-profit, citizens organization founded in Riverside. Their goal is to reduce air pollution in the Riverside-San Bernardino area.

Contact Peter R. Zweig at 688-1122 (business) and 689-3856 (home) if you have any questions.

Underwater photo class

UNDERWATER PHOTOGRAPHY COURSE will begin Thurs., March 24, at 7:00 pm, at the Family Branch YMCA in San Bernardino. The course will consist of 6 lectures and critique sessions and 5 photosessions. Course fee is \$60 and includes cost of film and development.

Nikonos cameras are available to rent and Ikelite housings can be ordered for your land cameras and strobes. You must be a certified scuba diver to enroll in the course, and NAUI and PADI specialty cards will be given in Underwater Photography.

For further information call Susan at 885-0561 (nights) or send your name and address to Sea-to-Sea Scuba School, 802 E. 16th St., number 7D San Bernardino, California 92404.

Kommander Korn, leader of the Kal State International Marching Kazoo Band was discovered to be saving bilabial fricatives in balloons in light of the natural gas shortage.

Money for School

Applications are now being accepted for financial aid for the 1977-78 academic year. Students may receive the following types of assistance:

Grants	\$1500 maximum
Loans	\$2500 maximum
Work Study	\$2000 maximum
Scholarships	\$ 600 maximum

Forms are available in the Financial Aid Office, Room 120, Student Services Building. All Forms must be completed and on file with the Financial Aid Office by April 1. Do not wait, your education could depend on it! Remember, April 1 is the deadline.

NOTE: Funds are still available for this academic year. If you need financial assistance to complete this year, stop by the Financial Aid Office for more information.

Dorm living invaluable

Dorm living is an invaluable learning experience, says Dr. Craig Henderson, coordinator of housing for California State College, San Bernardino.

In living apart from his family, the student becomes his own person, says the administrator, who joined the Cal State staff this quarter.

"Dorm life also provides an opportunity to mix with other students and gain insight into what they are thinking. There is a great difference in life styles — and part of learning is shared experience," he said.

Henderson regards the living arrangements in Cal State's Serrano Village as especially conducive to this kind of interrelating. The houses are designed to accommodate a maximum of 50 students, with 10 to a suite. More students elect to

live there each year. The occupancy has now reached 240.

The Cal State halls were built when planners had become more conscious of students' needs to have a residence that feels like a home, in contrast to a large "sterile" building with long corridors, Henderson adds.

Henderson previously worked as assistant to the dean of men at the University of Denver and most recently was director of the graduate and international student residence hall there.

He also has been a graduate residence advisor at Colgate University and a student activities director at Rutgers University. He earned a Ph.D. in higher education from the University of Denver and an M.A. in student personnel from Colgate.

Weather balloons being launched from here

Storm Seeding

Rain dances are out, but the San Bernardino Valley Municipal Water District is launching trial balloons from Cal State, San Bernardino as they explore locally a way to increase San Bernardino Valley's water supply, a way which may save the district \$500,000 a year in water supply costs.

The district is mandated to come up with supplemental sources of water for the valley. As part of a five-year storm-seeding project, the water district has been launching weather sensor balloons from a Cal State parking lot into orographic storms.

A small transmitter attached to the orange parachute below the large onion shaped helium balloon records data on wind velocity and direction and temperature as it rises into the storm, climbing 1,000 feet a minute.

Each balloon is tracked and its data carried back to the campus by a dish-shaped receiver, at the site until it reaches 30,000 feet. The balloons continue to rise and expand to a 14-foot diameter until they explode at 80,000 feet.

If the transmitted data indicates optimal conditions, the storm is seeded by some or all of eight generators located throughout the San Bernardino mountains.

Those optimal conditions are: winds from the west or southwest at 30 knots (35 mph) and a temperature of from -9 to -29 degrees Fahrenheit at 17,000 to

19,000 feet altitude. The storms of Jan. 7 and Feb. 23 and 24 met those conditions.

On those days the mountain generators were turned on to shoot a propane flame containing a suspension of silver iodide and ammonium iodide into the clouds which caused moisture to condense and fall to the earth as snow.

District water resources engineer Larry Rowe said the district probably increased the snow pack of those storms by 10 per cent, or 1 to 2 inches. Seeding 7 to 12 such storms in a winter would result in an annual increase in melt-off into the San Bernardino Valley of 5,000 to 6,000 acre-feet, enough water to meet the annual needs of a city the size of Colton.

Not only would such seeding of winter storms provide a local stable supply source of supplemental water, but it would result in substantial savings to the district, Rowe said.

At present all supplemental water for the San Bernardino Valley is purchased from the California State Water Project at \$100 per acre-foot. The cost of water from a local seeded storm is \$1.50 per acre-foot. District personnel estimate that the seeding project could result in an annual savings of from \$500,000 to \$600,000 a year for the water and additional savings in energy and transport costs. The seeding cost is \$25,000 to \$26,000 a year.

Using meteorological forecast data, the district launches the

balloons in a storm: one into the front, one during the storm and one when the storm is about to end. The real-time data enables personnel to adjust the mountain generators as precipitation conditions require.

The seeding target area upwind of Cal State is centered over Barton Flats and is bounded on the south by the San Bernardino-Riverside county line, on the east by Onyx Summit near Heart Bar State Park, on the north by Delamar and Gold mountains north of Big Bear City, and on the west by Arrowbear Lake and Running Springs.

This target area provides melt-off into the Santa Ana River and Bear and Mill creeks and into the heart of the San Bernardino Valley.

The district is required to collect measurement data on storms it does not seed for comparison, and to collect samples of snow and flora in the target area and examine them for signs of negative environmental impact caused by the seeding. So far no negative impact has shown up, Rowe said.

The water district uses equipment on loan from the United States Navy and provides data and lectures for Cal State classes in exchange for its fenced monitoring location on the campus.

While weather modification projects like this are not the sole answer to water shortage problems, they do have their place, Rowe said.

Cal State, San Bernardino launches its own trial balloon as a part of the Municipal Water Districts efforts to increase the amount of rain.

Science and health

Current heart paradigm questioned

By David Hendricksen

Very few in the medicoscientific community would refute the official dietary cardiovascular paradigm succinctly described as (1) atherosclerosis is the underlying process leading to coronary heart disease; (2) atheromas contain fats and cholesterol; (3) the higher the concentration of these substances in the blood, the greater the rate of formation of atheromas; and (4) dietary intake of fat and cholesterol has a direct influence on the levels of these substances in the blood.

This theory has evolved logically from a series of scientific experiments and epidemiological investigations. Not surprisingly, the Task Force on Arteriosclerosis of the National Heart and Lung Institute has stated that it would be wise "for the American people to follow a diet aimed at lowering serum lipid concentrations. For most individuals, this can be achieved by lowering intake of calories, cholesterol and saturated fats."

This advice is not to be taken lightly, but there must be a great deal more to the whole issue than this. How, for example, do we explain the fact that in the original cultural state, the

Eskimos subsisted almost entirely on a diet high in animal fat and protein, yet had a very low incidence of myocardial infarctions (heart attacks).

One might also consider the Northern Asiatic Indians who eat 23 per cent of their calories as fat, nearly all saturated, and who have a low cardiovascular mortality; while the Southern Indians consume very little fat (3.5 per cent of calories - half of which is unsaturated), but have an incidence of acute myocardial infarction seven times higher. Americans, by the way, consume enough fats to constitute about 40 per cent of their total caloric intake.

Another example which raises questions is the study done in Ontario, Canada, covering the years 1901 to 1961 which found no increase in deaths from cerebrovascular disease during that period, but a real increase in mortality from coronary vascular disease. If the formation of atheromas is related to increased intake of fats and cholesterol, why should the coronary arteries be involved and not the cerebral arteries.

Undoubtedly more is involved in heart disease than diet, but before leaving that aspect of the

subject, we should mention that some have called refined sugar the villain. They cite several epidemiological studies to support this, mainly conducted in several African cultures. In addition, they point out that the most significant dietary changes in Western countries in the past century has not been in consumption of fat but in consumption of refined sugar. Perhaps it should be mentioned here that the loss of fiber in our highly refined foods is blamed by some for increasing incidence of colon cancers.

The final dietary factor related to heart disease is salt. Americans consume five to twenty times more salt than necessary each day. Excess salt is related to high blood pressure and several other conditions. Jean Mayer has stated that the simplest and best dietary action for most Americans would be to remove the salt shaker from the table.

Next week we'll consider other lifestyle events related to heart attacks, and we'll begin with the report of four men who had a total of six documented heart attacks between them, and who each subsequently completed the Boston Marathon.

Incredible!

Do you suffer from magnetic irregularities or atomic piles? Then we recommend Preparation H-bomb, the nuclear physic.

Plop, plop, fizz fizz.
From bowel to bowl,
Oh what a relief it is.

ATTENTION NIGHT STUDENTS!
ASB has started an Evening Services office in PS-22, the PawPrint office.

There will be free coffee and tea. Also, all ASB Bulletins and other literature will be available there. If you have any comments on suggestions about anything on campus, this is the place to leave them.

The Evening Services offices will be open from 5:30 p.m. to 9:30 p.m. Monday through Thursday.

See you all there!

Features

Disabled Student Services wants to help

by Jeanne Houck

A small, but enthusiastic group animatedly discussed their special problems last Thursday in the Lower Commons. They were determined to do something to help themselves, and others like themselves. The result; the resurrection of a campus organization for the physically handicapped.

Laraine Turk, newly appointed co-ordinator of Disabled Student Services says that there are two main reasons for the existence of such a club. "There is, of course, the social interaction among the students and also an advantage in sheer numbers. There is power in a group. A group saying We need this is more influential than an individual saying I sure would like this."

Turk says many disabled students, especially students with "invisible" handicaps such as dyslexia and arthritis, don't like being labeled: "handicapped," and shy away from meetings of the handicapped. But as was voiced repeatedly in the meeting Thursday, the support of all disabled students is necessary to accomplish the organization's goals.

Another subject was the Disabled Students Service office. This office is a goldmine of information relating to the handicapped student. Located in SS-143, the office is run efficiently by Turk and her secretary, Caroline Rounds. Here, the disabled student has access to countless informative pamphlets and

periodicals specifically for the handicapped. Counseling and registration help is provided.

News of field trips, job opportunities, and conferences (there is one in San Jose March 11) is available. Here a handicapped student can inquire into personal services such as tutoring, and mobility assistance. The office also has things like books on tapes, and in Braille. Turk stresses, "Consider us a helpful agency, we try our best to meet the needs of our students."

Another result of the meeting Thursday was the decision to start the production of their own newsletter. It will be published in the beginning of the Spring quarter and will contain pertinent information that is helpful to the handicapped.

Caroline Rounds serves punch as disabled students share experiences. Photo by Kerry Kugelman.

Mavi Pasillas reads from a page of Braille. Photo by Kugelman.

Handicapped vets need help finding jobs

By Hank White

Throughout the nation major veterans organizations are urging leaders in business and industry to make jobs available to disabled veterans and other handicapped individuals. The Veterans Administration has long had a policy of encouraging the employment of disabled veterans and handicapped persons and leads the way in hiring them.

During the fall Richard L. Roudebush, Administrator of the Veterans Administration said that in 1975 the VA had employed 12,194 handicapped individuals an increase of 662 over 1974. Roudebush emphasized that 6.6 percent of the agency's employees were disabled veterans and said that handicapped individuals and disabled veterans accounted for more than one in ten of the VA's nearly 220,000 employees.

"If VA's experience is any guide, the employers will be the real winner," said Roudebush, "While we at V.A. intend to do all

that we can, it is obvious that one agency cannot provide all the opportunities that are needed."

That's just it: where can disabled veterans find jobs? What employers want to expended money to have their files, for example, transcribed into braille? Not Many. So the job market becomes limited.

Isn't it a shame that hundreds of thousands of men and women veterans who have given of their flesh, limbs, spirits, and minds are unemployed because they are inconvenienced by living in a society that has for the most part been ill-equipped and insensitive to, or largely inept in dealing with their special needs, desires and concerns.

At a recent White House Seminar on Disabled Veterans last October, the following solutions was suggested to alleviate the deplorable unemployment situation for this special group:

1. All Counseling and Rehabilitation programs should incorporate job training, job development and most importantly, job placement as an integral part of the total rehabilitation process, with an emphasis on the job training. It must be fully realized that rehabilitation does not take place unless substantive employment is the end result.

2. Congress must provide adequate funding and sufficient personnel to those implementation of programs to hire, place, and advance the employment of the physically or mentally handicapped individual

while specifically enforcing veterans preference for this group.

3. A Coordinated Employment Placement Bank should be centralized for the compiling of job data etc. which should be matched with the job skills of the individuals. Profile the veterans. Profile the Jobs, Work the two

together with employment as the end result.

4. National Public Awareness programs of capabilities and special skills of handicapped veterans must be implemented down to the local levels stressing the positive aspects and destroying the various myths about handicapped individuals.

5. Establish local information seminars for private sector employers so they may learn of the what, where and how of hiring disabled and handicapped veterans.

6. There must be strong enforcement of local state and federal laws regarding equal opportunity and affirmative action programs, especially by the Employment Standards Administration of the U.S. Department of Labor to assure that federal contractors comply with Public Laws affecting the physically and mentally disabled veteran.

These suggestions are not intended to completely solve the problems of unemployment among disabled veterans but serve as a useful beginning.

Many disabled and handicapped veterans feel the use of "disabled" or "handicapped" implies "less than able" and portrays images of weakness, incapacity, or inability to perform in a normal manner. It is

imperative to strike down these connotations and let these individuals prove themselves. For many are too proud to beg, are too willing to work and too talented to ignore.

If you know of openings that are available or willing to assist an organization that helps disabled or handicapped veterans contact the nearest VA, DAV, AMVET, American Legion etc. office nearest you. They welcome your call.

Association in concert reviewed

Not many showed up

By Kerry Kugelman

What if they gave a concert and nobody came?

That was very nearly the case Saturday night at the California Theater in San Bernardino, when the Association came to town to give a concert sponsored by ASB. Even though the band gave a four-star performance, the attendance was, to say the least, disappointing. Though the group is not exactly a household word, they are still well-known enough that they should have been able to draw a fair-sized crowd, even in a hard-rocking town like San Bernardino, but apparently this wasn't their night.

Warming up the crowd before the Association appeared were Mark Wenzel, a well-known mime, who, in addition to performing at Sea World regularly, also does routines occasionally at rock concerts in the San Diego area, Debbie and Kevin Price, doing their "Duet for two Cats,"

which won them first place in the recent ASB-sponsored Talent Contest, and Bedlam A.C., a comedy band whose songs are heard regularly on the Dr. Demento radio program.

The Association began their set with some mellow material, and slowly picked the pace up a bit as they went along, although never really going all the way with the music. Spicing up the performance with several numbers by other artists, including Cheech and Chong's "I Been Framed."

Though the crowd was not very large, they still mustered commendable rounds of applause for each song, even some of the less familiar tunes.

Ending the concert with their three hit songs, "Along Comes Mary," "Cherish," and "Wendy," the Association showed that old bands don't have to die — they can just keep playing and making people happy.

Too bad you weren't there.

Letters To The Editor More on modern music

Alas, the defense of modern music, I see, partakes of the same depressing techniques of plastic thinking and false bravura so abundant an ingredient in the music itself. Mr. Hatt takes up in his last letter the very attitude one would expect to find in a musician who favors histrionic "publicity stunts" of the Satie Vexations sort (that great artistic example of monotony-posing-as profundity).

Mr. Hatt has always (at least in his Cal State performing career) opted for theatre-pieces of rather hum-drum quality in his commendably energetic pursuit of new and unperformed music. I remember with especial despair and humor one piece in which he went through a pathetically uninspired piano-repairing routine (complete with tools and grimaces), that left his time-wasting audience rather embarrassed at having to politely applaud this sorry spectacle of an intelligent young man sacrificing his dignity on the altar of the Academy-Approved in music.

This is the same Mr. Hatt who answers my detailed analysis of new music with the quite undetailed reply of "Too bad." Not only does he grossly simplify my argument (to say nothing of equating it with Mr. Austin's, who esthetic I do not even know), but in his amusing attempt to cultivate a pose of contemptuous indifference he stumbles into an inconsistency: Whereas he admits not giving a damn about music's continuing self-castration in basic emotional terms (the point of his "Too bad" remark), he turns around and gloats over the emotion-provoking qualities of such things as "a new piece for piano and shotgun."

Obviously, Mr. Hatt has not established himself in theoretical bedrock. Either he encourages the eunuchization of an art-form that steadily increases the distance between itself and the public, or he secretly craves the sort audience-raping sensationalism inherent in works employing simple-minded stage tricks that were outdated long before they were incorporated into the "new music."

Mr. Hatt accuses me of trying to destroy new music. Music of the sort he enjoys is already one step from the morgue, and not from any exertions on the critics' part. It is chilling over into death (in public-acceptance terms) because those who all along nursed it so lovingly were at the same time ripping out of its body the indispensable core of whole-man-oriented and fundamentally sound emotionalism. If the people are not "dumb" enough to allow me to destroy your favorite examples of music, Mr. Hatt, then why are they staying away from contemporary-music sections of record stores in proverbial droves?

Sincerely,
Clark Elder Morrow

Have passport will travel

Question: I'm planning my foreign adventure and my transportation is arranged, what's next?

Answer: Now that you have decided where you are going, the next step is to get the necessary travel documents. Described below are the four important travel documents needed to insure a smooth and relatively worry-free trip. If you don't already have one, first on your list should be the acquisition of a passport, and once your itinerary is planned, any necessary visas.

Also basic to any student traveler's document folder should be an International Student Identity Card, the most widely recognized proof of full-time student status.

Another basic travel document which is not always necessary, but good for your own protection, is a World Health Organization (WHO) Card, which is a record of all shot and vaccinations.

Question: Where do I get a passport?

Answer: Applications can be obtained from most post offices. You must apply in person when requesting your first passport at any designated post office or at one of the following addresses in the Los Angeles area:

U.S. Passport Agency
1500 Aviation Boulevard
Hawthorne, CA
Tel: 536-6503

In addition to your application, you must provide proof of U.S. citizenship in the form of a certified birth certificate, baptismal certificate, military commission papers, or naturalization papers; two recent duplicate photos between 2½" and 3" square; valid identification in the form of a valid driver's license, government card or witness; and a fee of \$13.

Your passport is valid for five years from the date of issue and is needed for entry into most foreign countries and for re-entry into the U.S.

Allow up to four weeks for processing.

Question: For what countries will I need visas?

Answer: Some countries such as those in Western Europe do not require visas for visits of less than three months. Other countries in Eastern Europe, Africa, or Asia may require visas for stays of only one day or for transit purposes. To be safe and avoid disappointment, contact either the particular country's tourist office or consulate, or World Wide Visa Service 13263 Ventura Boulevard Studio City, CA 91604 Tel: 873-3142

Question: What are the benefits of the International Student Identity Card?

Answer: The International Student Identity Card (ISIC) is the only internationally recognized proof of full-time student status. For \$2.50 the ISIC allows discounted admission to museums, theaters, and concerts; allows one to stay in student hotels and dine in student restaurants; and use the extensive network of student trains, ships and charter flights. For more information and applications contact:

CIEE Student Travel Services
1093 Eroxtan Ave., No. 224
Los Angeles, CA Tel: 477-2069

or on campus see:
Doris Scott

Student Activities Center
Question: Will I need any shots or vaccinations for my trip?

Answer: The need for vaccinations or shots depends on your general health, the recommendations of your local health office, the entry requirement of the countries to be visited and U.S. re-entry restrictions. Necessary immunizations can be recorded in a World Health Organization Card, and given by your family physician or: World Wide Immunization Center, 7060 Hollywood Blvd, No. 910, Los Angeles, CA, Tel: 469-6774.

Intramurals

Those Guys no show, Kaopectate wins

By Laria Dieffenbachia
"A" League

Those Guys forgot to show up for their game with the Run and Gun.

Kaopectate had a "watery" victory over the Heads 58-40. The Heads' big guns Bob McDonald and Ron Henke weren't there so Steve Hernandez' 18 points picked up the slack. But it just wasn't enough.

"O'B" O'Brien's 10 points led the instructors in this, let's say, on-sided contest.

Betty's Boys went into overtime to nip the Best 63-61. Both teams had balanced scoring with 12 players between the two teams having 8 or more points.

For Betty's Boys: Jim Allo, 13 points; the infamous John Nagel, 14 points; and Rich Price, 10 points.

For the Best: Dan Harp, 14 points; Dave Harp, 13 points; and Greg Thompson 12 points.

"B" League Play-offs
The B Bombers annihilated the hapless Who Cares team 49-24. Reyes and Esposito "naged" basket after basket, while the Who Cares' Joe "Blind Man" Ainsworth couldn't find the basket.

The dubious profs played ferocious defense shutting off the Who Cares most prolific scorer (on the court?) Gayle Hendrickson.

Their leaping blocks of her set shots must have been a big ego builder for the idiot educators.

After the game Joe Long, the undeniable on the court leader of Who Cares, said the loss was probably due to the return of the Who Care's "Turkey" Grenfell.

Waterman played well, but couldn't beat the Fast Breaks. During most of the game it seemed to be a duel between Waterman's Mark Womack 23 points and Al Diaz 24 points of the Fast Breaks.

This duel was a good example of the closeness of the game in which there wasn't a decision until the final buzzer.

Too Old, Too Slow probably played their best game of the year in their 36-31 defeat at the hands of Tokay.

Gomez and Glasco led Tokay's scoring. While Butler and Person led the Tok's.

The final game of the day saw Mojave led by Mendonca, Nesbit and Runner beat Beefers II 41 to 40.

Ben McAllister's 20 points led the Beefers II.

Thanks extended

By Laria Dieffenbachia
I would like to take this opportunity to thank all those involved in the intramural and related activities this quarter. Joe Long, and his graduate assistants — J.C. Wright and Sandy Carter — ran some well done and most enjoyable activities.

People who gave their time to referee like — Dianer Bloecker, Francois McGinnis, Eric Sweetman and Miles Bogh — among others, and keep score like — Karen Kessinger, Cathy

Jackson and Charlie McKee — all deserve a great deal of thanks for their time spent (and more money?).

But most of all, a debt of thanks must go to those weird people who, instead of studying or spending their time earning money, spent their time enjoying themselves in intramural activities.

If you enjoyed yourselves in an intramural activity it is hoped that you would bring a friend and participate in another activity later this, or next quarter.

DD's finally break even

A tied score, 19-19, was the final outcome of last week's court confrontation between the Sugar Mamas and the Double Dribbles. In view of past performances, this score is quite commendable! In the past three games, the Sugar Mamas have consistently defeated the Double Dribbles by great margins:

Game 1: Sugar Mamas - 64, Double Dribbles - 18.

Game 2: Sugar Mamas - 64, Double Dribbles - 17.

Game 3: Sugar Mamas - 33, Double Dribbles - 24.

2 on 2 basketball

This week's results of 2 on 2 Basketball are scarce! As of this writing, the results of the Akadama Mama vs. the Persistent Pair are the only ones available.

Akadama Mama, Debbie Wade and Mohammed Saleh, defeated Persistent Pair, Diane Bloecker and Mark Womack, by a 2 to 1 victory.

More results next week!

Coming attractions

This week's games in the "A" League will be: Betty's Boys vs. the Best, 3 p.m., Those Guys vs. Heaus, 4 p.m., on March 9.

The winner of the 3 p.m. game will play Run and Gun next week, while the winner of the 4 p.m. game plays Kaopectate.

The "B" League semi-finals will be played with the B-Bombers playing the Fast Breaks at 3 p.m., March 11. At 4 p.m. Tokay will go up against Mojave, in the "Big" battle of "dormies."

The winners of each game will meet for the championship.

Game 4: Sugar Mamas - 19, Double Dribbles - 19.

This turn of the tables can be attributed to Debbie Wade's agreement to play on the DD side and the tough defensive work by the DD, themselves.

Sugar Mamas' high scorers were Diane Bloecker and Mary Abraham. Double Dribble high scorers were Debbie Wade and Sandy Brodock. Next weeks game will tell if the Double Dribbles can tip the scoreboard in their favor!

Classifieds

Male Student seeks roommate for 2 bdm., \$75-month house, at 250 18th St., 4 miles from Cal State. Available after April 1st; call 882-5745 for more information.

Male student seeks room to share, close to college preferred. Call 882-5745 for details.

Claim to fame

Cal State has a couple of basketball "claims to fame." One, it is very probably the only place left where there is a three point line used. This line is 22½ ft. around the perimeter of the basket, and a shot outside this line results in three points being awarded to the shooter.

The second you probably noticed in last week's intramural article. It is a singularly distinctive term for the less than enviable art of "cherry picking". This is when a player, for self-gratification through scoring a lot of points, does not play defense. Instead of defense this person will wait at his/her own offensive end for the long pass and subsequent lay-in.

John Nagel, "Mr. Intramural,"

Rec room offers pleasantness

By C.O. Yote

In the Morongo Recreation Room on Tuesdays at 6 p.m. you won't find any Lew Mathys, but you will find a very happy group of people.

The next logical step for you, would be to be wondering what these people are doing to acquire this pleasantness.

They are playing table games. Backgammon, table hockey, hearts are among the games that have already been completed.

Cynthia Groce was victorious in backgammon, while Mike Shafer won table hockey and Dennis Mendonca took the hearts tourney.

This week bid whist will be played. The game somewhat resembles bridge and is a whole lotta' fun.

So, instead of something very run-of-the-mill, like sex, this next Tuesday come out and play whist.

Campus Calendar

Tuesday, March 8

ASB Senate, 7 a.m., C-219
LDSSA, 9 a.m., C-219.
Business Management Club, 11 a.m., LC-287.
