Campus supports spending limit bill
By William Lundquist
Staff Writer
A campus-wide steering committee has been formed to support the passage of Proposition 111 and the Higher Education Facilities Bond Issue.
Proposition 111, which will come before California voters in June, would modify the state spending limit (the Gann limit) to reflect growth in the economy. It would allow the governor and legislature more latitude in addressing state needs.
In fact, Governor Deukmejian has tried the passage of Proposition 111 to his signing of Senate Bill 1645, which would limit the amount student fees may increase in any given year.
The current law that limits student fee increases expires on August 31, 1990. Last October, Deukmejian vetoed an assembly bill that would have extended the fee policy for another 2 years.
Policy experts at the California Post Secondary Education Commission predict immediate and substantial fee increases if Proposition 111 fails. They also predict cutbacks in student services, and caps on campus enrollment for the CSU and UC systems.
Anthony Evans, CSUSB President, said "One sure way for the students to limit their fee increases is to work for the modification of the Gann amendment, which would give the governor more flexibility than he now has."
The Higher Education Facilities Bond Issue would bring in $450 million for public higher education. The funds are critical to CSUSB's campus-wide steering committee will include members of the administration, faculty, unions, and student body.
Among the members are Judith Rymer, Vice-President for University Relations, and faculty members.
California Quake Watch
This graphic details the probability of a major earthquake (6.0 or greater) occurring at the site indicated. The probabilities were calculated prior to the Loma Prieta quake near San Francisco and current rent ratings are being calculated.

Quake fears on the rise

By William Lundquist
Staff Writer
"It was the first time I was really scared in an earthquake," said Pfau Library employee Cheryl Simmons. She was shelving books on the fourth floor when the building began to shake. "It was exciting because it was definitely big up here. There were piles of 30 to 50 books in every aisle."
Another employee agreed. "It was scary. Books were falling from the top shelves."
One floor up, in the Office of Extended Education, things were calmer. A few books fell off their shelves, and some file drawers flew open, but overall, the fifth floor fared better than the fourth. "People got under their desks. That's just procedure," said Jeannine Colunga, a clerical assistant.
Over in the library, there were piles of 30 to 50 books in every aisle. "It was exciting because it was definitely big up here. There were piles of 30 to 50 books in every aisle."

Zachary to speak on medical marketing

The California Inland Counties, American Marketing Association (CICAMA) March meeting will look at the field of medical marketing. The guest speaker will be Beth Zachary, vice president for Marketing and Business Development of White Memorial Medical Center, (WMMC). She will discuss the strategic marketing plan that turned WMMC into a profit making medical facility.
WMMC is a private, medium-size hospital located in a highly competitive environment in East Los Angeles. Two years ago it was losing $500,000 a month, had a high debt load, low employee and physician morale.
Ms. Zachary has received awards for program development, advertising, and communication from associations such as the Academy for Health Services Marketing, and International Association of Business Communications, International Film and TV Festival of New York and the Society for Technical Communication.
The meeting will be held March 21, at the Inland Empire Hilton Hotel, 2385 East Hospitality Lane, San Bernardino. The no-host cocktail bar will open at 6:30 p.m. in dinner at 7:15 p.m. Ms. Zachary will speak at 8 p.m. Reservations can be made by calling Greg Zerovnik at 714-625-0068.

Inland Empire is the home of the San Jacinto fault. Thomas Heaton, a seismologist with the USGS said it has produced the largest number of magnitude 6 earthquakes in California.
There is also a 20 percent chance that the San Jacinto fault will produce a magnitude 7 or greater quake in San Bernardino in the next 30 years. The last great quake here caused by the San Jacinto fault was probably around 1890.
The chance of a major earthquake in the Coachella Valley is even greater, at 40 percent within the next thirty years. The San Andreas has been locked in that location for 300 years. A 7.5 earthquake would radiate 900 times the energy of the recent 5.5 Upland quake.

Congressman George E. Brown, Jr., the sponsor of the bill, will supply more information on earthquakes or earthquake preparedness, upon request. Write to 657 North La Cadena Drive, Colton, California, 92324, or call (714)825-2472.
Fault line and liquefaction maps are available at the San Bernardino County Planning Office. The USGS has an earthquake hotline, updated daily, at (415) 329-4025.

If Budweiser is already your regular beer we'd like to say thanks for the business. If it's not, then we'd like to apply for the job. Of course our resume can only tell you who we are. To discover just how good we taste, we suggest you set up a personal interview.
CSUSB professors receive over 25,000 dollars in grants

Two CSUSB faculty members are the recipients of more than $25,000 in grants from the National Science Foundation (N.S.F.), designed to stimulate research activities of minority and women college professors. They are Dr. Clifford Young, Associated Professor of Public Administration, and Dr. Karen Kolehmainen, Associate Professor of Physics. These grants are designed to assist professors in obtaining preliminary funding to prepare full research proposals for later submission to the N.S.F.

Young's grant of $16,990 will be used to allow research on "Redevelopment and the Redevelopment Process from Three Different Theoretical Perspectives in the Two Counties of the Inland Empire." Young intends to use the funding in order to conduct face-to-face interviews with parties involved in two redevelopment projects in Riverside and San Bernardino counties. He hopes that these interviews will shed light on the particular philosophy involved in each redevelopment project. Young says that the results from these interviews will determine whether or not his future research will concentrate on one or all redevelopment programs in the Inland Empire.

Young's funding makes provisions for two student assistants, specialized computer software and travel expenses to be incurred when consulting with subject experts. He is presently in the literature review state, the lengthy process of reading all published data on the subject. According to Young, if his preliminary proposal is accepted by the N.S.F., his funding for more research could be as much as $300,000.

Kolehmainen received $9,487 to assist her in preliminary research on the existence of quark matter in the early universe. The grant is entitled "Study of Hadronization and Quark-Gluon Plasma in the Early Universe." She plans to have her preliminary calculations completed by February 28, 1991, in order to begin the application process for further grants. The N.S.F. grant pays Kolehmainen's salary during the summer of 1990, when she hopes to complete much of her research. The funding covers the salary of a student assistant and will also pay for computer time. Also included is money for travel expenses so that Kolehmainen may attend conferences to discuss her work with colleagues.

Software discounts available to students and faculty

Business software costs too much! At least for students and other members of the academic community. So, a four-year-old company is doing something about it by arranging for high-tech software publishers to offer their PC and Macintosh software programs to colleges, faculty members and students at bargain base-line prices. CAMPUS TECHNOLOGY

College grads will be in demand

Today's college grad probably will hold as many as 10- to 12-job offers from the moment he or she graduates until retirement. In an article in the "Jour­nal of Career Planning & Employment," Dr. David L. Birch of Massachusetts Institute of Technology and of Cognetics, Inc., figures that, with American firms scouring to fill labor shortages during the next decades, "college-educated employees will be able to just about name their own employment terms."

As a result, companies will readily repay each other for college grads, prompting former students to follow the most recent offer they get.

Scholarship provides aid for future teachers

The Paul Douglas Teacher Scholarship Program will provide up to $5000 per year for up to four academic years to students who demonstrate commitment in pursuing teaching careers in the pre-school, elementary or secondary school level, and who agree to teach on a full-time basis for a period of not less than two years for each year of scholarship funding or repay the scholarship with interest. A federally mandated requirement for this scholarship is that the student must have graduated in the top 10% of his/her high school class. CSUSB may select five recipients for this scholarship this year. Applications for this competitive program are available now in the Financial Aid Office. The deadline is April 1.

Teetering for Tots
Sigma Chi raises money for Cleo Wallace Home

For the past five years Sigma Chi has been holding a teeter-totter event to raise funds for their charity. The fund raiser raised money for the children of the Cleo Wallace Center. The event lasted from 10 a.m. March 7 and ended last Friday, March 9 at noon. The Cleo Wallace Center, Sigma Chi's national philanthropy, is a home in Colorado for children who are emotionally disturbed. The center is a nationally recognized non-profit corporation. In 1967 Sigma Chi took the center as its national philanthropy. All proceeds from the event will be given to the charity with a percentage going to a local children's center.

Mexico bound students must register first

Students crossing over international bridges to spend spring break in Mexico will be asked to sign in with Mexican officials starting March 1.

Mexico's government announced the program, in which students will be asked to register their names, as a safety measure in the wake of the murder of University of Texas student Mark Kilroy while he was vacationing in Matamoros last year. "I think this will be a very confident way to know who is in Mexico," said Carlos Pérez, deputy Mexican consul in Brownsville, Texas, just across the U.S. border from Matamoros. "As you know, we had a very unfortunate situation last year with the case of Mr. Kilroy."

AQMD seeks innovative research projects

The South Coast Air Quality Management District (AQMD) is seeking proposals from high school and college students to develop innovative ideas and conduct research projects dealing with air quality and pollution control. AQMD Executive Officer James Lents announced.

Selected projects will be funded through the district's Clean Air account, funds earmarked to promote innovative solutions to air quality problems, Lents said.

Grants for student projects will range from $5,000 to $20,000 and could be completed during the summer.

"We are looking to tap the most creative student minds..."
Financial Aid will not compensate fee increases

By Christopher Cabaldon
Consultant, Subcommittee on Higher Education
Special to The Chronicle

There appears to be a great deal of misinformation on many UC and CSU campuses regarding the impact of proposed increases of campus student fees on financial aid resources. As student governments and campus administrations join forces to promote campus increases for aquatic centers, auto garages, student health insurance, jaccuzis, pro sports shops, athletic stadiums, and concert centers, many students are being told that the pool of financial aid funds will increase to cover the proposed fee increases. In virtually every case, this is patently false.

"No funds are provided in the Governor's proposed 1990-91 budget to increase financial aid funds to offset campus fee increases." No funds are provided in the Governor's proposed 1990-91 budget to increase financial aid funds to offset campus fee increases. Although the Legislature last year agreed to a policy of funding such increases, budgetary constraints and growing concern about the magnitude and use of these fees make eventual funding of this new policy doubtful.

At the same time, President Bush has proposed total elimination of the work-study program and the federal contribution to the Cal Grant program. The governing board said the Governor has proposed systemwide student fee increases of $89 and $36 for the University of California and the California State University, respectively. To offset the increase, the proposed budget provides $3 million for student financial aid. In contrast, UC San Diego and UC Santa Barbara students have been asked by their leaders to approve campus fee increases of over $200 for recreational facilities, and health insurance fees exceeding $245 have already been approved at seven UC campuses. To date, CSU campuses have been slow to mirror this trend, but substantial increases are being considered at several campuses. These types of increases make state appropriation of adequate financial aid cost-prohibitive.

Last year, students protested proposed systemwide increases of $64 for UC and $68 for CSU, arguing that "no funds are provided in the Governor's proposed 1990-91 budget to increase financial aid funds to offset campus fee increases."

RENT NOW FOR SPRING BREAK

Students who are planning trips for Spring Break, and who would like to rent camping equipment should make reservations with ASI Camping Equipment Rentals as soon as possible. Hours for the rental office are Monday and Friday 11:30-1:30 next to the Student Union desk. You can also leave a message for RecRentals in the ASI office, located in the Student Union.

There's only one product proven to grow even one of these.

From the time you first started losing your hair, you've wished for something that could somehow reverse the balding process. Now, The Upjohn Company has developed Rogaine, the first and only product that is proven to grow hair.

Rogaine is not a cosmetic or conditioner. It's a prescription treatment for male pattern baldness of the crown of the head. In a year-long test involving almost 1,500 men, only 3% noted no growth. Virtually half (48%) saw at least moderate growth.

For more information contact a physician in the CSUSB Student Health Center.

Rogaine

Have You Tried AUTOPHERESIS?

And at the same time, you'll have the satisfaction of knowing your plasma donation can help patients in need and save lives.
'Dr. Dave' focuses on our planet's concerns

By Mike Luft
Special to The Chronicle

As the early morning mist begins to lift, unveiling a new day, he can be seen running in the quiet hills east of Riverside.

Or he might be found on Soda Dry Lake at the end of July heat crouched on all fours observing microscopic specimens of desert life.

More than likely, you will find him in a campus classroom teaching biology or other related topics. He is Dr. Dave Polcyn, ecologist, marathon runner, entomologist and concerned inhabitant of planet Earth. He is an easy going, earthy person with intense blue eyes that reflect the energy that drives him to be involved in so many activities. As an ecologist, Polcyn is acting as a campus coordinator in this year's Earth Day. He wants to raise student awareness of the energy consumed and the waste produced here at CSUSB. "An environmental audit, like those conducted on other campuses would reveal some shocking results," Polcyn said. "The amount of styrofoam, non-biodegradable waste, paper and energy used in a facility of this size is staggering," he said.

Polcyn strongly believes that the Earth has absorbed as much abuse as it can take and we all need to get involved in trying to salvage a liveable environment. Although he is still a young married man of thirty-two, he is taking drastic measures in his life that reflect his convictions. "I won't have kids because this place is going to hell," he said. "I'm a lucky guy," he said. "I can't think of anything else I'd rather do than what I'm doing now." When the pressures of the city get to be too much, he can go off by himself and still pursue his profession. Besides his desert research, he has spent time on the peaks of Colorado, as well as the beaches of Oahu doing work in marine biology. Educating the public about the overcrowded, fragile environment we all share is of prime concern to Polcyn. He is disturbed by the lack of concern shown by the Reagan and Bush Administrations toward improving the environment. "Unfortunately, when it comes to government
It's Greek to the Greeks as well

By Ellen Perkins
Staff Writer

Walking leisurely down the paths of CSUSB, the birds are chirping and a light breeze is whisping crisply through the trees. Eyes full of anticipation eagerly watch the activity ahead. College students of all ages are busily moving in and out of booths along the path. Voices are growing louder and someone approaches. What does he want with me? Is the pervading thought. A quick glimpse at signs plastered with Greek letters makes everything click.

CSUSB fraternity members of Delta Sigma Phi, Sigma Chi, Tau Kappa Epsilon, Sigma Nu; and sorority members of Alpha Delta Pi, Alpha Phi, Alpha Kappa Alpha, and soon coming Kappa Phi, Sigma Chi, Tau Kappa Epsilon, Sigma Nu; Delta chapters permeate the environment and things click. 

from the fact that way back then Greek was a from the fact that way back then Greek was a required course of study.

Fraternities grew in popularity and sprang up all over the country. Most of them following suit with Greek names. Currently there are 56 fraternities and 26 sororities nationwide.

CSUSB Student Life Coordinator Rick Morat stated that the use of Greek names could have stemmed from the idea that, "Greeks were considered a very educated and literated society."

In this regard, you would think that fraternities and sororities would at least be able to pronounce their names correctly. But do they?

Dr. Don E. Adams, Assistant Professor of Philosophy at CSUSB began studying classical Greek his freshman year in college and now, 11 years later, is teaching it to CSUSB students. Adams gives three disclaimers for possible mispronounciations:

(1) Obviously we have no recordings of Ancient Greeks speaking Ancient Greek, so there can be no certainty regarding the actual pronunciation of Ancient Greek. Scholars make educated guesses on the basis of changes in the language over time.

(2) Pronunciation has varied greatly over time and in different places, just as English pro-

Tom Pierce.

Russell Bogh, assistant legislative director of Associated Students, Inc. (ASI), will represent the CSUSB students. Ron Rapp, ASI legislative director, will serve on a state-wide steering committee.

Over the next three months, the committee will launch a voter registration drive, and will provide information on the measures to the news media. Flyers and mailings will be sent to alumni and Chambers of Commerce.

Many governing bodies will pass resolutions in support of Proposition 111 and the bond issue. The ASI Board of Directors began work on their resolution last week.

The Chronicle, the Friday Bulletin, and radio KSSB will continue to inform CSUSB on upcoming efforts to pass the two measures.

GREEK—Continued from page 9

nunciation has changed greatly over time and is different in different locations (London and Los Angeles, for example).

(3) Modern scholars do not all agree on how Ancient Greek was pronounced.

Adams commented on the pronunciations of Greek letters used by CSUSB fraternities and sororities:

Alpha = The 'a' should be pronounced like the 'a' in 'all' and the 'phi' should be pronounced as if you were going to make an English 'p' sound, but instead you blow through your lips."

Rapp = The 'a's are pronounced like the 'a's in alpha.

Phi = Phi was not 'pie' but was probably pronounced like 'pee.'

Sigma = It was probably pronounced more as if it were 'seegma.'

Phi = not 'f', but more like 'pee'.

Chi = The 'k' sound is a smooth palatal. To make the sound, pretend you are going to make the 'k' sound, and then exhale through your mouth. It should sound like you are preparing to spit (compare it to the 'ch' in the German 'Nachten'). Make that sound, then tack on the 'ee' sound discussed with sigma above.

Adams also said that the letters delta, epsilon, nu, tau, and omega are pronounced basically correct. This does mean that the sorority Alpha Phi, has been accidently pronouncing their name correctly, but claiming they have been pronouncing it wrong? According to some, the members wanted to be different from other organizations and thus pronounced it 'alpha phi'. Instead of 'alpha phi.'

Though the above pronunciations of classical Greek in general are fine for people to pronounce them the way they do? According to Morat, "languages change over time and people say what most easily rolls off the tongue."

It's not wrong, it's just the American way.

Free Tutoring During Finals

The Student Union and the Learning Center will provide limited, free tutoring during the week of finals.

A much wider range of tutoring is available up until (Friday) March 16 in the Learning Center (PL-37). Finals week tutoring will be held in the Student Union. Students should go to the Learning Center to schedule their appointments.

announcing an offer designed to save money for people who are well, a bit long-winded when it comes to, you know, talking on the phone, and who, quite understandably, don't want to have to wait till after 11 pm to get a deal on long distance prices.

If you spend a lot of time on the phone, the AT&T Reach Out America Plan could save you a lot on your long distance bill. And you don't have to stay up late to do it. Starting at 5 pm, the AT&T Reach Out America Plan takes an additional 25% off your already reduced evening prices.

Don't worry we'll keep it brief.

A cry for help from a campus club (L.I.S.N.)

A cry for help is being issued to all CSUSB students and clubs. The Low Income Support Network (L.I.S.N.) is in desperate need of donations to fund a Welfare Rights conference in Seattle, Washington, March 23-25. The information to be acquired will better help L.I.S.N. to serve CSUSB's low income student population, therefore, making it more possible for low income students to stay in school and complete their career objectives. A small donation of $10.00 from each of the more than 70 clubs at CSUSB will help L.I.S.N. reach the $500.00 amount needed to send our three representatives. Donations of $1.00 or more from individual students will also be greatly appreciated. All donations can be sent to Dr. Nancy Ross, F.O. #104. Checks should be made out to L.I.S.N. Thank you for your support.

Sincerely,
Lori A. Richard
Co-Chairperson

The Chronicle

Opinion Policies

The Chronicle welcomes views from readers on a wide variety of topics. Letters and commentaries may be sent to the editorial office at 5500 University Parkway. Letters must be typed and signed and must include phone number, class standing and student I.D. number. Faculty or staff members must include job titles. All letters should be as brief as possible and are subject to editing for purposes of condensation and layout.

Standing Up for Peace

Why have people risked their jobs, their homes, their families and even their lives to take a stand for peace? This is your chance to find out. The Standing Up for Peace Contest invites you to talk face to face with someone who has refused to fight in war, pay taxes for war, or build weapons for war, and then to express what you think and feel about what you heard by writing something or creating a work of art or music.

The contest is open to young people ages 15-23. The deadline for entries is May 1, 1990. To enter, send for the Standing Up for Peace contest booklet. Fellowship of Reconciliation, Box 277, Nampa, NY 10960, (914) 358-4601.

The '90s have brought a new consciousness of environmental concerns to many Americans, and CSUSB students are no exception. Increasingly, students and faculty are becoming informed about the serious threats to our very existence posed by the Greenhouse effect, ozone depletion, the mass extinction of species, routine use of deadly chemicals, the clear cutting of the rainforests, and so on. We are all aware that it is human technology and behavior which is causing these calamities. So, what can we do?

One organization on campus has a very immediate and relevant suggestion. Students and Others for Animal Rights (S.O.A.R.), is launching an educational campaign on the environmental destruction caused by the meat habit. While many are aware that fast food hamburgers are produced at the expense of the rainforests of South America, few realize the environmental calamities the meat habit produces right here at home.

In addition to causing massive suffering, raising these animals devastates forests and wildlife habitats and dumps more pollutants into lakes and streams than all other human activities combined. The water which is used in the process of raising cattle here in California alone could provide water for a city of 22 million people.

Throughout America, our forests and streams are destroyed by overgrazing, and wildlife are displaced and killed and replaced with cattle. Millions of acres of valuable farmland which could provide food for a hungry world are devoted to raising feed for livestock, which produce only a single pound of protein for every ten they eat. Furthermore, for every quarter pound hamburger eaten, 55 square feet of the rainforest is destroyed. And all this for a habit - the meat habit, which is an established contributor to heart disease, stroke and cancer.

Even knowing all this, many find it difficult to kick the meat habit. But now, there is an opportunity to help yourself and others to give up meat. The Great American MeatOut is the day to take that first step, and a day to learn more about the benefits to you, the animals and the environment of a diet free of meat.

On March 20, people all across the U.S. will be pledging to give up meat for the day. If you are thinking that one day makes no difference, consider that a mere one percent reduction in meat consumption will save 60 million innocent, feeling animals per year (this is equivalent to all animals killed in U.S. laboratories in a year).

So, even if you are not ready to kick the meat habit, you can take a meaningful step to reduce animal suffering and improve your health. (S.O.A.R. is a group which provides support to those who wish to kick the meat habit, as well as becoming aware of animal rights issues). The Great American MeatOut is a day for education and activism as well. If you would like to take the "Meat Out Pledge," if you would like to sign others up to do likewise, or to participate in other MeatOut activities, contact Susan Finsen (Faculty advisor for S.O.A.R) 880-5871 or Sarah Toliver (714)875-3496.

Schwartz looks back on an impressive season

By Jeff Zelenaski
Staff Writer

After winning 22 consecutive games and breaking into the national rankings, the CSUSB Women’s basketball team ended it’s season last week with the Western Regional playoffs. They split a pair of games in Moorhead, Minn. and finished the year with a 24-4 overall record.

At the beginning of the season nobody gave the Lady Coyotes a chance to even get to the playoffs, but they did. In addition to making the playoffs they won a post season game, a first for the Lady Coyotes. "This year’s team definitely made the commitment to be a superior season. This was to be as good as we were," said head coach Gary Schwartz.

According to Schwartz there was one thing that could have made a difference in the playoffs. "If we could have gotten to the playoffs, we could have made a better showing, especially in the first round. We had proven that we were a great team at home."

"I wasn't sure what to expect going into the playoffs. I went thinking that we would have a shot to win, but I thought we had a shot to win. However, St. Thomas and Concordia (the #1 seed) were a step ahead of us. You always go in thinking you can win until you come up against a better team, and we did," Schwartz said.

Throughout the remarkable season many records fell, you could almost say the record books were rewritten. Senior Teri Paine-Walsh had set 25 records by the end of the year. The records include season, game, and career records of all kinds, but the most notable was her 2,015 (18.8 points per game) total points in her 107 game career. "Teri has been the player in the CSUSB program for the last four years. She was there for us every night with her 20 points and 10 rebounds. She was a real hard worker and a real game player," Schwartz said.

Another senior, Lori Peters, also made an attack on the record books in the rebounding department. "She was a crucial part of our success. she is a team player in every sense of the word. Everything she did didn’t always show up on paper, she did alot of the intangibles for us," Schwartz said.

In her first season as a Coyote, sophomore Laura Beeman made her own page in the book this past season with her assists. She finished with over 200 assists in a single season.

"Laura was the most important key for this year’s success. She is what CSUSB had never had, a true point guard. She was the person that passed the ball to everyone else to keep them happy. Her assist records speaks for the type of player she is," Schwartz said.

After winning 22 consecutive games, making the playoffs, winning a game in the playoffs, individuals breaking numerous records, Schwartz is more than satisfied with this team’s accomplishments. "I’m totally ecstatic about this past season. With the lack of height and experience we had, a 24-4 record was a super season. This team became the best it possibly could be, that’s a real credit for them."

CSUSB tops UCSD in softball doubleheader

By Kevin R. Homey
Editor-in-Chief

CSUSB's softball team rallied this past week to sweep conference rival UC San Diego at home this Saturday. The Lady Coyotes had been struggling so far this season, but the wins, plus the sweep of Christ College earlier in the week, boosted their record to 7-5.

CSUSB gets a team close to being eliminated on the basis of their record against UC San Diego, or another local school.

The Lady Coyotes could face the Tritons three times this season; twice in scheduled games, and they might also meet at the UC San Diego tournament in April. CSUSB must have a winning record against UC San Diego by season's end to get past them.

"San Diego is the major obstacle between us and the [regional] tournament," said head coach Sue Strain. "We have to prove ourselves the strongest team in the area."

The Lady Coyotes did just that as they put together two solid games against the Tritons.

Junior Marne La Fleur picked up the win in game one, allowing only two hits in the seven inning contest. The victory improved La Fleur's record to 5-2.

UC San Diego scored first on a solo homerun in the first inning. CSUSB retaliated with a three-run homerun by Senior center-fielder Anne Cordero.

Neither team scored for the rest of the contest as La Fleur only allowed one more hit in the contest.

In the second game, Sophomore Tanna Cash and the Lady Coyote defense held the Tritons scoreless. Unfortunately, the Lady Coyotes were having their own troubles scoring. The game entered the fifth inning locked at 0-0.

It was then, however, that the Lady Coyotes' dormant offense woke up. La Fleur, now playing left-field, singled and reached second on a sacrifice bunt by rightfielder Jennie Legrande. La Fleur moved to third following a wild pitch. Catcher Kathy Bingham picked up the RBI with a single up the middle. Following Bingham, third-baseman Felicia Harral poked the ball out of the infield to score Bingham from second base.

That was all the Lady Coyotes needed as Cash completed her shut-out.

Coach Strain was pleased with the wins and was optimistic about the Lady Coyotes' future.

"We had some injuries, and some key people gone at the beginning, but we realize now that what ever obstacle we have we can still win: we can adjust, put people in different places, they can do a good job and we'll win. The Christ College game proved that."

CSUSB had dropped to 3-5 prior to the trip to Christ College on March 6. Cash was sick, first baseman Monica Reyes was out with a broken finger, and La Fleur was forced to pitch both games. La Fleur pitched two shutouts as CSUSB swept, 3-0, 2-0.

The Lady Coyotes should be back to full strength this weekend as Reyes is expected to return.

CSUSB's next home stand will be a doubleheader this Friday as they host Whittier College. The games are the first of an eight game homestand (four doubleheaders) against Whittier, Pacific University (from Oregon) on March 23, Augsburg College (from Minnesota) on March 25, and Claremont College on March 29. Each game versus Augsburg will be a doubleheader this Sunday as they host Whittier College. The games are the first of an eight game homestand (four doubleheaders) against Whittier, Pacific University (from Oregon) on March 23, Augsburg College (from Minnesota) on March 25, and Claremont College on March 29. Each doubleheader begins at 2 p.m., except the Sunday game versus Augsburg which starts at noon.

CSUSB Recreational Sports presents MEN'S VOLLEYBALL
The Fighting Irish of NOTRE DAME vs. CSUSB's MEN'S VOLLEYBALL CLUB

Wednesday, March 14 @ 7:30 p.m. CSUSB Gym

Admission is free!
