April 4th 1990

CSUSB
Colleges nationwide announce tuition hikes

One by one, college administrations are announcing tuition hikes for next school year that, once again, promise to make the price of education rise faster than prices for any other kind of good or service.

While the general inflation rate hovers around 4.5 percent, officials at the universities of Miami, Chicago, Rutgers, Stanford, Central Michigan, Loyola and Duke, among others, announced in February that they were raising tuition by 5.5 percent to 11 percent next year.

Two-year college students don't seem much better off. Southeast Community College in Lincoln, Neb., for example, will raise prices 6.5 percent in 1990-91.

Though it's still too early to compute a national average for 1990-91 increases, most students can expect jumps ranging from 5 percent to 9 percent if the trends established in February continue.

Tuition has risen faster than the inflation rate during each of the past nine years. For 1989-90, tuition at four-year public campuses rose 7 percent, to an average $1,694 per term, the College Board reports. It rose by 9 percent, to an average $8,737, at four-year private campuses.

Students at public two-year schools fared a little better. Their tuition increased an average of 5 percent, to $845. Private two-year colleges raised their rates by 7 percent for the 1989-90 year.

Community and junior colleges "try real hard to stay at or below the rate of inflation," said Judy Tomczak of the American Association of Community and Junior Colleges. Many students, however, complain the price has gone up too far, too fast.

By the time she graduates, first-year Wesleyan University student Susan Chun figures she'll be paying 25 percent more than she is now for tuition, room and board, books and personal expenses.

She now pays about $820,000. If rates continue increasing by 7 percent every year, she will probably need $25,000 for her senior year in 1993.

"That's a hell of a lot of money," Chun said. "An education shouldn't be such a financial burden."

To protest $1,000 tuition hikes for out-of-staters, Arizona State University (ASU) students took over the Student Services building for 55 hours Feb. 21 through Feb. 23.

In-state tuition at ASU, the University of Arizona and Northern Arizona University will go up $116.

"We aren't getting our money's worth," said John Kerman of ASU's student government, where in-state students now pay $1,644 and out-of-staters fork over $5,485 annually.

Despite tuition increases, the 45,000-student campus in Tempe suffers from overcrowded classes, underpaid faculty, and too many graduate students teaching, Kerman charges.

"I'm having to take actions that I didn't plan on," added Andy Monzingo, a Northern Arizona student whose tuition will increase by $900, or 18.5 percent next year.

The California native said he now has a student loan, a Pell grant and a part-time job. Monzingo is in the Marine Corps Reserve, so he is trying to get a GI Bill grant and is applying for "every possible right available," said Monzingo.

Shearer sparks CSUSB sports

Tammy Shearer sure has a lot of energy.

She has enough energy to play three sports at CSUSB, hold a job, and maintain a good GPA. How does she do it? A lot of people often ask that question when the name Shearer is brought up in conversation, even among her coaches.

"I sometimes wonder how she does it all," said basketball coach Gary Schwartz. "Tammy is just an incredible individual. It amazes me how she can keep up with the pace of three sports during the year," said Ralph Perez, her soccer coach.

Shearer doesn't see it as all that big of an ordeal, she simply likes sports.

"Sports are my life. I've played ever since I was a little kid. It didn't matter what time of the day it was."

Shearer is a three-sport starter for CSUSB. In softball, which she is playing currently, she's batting .383 with a fielding percentage of .984.

Senior Tammy Shearer is a three-sport starter for CSUSB. In softball, which she is playing currently, she's batting .383 with a fielding percentage of .984.

**Eleventh Annual VETERANS' JOB FAIR**

Friday, April 6th
National Orange Show Restaurant
San Bernardino
9:00 a.m. - 2:30 p.m.

Many Local and National Employers Bring Plenty of Your Resumes

**FREE TO ALL JOB SEEKERS**

For Information Call (714) 782-3230

**START YOUR CLIMB TO CAREER SUCCESS THIS SUMMER.**

Apply now for six weeks of Army ROTC leadership training. With pay, without obligation.

You'll develop the discipline, confidence and decisiveness it takes to succeed in any career. And you'll qualify to earn Army officer credentials while you're completing your college studies.

For more information, contact MAJ Mike Robel, Student Services 126 or call 887-9545 (collect).

**ARMY ROTC TWO-YEAR PROGRAM**

**THE SMARTEST COLLEGE COURSE YOU CAN TAKE.**
Alpha Kappa Psi hosts art auction

An art auction featuring lithographs, etchings, serigraphs, watercolors and oil paintings will be held at CSUSB beginning Saturday, April 7, in the Multi-purpose Room of the Student Union Building. A preview of the works available for sale will be conducted at 7 p.m. with the auction beginning at 6 p.m. Prices begin at $30 per work. Frames will be included in the purchase price.

Admission to the event is $2 per person. The auction is being hosted by Alpha Kappa Psi, a professional business fraternity at CSUSB. All proceeds from the event will benefit a variety of upcoming Alpha Kappa Psi projects.

Additional information is available from Jon Doucett, fraternity secretary, at (714)864-8028.

Graduate portraits available

Frontrunner Photography, in cooperation with the Academic Affairs Office, is offering its last "on campus" opportunity of the academic year for all 1990 graduates to have their portraits taken. This photo session will encompass all December 1989, January and March 1990 graduates, as well as all candidates for June, August, and December 1990 graduation. Because a yearbook is not offered, the program is designed mainly for students desiring portraits for personal use.

Each interested senior and graduate student will have three poses taken at no cost. Poses in "dress clothes" as well as cap and gown will be available. Caps and gowns will be provided for students interested in having a portrait taken in traditional "gown" pose. Graduation packages will be available for purchase.

Portraits are scheduled for April 5th, 12, 13, and 19 in the Pine Room, Lower Commons. All eligible students should receive information in the mail by April 15. If not, call Frontrunner Photography at (714)792-6937 to arrange a portrait sitting.

Dr. Craig Henderson to speak on Gay and Lesbian Rights, Monday

One topic will be the changing values of churches and religions regarding homosexual members and clergy. The question of monogamy and marriage with same sex couples and personal issues regarding family law and child care of gay and lesbian individuals or couples will be discussed. Recent court cases concerning the government's position that gay and lesbian personnel demoralize and pose a risk to military security will be covered.

Dr. Henderson will examine the effects of institutional homophobia on society and individuals and what lies on the horizon as we enter the last decade of this century.

Everyone is invited to attend. The presentation will be on Monday, April 9 from 12 to 1 p.m. in the Sigma More Room of the Lower Commons. Tea and coffee will be provided. Feel free to bring a bag lunch.

For more information, contact Dr. Ellen Gruenberg, Women's Studies Director, School of Social and Behavioral Science, FO-253, or ext. 5546.

CSUSB given '2+2+2' grant for minority students to pursue teaching career

A $30,000 grant, awarded through the chancellor's office of the California Community Colleges to CSUSB is fueling one of 10 projects in the state designed to increase the number of underrepresented minority students pursuing a teaching career.

The 2+2+2 San Bernardino Teachers Options Program, which focuses on a student's junior and senior years in high school, two years of junior college and two years at a four-year university, is now recruiting 60 minority students from CSUSB, San Bernardino Valley College and CSUSB.

This is one of the rare times that the community colleges have collaborated on such a program's articulation plans to a four-year institution, a job usually headed up by the community colleges.

"We're looking for students who are interested in becoming teachers, but don't know enough about the teaching profession to solidify their interests," said Dr. Kathryn Reily, assistant professor of advanced studies, and coordinator of the CSUSB. She co-coordinates the program with CSUSB College Dr. Esteban Diaz, associate professor of elementary and bilingual education.

Because many minority students are concerned about a community college and then transfer to a four-year university, Diaz said it is critical that they see a clear education path. Educators have been concerned that students are not being well-informed early enough in high school to plan a career in teaching, said Diaz.

The program will outline in detail the requirements students can meet through early preparation courses in high school, course work at a community college or courses at the university level. It will be introduced this summer with a "Careers in Teaching Education" class. The course will give students the opportunity to become acquainted with each other, and advisors will conduct career interest inventories as well as small group discussions.

Each student will receive $200 to $250 in tuition scholarship money. Counseling support throughout a student's schooling is major and unusual feature of the program, say administrators.

Tuition

Continued from front page

Special Workshops specifically for geometry will be offered on the following dates:

- May 11 (the Friday before test date) 6 p.m. - 9 p.m.
- May 12 (the Saturday before test date) 9 a.m. - 5 p.m.
- May 27 (the Saturday before test date) 9 a.m. - 5 p.m.
- May 28 (the Saturday after test date) 9 a.m. - 5 p.m.
- May 29 (the Sunday after test date) 9 a.m. - 5 p.m.

BMI test workshops scheduled

The Learning Center will offer a series of workshops for students who plan to take the May 12th BMI Test Level I. Students should have scored at least a 400 on a previous BMI — or get at least 25% correct out of 50 on a math screening test available in the Learning Center. All interested should come to the Learning Center (PL-37) or call (ext. 5038) by April 5th to sign-up.

Below is a copy of the workshop schedule. Students should plan to attend all sessions.

- April 7, 14, 21, 28, and May 5th 9 a.m. - 12 noon
- May 11 (the Friday before test date) 6 p.m. - 9 p.m.

Special Workshops specifically for geometry will be arranged and publicized at a later date.

Delta Sig, Sigma Chi raise funds for athletics

Recently, CSUSB made the decision to move from Division III to Division II. The move requires the school to give scholarships in order to draw competitive athletes, requiring an increased amount of needs. To gain the funds needed, the athletic department has begun a fund-raising campaign for community and student body, which recently voted down a referendum to raise tuition.

In response to the students' decision, the Sigma Chi fraternity decided to sponsor a basketball game with the Delta Sigma Phi fraternity to raise money for the local Scholarship Fund. The players of the charity game gained money for student's education, as a priority, to research, as a priority.

For some lucky students they already have ended. The local Campus College in Elyria, Ohio, probably won't increase this tuition fee, said Pauline Labou, a spokeswoman for the school.

"We're trying to keep school affordable, so we don't raise tuition unless we're really pressed," she said.

Root, a junior, figured his costs have risen 35.38 percent since he enrolled at Syracuse.

"I don't think I should have to worry about paying for school. If I have to work more and try to excel in school, eventually one of them is going to give," he said.

At Syracuse University, the board of trustees approved a 9.94 percent tuition increase Feb. 2 that sent tuition, fees, and room and board up to $11,830 and provoked students into a campus protest.

For a week, students boycott ed the student union, which recently voted down a proposal to give scholarships to incoming teachers, but don't raise tuition unless they can keep it. The new rate will end, he asserts, "when the federal government sees education, as a priority, to research, as a priority."

For some lucky students they already have ended. The local Campus College in Elyria, Ohio, probably won't increase this tuition fee, said Pauline Labou, a spokeswoman for the school.

"You'd try keeping school affordable, so we don't raise tuition unless we're really pressed," she said.

WE PRINT OUR RESUME ON EVERY CAN.

If Budweiser is already your regular beer we’d like to say thanks for the business. If it’s not, then we’d like to apply for the job.

Of course our resume can only tell you who we are. To discover just how good we taste, we suggest you set up a personal interview.
COVE provides a safe haven for weary computer users

By Kim Perkins
Staff Writer

Walking through the aisles of books in the library is usually an ordinary, everyday experience in the life of a college student. But for CSUSB students Diana Cordova, Bret Knight, and Ed Thomson it is quite a delightful experience. Into the library, up the elevator, and through row upon row of deep, dark texts they go. Behind the back side of a monstrous wall of books a warm light glows from a tiny room. Within a few minutes sounds of laughter and mirth drift through the air as these three characters graciously attend to their duties. The small room, previously known as the COVE (acronym: CO - for the Communications Department, VE - for Vocational Education), is now officially known as the Advanced Macintosh Lab. It is equipped with ten Macintosh SE's, advanced software, and a mighty Mac at the side of the whole operation.

The COVE was originally founded by the Communication, Science, and Vocational Education Departments for teaching journalism, advertising, and desktop publishing. The laboratory is open to communication students and all others during certain hours.

Cordova, Knight, and Thomson are the computer wizards. Their job is to minister to the poor, helpless creatures who try to make use of these advanced machines. They are often called upon and many students are very grateful to them.

Their jobs include helping users get into the programs they want to use, finding lost files, saving files, printing, as well as running the entire COVE network.

Thomson, one could say, is perhaps the captain of the crew and knows more about the ship and its voyagers than anyone else. He has worked in the laboratory for over two years and is called whenever anything goes wrong with the computers in the COVE or elsewhere on campus.

He is currently a senior and will graduate in June with his Bachelor's Degree in Computer Science.

Knight refers to Thomson as "the computer guru of the school - called upon to troubleshoot and consult."

Knight is also a senior and has worked in the lab since Fall, 1989. He will graduate in June with a degree in Graphic Design.

He states, "Working in the lab is beyond description. It feels like liquid particles of the Big Bang traveling through the universe at light speed... besides I like helping the computer illiterates and making the world a better place."

The lovely Diana Cordova carries the feminine side to this bewitching little cove. She is presently a junior and working toward a degree in communications.

She has been working with computers for over five years. She plans to work in the COVE until she graduates in the spring of 1991.

She likes working in the COVE because "it is peaceful, organized, it's easy to concentrate and work in, and it's not boring."

Cordova has arranged computer magazines throughout the room and decorated it with fashion. The enchanting COVE grows dark and tranquil as the night creeps in, patiently awaiting for those who dare enter.

Have You Tried AUTOPHERESIS?

You'll be surprised how much you like it!

During your 35 to 60 minute plasma donation you'll be free to read, study, or plan that next vacation. The money you save from your donations will help you make your dreams come true. And at the same time, you'll have the satisfaction of knowing your plasma donation can help patients in need and save lives.

As you race to the finish of the school year, be sure to enter our "RACE TO THE FINISH" Sweepstakes, where you could win one of these great prizes:

- **GRAND PRIZE—ONE WINNER**
  An all-expense-paid trip for two to Paris for the 1990 Tour de France.

- **FIRST PRIZE—50 WINNERS**
  A Raleigh Assault* or Finesse* All-Terrain Bike.

- **SECOND PRIZE—500 WINNERS**
  A go-anywhere Fanny Pack.

- **THIRD PRIZE—1,000 WINNERS**
  A sports water bottle.

To enter, just race over to the campus contact listed at right and ask to take a free test drive on one of our featured desktop PCs. It just might be the most rewarding test of your college career!

ROTC violates campus non-discrimination policy

By Mooryllen M. Jenkins
Special to The Chronicle

The continual presence of U.S. Marine Corps and U.S. Air Force recruiters on campus and the continuing existence of the CSUSB Army ROTC program directly violates the CSUSB non-discrimination policy that forbids discrimination on the basis of sexual orientation.

The military policy against recruiting homosexuals is documented in a 1982 Defense Department study that labels homosexuality as "incompatible with military service." It further states that excluding homosexuals from the military would help "maintain discipline, good order and morale...foster mutual trust and confidence among service members, [would] maintain the public acceptability of military service and...prevent breaches of security." In addition, the military may discharge homosexuals if they acknowledge a "propensity" to commit homosexual acts.

Several lawsuits challenging this policy have followed, but the Supreme Court, by allowing rulings in lower courts upholding discriminatory procedures to stand and by refusing to hear appeals from homosexuals in the military, has shown repeatedly that it does not consider discrimination based on sexual orientation to be a violation of the Constitution's guarantee of "equal protection of the laws" for all.

Here at CSUSB, the Student Rights and Responsibilities brochure, published by the Office of the Vice President for Student Services, asserts non-discrimination on the basis of "sex, age, race, ethnic origin, religion, national origin, marital status, physical handicap, sexual orientation, veteran's status, or pregnancy." It further states that "the California State University does not discriminate on the bases of that listed above. Title IX, Section 504 of the Rehabilitation Act, Title VI of the Civil Rights Act of 1964, statutes and executive orders from the Governor prohibit these forms of discrimination."

In addition, in a statement of opinion released on April 30, 1986, the Attorney General of the State of California, John K. Van De Kamp, states that according to California Labor Code sections 1101 and 1102, publicly disclosing oneself as homosexual is a political act, and "No employer shall make, adopt, or enforce any rule, regulation, or policy...directing political activities or affiliations of employees."

Political activity and political affiliation are protected under the First Amendment Freedom of Speech of the United States Constitution, and the California Supreme Court has ruled that disclosure of sexual orientation is a political act and therefore protected under this clause. According to Paul Esposto, Director of the Career Development Center, any company or organization wishing to recruit on campus must sign a Western College Placement Association form which states that "the Career Development Center does not make available its interviewing facilities, job listings, or other services to employers who unlawfully discriminate in the selection of employees on the basis of race, color, sex, sexual orientation...or any other basis prohibited by applicable law." In addition, recruiters must comply with the University Policy Statements on Employer-Recruitment Activity, which states that "recruiters must agree to comply with all state and federal regulations which deal with antidiscrimination on pre-employment practices."

When asked why the military recruiters were allowed to recruit on campus, given their apparent violation of campus and state non-discrimination policies, Dr. Esposto stated, "We will not expose the students to
anything that is clearly discriminatory that we are aware of. He further asserted, "It is in the best interest of the institution to allow any employer who signs the form agreeing to comply with University policy on campus. I will not challenge an employer that tells me they will abide by our center's rules and regulations."

Dr. Esposito also stated that the military would continue to be permitted to recruit on campus until his office received "official notification from the Chancellor's Office (of the CSU system) or a government agency proving [that the] armed services have been discriminatory regardless of whether the form was signed."

Once a policy is handed down from either of these sources, Dr. Esposito asserted that he would not hesitate to enforce a new policy. But until then, to challenge the existing policy of allowing the military on campus would be "extremely atypical and problematic."

The CSUSB Army ROTC program also subscribes to the military's policy of non-recruitment of homosexuals. Major Robel, Assistant Professor of Military Science, stated that the CSUSB Army ROTC program stipulates that persons enrolled must be U.S. citizens, non-handicapped to pass the physical, have no major law violations, a GPA above 2.0, and be under 30 by the time of graduation. Although this policy was chosen as the target date to allow current freshmen to graduate, although this proposal, if accepted by the regents, would mean the loss of $82 million dollars a year in military funding, supportive faculty and students at the University of Wisconsin see the move as an emphatic statement for the unacceptable discrimination based on any organization.

Until the military abandons its policy of allowing discrimination based on sexual orientation, any branch of the armed forces that recruits or operates here at CSUSB will violate the Army ROTC military science courses for academic credit only, regardless of whether he or she meets the Army ROTC criteria for enrollment. Only students meeting the criteria, however, may enlist in the Army ROTC program itself to receive the ROTC benefits, including possible scholarships, a subsistence allowance of $100 per month, and a commission as a second lieutenant upon successful completion of the program and graduation.

In justifying the exclusion of homosexuals, Major Robel said they are "prejudicial to good order and discipline. He continued to state that "except within these guidelines, we don't discriminate."

In response to the military's policy of discrimination based on sexual orientation, any branch of the armed forces that recruits or operates here at CSUSB will violate campus policy prohibiting discrimination based on sexual orientation. Any branch of the armed forces will not tolerate discrimination at any level.

Student Association takes stand against ROTC's alleged discrimination

The CSSA took a bold and decisive step by passing a resolution calling for the CSU to "put a stop to the ROTC practice of discriminating against homosexuals" and further requested that if their practices are not halted that the CSU will "remove the ROTC from campus until their discriminatory practices are stopped."

All of this came in response to the CSSA's concern that the Army ROTC practice of discriminating against homosexuals was directly conflicting with the CSU's strong stance against discrimination on our campuses. The fact is no other academic program in the CSU system has a requirement of sexual orientation for admission or retention and the CSSA feels that the ROTC should not be an exception.

This resolution is just one more step to making our universities free of racism and discrimination.

There's only one product proven to grow even one of these.

This one.

From the time you first started losing your hair, you've wished for something that could somehow reverse the balding process. Now, The Upjohn Company has developed Rogaine, the first and only product that's proven to grow hair.

Rogaine is not a cosmetic or conditioner. It's a prescription treatment for male pattern baldness of the crown of the head that's available only with a prescription written by your doctor.

Two million men just like you have used Rogaine.

Today, two million men worldwide have seen their doctor and begun treatment with Rogaine. And for good reason. Rogaine works for many men. That's not a claim, it's a proven fact. Proven in clinical tests conducted by dermatologists at medical centers across the country. Proven by the results that are simply unprecedented.

In a year long test involving almost 1,500 men, only 16% reported no new growth. Virtually half (46%) saw at least moderate growth with Rogaine. 36% noted minimal growth.

Generally, it took four months before hair began growing again. The side effects were minimal. The most common, tingly scalp, occurred in only 5% of the men.

See your dermatologist or family doctor or call 1-800-253-7300 ext. 903.

For more information contact a physician in the CSUSB Student Health Center.

COURSES—Continued from front page

Graduate students. The higher education process is designed to go in a logical procession from a general discussion of a subject to in-depth analysis of that subject. "Graduate students must have enough intellectual maturity to succeed in upper division coursework and general education classes make this possible," said Dr. Lance Masters, Assistant Dean of Business Administration. "This is not a claim, it's a proven fact. Proven by the members of A.S.I. Take this policy into serious consideration and I hope that they might take action in the form of a petition to address the students, which are people who are affected," Scines said.

"I take upper level courses as an undergraduate because I'm getting the major that I would most like to devote my life's work to. Through these more difficult courses I can become better acquainted with the specifics of a particular course of study. Right now I'm an undeclared freshman hoping to find a major I want to declare through my 300 level courses," stated Jason Kelly.

A student who welcomes this event is Stacy Cervern, a sophomore majoring in Communications. "If a person goes to college they should have to take at least two major courses they may take as an undergraduate because the school must differentiate between general education and upper division work," she said. "The need for a student to take this intellectual stimulation should be more than fulfilled through undergraduate coursework."
SHEARER

Continued from front page

when someone asked me to
go and play, I always went
with them," said Shearer,
"It seemed like I always had
time to play sports."

Shearer, who is a Physical
Education major with a
minor in Recreation and
Biology, also holds down a
job while playing. She works
for a newspaper delivering
papers.

"I have a paper route at
three in the morning, after
my route I go back home
and sleep a while before
going to school. I usually
ger 5-6 hours of sleep a
night," said Shearer.

In the classroom she holds
a 2.80 GPA.

"I pull A's and B's, I don't
like C's," said Shearer.

With her tough schedule
Shearer clearly shows her
dedication to all her sports.

"She is one of those people who you believe can do anything if she puts her
mind to it," said Perez.

On the soccer field this
past year she helped to lead
the team with three goals
and two assists.

"She is a very quiet, yet
very intense leader on the
field. She is one of those
people who you believe can
do anything if she puts her

Coach Ralph Perez, Women's Soccer

mind to it," said Perez.

She was the fourth lead­ing scorer on the basketball
team with a 7.9 point per
game average and was third
in rebounding with a 5.4
average. She helped to lead
the Coyotes the a 24-4 re­
success," said Schwartz. "I
think that (playing all three
sports) was really something
that she wanted to do."

Currently, Shearer is play­ing her favorite.

"Softball is my favorite
sport. It's a little more indi­
vidual of a sport; in softball
you have to make the play
when you're hit the ball."

"She's a real gutsy player.
She's doing well right now,
she's really helping the
team," said softball coach
Sue Strain. "She is the part
of the nucleus that we have.
As the starting second base­
man she and Lisa Hilborn
have the prettiest double
play I've seen."

On the season so far
Shearer has batting .383, with
a fielding percentage of .964.
The Lady Coyotes are cur­
rently ranked fifth in NCAA
Division III with a record of
16-6.

"As a quiet player she is
often overlooked," said
Strain, "She is the most
consistent player I've ever
seen."

Playing multiple sports
isn't anything new for
Shearer. She lettered in four
sports at Norco High School;

Tammy Shearer

track, tennis, softball.

"Tammy seems to strive
on being active. Although it
might not be for other ath­
letes, it's right for Tammy;" said Schwartz.

Tammy Shearer has
proven to everyone that it is
right for her.

CSUSB RECREATIONAL SPORTS
PRESENTS
INFORMAL INDOOR
SOCCER

Mondays from 4 p.m. to 6 p.m.

These pick-up games are open to all CSUSB stu­
dents * No sign-up required * Just show up!

"WHOLLY RECREATION!"

Golf drives past top ranked UCSD

CSUSB's golf team, ranked second in the Western Region Division III, defeated region leader UCSD by 40 strokes in the CSU Stanislaus Tournament held on March 26-27. The Coyotes finished the tourney ninth overall and first among Division III teams.

Just prior to the tournament, CSUSB had been ranked second, behind UCSD, in the Western Region, and ninth in the nation, also behind UCSD (8th). The showing at the tournament would improve CSUSB's ranking when the polls are released again.

The Coyotes are a perfect 10-0 after 10 rounds this season and are looking to extend their winning streak this weekend at the Grand Canyon Invitational.

CSUSB's sweep of the inaugural Rotary North/Csusb Spring Baseball Classic lost some of its savor as the Coyotes lost two key players to injury.

Pitcher Rene Aguilar suffered a strained back in a pre-tourney game against University of Wisconsin-Whitewater, and outfielder Sal Herrera was hit by a pitch against Whitewater three days later, suffering a fractured wrist. Herrera is not expected to be able to return for at least three weeks, while Aguilar's condition is uncertain.

The Coyotes were undefeated throughout the five-team round-robin tournament, and are proving themselves a much improved team from the one that was shut out by Azusa Pacific 8-0 three weeks ago. The Coyotes scored a total of 50 runs during the four-game tourney, and allowed only 16.

Five members of the squad were named to the All-Tournament Team: Ryan Love-second base, Jeff Brennan-outfield, Bret Parrick-catcher, Brandon Moore-designated hitter, and Brooks Peters-pitcher.

Following the game versus Azusa on March 7, the Coyotes' record had dropped to a dismal 3-7. They were averaging only 4.7 runs per game and were giving up close to seven. The team was well off the pace that had brought them close to being selected to the Western Regional playoffs, last year at, 28-8-1.

Since that game, however, the Coyotes (15-8) have won 12 out of 13, increased their offense to 11.5 runs per game while allowing a mere 3.5, and have regained their vision of post-season play.

The Coyotes will go into action this Saturday in a double header against the University of La Verne, at La Verne.

Coyotes survive, sweep Spring Classic

The CSUSB softball team, with its 16-6 record, has been listed among the top ten teams in the nation for the first time in its four year history.

"It shows that we've gotten the respect of the other teams," said first year head coach Sue Strain. "People are seeing what we are doing. It's important to get this kind of respect this early in the season."

The Lady Coyotes are ranked fifth in the nation in NCAA Division III. They were also ranked second in the Western Regional, the first time the team has been ranked higher than the seventh. "We're not at our peak yet," continued Strain, "but lately the offense has picked up, and our pitching staff is doing a great job."

The Lady Coyotes have been strong all year.

"At the beginning of the season, the defense was winning our games for us," said Strain. "But lately the offense has picked up, and our pitching staff is doing a great job."

Both pitchers, Cash and LaFleur, have ERAs below 3.5, and have given up a total of 31 runs in 22 games this season, an average of only 1.4 runs per game, including 10 shut-outs.

The Lady Coyotes play their final home game of the season on Tuesday versus Cal Baptist.

Softball gains respect with national ranking

The Lady Coyotes play an average of only 1.4 runs per game, including 10 shut-outs.
