CSUSB
Colleges nationwide announce tuition hikes

One by one, college administrations are announcing tuition hikes for next school year that, once again, promise to make the price of education rise faster than prices for any other kind of good or service.

While the general inflation rate hovers around 4.5 percent, officials at the universities of Miami, Chicago, Rutgers, Stanford, Central Michigan, Loyola and Duke, among others, announced in February that they were raising tuition by 5.5 percent to 11 percent next year.

Two-year college students fared a little better. Their tuition increased an average of 5 percent, to $842. Private two-year private campuses raised their rates by 7 percent for the 1989-90 year.

Community and junior colleges "try real hard to stay at or below the rate of inflation," said Judy Tomczak of the American Association of Community and Junior Colleges.

Many students, however, complain the price has gone up too fast, too fast.

By the time she graduates, first-year Wesleyan University student Susan Chun figures she'll be paying 25 percent more than she is now for tuition, room and board, books and personal expenses.

Chun now pays about $20,000. If rates continue increasing by 7 percent each year, she will probably need $25,000 for her senior year in 1993.

"That's a hell of a lot of money," Chun said. "An education shouldn't be such a financial burden."

To protest $1,000 tuition hikes for out-of-staters, Arizona State University (ASU) students took over the Student Services building for 55 hours Feb. 21 through Feb. 23.

In-state tuition at ASU, the University of Arizona and Northern Arizona University will go up $116.

"We aren't getting our money's worth," said John Kierman of ASU's student government, where in-state students now pay $1,644 and out-of-staters fork over $2,485 annually.

Despite tuition increases, the 45,000-student campus in Tempe suffers from overcrowded classes, underpaid faculty, and too many graduate students teaching, Kierman charges.

"I'm having to take actions that I didn't plan on," added Andy Monzago, a Northern Arizona student whose tuition will increase by $900, or 18.5 percent next year.

The California native said he now has a student loan, a Pell grant and a part-time job. Monzago is in the Marine Corps Reserve, so he is trying to get a GI Bill grant and applying for "everything that's available,"

Undergrads restricted from upper-division classes

By Jacob Powell

Staff Writer

Next fall, the administration of CSUSB will begin to enforce a policy which states until that time was on the books but not strictly enforced. This is the requirement that all students enrolled in upper division courses must have completed eighty nine and one half quarter units.

In the Spring, when students register for next year's Fall classes, any freshman or sophomore with upper division courses (300 or 400 level) on their C.A.R. packages will have that registration denied. These students will also not be given enough notice to participate in "Walk-Through" registration, forcing them to participate in the "Add-Drop" period.

One reason for this policy is that general education courses provide good foundations in general knowledge and skill areas that can be used later in their future careers.

Shearer sparks CSUSB sports

By Jeff Zelenski

Staff Writer

Tammy Shearer sure has a lot of energy. She has enough energy to play three sports at CSUSB, hold a job, and maintain a good GPA. How does she do it? A lot of people often ask that question when the name Shearer is brought up in conversation, even among her coaches.

"I sometimes wonder how she does it all," said basketball coach Gary Schwartz. "Tammy is just an incredible individual. It amazes me how she can keep up with the pace of three sports during the year," said Ralph Perez, her soccer coach.

Shearer doesn't see it as that big of an ordeal, she simply likes sports. "Sports are my life. I've played ever since I was a little kid. It didn't matter what time of the day it was."

Rape
101.

Sponsored by Greeks Against Rape

If you think rape can't happen to you, you're as in the real education. Because statistics show that rape happens often to women in your age group. In fact, this year one out of six college women will be the victim of rape or attempted rape. Very often by someone she knows. A fellow student. Even a date.

And that's a crime. Because anytime a woman is forced to have sex against her will it's a felony. Rape's a subject no one should take lightly.

Alpha Kappa Psi hosts art auction

An art auction featuring paintings, etchings, serigraphs, watercolors and oils will be held at CSUSB beginning Saturday, April 7, in the Multi-purpose Room of the Student Union Building. A preview of the works available for sale will be conducted at 7 p.m. with the auction beginning at 8 p.m. Price begins at $30 per work. Frames will be included in the purchase price.

Admission to the event is $2 per person. The auction is being hosted by Alpha Kappa Psi, a professional business fraternity at CSUSB. All proceeds from the event will benefit a variety of upcoming Alpha Kappa Psi projects.

Additional information is available from Don Doukh, fraternity secretary, at (714)864-8028.

Graduate portraits available

Frontunner Photography, in cooperation with the Admissions Office, is offering its last "on campus" opportunity of the academic year for all 1990 graduates to have their portraits taken. This photo session will encompass all December 1989, January and March 1990 graduates, as well as all candidates for June, August, and December 1990 graduation. Because a yearbook is not offered, the program is designed mainly for students desiring portraits for personal use.

Each interested senior and graduate student will have three poses taken at no cost. Poses in "dress clothes" as well as cap and gown will be available. Caps and gowns will be provided for students interested in having a portrait taken in traditional "graduation" attire. Proof packages will be made available for purchase.

Portraits are scheduled for April 7, 13, 14, 20, 22, 27, and 28 in the Pine Room, Lower Commons. All eligible students should receive information in the mail by April 15. If not, call Frontunner Photography at (714)792-6937 to arrange a portrait sitting.

Dr. Craig Henderson to speak on Gay and Lesbian Rights, Monday

One topic will be the changing values of churches and religions regarding homosexual members and clergy. The question of monogamy and marriage with same sex couples and personal issues regarding fund-raisers, child care of gay and lesbian individuals or couples will be discussed. Recent court cases, the government's position that gay and lesbian personnel demoralize and pose a risk to national security will be covered.

Dr. Henderson will examine the effects of institutional homophobia on society and individuals and what lies on the horizon as we enter the last decade of this century.

Everyone is invited to attend. The presentation will be on Monday, April 9, from 12 to 1 p.m. in the Syracomore Room of the Lower Commons. Tea and coffee will be provided. Feel free to bring a bag lunch.

For more information, contact Dr. Ellen Grunbaum, Women's Studies Director, School of Social and Behavioral Science, FO-253, or ext. 5063.

CSUSB given '2+2+2' grant for minority students to pursue teaching career

A $30,000 grant, awarded through the chancellor's office of the California Community Colleges to CSUSB is fueling one of 10 projects in the state designed to increase the number of underrepresented minority students pursuing a teaching career.

The 2+2+2 San Bernardino Teachers Options Program, which focuses on a student's junior and senior years in high school, two years of junior college and two years at a four-year university, is now recruiting 60 minority students from Cajon High School, San Bernardino Valley College and CSUSB.

This is one of the rare times that the community colleges have combined a program's articulation plans to a four-year institution, a job usually headed up by the community colleges themselves.

"We're looking for students who are interested in becoming teachers, but don't know enough about the teaching profession to solidify their interests," said Dr. Kathryn Reilly, assistant professor of advanced studies at the CSUSB. She co-coordinates the program with CSUSB College of Education, Dr. Esteban Diaz, as well as several other area colleges and universities.

Because many minority students are concerned about a community college and then transfer to a four-year university, Diaz said it is critical that they see a clear education path. Educators have been concerned that students are not being well-informed early enough in high school to plan a career in teaching, said Diaz.

The program will outline in detail the requirements students can meet through the four-year universities and the college or at the university level. It will be introduced this summer with a "Careers in Teaching Education" class. The course will give students the opportunity to become acquainted with each other, and advisors will conduct career interest inventories as well as small group discussions. Each student will receive $200 to $250 in tuition scholarship money. Counseling support throughout a student's schooling is a major and unusual feature of the program, said administrators.

TUITION

Continued from front page

scholarship that I see" so that he can continue at NAU.

"I don't think I should have to worry about paying for school. If I have to work more and try to excel in school, eventually one of them is going to give," he said.

At Syracuse University, the board of trustees approved a 9.94 percent tuition increase Feb. 2 that sent tuition, fees and room and board up to $11,830 and provoked students into a campus protest.

For a week, students boycotted university facilities—such as the bookstore and food service—until they pay to use or buy products.

It was very effective in that most students participated," said Mark Root. In the past, he said, students have been apathetic.

Root, a junior, figures his costs have risen 35.39 percent since he enrolled at Syracuse.

"I know a lot of people who have left, or who will be leaving, because of the increasing tuition. It's not fair," he said.

A University of New Mexico student said that, for every $100 tuition hike, 1.3 percent of the student population will have to leave school because of the financial burden.

Using the formula, the task force calculated that about 10 percent of the student body will be forced to drop out if UNM proceeds with its plan to raise prices by 7.9 percent.

"If you took the increase in military research funding and funneled it into general education funds, you'd end up with plenty of scholarships to keep tuition increases within the inflation rate," maintained Rich Cowan of the National Coalition for Universities in the Public Interest, a Cambridge, Mass., group that monitors corporate influence on campus processes.

"The perpetual increases will end, he asserts, "when the federal government sees education, science, and research, as a priority."

For some lucky students they already have.

The Loraine County Community College in Elyria, Ohio, probably won't increase tuition this year, said Pauline Latkovic, a spokeswoman for the school.

"We're trying to keep school affordable, so we don't raise tuition unless we're really pressed," she said.

Delta Sig, Sigma Chi raise funds for athletics

Recently, CSUSB made the decision to move from Division III to Division II. The move requires the school to give scholarships in order to draw competitive athletes, requiring an increased amount of money. To meet this need, the funds needed, the athletic department, made a serious effort to increase student and community support, which recently voted down a referendum to raise tuition.

In response to the students' decision, the Sigma Chi fraternity decided to sponsor a basketball game with the Delta Sigma Phi fraternity to raise money for the local athletic scholarship fund. The players of the charity game gained money for scholarships for the number of points scored by the team and/or by any individual player. A dollar was also charged for spectators.

"The idea of having a game raised by the event, which went to the scholarship fund," said a Sigma Chi business manager for the event. "The idea came out of the athletic department and we decided to raise money for the local athletic scholarship fund."
WE PRINT OUR RESUME ON EVERY CAN.

THIS BUD'S FOR YOU.
COVE provides a safe haven for weary computer users

By Kim Perkins
Staff Writer

Walking through the aisles of books in the library is usually an ordinary, everyday experience in the life of a college student. But for CSUSB students Diana Cordova, Bret Knight, and Ed Thomson it is quite a delightful experience.

Into the library, up the elevator, and through row upon row of deep, dark texts they go. Behind the back side of a monstrous wall of books a warm light glows from a tiny room. Within a few minutes sounds of laughter and mirth drift through the air as these three characters graciously attend to their duties.

The small room, previously known as the COVE (acronym: CO - for the Communications Department, VE - for Vocational Education), is now officially known as the Advanced Macintosh Lab. It is equipped with ten Macintosh SE's. Its purpose is to provide student access to advanced computer programs at no cost. This is a service for students who want to use. finding lost files, saving files, printing, as well as running the entire COVE network.

The COVE was originally founded by the Communications, Science, and Vocational Education Departments for teaching journalism, advertising, and desktop publishing. The laboratory is open to communication students and all others during certain hours. Cordova, Knight, and Thomson are the computer wizards. Their job is to minister to the poor, helpless creatures who try to make use of these advanced machines. They are often called upon and many students are very grateful to them.

Their jobs include helping users get into the programs they want to use, finding lost files, saving files, printing, as well as running the entire COVE network.

Thomson, one could say, is perhaps the captain of the crew and knows more about the ship and its voyages than anyone else. He has worked in the laboratory for over two years and is called whenever anything goes wrong with the computers in the COVE or elsewhere on campus.

He is currently a senior and will graduate in June with his Bachelor's Degree in Computer Science. Knight refers to Thomson as "the computer guru of the school - called upon to troubleshoot and consult." Knight is also a senior and has worked in the lab since Fall, 1989. He will graduate in June with a degree in Graphic Design.

He states, "Working in the lab is beyond description. It feels like liquid particles of the Big Bang traveling through the universe at light speed... besides I like helping the computer illiterates and making the world a better place."

The lovely Diana Cordova carries the feminine side to this bewitching little cove. She is presently a junior and working toward a degree in communications.

She has been working with computers for over five years. She plans to work in the COVE until she graduates in the spring of 1991. She likes working in the COVE because "it is peaceful, organized, it's easy to concentrate and work in, and it's not boring."

Cordova has arranged computer magazines throughout the room and decorated it with fashion. The enchanting COVE grows dark and tranquil as the night creeps in, patiently awaiting for those who dare enter.

Located in PL 315, the COVE has been hidden from most students, and offers seclusion.

Students have found the COVE to provide refuge from the flurry of finals.

Policies

The Chronicle welcomes views from readers on a wide variety of topics. Letters and commentaries may be sent to the editorial office at 5500 University Parkway. Letters must be typed and signed and must include phone number, class standing and student I.D. number. Faculty or staff members must include job titles. All letters should be as brief as possible and are subject to editing for purposes of condensation and layout.

Letter to Editor

ROTC violates campus non-discrimination policy

By Mooryllen M. Jenkins

Special to The Chronicle

The continual presence of U.S. Marine Corps and U.S. Air Force recruiters on campus and the continuing existence of the CSUSB Army ROTC program directly violates the CSUSB non-discrimination policy that forbids discrimination on the basis of sexual orientation.

The military policy against recruiting homosexuals is documented in a 1982 Defense Department study that labels homosexuality as "incompatible with military service." It further states that excluding homosexuals from the military would help "maintain discipline, good order and morale... foster mutual trust and confidence among service members,... maintain the public acceptability of military service and... prevent breaches of security." In addition, the military may discharge homosexuals if they acknowledge a "propensity" to commit homosexual acts.

Several lawsuits challenging this policy have followed, but the Supreme Court, by allowing rulings in lower courts upholding discriminatory procedures to stand and by refusing to hear appeals from homosexuals in the military, has shown repeatedly that it does not consider discrimination based on sexual orientation to be a violation of the Constitution's guarantee of "equal protection of the laws" for all.

Here at CSUSB, the Student Rights and Responsibilities brochure, published by the Office of the Vice President for Student Services, asserts non-discrimination on the basis of "sex, age, race, ethnic origin, religion, national origin, marital status, physical handicap, sexual orientation, veteran's status, or pregnancy." It further states that "the California State University does not discriminate on the bases of that listed above. Title IX, Section 504 of the Rehabilitation Act, Title VI of the Civil Rights Act of 1964, statutes and executive orders from the Governor prohibit these forms of discrimination."

In addition, in a statement of opinion released on April 30, 1986, the Attorney General of the State of California, John K. Van De Kamp, states that according to California Labor Code sections 1101 and 1102, publicly disclosing oneself as homosexual is a political act, and "No employer shall make, adopt, or enforce any rule, regulation, or policy... direct the political activities or affiliations of employees." Political activity and political affiliation are protected under the First Amendment Freedom of Speech of the United States Constitution, and the California Supreme Court has ruled that disclosure of sexual orientation is a political act and therefore protected under this clause. According to Paul Esposito, Director of the Career Development Center, any company or organization wishing to recruit on campus must sign a Western College Placement Association form which states that "the Career Development Center does not make available its interviewing facilities, job listings, or other services to employers who unlawfully discriminate in the selection of employees on the basis of race, color, sex, sexual orientation, or any other basis prohibited by applicable law." In addition, recruiters must comply with the University Policy Statements on Employer-Recruitment Activity, which states that "recruiters must agree to comply with all state and federal regulations which deal with antidiscrimination on pre-employment practices."

When asked why the military recruiters were allowed to recruit on campus, given their apparent violations of campus and state non-discrimination policies, Dr. Esposito stated, "We will not expose the students to
anything that is clearly discriminatory that we are aware of.” He further asserted that it is in the best interest of the institution to allow any employer who signs the form agreeing to comply with University policy on campus. I will not challenge an employer that tells me they will abide by our center’s rules and regulations.

Dr. Esposito also stated that the military would continue to be permitted to recruit on campus until his office received “official notification from the Chancellor’s Office (of the CSU system) or a government agency proving that the armed services have been discriminatory regardless of whether the form was signed.”

Once a policy is handed down from either of these sources, Dr. Esposito asserted that he would not hesitate to enforce a new policy. But until then, to challenge the existing policy of allowing the military on campus would be “extremely atypical and problematic.”

The CSUSB Army ROTC program also subscribes to the military’s non-discrimination policy. But until then, to challenge the existing policy of allowing the military on campus would be “extremely atypical and problematic.”

Major Robel further contended that the CSUSB ROTC program does adhere to the campus non-discrimination policy by allowing any student to enroll in any of the Army ROTC military science courses for academic credit only, regardless of whether he or she meets the Army ROTC criteria for enrollment. Only students meeting the criteria, however, may enlist in the Army ROTC program itself to receive the ROTC benefits, including possible scholarships, a subsistence allowance of $100 per month, and a commission as a second lieutenant upon successful completion of the program and graduation. In justifying the exclusion of homosexuals, Major Robel said they are “prejudiced to good order and discipline.” He continued to state that “except within these guidelines, we don’t discriminate.”

In response to the military’s policy of discrimination based on sexual orientation, any branch of the armed forces that recruits or operates here at CSUSB would have to show that CSUSB will not tolerate discrimination at any level.

Student Association takes stand against ROTC’s alleged discrimination

The CSSA took a bold and decisive step by passing a resolution calling for the CSU to “put a stop to the ROTC practice of discriminating against homosexuals” and further requested that if their practices are not halted that the CSU will “remove the ROTC’s from campus until their discriminatory practices are stopped.”

All of this came in response to the CSSA’s concern that the Army ROTC practice of discriminating against homosexuals was directly conflicting with the CSU’s strong stance against discrimination on our campuses. The fact is no other academic program in the CSU system has a requirement of sexual orientation for admission or retention and the CSSA feels that the ROTC should not be an exception.

This resolution is just one more step to making our universities free of racism and discrimination.

Positions now available for Spring quarter:

See your dermatologist or family doctor or call 1-800-253-7300 ext. 903

There's only one product proven to grow even one of these.

This one.

From the time you first started losing your hair, you've wished for something that could somehow reverse the balding process. Now, the Upjohn Company has developed Rogaine, the first and only product that's proven to grow hair.

Rogaine is not a cosmetic or a conditioner. It's a prescription treatment for male pattern baldness of the crown of the head that's available only with a prescription written by your doctor.

Two million men just like you have used Rogaine.

Today, two million men worldwide have seen their doctor and began treatment with Rogaine. And for good reasons. Rogaine works for many men. That's not a claim, it's a proven fact. Proven in clinical tests conducted by dermatologists at medical centers across the country. Proven by results that are simply unprecedented.

In a year long test involving almost 1,000 men, 10% reported no new growth. Virtually half (48%) saw at least moderate growth with Rogaine. 36% noted minimal growth. Generally, it may take months before hair began growing again. The side effects were minimal. The most common, itchy scalp, occurred in only 5% of the men.

The higher education process is designed to go in a logical procession from a general discussion of a subject to an in-depth analysis of that subject. "Graduate students must have enough intellectual maturity to succeed in upper division course work and general education classes make this possible," said Dr. Lance Masters, Assistant Dean of Business Administration. Said, Dr. Masters also said that he has encountered many students whose position in this school has been put into jeopardy because they were not able to meet the expectations of their 300 and 400 level courses.

One of the requirements that the national groups agreed upon was to disallow undergraduate from taking upper level course work. Some students, however, don't agree with the administration's evaluation. "Being a student who decided for myself to get the general education courses out of the way, I find it extremely unfair of the administration to restrict graduates to only undergraduate courses," said Darin Scines, a Political Science major.

when someone asked me to go and play, I always went with them," said Shearer, "It seemed like I always had time to play sports."

Shearer, who is a Physical Education major with a minor in Recreation and Biology, also holds down a job while playing. She works for a newspaper delivering papers.

"I have a paper route at three in the morning, after my route I go back home and sleep a while before going to school. I usually get 5-6 hours of sleep a night," said Shearer.

In the classroom she holds a 2.80 GPA.

"I pull A's and B's, I don't like C's," said Shearer.

Golf drives past top ranked UCSD

CSUSB's golf team, ranked second in the Western Region Division III, defeated region leader UCSD by 40 strokes in the CSU Stanislaus Tournament held on March 26-27. The Coyotes finished the tournament ninth overall and first among Division III teams.

Just prior to the tournament, CSUSB had been ranked second, behind UCSD, in the Western Region, and ninth in the nation, also behind UCSD (8th). The showing at the tournament improved CSUSB's ranking when the polls are released again.

The Coyotes are a perfect 9-0 in dual matches this season and are looking to extend their winning streak this weekend at the Grand Canyon Invitational.

Coyotes survive, sweep Spring Classic

CSUSB's sweep of the inaugural Rotary North/CSUSB Spring Baseball Classic lost some of its savor as the Coyotes lost two key players to injury.

Pitcher Rene Aguilar suffered a strained back in a pre-tournament game against University of Wisconsin Whitewater, and outfielder Sal Herrera was hit by a pitch against Whitewater three days later, suffering a fractured wrist. Herrera is not expected to be able to return for at least three weeks, while Aguilar's condition is uncertain.

The Coyotes were undefeated throughout the five-team round-robin tournament, and are proving themselves a much improved team from the one that was shut out by Azusa Pacific 8-0 three weeks ago. The Coyotes scored a total of 50 runs during the four-game tournament, and allowed only 16.

Five members of the squad were named to the All-Tournament Team: Ryan Love, second base; Jeff Brennan, outfield; Bret Parrock, catcher; Brandon Moore, designated hitter, and Brooks Peters-pitcher.

Following the game versus Azusa on March 7, the Coyotes' record had dropped to a dismal 3-7. They were averaging only 4.7 runs per game and were giving up close to seven. The team was well off the pace that had brought them close to being selected to the Western Regional playoffs, last year at 28-8-1.

Since that game, however, the Coyotes (15-8) have won 12 out of 13, increased their offense to 11.5 runs per game while allowing a mere 3.5, and have regained their vision of post-season play. The Coyotes will go into action this Saturday in a double header against the University of La Verne, at La Verne.

Softball gains respect with national ranking

The CSUSB softball team, with its 16-6 record, has been listed among the top ten teams in the nation for the first time in its four year history.

"It shows that we've gotten the respect of the other teams," said first year head coach Sue Strain, "People are seeing what we are doing. It's important to get this kind of respect this early in the season."

The Lady Coyotes are ranked fifth in the nation in NCAA Division III. They were also ranked second in the Western Region, the first time the team has been ranked higher the seventh. "We're not at our peak yet," continued Strain. "We can never be satisfied with our play, we are always looking to improve. We go into each game as the underdog, we can't relax, not yet."

The Lady Coyotes continued to improve with a sweep of visiting Claremont College last Thursday. Sophomore Tanna Cash (7-3) pitched the first game, which lasted only five innings due to the 10 run mercy rule, allowing only three hits in the 12-0 victory.

Senior center fielder, Anne Cordero, was three-for-three in the contest, including two triples, drove in three runs, and scored twice for the Lady Coyotes. Left fielder Marnie LaFleur was also three-for-three, including a home run. She also had three RBIs and scored twice.

In the nightcap, LaFleur (9-3) pitched four innings, allowed three hits and one unearned run. She continued with the hot bat, again going three-for-three, picking up two more RBIs, and scoring twice. Senior shortstop Lisa Hilbom picked up an RBI on a two-run home run, her second of the season. Melody Bumstead pitched the final three innings in relief to get the save.

The national ranking is proof of the team's talent. Cordero, twice named to the All-Western Region Team and a second team All-American in 1988, holds the highest batting average on the team at .539. She is also the team leader in RBIs (23) and stolen bases (7). LaFleur follows close behind with 21 RBIs and a .305 batting average.

Other leaders for the Lady Coyotes are second baseman Tammy Shearer, batting .383 with 15 RBIs, Hilbom, batting .318 with 15 RBIs, and first baseman Monica Reyes batting .308.

Defensively, the Lady Coyotes have been strong all year.

"At the beginning [of the season], the defense was winning our games for us," said Strain. "but lately the offense has picked up, and our pitching staff is doing a great job."

Both pitchers, Cash and LaFleur, have ERAs below 1.0 (.330 and .886 respectively) and have been getting stronger throughout the season. The Lady Coyotes have given up a total of 31 runs in 22 games this season, an average of only 1.4 runs per game, including 10 shut-outs.

The Lady Coyotes play their final home game of the season on Tuesday versus Cal Baptist.
