Campus supports spending limit bill

By William Lundquist
Staff Writer

A campus-wide steering committee has been formed to support the passage of Proposition 111 and the Higher Education Facilities Bond Issue.

Proposition 111, which will come before California voters in June, would modify the state spending limit (the Gann limit) to reflect growth in the economy. It would allow the governor and legislature more latitude in addressing state needs.

In fact, Governor Deukmejian has tried the passage of Proposition 111 to his signing of Senate Bill 1645, which would limit the amount student fees may increase in any given year.

The current law that limits student fee increases expires on August 31, 1990. Last October, Deukmejian vetoed an assembly bill that would have extended the fee policy for another five years.

Policy experts at the California Post Secondary Education Commission predict immediate and substantial fee increases if Proposition 111 fails. They also predict cutbacks in student services, and caps on campus enrollment for the CSU and UC systems.

Anthony Evans, CSUSB President, said "One sure way for the students to limit their fee increases is to work for the modification of the Gann amendment, which would give the governor more flexibility than he now has."

The Higher Education Facilities Bond Issue would bring in \$450 million for public higher education. The funds are critical to CSUSB's building expansion program.

Because passage of the two measures is so vital to the entire CSUSB community, the steering committee will include members of the administration, faculty, unions, and student body.

Among the members are Judith Rymer, Vice-President for University Relations, and faculty members

Quake fears on the rise

Chances of a major earthquake in San Bernardino grow

By William Lundquist
Staff Writer

"It was the first time I was really scared in an earthquake," said Pfau Library employee Cheryl Simmons. She was shelving books on the fourth floor when the building began to shake.

"It was exciting because it definitely was big up here. There were piles of 30 to 50 books in every aisle."

Another employee agreed. "It was scary. Books were falling from the top shelves."

One floor up, in the Office of Extended Education, things were calmer. A few books fell off their shelves, and some file drawers flew open, but overall, the fifth floor fared better than the fourth.

"People got under their desks. That's just procedure," said Jeannie Colunga, a clerical assistant. Her office has an earthquake policy so that employees know which desks give the most protection. They have worked out a system to account for all personnel in the event of a large quake.

According to seismologist at a community forum on earthquakes held March 3, a larger earthquake is definitely in the future for San Bernardino.

"We live in a very exciting geological area," is how Doug Morton, a geologist with the U.S. Geological Survey (USGS) put it.

According to USGS publication, there is a 20 percent chance of a magnitude 7.5 or larger earthquake along the San Andreas fault in the San Bernardino Mountains within the next 30 years.

The most recent major quake in this area along the San Andreas is believed to have occurred around 1812. The estimated recurrence interval is 198 years.

As if the San Andreas wasn't enough, the San Bernardino Valley is the home of the San Jacinto fault. Thomas Heaton, a seismologist with the USGS said it has produced the largest number of magnitude 6 earthquakes in California.

There is also a 20 percent chance that the San Jacinto

fault will produce a magnitude 7 or greater quake in San Bernardino in the next 30 years. The last great quake here caused by the San Jacinto was probably around 1890.

The chance of a major earthquake in the Coachella Valley is even greater, at 40 percent within the next thirty years. The San Andreas has been locked in that location for 300 years.

A 7.5 earthquake would radiate 900 times the energy of the recent 5.5 Upland quake.

Congressman George E. Brown, Jr., the sponsor of the forum, will supply more information on earthquakes or earthquake preparedness, upon request. Write to 657 North La Cadena Drive, Colton, California, 92324, or call (714)825-2472.

Fault line and liquefaction maps are available at the San Bernardino County Planning Office. The USGS has an earthquake hotline, updated daily, at (415) 329-4025.

Zachary to speak on medical marketing

The California Inland Counties, American Marketing Association (CICAMA) March meeting will look at the field of medical marketing. The guest speaker will be Beth Zachary, vice president for Marketing and Business Development of White Memorial Medical Center, (WMMC). She will discuss the strategic marketing plan that turned WMMC into a profit making medical facility.

WMMC is a private, medium size hospital located in a highly competitive environment in East Los Angeles. Two years ago it was losing \$500,000 a month, had a high debt load, low employee and physician morale.

Ms. Zachary has received awards for program development, advertising, and communication from association such as the Academy for Health Services Marketing, and International Association of Business Communications, International Film and TV Festival of New York and the Society for Technical Communication.

The meeting will be held March 21, at the Inland Empire Hilton Hotel, 2385 East Hospitality Lane, San Bernardino. The no-host cocktail bar will open at 6:30 p.m. with dinner at 7:15 p.m. Ms. Zachary will speak at 8 p.m. Reservations can be made by calling Greg Zerovnik at 714-625-6068.

RESERVE OFFICERS' TRAINING CORPS

**START YOUR CLIMB
 TO CAREER SUCCESS THIS SUMMER.**

Apply now for six weeks of Army ROTC leadership training. With pay, without obligation.

You'll develop the discipline, confidence and decisiveness it takes to succeed in any career. And you'll qualify to earn Army officer credentials while you're completing your college studies.

For more information, contact MAJ Mike Robel, Student Services 126 or call 887-9545 (collect).

**ARMY ROTC
 TWO-YEAR PROGRAM**

**THE SMARTEST COLLEGE
 COURSE YOU CAN TAKE.**

WE PRINT OUR RESUME ON EVERY CAN.

If Budweiser is already your regular beer we'd like to say thanks for the business. If it's not, then we'd like to apply for the job.

Of course our resume can only tell you who we are. To discover just how good we taste, we suggest you set up a personal interview.

**THIS BUD'S
FOR YOU.**

CSUSB professors receive over 25,000 dollars in grants

Public Information Office
Special to The Chronicle

Two CSUSB faculty members are the recipients of more than \$25,000 in grants from the National Science Foundation (N.S.F.), designed to stimulate research activities of minority and women college professors.

They are Dr. Clifford Young, Associated Professor of Public Administration, and Dr. Karen Kolehmainen, Associate Professor of Physics. These grants are designed to assist professors in obtaining preliminary funding to prepare full research proposals for later submission to the N.S.F.

Young's grant of \$16,990 will be used to allow research on "Redevelopment and the Redevelopment Process from Three Different Theoretical Perspectives in the Two Counties of the Inland Empire." Young intends to use the funding in

order to conduct face-to-face interviews with parties involved in two redevelopment projects in Riverside and San Bernardino counties.

He hopes that these interviews will shed light on the particular philosophy involved in each redevelopment project. Young says that the results from these interviews will determine whether or not his future research will concentrate on one or all redevelopment programs in the Inland Empire.

Young's funding makes provisions for two student assistants, specialized computer software and travel expenses to be incurred when consulting with subject experts. He is presently in the literature review state, the lengthy process of reading all published data on the subject. According to Young, if his preliminary proposal is accepted by the N.S.F., his

funding for more research could be as much as \$300,000.

Kolehmainen received \$9,487 to assist her in preliminary research on the existence of quark matter in the early universe. The grant is entitled "Study of Hadronization and Quark-Gluon Plasma in the Early Universe." She plans to have her preliminary calculations completed by February 28, 1991, in order to begin the application process for further grants. The N.S.F. grant pays Kolehmainen's salary during the summer of 1990, when she hopes to complete much of her research. The funding covers the salary of a student assistant and will also pay for computer time. Also included is money for travel expenses so that Kolehmainen may attend conferences to discuss her work with colleagues.

Software discounts available to students and faculty

Business software costs too much! At least for students and other members of the academic community. So, a four-year-old company is doing something about it by arranging for high-tech software publishers to offer their PC and Macintosh software programs to colleges, faculty members and students at bargain basement prices.

CAMPUS TECHNOLOGY

College grads will be in demand

Today's college grad probably will hold as many as 10-to-12 jobs from the moment he or she graduates until retirement.

In an article in the "Journal of Career Planning & Employment," Dr. David L. Birch of Massachusetts Institute of Technology and of Cognetics, Inc., figures that, with American firms scrounging to fill labor shortages during the next decades, "college-educated employees will be able to just about name their own employment terms."

As a result, companies will readily raid each other for college grads, prompting former students to follow the most recent offer they get.

Scholarship provides aid for future teachers

The Paul Douglas Teacher Scholarship Program will provide up to \$5000 per year for up to four academic years to students who demonstrate commitment in pursuing teaching careers in the pre-school, elementary or secondary school level, and who agree to teach on a full-time basis for a period of not less than two years for each year of scholarship funding or repay the scholarship with interest.

A federally mandated requirement for this scholarship is that the student must have graduated in the top 10% of his/her high school class. CSUSB may select five recipients for this scholarship this year. Applications for this competitive program are available now in the Financial Aid Office. The deadline is April 1.

began operations in 1985 under the guidance of William R. Hornbeck, formerly the head of one of the technical sales divisions for WordStar International. "I saw a trend coming," said Hornbeck, "which indicated that software companies would be willing to give up a little of their front-end profits in exchange for an opportunity to build brand loyalty among members of

the academic community." "After all," he continued, "university men and women soon become business leaders and their experiences with good software in school can carry over to purchasing decisions at their future places of employment."

Following an initial start with WordStar wordprocessing software, in which the publisher agreed to market the \$495 soft-

ware program to educational buyers for just \$120 through Campus Technology, the company soon expanded its representation to over three hundred software products. "We were able to establish ourselves as a national centralized service center," said Hornbeck, "and we have found ourselves in a position to recommend academic pricing to many of the strategic software pub-

lishers."

In addition to special single unit and lab pack pricing programs made available to the school purchasing office, CAMPUS offers savings of between 50% and 80% off of regular retail prices to the individual buyer. The faculty member or student provides a photocopy of their current I.D. card along with

Sigma Chi raises money for Cleo Wallace Home

For the past five years Sigma Chi has been holding a teeter-totter event to raise funds for their charity. The fund raiser raised money for the children of the Cleo Wallace Center. The event lasted from 10 a.m. March 7 and ended last Friday, March 9 at noon.

The Cleo Wallace Center, Sigma Chi's national philanthropy, is a home in Colorado for children who are emotionally disturbed. The center is a nationally recognized non-profit corporation. In 1967 Sigma Chi took the center as its national philanthropy. All proceeds from the event will be given to the charity with a percentage going to a local children's center.

Mexico bound students must register first

Students crossing over international bridges to spend spring break in Mexico will be asked to sign in with Mexican officials starting March 1.

Mexico's government announced the program, in which students will be asked to register their names, as a safety measure in the wake of the murder of University of Texas student Mark Kilroy while he was vacationing in Matamoros last year.

"I think this will be a very confident way to know who is in Mexico," said Carlos Perez, deputy Mexican consul in Brownsville, Texas, just across the U.S. border from Matamoros. "As you know, we had a very unfortunate situation last year with the case of Mr. Kilroy."

AQMD seeks innovative research projects

The South Coast Air Quality Management District (AQMD) is seeking proposals from high school and college students to develop innovative ideas and conduct research projects dealing with air quality and pollution control, AQMD Executive Officer James Lents announced.

Selected projects will be funded through the district's Clean Air account, funds earmarked to promote innovative solutions to air quality problems, Lents said.

Grants for student projects will range from \$5,000 to \$20,000 and could be completed during the summer.

"We are looking to tap the most creative student minds

Financial Aid will not compensate fee increases

By Christopher Cabaldon
Consultant, Subcommittee
on Higher Education
Special to The Chronicle

There appears to be a great deal of misinformation on many UC and CSU campuses regarding the impact of proposed increases of campus student fees on financial aid resources. As student governments and campus administrations join forces to promote campus increases for aquatics centers, auto garages, saunas, health insurance, jacuzzis, pro sports shops, athletic stadiums, and concert centers, many students are being told that the pool of financial aid funds will increase to cover the proposed fee increases. In virtually every case, this is patently false.

University, respectively. To offset the increase, the proposed budget provides \$3 million for student financial aid. In contrast, UC San Diego and UC Santa Barbara students have been asked by their leaders to approve campus fee increases of over \$200 for recreational facilities, and health insurance fees exceeding \$245 have already been approved at seven UC campuses. To date, CSU campuses have been slow to mirror this trend, but substantial increases are being considered at several campuses. These types of increases make state appropriation of adequate financial aid cost-prohibitive.

Last year, students protested proposed systemwide increases of \$84 for UC and \$68 for CSU, arguing that,

"No funds are provided in the Governor's proposed 1990-91 budget to increase financial aid funds to offset campus fee increases."

No funds are provided in the Governor's proposed 1990-91 budget to increase financial aid funds to offset campus fee increases. Although the Legislature last year agreed to a policy of funding such increases, budgetary constraints and growing concern about the magnitude and use of these fees make eventual funding of this new policy doubtful.

At the same time, President Bush has proposed total elimination of the work-study program and the federal contribution to the Cal Grant program.

The governing board said the Governor has proposed systemwide student fee increases of \$69 and \$36 for the University of California and the California State

despite compensating increases in financial aid, the fee hikes would reduce access for low and middle-income students. The Legislature concurred and reduced the increases by more than half. In fact, the increase in student-approved campus fees was larger than the increase in systemwide fees last year (especially for UC graduate students). Despite a state budget that proposes cuts for health, welfare, and the schools, it appears that, once again, student-approved campus fee hikes for recreational amenities and insurance will exceed the systemwide fee increases this year.

In addition to clarifying on

RENT NOW FOR SPRING BREAK

Students who are planning trips for Spring Break, and who would like to rent camping equipment should make reservations with ASI Camping Equipment Rentals as soon as possible. Hours for the rental office are Monday and Friday 11:30-1:30 next to the Student Union desk. You can also leave a message for RecRentals in the ASI office, located in the Student Union.

There's only one product proven to grow even one of these.

This one.

From the time you first started losing your hair, you've wished for something that could somehow reverse the balding process. Now, The Upjohn Company has developed *Rogaine*, the first and only product that's proven to grow hair.

Rogaine is not a cosmetic or conditioner. It's a prescription treatment for male pattern baldness of the crown of the head that's available only with a prescription written by your doctor.

Two million men just like you have used *Rogaine*.

Today, two million men worldwide have seen their doctor and begun treatment with *Rogaine*. And for good reason. *Rogaine* works for many men. That's not a claim, it's a proven fact. Proven in clinical tests conducted by dermatologists at medical centers across the country. Proven by results that are simply unprecedented.

In a year-long test involving almost 1,500 men, only 16% reported no new growth. Virtually half (48%) saw at least moderate growth with *Rogaine*. 36% noted minimal growth. Generally, it took four months before hair began growing again. The side effects were minimal. The most common, itchy scalp, occurred in only 5% of the men.

Your doctor has the proof. And the prescription.

Your dermatologist or family physician will tell you what *Rogaine* can do for you. So see your doctor now. The sooner you get your prescription for *Rogaine*, the sooner you could be growing hair again.

For more information and a certificate worth \$10 as an incentive to visit your doctor (sorry, this offer is available for men only), call the toll-free number below or send in this coupon.

Please send me a \$10 certificate as an incentive to see my doctor. Send coupon to: The Upjohn Company, P.O. Box 9040, Opa Locka, FL 33054-9944

'Dr. Dave' focuses on our planet's concerns

By Mike Luft
Special to The Chronicle

As the early morning mist begins to lift, unveiling a new day, he can be seen running in the quiet hills east of Riverside.

Or he might be found on Soda Dry Lake at the end of Zzyzx Road in the searing, July heat crouched on all fours observing microscopic specimens of desert life.

More than likely, you will find him in a campus classroom teaching biology or other related topics. He is Dr. Dave Polcyn, ecologist, marathon runner, entomologist and concerned inhabitant of planet Earth. He is an easy going, earthy person with intense blue eyes that reflect the energy that drives him to be involved in so many activities.

As an ecologist, Polcyn is acting as a campus coordinator in this year's Earth Day. He wants to raise student awareness of the energy consumed and the waste produced here at CSUSB. "An environmental audit, like those conducted on other campuses would reveal some shocking results," Polcyn said. "The

responsible for pollination in vast areas of the world, Dr. Polcyn hopes that his research will contribute to finding a solution to a potentially deadly situation.

Let one get the wrong impression, Dr. Polcyn is not a grim, doomsday prognosticator. He is a physical fitness proponent.

A poster in his office shows an exhausted runner, vomiting up his last meal with the caption imploring to "Run for Fun." When asked if this related to him, he said, "Friends thought that looked like me."

He runs thirty to forty miles a week unless he is training for a marathon, then he ups the distance to sixty or seventy miles. Yes, he says he could easily be the one in the poster, since he is dehydrated, exhausted and disoriented at the finish of twenty-six miles. Why does he do it? "I do it because I forget what it was like the last time," he laughed.

"I guess I'm trying to run away from age, ulcers, migraines, smoking, drinking, all those things I suffered from before I started running. I want to die with my running shoes on," he said.

"I won't have kids because this place is going to hell."

- Dr. Dave Polcyn

amount of styrofoam, non-biodegradable waste, paper and energy used in a facility of this size is staggering," he said.

Polcyn strongly believes that the Earth has absorbed as much abuse as it can take and we all need to get involved in trying to salvage a liveable environment. Although he is still a young married man of thirty-two, he is taking drastic measures in his life that reflect his convictions. "I won't have kids because this place is going to hell," he said.

The research he does on insects in the desert, in the middle of summer, may cause those who don't know him to question his sanity. "It's usually just me, the caretaker and his wife out at the California Desert Research Consortium, and they have the only air-conditioned quarters," Polcyn said. "It fascinates me how these primitive creatures can run around expending tremendous amounts of energy when the birds in the trees are panting and I'm melting," he said.

But it is their secret of adaptability that Dr. Polcyn hopes to unlock. When the "greenhouse effect" begins killing off insects that are

It is evident Polcyn enjoys his research, teaching and interacting in his classes. Randy, a student in Biology 100 last fall, said "Dr. Dave really gets into ecology and you can't help getting fired up and wanting to do something to help save the environment before it's too late." Dr. Dave is a nickname Polcyn has had since he was in junior high when he knew he wanted to be a scientist.

"I'm a lucky guy," he said. "I can't think of anything else I'd rather do than what I'm doing now." When the pressures of the city get to be too much, he can go off by himself and still pursue his profession. Besides his desert research, he has spent time on the peaks of mountains in California and Colorado, as well as the beaches of Oahu doing work in marine biology.

Educating the public about the overcrowded, fragile environment we all share is of prime concern to Polcyn. He is disturbed by the lack of concern shown by the Reagan and Bush Administrations toward improving the environment.

"Unfortunately, when it comes to government

It's Greek to the Greeks as well

By Kim Perkins
Staff Writer

Walking leisurely down the paths of CSUSB, the birds are chirping and a light breeze is wisping crisply through the trees. Eyes full of anticipation eagerly watch the activity ahead. College students of all ages are busily moving in and out of booths along the path. Voices are growing louder and someone approaches. What does he want with me? Is the pervading thought. A quick glimpse at signs plastered with Greek letters makes everything click.

CSUSB fraternity members of Delta Sigma Phi, Sigma Chi, Tau Kappa Epsilon, Sigma Nu; and sorority members of Alpha Delta Pi, Alpha Phi, Alpha Kappa Alpha, and soon coming Kappa Delta chapters permeate the environment and jump out at every new face.

Fraternities have been around since 1771, almost as long as American colleges. The first fraternity ever, Phi Beta Kappa of Williamsburg, Virginia, took on its Greek name from the initials of their Greek motto "Love of wisdom, the guide of life." The fact that they chose Greek may stem

from the fact that way back then Greek was a required course of study.

Fraternities grew in popularity and sprang up all over the country. Most of them following

suit with Greek names. Currently there are 56 fraternities and 26 sororities nationwide.

CSUSB Student Life Coordinator Rick Morat stated that the use of Greek names could have stemmed from the idea that, "Greeks were considered a very educated and literated society."

In this regard, you would think that fraternities and sororities would at least be able to pronounce their names correctly. But do they?

Dr. Don E. Adams, Assistant Professor of Philosophy at CSUSB began studying classical Greek his freshman year in college and now, 11 years later, is teaching it to CSUSB students.

Adams gives three disclaimers for possible mispronunciations:

(1) Obviously we have no recordings of Ancient Greeks speaking Ancient Greek, so there can be no certainty regarding the actual pronunciation of Ancient Greek. Scholars make educated guesses on the basis of changes in the language over time.

(2) Pronunciation has varied greatly over time and in different places, just as English pro-

Tom Pierce.

Russell Bogh, assistant legislative director of Associated Students, Inc. (ASI), will represent the CSUSB students. Ron Rapp, ASI legislative director, will serve on a state-wide steering committee.

Over the next three months, the committee will launch a voter registration drive, and will provide information on the measures to the news media. Flyers and mailings will be sent to alumni and Chambers of Commerce.

Many governing bodies will pass resolutions in support of Proposition 111 and the bond issue. The ASI Board of Directors began work on their resolution last week.

The Chronicle, the Friday Bulletin, and radio KSSB will continue to inform CSUSB on upcoming efforts to pass the two measures.

GREEK

Continued from page 9

nunciation has changed greatly over time and is different in different locations (London and Los Angeles, for example).

(3) Modern scholars do not all agree on how Ancient Greek was pronounced.

Adams commented on the pronunciations of Greek letters used by CSUSB fraternities and sororities:

Alpha = The 'a' should be pronounced like the 'a' in 'all' and the 'ph' should be pronounced as if you were going to make an English 'p'

sound, but instead you blow through your lips."

Kappa = The a's are pronounced like the a's in alpha.

Pi = Pi was not 'pie' but was probably pronounced like 'pee.'

Sigma = It was probably pronounced more as if it were 'seegma.'

Phi = not 'fi', but more like 'pfee'.

Chi = The 'k' sound is a smooth palatal. To make the sound, pretend you are going to make the 'k' sound,

and then exhale through your mouth. It should sound like you are preparing to spit (compare it to the 'ch' in the German 'machen'). Make that sound, then tack on the 'ee' sound discussed with sigma above."

Adams also said that the letters delta, epsilon, nu, tau, and omega are pronounced basically correct.

Does this mean that the sorority, Alpha Phi, has been accidentally pronouncing their name correctly, but claiming they have been

pronouncing it wrong? According to some, the members wanted to be different from other organizations and thus pronounced it 'Alpha Phee,' instead of 'alpha phi'.

Though the above pronunciations of classical Greek is standard, is it wrong for people to pronounce them the way they do? According to Morat, "languages change over time and people say what most easily rolls off the tongue."

It's not wrong, it's just the American way.

Free Tutoring During Finals

The Student Union and the Learning Center will provide limited, free tutoring during the week of finals.

A much wider range of tutoring is available up until (Friday) March 16 in the Learning Center (PL-37). Finals week tutoring will be held in the Student Union. Students should go to the Learning Center to schedule their appointments.

PROP

Continued from page 7

your campus that there will be no increase in financial aid resources from either the state or the federal government next year to compensate for campus fee increases, I would be interested in your thoughts about what seems to be a contradictory and untenable position. If access to higher education is threatened by a \$60 systemwide fee increase with some compensating financial aid, how can it not be threatened even more seriously by \$200 campus fee increases with no compensating aid? Your timely response to this apparent paradox would be particularly helpful as the Legislature again debates restoration of the state policy limiting systemwide fee increases and as legislators are asked to defend a state budget that proposes minimal fee increases when students seem to be sending a clear message through their referenda that they can afford much more.

MONEY FOR STUDENTS IN THE SPRING

The California Faculty Association, San Bernardino Chapter, will award one scholarship each to an undergraduate and graduate student. The scholarships will cover tuition and fees, at the resident student rate, and will provide \$50 toward books for Spring 1990. Only CSUSB students are eligible. Candidates must write an essay of no more than five typewritten double spaced pages focusing on the positive contributions of cultural diversity to quality education. Each entry should include a cover page with student's name, undergraduate or graduate status, social security number, address, and phone number. Scholarships will be awarded to the essays. Ties will be resolved using GPA's. Entries are due March 30, 1990. Submit them to Dr. Mary Smith's mailbox, AD 135 or to her office, AD 174.

Announcing an offer designed to save money for people who are, well, a bit long-winded when it comes to, you know, talking on the phone, and who, quite understandably, don't want to have to wait till after 11 pm to get a deal on long distance prices.

If you spend a lot of time on the phone, the AT&T Reach Out® America Plan could save you a lot on your long distance bill. And you don't have to stay up late to do it. Starting at 5 pm, the AT&T Reach Out® America Plan takes an additional 25% off our already reduced evening prices.

To find out more, call us at 1 800 REACH OUT, ext. 4093. And don't worry, we'll keep it brief.

Discount applies to out-of-state calls direct-dialed 5-10 pm, Sunday-Friday. This service may not be available in all residence halls.

AT&T
The right choice.

A cry for help from a campus club (L.I.S.N.)

A cry for help is being issued to all CSUSB students and clubs. The Low Income Support Network (L.I.S.N.) is in desperate need of donations to fund a Welfare Rights conference in Seattle, Washington, March 23-25. The information to be acquired will better help L.I.S.N. to serve CSUSB's low income student population, therefore, making it more possible for low income students to stay in school and complete their career objectives.

A small donation of \$10.00

from each of the more than 70 clubs at CSUSB will help L.I.S.N. reach the \$500.00 amount needed to send our three representatives. Donations of \$1.00 or more from individual students will also be greatly appreciated. All donations can be sent to Dr. Nancy Ross, F.O. #104. Checks should be made out to L.I.S.N.

Thank you for your support.

Sincerely,
Lori A. Richard
Co-Chairperson

Club focuses on today's environmental issues

The '90s have brought a new consciousness of environmental concerns to many Americans, and CSUSB students are no exception. Increasingly, students and faculty are becoming informed about the serious threats to our very existence posed by the Greenhouse effect, ozone depletion, the mass extinction of species, routine use of deadly chemicals, the clear cutting of the rainforests, and so on. We are all aware that it is human technology and behavior which is causing these calamities. So, what can we do?

One organization on campus has a very immediate and relevant suggestion. Students and Others for Animal Rights (S.O.A.R.), is launching an educational campaign on the environmental destruction caused by the meat habit. While many are aware that fast food hamburgers are produced at the expense of the rainforests of South America, few realize the environmental calamities the meat habit produces right here at home.

In addition to causing massive suffering, raising these animals devastates forests and wildlife habitats and dumps more pollutants into lakes and streams than all other human activities combined. The water which is used in the process of raising cattle here in California alone could provide water for a city of 22 million people.

Throughout America, our forests and streams are destroyed by overgrazing, and wildlife are displaced and killed and replaced with cattle. Millions of acres of valuable farmland which could provide food for a hungry world are devoted to

raising feed for livestock, which produce only a single pound of protein for every ten they eat. Furthermore, for every quarter pound hamburger eaten, 55 square feet of the rainforest is destroyed. And all this for a habit - the meat habit, which is an established contributor to heart disease, stroke and cancer.

Even knowing all this, many find it difficult to kick the meat habit. But now, there is an opportunity to help yourself and others to give up meat. The Great American MeatOut is the day to take that first step, and a day to learn more about the benefits to you, the animals and the environment of a diet free of meat.

On March 20, people all across the U.S. will be pledging to give up meat for the day. If you are thinking that one day makes no difference, consider that a mere one percent reduction in meat consumption will save 60 million innocent, feeling animals per year (this is equivalent to all animals killed in U.S. laboratories in a year).

So, even if you are not ready to kick the meat habit, you can take a meaningful step to reduce animal suffering and improve your health. (S.O.A.R. is a group which provides support to those who wish to kick the meat habit, as well as becoming aware of animal rights issues).

The Great American Meat Out is a day for education and activism as well. If you would like to take the "Meat Out Pledge," if you would like to sign others up to do likewise, or to participate in other MeatOut activities, contact Susan Finsen (Faculty advisor for S.O.A.R.) 880-5871 or Sarah Tolliver (714)875-3496.

CLASS STRUGGLE

\$500 PRIZES \$100

Standing Up for Peace CONTEST

Why have people risked their jobs, their homes, their families and even prison to take a stand for peace? This is your chance to find out. The Standing Up for Peace Contest invites you to talk face to face with someone who has refused to fight in war, pay taxes for war, or build weapons for war, and then to express what you think and feel about what you heard by writing something or creating a work of art or music.

The contest is open to young people ages 15-23. The deadline for entries is May 1, 1990.

To enter, send for the Standing Up for Peace contest booklet, Fellowship of Reconciliation, Box 271, Nyack, NY 10960, (914) 358-4601.

Standing Up for Peace is a project of the 1990 Celebration of Conscience Committee. Sponsors include: CCCO/An Agency for Draft and Military Counseling, Committee and Military Tax Campaign, Fellowship of Reconciliation, Menhoffer Central Committee, Midwest Committee for Military Counseling, National Interreligious Service Board for Conscientious Objectors, National War Tax Resistance Coordinating Committee, Peace Tax Foundation, War Resisters League.

AQMD

James Mulvihill, John Craig, and Tom Pierce.

Russell Bogh, Assistant Legislative Director of Associated Students, Inc. (ASI), will represent the CSUSB students. Ron Rapp, ASI Legislative Director, will serve on a state-wide steering committee.

Over the next three months, the committee will launch a voter registration drive, and will provide information on the measures

to the news media. Flyers and mailings will be sent to alumni and Chambers of Commerce.

Many governing bodies will pass resolutions in support of Proposition 111 and the bond issue. The ASI Board of Directors began work on their resolution last week.

The Chronicle, the Friday Bulletin, and radio KSSB will continue to inform CSUSB on upcoming efforts to pass the two measures.

Schwartz looks back on an impressive season

By Jeff Zelenski
Staff Writer

After winning 22 consecutive games and breaking into the national rankings, the CSUSB Women's basketball team ended its season last week with the Western Regional playoffs. They split a pair of games in Moorehead, Minn. and finished the year with a 24-4 overall record.

At the beginning of the season nobody gave the Lady Coyotes a chance to even get to the playoffs, but they did. In addition to making the playoffs they won a post season game, a first for the Lady Coyotes.

"It (the outlook of the season) was an unknown to me at the beginning. I was new to the area, I felt we had a chance of being a good team. Realistically I don't think that anyone expected us to be as good as we were," said head coach Gary Schwartz.

"This year's team definitely exceeded all expectations."

The Lady Coyotes started the season at a shaky 1-3 start after losing to Division II power Cal State Domin-

gez Hills and dropping a pair of games during a tournament in New York.

"I think anytime that you have a new coach you always expect the transition to take time. Early (in the season) the whole team was struggling to adjust to the system," Schwartz said.

After the road trip to East Coast the Lady Coyotes started a winning streak that wasn't broken until the first round of the regionals, three months and 22 games later.

"The major reason for the turn around was that they saw we weren't going to win if we didn't follow the new system exactly the way they learned. Early, they tried to hold on to the old way of doing things," Schwartz said.

"When we were 1-3 they discovered that they didn't like to lose. They then committed themselves to do the things the right way. They made the commitment to be the best they could be."

The Lady Coyotes winning streak included victories over Division II teams San Francisco State and CSU Hayward as well as some very good NAIA and fellow Division III schools.

"We beat some quality teams this year that some people didn't think we could, but I think the high point of the season was when we made the regionals," Schwartz said.

The Lady Coyotes went into the playoffs as the third seeded team out of the four chosen to compete. They lost in the first round to second-seeded St. Thomas 78-49, but bounced back the next night to defeat fourth seeded Colorado College 64-53.

"I wasn't sure what to expect going into the playoffs. I went thinking that we competed with Colorado earlier in the year (winning 79-65) and because of that I thought we had a shot to win. However, St. Thomas and Concordia (the #1 seed) were a step ahead of us. You always go in thinking you can win until you come up against a better team, and we did," Schwartz said.

According to Schwartz there was one thing that could have made a difference in the playoffs.

"If we could have gotten the tournament at Cal State we would have made a better showing, especially in the first round. We had proven that we were a great team at home."

Above Teri Paine, left Laura Beeman

Throughout the remarkable season many records fell, you could almost say the record books were rewritten. Senior Teri Paine-Walsh had set 25 records by the end of the year. The records include season, game, and career records of all kinds, but the most notable was her 2,015 (18.8 points per game) total points in her 107 game career.

"Teri has been the player in the CSUSB program for the last four years. She was there for us every night with her 20 points and 10 rebounds. She was a real hard worker and a real game player," Schwartz said.

Another senior, Lori Peters, also made an attack on the record books in the rebounding department.

"She was a crucial part of our success, she is a team

player in every sense of the word. Everything she did didn't always show up on paper, she did a lot of the intangibles for us," Schwartz said.

In her first season as a Coyote, sophomore Laura Beeman made her own page in the book this past season with her assists. She finished with over 200 assists in a single season.

"Laura was the most important key for this year's success. She is what CSUSB had never had, a true point guard. She was the person that passed the ball to everyone else to keep them happy. Her assist records speak for the type of player she is," Schwartz said.

After winning 22 consecutive games, making the playoffs, winning a game in the playoffs, individuals breaking numerous records, Schwartz is more than satisfied with this team's accomplishments.

"I'm totally ecstatic about this past season. With the lack of height and experience we had, a 24-4 record was a superior season. This team became the best it possibly could be, that's a real credit for them."

Coach Schwartz

Fontana rec department hosts arts and craft fair

The City of Fontana Recreation Department will be hosting its annual Spring Fling Arts and Crafts Fair on the lawn in front of Fontana City Hall, located at 8353 Sierra Ave., on March 17.

The fair will be going on from 8 a.m. until 4 p.m. and will host 80-100 vendors who will be showing off and selling their crafts. There will be an Easter Art Contest for artists of all ages and awards will be given in each group.

There will also be games, food, moon bounce, and a great opportunity to purchase hand made gifts for all occasions including Easter. Pictures with the Easter Bunny will be available for \$1 from 10 a.m. until 2 p.m.

Come play the game booths for 25 cents or enter the art contest for the same price.

If you're a vendor looking to sell your handmade goods, 10 ft. x 10 ft. spaces are available at the fee of \$10 for Fontana residents and \$12 for non-residents. Applications are being accepted until March 16, at 4:30 p.m. at the Recreation Office located at 9460 Sierra Avenue. No commercial items are to be sold.

If you have questions please contact Barbara Smith, Special Events Coordinator at (714) 350-7635.

CSUSB tops UCSD in softball doubleheader

By Kevin R. Horney
Editor-in-Chief

CSUSB's softball team rallied this past week to sweep conference rival UC San Diego at home this Saturday. The Lady Coyotes had been struggling so far this season, but the wins, plus the sweep of Christ College earlier in the week, boosted their record to 7-5.

San Diego has been a traditional rival to CSUSB's athletic program. Each year, CSUSB gets a team close to the regional playoffs, only to be eliminated on the basis

of their record against UC San Diego, or another local school.

The Lady Coyotes could face the Tritons three times this season: twice in scheduled games, and they might also meet at the UC San Diego tournament in April. CSUSB must have a winning record against UC San Diego by season's end to get past them.

"San Diego is the major obstacle between us and the [regional] tournament," said head coach Sue Strain. "We have to prove ourselves the strongest team in the area."

Chronicle photos

Third-baseman Felicia Harral is part of the tenacious Coyote defense.

Chronicle photos

Second-baseman Tammy Shearer tries for a double-play in the second game of the doubleheader.

The Lady Coyotes did just that as they put together two solid games against the Tritons.

Junior Marnie La Fleur picked up the win in game one, allowing only two hits in the seven inning contest. The victory improved La Fleur's record to 5-2.

UC San Diego scored first on a solo homerun in the first inning. CSUSB retaliated with a three-run homerun by Senior center-fielder Anne Cordero.

Neither team scored for the rest of the contest as La Fleur only allowed one more hit in the contest.

In the second game, Sophomore Tanna Cash and the Lady Coyote defense held the Tritons scoreless. Unfortunately, the Lady Coyotes were having their own troubles scoring. The game entered the fifth inning locked at 0-0.

It was then, however, that the Lady Coyotes' dormant

offense woke up. La Fleur, now playing left-field, singled and reached second base on a sacrifice bunt by rightfielder Jennie Leogrande. La Fleur moved to third following a wild pitch. Catcher Kathy Bingham picked up the RBI with a single up the middle. Following Bingham, third-baseman Felicia Harral poked the ball out of the infield to score Bingham from second base.

That was all the Lady Coyotes needed as Cash completed her shut-out.

Coach Strain was pleased with the wins and was optimistic about the Lady Coyotes' future.

"We had some injuries, and some key people gone at the beginning, but we realize now that what ever obstacle we have we can still win; we can adjust, put people in different places, they can do a good job and we'll win. The Christ College game proved

that."

CSUSB had dropped to 3-5 prior to the trip to Christ College on March 6. Cash was sick, first baseman Monica Reyes was out with a broken finger, and La Fleur was forced to pitch both games. La Fleur pitched two shutouts as CSUSB swept, 3-0, 2-0.

The Lady Coyotes should be back to full strength this week as Reyes is expected to return.

CSUSB's next home stand will be a doubleheader this Friday as they host Whittier college. The games are the first of an eight game homestand (four doubleheaders) against Whittier, Pacific University (from Oregon) on March 23, Augsburg College (from Minnesota) on March 25, and Claremont College on March 29. Each doubleheader begins at 2 p.m., except the Sunday game versus Augsburg which starts at noon.
