CSUSB
Annual A.S. Elections Comedy Goes Into Second Act

by M. A. Kemenovich

Accompanied by student cries of bemused innocence some of the candidates are indulging in their favorite springtime sport: Name Calling. Busy rewriting the history of this last year, accompanied by studied attempts to emulate professional campaign rhetoric, the candi-
didates are busyly explaining how and what they’d do using a back-
ground of claimed expertise in in-
action. Each maximizes the others’ failures while minimizing their own, all accompanied to a tune of confu-
sion in how to deal with the people who don’t claim anything.
It has come to the point that truth is dangerous. Any candidate making a definitive statement takes the chance of having the truth twisted to prejudice his case by those who listen. The only safe thing is to do nothing, at-
tempted nothing and said nothing.
No one outside of the AS circle seems to care much.
Is an AS election important? You better believe it. True, we are a commuter school but the s ervices we all receive are based on the im-
agination and energy of the elected
officials.

Because of state imposed legal checks and balances, hardly anyone can mess up “AS” per-
munist. Probably the worst that could be expected is stagnation. No new programs, faulty ad-

ministration of current programs and a propensity to rely on past
practices, will slow the flow of new programs and the recruitment of badly needed new blood. With the continual drain and atten-
tion of transfer, graduation and boom, new people are always needed.
Nonetheless, the campaign prom-
ises and delivers lighter
moments. The machinations, plots and subterfuges used to get ban-
ers on the library, a Toga party in a local Country and Western bar.
The styles of the candidates are as different as day and night, and that is exactly what makes them interesting. Without facies, Kathryn Forster is run-
ning a personalized campaign on individual contact. Tim Hamre is de-
pending on media type support and reputation. Sandy Case is run-
ing steadily if not imaginatively. James Lyne depends on friends-
ships. And Fuentes is much in evidence in posters but I don’t think I have ever met or seen him.
All of the machinations and laughable actions we chuckle over are all aimed at one thing though. All of the candidates want the posi-
tions they are campaigning for, partially for ego, partially for person-
al fulfillment but mostly in order to serve their fellow students. If their actions are running, remem-
ber they are not professionals. There are merely interested and concerned students of varying
abilities and experience who want to do something.
The next time you laugh at them just remember that they at least are trying to do something and are will-
ing to stick their necks out and make mistakes. By exposing them-
se//s, they may call forth ridicule, but they do belong to that lost
breed of people who are willing to try.
We can at least listen to them and make our decision. The polls will be conveniently placed this week. All you need is an ID card
Take advantage of the opportunity to make some statement of support for the student government orga-
ization you pay for at registration.

Board Rates To Go Up 18 Percent

by Tim Hamre

In a meeting held last Thursday, the Board of Directors for the CSCSB Foundation adopted new board rates for dorm residents next year which are 18 percent higher than this year.
Residents on the 15 meal plan will be paying $3.60 per day in-
stead of the current $3.05 per day. Nineteen meal plan residents, cur-
rently paying $3.17 per day, will pay $4.07 per day next year. This means an increase of 18 percent for the 15 meal plan and a 17.3 percent increase for those on the 19 meal plan.
The board rate is set for an antici-
pated dorm population of 276-300 residents. (The rate changes for every increment of 25 residents with it being lower if there are more residents.) There are cur-
rently 326 dorm residents.
Next year, the Foundation will collect from each resident the rates mentioned above, which will be written into next year's housing license. However, the Foundation will pay Professional Food Management (PFM) the company, which is contracted to run the Commons, at the appropriate rate for the actual number of boarders.
If, in other words, if there are more than 300 residents next year, the Foundation will collect more from each resident than it will actually pay to PFM.
The Foundation usually under-
estimates the number of residents, and then puts the extra money it collects into a reserve fund. This reserve fund would theoretically be used as a cushion if the dorm population ever fell below antici-
pated levels, thus causing the
Foundation to pay PFM more than it collects from each student.
This year, the Foundation is col-
lecting $ 04 more each day from each student than it is paying to PFM. Over the 244 day feeding calendar, they are collecting $9.76 extra from each resident. For the current 326 residents, this totals an
extra $3,181.76 collected this year.
The next time you laugh at them just remember that they at least are trying to do something and are will-
ing to stick their necks out and make mistakes. By exposing them-
se//s, they may call forth ridicule, but they do belong to that lost
breed of people who are willing to try.
We can at least listen to them and make our decision. The polls will be conveniently placed this week. All you need is an ID card
Take advantage of the opportunity to make some statement of support for the student government orga-
ization you pay for at registration.

A.S. Elections Enter Final Week

The first week of AS campaign-
ning has passed as candidates prepare for last minute campaign-
ning before the elections scheduled for Wednesday and Thursday (April 23 & 24).
While campaigning officially started last Monday, there was much activity preceding it. The most notable pre-campaign activity was the aligning of tickets. personalized campaign on

Farwell recommended to the Foundation Board that they only anticipate 276-300 residents next year. He explained that if Proposal
9 passed, there is no way of knowing how that would affect the
dorm population.
Dean of Students and Founda-
tion President Anna M. Farwell.

Dean of Students and Founda-
tion President Anna M. Farwell.
Letters to The Editor

Dear Editor,

Now that the campaign for A.S. President has ended, the question on the minds of everyone is what is to come after all this activity. We have already been informed that there will be an AS activities Committee meeting for this quarter. In my opinion, the AS Activities Committee was the most inefficient committee I have ever seen. The committee met in a study room at the Student Union Building with only twelve members present. The meeting was only attended by the President, Vice President, and Secretary. The meeting lasted for an hour and a half and was unproductive. The only thing that was decided was that the committee would meet again next week.

Sincerely yours,

[Signature]

Editorial Repliers

(When questioned about this matter, Howard, the Chair of the Activities Committee, had the following to say.)

The Paso Print is published twice a month during the school year. 1970-71 publication schedule is:

Spring Quarter 1970
April 15, 22, 29
May 6, 13, 20, 27
It is published by the Associated Students of California State College, San Bernardino, in cooperation with the Student Union Building at 5500 State College Parkway, San Bernardino, CA 92407.
The telephone number is 867-1401.

Dear Tim Hamre,

I am outraged at the way that the A.S. Activities Committee has handled the recent events. First, I must tell you that I am not a member of the Committee, but I have been involved in its affairs. The Committee was informed of the event unilaterally. I was not present when the decision was made. I was not consulted before the decision was made. I was not a part of the decision-making process. I was not aware of the decision until it was announced.

Sincerely yours,

[Signature]
Dorm Board Rates To Go Up 18 Percent

continued from page 1

tion Secretary Kenton Monroe explained that an 18 percent increase in dorm board rates was considered necessary when compared to the increases other CSUC campuses are experiencing. Board rates at other CSUC campuses will increase from 12 to 21 percent next year.

In a letter to Farwell, Richard Meyer, Chairman of the Board for PFM, discusses the need for a 12 percent increase. Meyer uses the 12 percent figure because PFM is currently charging the Foundation at the board rate set for 326-350 residents, and this will increase by 12 percent.

If the Foundation Board had adopted the proposed rate for 326-350 residents, then dorm board rates would only be increased by 10.5 percent. (This is due to the fact that they are already paying 0.4 per day than the 326-350 rate.) For instance, 15 meal plan residents are currently paying the Foundation $3.05 per day. The rate that PFM will charge the Foundation next year if there are 326-350 residents is only $3.37, or 10.5 percent increase.

The Foundation Board also accepted several proposed changes in the food service contract. These changes emerged from the Ad Hoc Committee that was established to review the contract after the PFM contract controversy last Fall.

Under the new food service contract, PFM will be required to pay its employees a minimum wage equal to the Federal minimum wage. The College’s pay scale for student assistants. There are, however, no provisions for step increases. Serving hours will remain the same with the exception of weekend brunches. Next year, weekend brunches will be served from 10:15 to 11:30 a.m.

PFM will no longer be providing free meals for the eight Resident Assistants, and will no longer be computing this cost into their board rates. The cost of these meals will still continue to be computed into the room cost, as it is part of the compensation for being an RA.

This practice of double counting the RA’s board costs had been going on for three years before an investigation by The PauPrint discovered it last Fall. After the investigation, the return of about $18,000 from the Foundation to the CSUC Dormitory Revenue Fund.

The change that was instituted at the board rate set for 326-350 rate. (It is a change on a remaining interest.) The recent change of having the grill open at every dinner meal will be continued.

A monthly roast beef night will be added next year which will be similar to the monthly steak night. This provision, however, will be subject to review in the Fall.

Next year, PFM will pay for 25 percent of the utilities (up to $6,000) instead of the 10 percent it is paying this year. They will also pay for the cost of garbage removal.

Placement Center To Add Career Counseling And Testing Service

A.S. Elections continued from page 1

dorsments from clubs and individuals. Hamre told them that there had made any move to collect endorsements, relying on his reputation instead. Hamre found himself on the defensive later in the week as he tried to counter rumors that he would cut off all funding for Black History Week and Cinco de Mayo. These rumors resulted in former members picking up signs from BSU and MEChA, although after Hamre and Fortner spoke to BSU last Friday they decided not to endorse a candidate.

Flyers have appeared on campus for every candidate except Fuentes.

Candidates have also gone in for sponsoring activities.

The Committee to Elect James Lyne sponsored a toga party last Wednesday at the Wooden Nickel. They collected $1.50 each from about 25 people who showed up for the party. Proceeds were raised from selling for the key of beer. However, about $20 in donations were raised by auctioning off the kitchen.

Thursday night saw a Rock & Roll dance in the Student Union sponsored by the Hamre-Flathers-Rodarte ticket. Billed as the alternative activity that A.S.U.C. has not tried to sponsor, the dance attracted 150 students who paid 50 cents each. Ten dollars in prizes were also given out in a Rock and Roll trivia contest. The dance went off without a hitch after expenses, which was more than the campaign had hoped for. (It is not known what the candidates have planned for this week (they're not talking). What they will do this week remains to be seen as we near the elections scheduled for this Wednesday and Thursday.

The Purpose Of BSU

The BSU is an organization on campus which has many, especially commuter students may not be aware of. The BSU stands for the Black Student Union and it strives to unite black students of all academic backgrounds together. An important part of the BSU comes with the ability to share and exchange news ideas. But beyond ideas, there is also a chance to sit down and rap with fellow members about academic and personal problems. By talking things out with other members one not only gets an understanding, which we all sometimes lack.

For those who are interested in activities BSU provides that also. Many projects that the BSU participates in deals with community needs, especially in the black community. The BSU also participates in the many campus oriented activities which occur throughout the year. Cultural events are also recognized by the BSU, during Black History Week an entire program is sponsored. In the future many other cultural events will be pursued; such as the celebration of Martin Luther King Jr.’s birthday, and many other notable days.

Now that we’ve taken the time to familiarize you with the BSU we sincerely hope you’ll be motivated to participate in upcoming events. Without your participation and support, BSU will not able to sponsor future events. And without BSU’s black students on campus will not have any functions to represent the pride we have ourselves. So come on and PARTICIPATE! For the BSU is GOING PLACES! Meetings are held every Friday at 11 a.m. in the Senate Chambers which is located in the Student Union.

Marketing Club Competes At Bakersfield

by Tim Hame

Members of the Marketing Club spent last weekend in Bakersfield participating in the regional round of the American Advertising Federation Student Competition. If they win the regional round, they will go on to additional rounds up national competition.

Results of the competition were not known at press time.

The competition involves test marketing snack food products. The campus which many of you have never heard of Nabisco’s Corn Korks, Corn Diggers, Potato Chipsters, Nach and Flings.

All the competitors are test marketing the same product. Competitors must do marketing research, analyze consumer usage, create an advertising program and present the entire package. The presentation must show the present market status, how competitors decided to approach it, the advertising campaign that will be used, and a budget for the operation.

Members of the Marketing Club include: Brenda Maddox (President), Steve Fries (Vice-President), Sherr Auerbach (Secretary), Mohammed Saleh (Treasurer), Lyle Scorz, Anna Maddox, Jeff Edwards (Musical Coordinator), Maureen Miller (Photographer), Tom Ruvolo (Artist), Chris Millard, Pattie Prieto, Shaver Jepway, Laura Lloyd, Gregg Grant and Robin Bahcor. John Chaney is the Faculty Advisor.

The actual presentation of the project will be done by Brenda Maddox, Steve Fries, Mohammed Saleh, Lyle Scorz and Anna Maddox.

Membership in the Marketing Club is open to interested students.

Festivities Planned

by Tim Hame

Cinco De Mayo festivities are being planned on this campus for Monday, May 5. Festivities will take place in the Commons Patio area. Leading off the entertainment at 11 a.m. will be the Mariachi Cucula which will perform again at 1 p.m. Folklorico Lindo de Mexico will perform at 12 noon and again at 2 p.m.

The traditional breaking of the piñata will take place at 12 noon.
Student Affirmative Action Program Initiated Here

Cal State, San Bernardino has been chosen as one of six campuses in the 19-campus California State University and College system to participate in a program for Student Affirmative Action.

Designed to increase the number of under-represented ethnic groups in higher education, the program is inherent in the CSUC commitment to insure the availability of a quality college education for all students prepared to meet the challenges.

The state Legislature-mandated program is not intended to provide special admission assistance, but rather, is purely informational.

Village Idiot

by Shari Mills

This year’s Serrano Village Track Meet, to be held at San Bernardino Valley College on May 10th, has run into a few problems. Dennis Mendocino, in charge of the track meet told SVC that the new $60,000 track is in meters instead of yards as it was previously set. Now some of the track and field events will have to be converted into meters. Also, we have been asked to have guards at the track meet to help protect the track against damage. Other than these minor problems to work out, the track meet should run smoothly.

In addition to ribbons awarded to the first 5 places in each event, a trophy will be awarded to the male and female with the highest overall points.

The Spring Dinner Dance will be held at the Chili Pepper on May 17th this year. The evening will start out with drinks on the patio at 7:00, dinner starting at 8:00, followed by dancing outside. The first 5 places in each event will be awarded to the male and female with the highest overall points.

The meeting of the spring quarter brought about several important changes for the G.S.U. In addition to the election of a new campus, the name of the organization was changed to Gay and Lesbian Union of CSUSB. The adoption of the new name is an attempt to include all of the gay, lesbian, students, faculty and staff on our campus.

Also discussed were plans to form a speakers’ bureau. From which G.S.U. members would be available to speak to classes and organizations on campus about the myths and stereotypes which surround homosexuality and gay lifestyles. Plans were also made to form a textbook research group. This group would review textbooks being used on our campus which discuss information on homosexuality and gay lifestyles. Where notes have shortcomings or misinformation perpetuating damaging myths and stereotypes, supplementary readings will be suggested to faculty to provide alternative viewpoints.

Students speaking for this quarter will be speaking on the gay community and such topics as Religion, Foster Parenting, Law, and Mental Health.

In an effort to accomplish these tasks, the bi-weekly meeting schedule was expanded to weekly meetings on Wednesday at 12 noon in the lower commons.

Cal State Librarian Authors Bibliography

At least 98 percent of all the science fiction and fantasy books published in English are cited in a bibliography authored by Librarian M.B. Burgess. Favorable reviews are being received for the comprehensive reference work, Science Fiction and Fantasy Literature, which was published this winter by Gale Research Co. of Detroit. The two-volume work, the 16th books published by Burgess in nine years, took six years to compile. In addition to researching the 19,000 science fiction books in his collection, Burgess examined another 9,000 publications. His bibliography thus lists 15,854 English language first editions of books. The first eight published between 1700 and 1774 in the fields of science fiction, fantasy and weird supernatural fiction. Approximately 10,000 of these are also in

Among other interests to students of science fiction is the pictorial history consisting of more than 60 pictures of Burgess' collection. The plates date from about 1850 to modern times.

The main portion of "Science Fiction and Fantasy Literature" Burgess has noted the

Frosh Orientation Seeks Leaders; Apply Now At Freshman Services

Roberta Strathis-Ochoa, head of Freshman Services has launched her annual quest for interested, mature, experienced and personable students to act as counselors and informal advisors for Freshmen during their annual orientation in the fall.

Approximately 200 Freshmen show up for the day long series of activities designed to lessen culture shock in leaving high school and moving into a college. The Freshmen are divided into small groups of ten to fifteen students with an orientation leader and faculty advisor. The activities are designed to break the ice, make friends, answer questions, assure fears and give the Freshman a grounding in college survival information.

The Freshmen are motivated to a more extensive participation in on-campus activities through informal programs. Many intramural and AS participants have come from the ranks of the Freshmen in orientation.

There is a need for orientation leaders with time, energy and a desire to participate. Applications will be accepted until the end of April but are preferred by May.

There will be an interview and it is accepted, a series of short training periods. The reward and payment is a T-shirt and lunch and the feeling that you have helped someone along.

Effects Of Agent Orange Remain Unclear

LOS ANGELES — In the most definitive statement on Agent Orange yet made by a high government official, Veterans Administration chief Max Cleland told Congress that "despite major efforts by many agencies and individuals it remains unclear" whether exposure to the herbicide used in Vietnam can cause "any long term effects on human health."

But Mr. Cleland, a triple amputee veteran of fighting in Vietnam, told a House Veterans Affairs subcommittee, "I want you to know, as one who has a personal stake in this question, that we at the VA, including the 39,000 Vietnam veterans employed by VA, are committed to obtaining and disseminating accurate information as soon as humanly possible. In the meantime, we shall continue to provide every eligible veteran in need of treatment appropriate medical care regardless of causation. We owe them no less."

Mr. Cleland and VA's Chief Medical Director, Dr. Donald L. Custis, testified orally on February 25 and also presented an exhaustive, 99-page report on Agent Orange findings to date.

Mr. Cleland told the committee that most of the available data on the effects of a toxic element of Agent Orange called dioxin or TCDD, comes from experiments on animals, not humans.

He said that while these experiments have shown that harmful and even fatal effects can be produced by concentrated doses over a prolonged period, "the relevance of these animal studies to humans is unclear at the present time."

"The only way to determine their relevance," he added, "is through meticulously designed, long-range epidemiological studies of humans exposed to TCDD in industrial or laboratory accidents or, as in this case, possible exposure in Vietnam."

Noting that human studies on TCDD exposure so far have been very limited in size and do not resolve questions concerning human toxicity, Mr. Cleland said, "Thus far, no human body has shown any evidence for a delayed syndrome of toxicity of any Agent Orange constituent encountered under accidental conditions. In fact, the only long term disease in humans clearly associated with such exposures is the skin condition chloracne. Therefore, there is not now any proof that a definitive 'Agent Orange Syndrome' exists in our Vietnam veterans."

He outlined the results obtained in a recent VA study of the levels of dioxin in the fat of veterans known to have been exposed to Agent Orange compared to a control group of unexposed veterans.

"In this study we showed that small amounts of dioxin could be found in the fat of some but not all the veterans included in the study who were possibly exposed to Agent Orange in Vietnam."

"However, we discovered that dioxin could also be found in the unexposed study participants. This suggested that Vietnam veterans could be exposed to dioxin outside of Vietnam."

"At any rate," Mr. Cleland said, "no correlation could be established in this study between fat levels of dioxin and the occurrence of symptoms of disease."

He outlined for committee members the steps the VA has taken and is taking to provide definitive medical information on the subject. He noted the development of a VA epidemiological study building on a data base obtained from agency examinations of nearly 10,000 veterans since July 1978 and submission of tissue specimens from Vietnam Era veterans treated in VA hospitals to a special unit at the Armed Forces Institute of Pathology.

To date, Mr. Cleland said, 1,233 disability claims involving exposure to Agent Orange have been decided by VA regional offices around the nation. In 21 instances, the disorders claimed to be due to the herbicide were found to be service connected, but in none of them was it necessary to determine whether Agent Orange was a causation factor.

The VA Administrator said the agency will continue to "conscientiously and expeditiously perform those Agent Orange studies which are within its scientific competence and will encourage others to undertake the additional studies which we cannot reasonably perform."

VOTE to re-elect

KATHY FORTNER for A.S. President

This year Kathy has:

1. Developed a Student Representative Outreach Program — to get input from all parts of the student community.

2. Continued to work to ensure jeopardized IRA funding to student projects involving travel (i.e. Chamber Singers trip to Mexico City competition)

3. Expanded Snack Bar hours in the Student Union.

4. Maintained an on-campus attendance record of 18 weekdays per month.

5. Worked to provide quality activities even though she has had to train 3 Activities chairs in the last 7 months.

6. Continued her work to improve the quality of the food in the Commons. Something her opponent hasn’t even done though he pushes this as one of his accomplishments.

The following clubs and individuals know the work Kathy Fortner has done and Urge you to Re-Elect Her as A.S. President.

Career Questions: Answers From the Experts
First new truck of the 80's...

TOUGH 1980 FORD.

Tough Ford Trucks set the pace for the 80's. New aerodynamically designed pickups with exclusive Twin-I-Beam front suspension. Bigger payloads than last year based on comparable vehicle weights. New 4x4's and Broncos—the only American-built 4WD trucks with Twin-Traction Beam independent front suspension. Plus vans with out-front engine design for more move-around room inside.

And the sporty Courier. The tough compact from Ford. New 80 Fords set the pace in gas mileage ratings, too.

The campus career center—Careers via computer—Peer power—Experience speaks through alumni—Help from the government—A new approach to women and careers—Cash-and-carry counseling businesses—Profiles: among the new breed are John C. Crystal, John L. Holland, and Tom Jackson.

How do I get a job?........................... 22
Stalking the market and setting your sights—Making the first contact—Clues for the interview—Accept or decline?—Reject blues—Starting salaries—Profile: a successful job search.
Choosing a career may be the most important decision you'll ever make. About 10,000 days of your lifetime are at stake—that's how much time the average working person spends at his or her job.

And it's no wonder that the decision is often tough; one authority estimates that, theoretically, a college student has 42,000 career options to choose from. The possibilities are exciting—and overwhelming. Throughout your college years, the pressure mounts; your family, friends, and professors expect you to choose your life's work wisely. How can you possibly narrow the alternatives?

If you're like most students, you have many unanswered questions about the career search. Must you choose a single direction? Which courses or degrees are marketable? How valuable are job-market predictions?

For the answers to these and other career questions, Insider went to independent career consultants and authors, psychologists, corporate recruiters, personnel directors, and college career counselors, as well as to students who have found their way through the labyrinth of career decisions. All are authorities on finding and succeeding in a career.

Career planning and counseling became a major professional field about 10 years ago, when college graduates first found themselves outnumbering the professional openings they had always taken for granted. And the trend continues; the federal government predicts that the number of college graduates entering the labor force between 1978 and 1990 will exceed by 3.3 million the openings traditionally filled by degree-holders.

This Insider is intended to help you find your own answers and, in doing so, help you compete successfully during this economic squeeze. It contains a sampling of the latest thinking in career planning—how to decide on and reach career goals, and how to cope with changes in the market. The experts in the following pages suggest methods you can start using now, and continue to rely on throughout your working life.
**Debunking Career Myths**

An important first task in planning your future is to reject a few common myths about careers. Here are some warnings from the experts.

- **The "job market."** "There is no such thing as a job market from the point of view of the individual," says John C. Crystal, professional career counselor and author. "There is an employment market strictly for the benefit of employers, but even it doesn't work very well for them," Crystal says students expect the so-called job market to do something it isn't designed to do, and probably won't do—find or create the right job for them.

- **One life, one career.** The idea that a single career should satisfactorily endure a lifetime has become so accepted that "the choice of a career becomes a self-imposed necessary and fateful process," writes Yale psychologist professor Seymour Sarason in *Work, Aging, and Social Change* (Free Press, New York, N.Y., 1979, $5.95). But because of developing technology and worker dissatisfaction, many people change careers several times.

- **The power of a college degree.** A degree neither guarantees nor limits you to a job in a specific field. "One doesn't have to have a degree in business or accounting to function in a business setting," notes Brad Fagen, professor of higher education at the University of Iowa, and author of a study of career preparation in the liberal arts. Skills such as your ability to analyze information may be far more important than what subject you happened to major in.

- **Planning alone guarantees success.** "The students' greatest mistake," says Joe Miller, counselor at Illinois State, "is that they do not go out and get experience in the area they're interested in."

- **The perfect job.** It won't be your first job after graduation probably won't provide immediate recognition and fulfillment, and it may not even pay very well. John Shingleton, director of placement at Michigan State University, says you should beware of the "expectations gap," and warns that many graduates may have to take stop-gap jobs while awaiting appropriate openings.

---

**Gregory Hayes: His Career Is Careers**

The college environment and the satisfaction of helping students through the maze of career information attracted Gregory Hayes to the career-counseling field.

A 30-year-old New Jersey native, Hayes is executive director of the career-development center at USC. He entered career counseling nine years ago and has been at USC for three years. Before that, he worked in counseling at Howard University and the University of Dayton, where he earned a master's degree in college personnel administration.

At USC, he has implemented a career-planning course for student athletes and a career-counseling program for alumni. Hayes plans to write a book on career aspirations of black college students.

"We don't have enough experts to provide career assistance to blacks," he says. "There's a need for role models."

---

**What Makes an Expert?**

They advise others on job hunting, but just who are college placement and career counselors? Where do they come from, and how do they get into the field?

Most earn a master's degree in counseling or student personnel work, according to Dr. Frank Burtnett, director of professional development programs for the American Personnel and Guidance Association.

No license or certificate is needed before entering the field, but the Association for Counselor Education and Supervision, an APGA affiliate, sets standards for training programs in counseling. Institutions that adhere to ACES's standards require students to complete a counseling internship.

Above all, career counselors should enjoy working with people, says Burtnett. They should also have analytical ability and be able to cope with change.

---

**What Color Is Your Parachute?**

Was among the first career-planning books to sound off against the traditional approach to careers, and it is still cited as an outstanding source in the field. The author offers a humorous but helpful approach to career decisions, including exercises to help identify skills, goals, and interests. By Richard Nelson Bolles (Ten Speed Press, Berkeley, Calif., revised 1980, $6.95).
We've sold 2½ million Pintos in the past ten years. That's more than any other small car in America. So we decided to celebrate with a family reunion. Five families to be exact. And between them, they account for some 36 Pintos. Which is a pretty good sign that Pinto's doing a lot of things right for these folks.

One of the things Pinto does best is provide the kind of mileage a family needs these days. A single 13-gallon fill-up gives Pinto an estimated driving range of over 300 miles. Hard to believe? Just look at these 1980 EPA figures.

For comparison, your mileage and range may differ depending on speed, distance, and weather. Actual highway mileage will probably be lower than estimate. Wagon and California ratings are lower.

Pinto's equally impressive when it comes to standard features. Like steel-belted radial tires. Rack and pinion steering. An electric rear window defroster. Bucket seats. And some 36 other good things.

And Pinto wraps it all up for a very reasonable sticker price. Which you'll discover at your Ford Dealer. Because that's where you can get into the picture by buying or leasing a 1980 Pinto.

*Small cars and wagons under 100" wheelbase.
How do I choose a career?

Start by getting to know yourself.

An Exercise In Career Decision-Making

One career expert estimates that, in theory, a college student has 42,000 career options from which to choose. Each student narrows that to a manageable number and, ultimately, chooses one or perhaps two. But how? Start by identifying certain factors that shape your career decision, says Tom Jackson, author and career consultant.

"There are five variables that most people can't organize in their own minds—skills, interests, satisfaction, practicality, and willingness to do what's necessary to get the job," Jackson says.

He offers some step-by-step tactics to get your career options on paper.

1. List 25 things you like to do, even those you see as insignificant. Pretend you have a month's vacation and $2,000. What would you do?
2. On a separate sheet, list 25 things you can do that produce good results—whitling, playing an instrument. What do you do that earns you compliments?
3. Pick out your top five from each category and make a grid of these horizontally and vertically. Now you have 25 possible intersections. Select 10.
4. On 10 separate sheets, list three or four jobs that could fit each intersection. (For example, if you like to cook and you're good at organizing parties, possible jobs could be caterer, restaurant owner, or chef.) Now you have a list of 30 jobs.
5. Grade each job with either an A (maximum satisfaction), B (moderate), or C (minimum). Then rank each in terms of practicality (getting the job, additional education required).
6. Ask, "Am I willing to do what's necessary to get this job?" If not, cross it out.

This exercise should provide a list of realistic careers to consider pursuing. For more detailed career-planning suggestions, see Jackson's Guerrilla Tactics in the Job Market (Bantam Books, N.Y., 1978, $2.50).

Match Yourself To a Career

The snide remark "I know your type" takes on new meaning in the career search. John L. Holland, a psychologist at Johns Hopkins University, uses six "types" to match personalities to suitable jobs in his career interest test, "The Self-Directed Search" (Consulting Psychologists Press, Palo Alto, Calif., 1974, $2.25 plus postage).

The test instructs you to rank your interests, abilities, and experiences. A composite score reveals your career profile as a combination of three of the following categories.

- **Realistic.** Has mechanical abilities; is described as conforming, persistent, practical. (Examples of appropriate jobs: auto mechanic, aircraft controller, electrician.)
- **Investigative.** Has mathematical and scientific abilities; is analytical, curious, precise. (Biologist, chemist, geologist.)
- **Artistic.** Has artistic abilities and is considered complicated, emotional, original. (Composer, writer, performer.)
- **Social.** Has social skills and talents and is described as friendly, idealistic, responsible. (Teacher, counselor, religious worker.)
- **Enterprising.** Has leadership and speaking abilities; is adventurous, ambitious, impulsive. (Salesperson, executive, buyer.)
- **Conventional.** Has clerical and mathematical abilities, and is careful, obedient, efficient. (Bookkeeper, bank clerk, tax expert.)

---

*David Campbell, author, and Vice-President of Research and Programs at the Center for Creative Leadership, Greensboro, N.C.*

"There is no such thing as a fixed career choice. Where you'll be in the future depends largely on the smaller decisions you make on a daily basis. People shouldn't feel uncomfortable about the fact that they'll change as they get new information."
NEW FAIRMONT FUTURA TURBO

Drive tomorrow today.

Futura, now with the only 4-cylinder engine with optional turbo built in America.

Get set for the 80's. Ford Futura's exciting turbo option, which comes with a floor-mounted automatic transmission, offers reserve power for passing and freeway merging.

There's economy, too.
The Futura equipped with the turbo option delivers good fuel economy in 1980. EPA estimated MPG, 26 estimated highway MPG.*

*Compare this estimate to other cars. Actual mileage may differ depending on speed, weather, and trip length. Actual highway mileage will probably be lower. Turbo option not available in Calif.

Tomorrow's styling, today's prices.
Futura's crisp, personal-size proportions are tailored for the 80's. Yet its sporty distinction is priced far lower than you might expect. All the more reason to see your Ford Dealer to buy or lease a 1980 Futura. And be sure to ask him about the Ford Extended Service Plan.

FORD FAIRMONT FUTURA

FORD DIVISION
Living Up To Whose Expectations?
Did your parents fill your toybox with "scientific" playthings or give you lots of books about doctors?
These and other subtle influences from family, peers, and society as a whole may cause you to overlook some career possibilities, says Ruth Crane, consultant and co-author of Self-Evaluation Career Guide (with Marcine H. Goad, Pilot Books, New York, 1978, $3.50).
"When you're exploring career choices and you come up with a positive or negative reaction, find out why," she advises. Are you basing it on what other people expect? Identify the influence, Crane says, so you can determine whether your reaction represents your own feelings.

Preventing Future Job Shock
Adults returning to school make up a growing percentage of college enrollments. Many are experiencing "career passages"—returning to school in order to change careers or to update knowledge in a developing field.
Statisticians say the average worker has two to three different careers in a lifetime; some experts estimate as many as five. Professional counselors emphasize the key to weathering career changes is skills.
"You can't predict when career changes will be—and they will often happen at a time when you're least prepared," says career consultant and author Richard Nelson Bolles.
He identifies two reasons for career transitions. "First, some changes are brought about by external factors," he says. "A job may vanish due to drastic changes in the whole industry." The second reason is dissatisfaction with a job or a field.
These passages are traumatic, because workers usually see their skills as applicable to a single field.
The one weapon you have against future job shock, says Bolles, is "the ability to identify the common threads that run through your life, whether problem-solving, analytical, artistic, or social abilities. You don't necessarily need to run back to college (to prepare for a career change). Many times you can pick up the course content of a job if you have the required basic skills.
"Many people stay in a career in which they are unhappy because they don't assess their skills," he adds, "and more important, they don't analyze which ones of those they actually enjoy."
The time to begin making that assessment is in college. And as insurance against becoming trapped in an unsatisfying job, Bolles recommends that students think beyond the context of courses and analyze what transferable skills can be gained from them.

Bob Reichblum: Realizing a Dream
Most people struggle with the decision of "what to be when they grow up," and sometimes the dilemma lasts well into the adult years. But a few seem to be born knowing what they want from life. If you have a lifelong dream, don't be afraid to follow it, says Bob Reichblum, whose career decision was easily made.
"By the fifth grade, when all my friends wanted to be doctors and astronauts, I was out there videotaping our baseball games," says 22-year-old Reichblum, a television news producer for station KWY in Philadelphia.
He firmed up career plans early when he became a studio go-fer at age 13. And, while a broadcast journalism major at Syracuse University, he interned at a Pittsburgh station. After graduation, the station gave Reichblum his first full-time job.
"Having a daily deadline is really appealing," he says, "and subject matter is always changing. Besides, it's one of the few businesses where you can jump on your desk and scream at the top of your lungs, and no one blinks an eye."

Chris Fallon: Finding a Niche
Chris Fallon, 23, is among a handful of female college sports information directors. Yet, two years before she accepted the post at St. Francis College in Brooklyn, where she is also assistant athletic director, she "didn't even know the job existed."
As a junior in communications at Manhattan College, Fallon was asked by a club football team to keep statistics and do publicity. That sparked her interest, and she volunteered to work in the sports information office at Manhattan.
Through this job and other part-time work—covering basketball as a newspaper stringer and interning at a harness race track—Fallon found working in sports "lots of fun." Plus, she says, "I picked up the working skills that I couldn't get through classwork."
Where are the jobs?

Keep the market in perspective.

Long Shots
And Sure Bets:
Job Market
Predictions

How heavily should you depend on employment predictions? Professional counselors caution you to keep them in perspective. Like all other components of career planning, taken singly, predictions are just a tool.

“It’s really tough to go on predictions,” says Tom Overton, director of counseling at North Texas State University. “The changing economy has made the market so hard to predict.”

Many professions have ridden the rollercoaster of surplus and shortage over the years. Richard Freeman explores the subject in his book, The Overeducated American. (Academic Press, New York, 1976, $15.00), and offers engineering as the “classic example.”

The obvious factor behind shifts in the field’s popularity is shifts in demand, such as the downward trend in space exploration in recent years.

Freeman, an economics professor at Harvard, says a strong market with high salaries brings increased enrollment in engineering schools. “Then, more or less, four years later, there are too many graduates and that depresses salaries, and in turn discourages students from the field. A few years later there’s a shortage, and the cycle repeats itself,” he says.

The latest study by the Engineering Manpower Commission shows 1977 freshman enrollment at an all-time high of 89,000, up from 50,000 in 1973. The Bureau of Labor Statistics expects a 25 percent growth in engineering occupations between 1976 and 1985, and predicts that the number of applicants will roughly equal the number of expected openings.

Affirmative Action: How Far Have We Come?

Women and minorities have made undeniable gains in the job market over the last 10 years.
"Companies are a great deal better (about hiring practices) than they were 15 years ago, and surveys show most Americans favor affirmative action," says Eleanor Holmes Norton, head of the Equal Employment Opportunity Commission.

Statistics show a substantial gain for blacks and women in prestigious occupations, yet both are still underrepresented in many areas. And, while wages for black women have risen to meet those of white women, the earnings of both are still below men of any race.

“If you measure against the base of where we started, there has been an improvement,” says Norton. “If you look at where it should be, the change is not satisfactory.”

M.B.A.’s: Riding On a Reputation

The attractive glitter of the master’s degree in business administration may be in the tarnishing stages.

Eugene Jennings, a Michigan State University professor, annually surveys corporations known to hire large numbers of M.B.A.'s. He expects the predicted recession to produce a “real glut.”

“We’re seeing signs of the cutoff now,” warns Jennings, adding that “if you get an M.B.A. from a second- or third-tier school, you’re probably more handicapped than if you had just stuck with a bachelor’s.”

Others are cautious about the market but somewhat more optimistic. “This year, the top 10 or 12 schools were overwhelmed with recruiters,” says Pennsylvania’s Wharton School dean Donald Carroll. “Students from other schools are probably finding jobs, but are less avidly sought after and receive much lower salary offers.”

Jim Viehland, of the American Assembly of Collegiate Schools of Business, agrees that there may be a “slight downturn in need due to economic conditions. Some people may call it a glut,” he says. “I think it’s a short-term phenomenon.”

Freelance Your Way Into a Job

Breaking into a tight market area may take diligence, self-discipline, patience, and even a little luck. But while waiting for the big break, graduates in some crowded professions can make needed contacts, gain experience, and earn money by freelancing.

Joelle Delaplace, 24, is a freelance interpreter/translator in Washington, D.C. Since completing her studies at Georgetown University last May, she has worked at several international conferences, earning $200 a day. When translating (written work) or interpreting (oral work) for private businesses, Delaplace earns $10 to $15 an hour.

A certified interpreter/translator, she admits the field is very difficult to break into. “Most employers require several years’ experience,” she says. “Often they think age is synonymous with quality.”

She recommends freelancing as a way for beginners to get experience and sample the field before specializing. “When you freelance, a lot depends on personal reference—who knows that you exist. The more people you contact initially, the more chance you have in the future. In this field, they do keep your name on file.”

Delaplace suggests that prospective freelancers apply in person to the people they will be working for; avoid personnel officers. And she emphasizes that the key to finding freelance jobs is not necessarily luck, but timing and persistence.

Profiles

Bob Rhinehart: The Bottom Line

Bob Rhinehart, 22, is a junior in business administration at the University of Tennessee. He is also a third-year apprentice plumber.

“People are turning to blue-collar trades because of the money,” he explains. He earns $7.10 an hour, plus benefits.

Rhinehart didn’t always yearn to be a plumber. After getting married during his freshman year, he found he was underqualified for “anything except degrading jobs. I skipped around from job to job just surviving,” until his grandfather, a union plumber, persuaded him to learn the trade.

His wife, Carole, is also a business major. “Our families are educated,” says Rhinehart. “If a person’s not educated—I don’t care what kind of money he makes—he won’t have a good outlook on life. Won’t know about literature and the arts. It’s not degrading to be a plumber, but without an education, you’re still a peon.”

Insider 11
INTRODUCING A SPORTS CAR FOR THE 80's. FORD MUSTANG.

Enjoy the exhilaration of sports car performance and handling with the low price and high mileage you need today. Certified by the U.S. Auto Club as a sports car.

USAC put Mustang against a number of popular sports cars in a series of tests, including acceleration, cornering, steering response and braking. The result—Mustang earned certification.

Mustang offers the advantages of a sports car. Yet at the heart of all standard Mustangs is a high mileage 4-cylinder engine.

23 ESTATE MILEAGE
38 ESTATE MILEAGE

For comparison your mpg may differ depending on speed, distance and weather. Actual highway mpg will probably be lower than estimate. City mpg shown.

Design your own Mustang.

The standard Mustang is impressive. With a modified McPherson front suspension, rack & pinion steering and sleek, aerodynamic styling. But it can be much more—a world of options like Michelin TRX radial tires, forged aluminum wheels and the elegant Mustang Ghia with deep pile carpeting and soft velour seats. You can make your Mustang a completely personalized car.

Sports car performance with impressive fuel economy. That's what makes Mustang a sports car for the 80's.

Whether you buy or lease a Mustang, ask your Ford Dealer about the Extended Service Plan.

How do I make the most of college?

Strategies for exploring options and developing skills.

Make Your Skills Work for You

Skills. That one word means a lot to your future. The recurring theme among the experts we surveyed is an emphasis on "skills" and "competences," rather than specific studies.

Your major alone may not make a decisive difference in your future, but the skills you master and the way you communicate them to others can carry you through a lifetime of careers.

"Simply saying you have a philosophy degree may turn a lot of people off," explains consultant and author John Crystal. "If you learn to outline your skills in common English, you'll find your employment prospects are far broader than you think."

Carefully chosen courses mixed with part-time jobs, volunteer activities, or organized programs like internships and co-ops can help you develop the abilities employers seek. In this section, counselors and fellow students offer techniques for building your skills.

THE TOP 10

The National Center for Education Statistics' latest study shows that the following majors are the most popular with undergraduate students across the country.

Marketing Your Major

If you are working toward a liberal arts or sciences degree, career experts suggest you take steps to "practicalize" it. Here are a few ways you can make it more marketable.

Double majors. Enterprising students have started negotiating double majors that cross lines between disciplines. For example, some universities offer combined humanities and business degrees; others allow students to tailor a program for a specific career, such as majoring in both broadcasting and international politics as background for a job as a foreign correspondent.

"The double major is becoming more common," says Brian Barrett, counselor at Fordham University. "but it's marketable only if done right." Barrett suggests you choose your second major for a specific purpose. See your adviser or academic dean for information about your school's policies.

Liberating Liberal Arts

Alma College in Michigan is brightening the prospects for its liberal arts graduates. The college's career-preparation program teaches liberal arts majors to assess their skills and relate them to other fields.

About one-fifth of Alma's students participate each year. Special faculty counseling helps them link their education to a career. Literature professors point out that analytical skills can prove valuable in business, and history students discover that working with documents and "getting to the bottom line" ties into sales jobs.

Participants choose a do-it-yourself major emphasizing marketable skills, which they put to use during a practicum. A public relations emphasis, for example, may include a term of legislative research.

The program gives a broader background than would a "quick technological fix," says Dean of Instruction John Agria. "We are preserving the liberal arts emphasis and helping students package themselves for business."

Minors. The minor subject of study, which had been eliminated or ignored by many schools, is making a strong comeback as a means of enhancing arts and sciences degrees. The University of South Carolina, for instance, has set up formal career-specific minors for humanities majors in which students take 18 hours of core requirements in subjects such as marketing, public relations, or other career-specific subjects. Again, talk to counselors at your school about developing a compatible major/minor relationship.

Electives. A less-formal way to beef up a liberal arts degree and introduce new skills is through elective courses. Frank S. Endicott, former director of Northwestern University's placement center, advises nonbusiness majors who may be interested in business positions to "include some courses in economics, accounting, and computer science." Examine your course catalog thoroughly for potentially valuable electives.

Beyond Careers

It is essential to think about and plan for your future, but keep in mind that college offers more than just career preparation.

One benefit is satisfaction from the experience itself—the learning, and the stimulus of interesting people and ideas, says Howard Bowen, author and professor of economics and education at Claremont Graduate School in Claremont, California.
"College contributes to emotional development and helps people find their personal identity," Bowen says. "It helps them in making lifetime choices, not only in careers but also in the selection of friends, spouses, interests, and lifestyles."

He stresses that going to school encourages tolerance "toward various ethnic and national groups, and toward people holding different opinions."

And on the other side of the balance sheet, he adds, "There are no advantages in being uneducated or poorly educated."

---

**Enough Is Enough—Or Is It?**

Graduation sometimes brings more questions than answers. In addition to puzzling over the job search, you probably will wonder about graduate or professional study. Here are some suggestions that may help you in your decision.

- **Find out whether an advanced degree in your field will be genuinely helpful.** "An M.A. or a Ph.D. is almost a necessity in a field like psychology," says Tom Overton, director of counseling at North Texas State University in Denton. "But in elementary education, especially when you're looking for your first job, it may make you overqualified."

- **Calculate the cost-effectiveness of getting another degree.** Most graduate programs will set you back at least $5,000, and simultaneously deprive you of one to two years' experience and earnings. "Unless you're going into medical school or law school, the straight economic payoff is very limited in graduate school," says sociologist Christopher Jencks, author of *Who Gets Ahead?* (Basic Books, New York, 1979, $17.50). "Most graduate programs won't substantially increase your earning power."

- **Consider the potential value of an advanced degree**

---

**Michael Appleton:**

**Business and Blueprints**

Hot property. That's what many students hope to become when they complete combination-degree programs such as M.B.A./architecture, M.B.A./law, and M.B.A./foreign service, offered at various schools across the country.

Michael Appleton believes he will have an advantage in the future with the M.B.A./master of architecture degrees he recently earned at Washington University in St. Louis. "Companies will be getting two fields of knowledge from one employee," he explains.

His program took three years, one year less than it would take to earn the degrees separately.

Appleton, 27, is considering real-estate development as a career. "As an architect, I could work with a developer and rely on my background in finance," he says. "Likewise, in business I could work well with an architect, since I can read plans."

---

**Richard Banner:**

**Chairman of the Board Games**

Richard Banner, who studied history at Illinois State University, is applying his major with a vengeance. The fate of armies and the future of nations depend on his work.

Banner, through his Game Designers' Workshop, creates and sells board games. Far from the mellow moves of backgammon, these games recreate the grandest and goriest battles in the history of war.

"A board game is a reflection of popular history," says Banner, who co-founded the company while still at Illinois State. Through exhaustive research of actual campaigns, he aims to provide both "a good simulation and a good game."

---

**Ann Flemming:**

**Firsthand Knowledge**

A work-study assignment doesn’t have to be limited to shelving library books.

Ann Flemming, a Florida Memorial College student, was persistent in requesting a change from a clerical work-study assignment to one that's giving her experience in her major—social services.

"Books and the classroom aren't enough to help you decide on a career," she says. "I wanted firsthand knowledge."

As a supervisor at Fellowship House, a psychiatric rehabilitation center, Flemming visits members, helps balance budgets, and assists in the center's recreation programs.

"I love the job," she says. "I know I can help people, and I enjoy that."
in a field other than your undergraduate major. "Students need different perspectives," says Roman Andrus, assistant dean at Brigham Young University's College of Business. "The more varied your experience, the more effectively you'll be able to deal with different kinds of people." And, choosing a different field of study gives you an opportunity to change or focus career directions.

- Investigate combination-degree programs. Some schools allow mixing and matching of graduate studies. "The rationale is that students get two degrees in less time," says Constantine Michaelides, dean of Washington University's School of Architecture. The school participates in a combined M.B.A./master of architecture program. "Ideally, students can develop a career that combines talents in both fields," says Michaelides.

Far From The Maddening Midterms

Students may call it a needed break, but academe calls it "stopping out."

"There are certain jobs you just can't acquire through part-time work," explains Kesselman. "And although many structured programs, such as co-ops and internships, give you a true feel for the working world, many do not. Besides, lots of schools are limited and don't have these programs at all."

She gives two main reasons for taking a working break. First, it helps you test career plans. "Reading, talking about it, and studying it isn't enough," she says. You should get some hands-on exposure.

Stopping out also gives you a chance to decide among several options, free from the pressures of school and with plenty of time to explore.

While stopping out can help you define career goals and let you mature, you should be ready to explain your motives, says Rankin Harris, career counselor at the University of North Carolina at Chapel Hill. "Most employers are pretty accepting of this, but some may interpret your stopping out as a lack of application and sense of direction," he says.

Learning To Cope Through Co-ops

Cooperative education at most schools means alternating quarters of study with a 9-to-5 job. But Antioch College in Ohio has expanded the co-op concept to include hitchhiking, backpacking, and travel.

"It's an experience-based education," says Dan Hotaling, director of Antioch's program. "The objective is to learn about other cultures and values, coping in a complex world, getting along with different kinds of people—other than those in the ivory tower or back at home."

Antioch was the first liberal arts college to adopt a co-op program, which it initiated 60 years ago. Since then, all its students have been required to participate during every year of their undergraduate education. The graduates have an advantage in the job search—the equivalent of two years' employment during school, says Hotaling. "They're more readily accepted in grad school or a profession."

Future Payoffs For Involvement

Participation in campus organizations will tell a future employer that you have flexibility, you can work as part of a team, and you can structure your own time.

"Those are the 'biggies' employers look for in interviewing grads," says Melissa Roth, a corporate recruiter for Vulcan Materials Company. "They look for active involvement."

The number and diversity of your activities will impress an interviewer. "If you had a B average, held a part-time job, and were active in campus groups, that shows you can plan your own schedule and handle more than one thing at a time. It also shows a high energy level," counsels Roth. "An employer doesn't want some­body who's going to slump out at three o'clock."

College to Career covers a broad spectrum of career-related questions. Author John Shingleton, director of placement services at Michigan State University, starts with the purpose of a career and progresses through career development and advancement. He cautions the reader about traps and pitfalls of college, and offers instruction on relating your education to your career aspirations. College to Career, by John Shingleton, McGraw-Hill, 1977, New York, $5.95.
These girls know a thing or two about Ford Pintos, and they love the 1980 Pinto Rallye. They're the girls from the 8-Pinto sorority in Long Beach, California, and each one owns a Pinto. Left to right, they're Karen, Linda, Lisa, Kim, Sue, Bonnie, Marianne and Cathy.

40 STANDARD FEATURES
The 1980 Pinto is packed with standard features. Features like steel-belted radials, bucket seats, tinted glass, and rack and pinion steering. On the Pinto Rallye you also get a Sports Package which includes tachometer, ammeter, and front and rear spoilers.

EXCELLENT MILEAGE

Compare this estimated mpg to other cars. Your mpg may differ depending on speed, distance, and weather. Actual highway mpg will probably be lower than estimate. California and wagon ratings are lower.

WIDE CHOICE OF MODELS
The 1980 Pinto comes in a variety of sedans, hatchbacks and wagons. At prices that will surprise you. There's even an Extended Service Plan available providing longer protection than your car's basic warranty. Consult your Ford Dealer.

Compare Pinto. It may be America's best small car value.
Where do I go for career advice?

People and places are the resources for your search.

What's Available On Campus
Whether it's called a career resource center, planning and placement office, or development center, the purpose is the same—to help students choose, plan for, and pursue a career.

Services vary by campus, but here's an idea of what's available at most career centers:

- Trained counselors to help you clarify career goals
- Testing services with interpretation of results
- Lists of current job openings
- Information on the nature of various occupations

A Time-Saver: Computer Counseling
"Six years ago, computers scared most people to death," recalls one career counselor. But as the machines gained popularity and acceptance through media exposure, they also gained widespread use in career planning offices.

Their basic function is to provide information, sometimes through a printout and sometimes by "talking back" to the student.

"There's nothing yet that can choose a career for you," says Maurice Mayberry, director of the Career Resource Center at the University of Florida. "But I'd estimate you could spend two to three weeks in a library pouring over printed information and get the same information from a computer in one hour." 

A LITTLE HELP FROM YOUR FRIENDS
The student grapevine lies at the root of the University of Virginia's Peer Career Counseling program. The counselors are trained upperclassmen who assist others in identifying interests, skills, and career goals.

At any school there's a grapevine among students—they share career-planning approaches and courses which have been useful to them," says Karen Knierim, assistant director of the career planning office. "We feel we're legitimizing the grapevine by training peer counselors."

Expanding Market For The Handicapped
Counselors no longer advise handicapped students to let their disabilities dictate their career goals.

"When we first started, almost all of the handicapped students majored in social services," says Southern Illinois University counselor...
Valerie Brew. "Now they're going into business, engineering, and computer science."

Brew, who has only partial use of her arms due to polio, helped establish the SIU program after her own frustrating bout with the job market four years ago. Since then, she has placed 39 students in whose fields, and this year she's working with 40 seniors.

She counsels students to approach their disability matter-of-factly during interviews, and advises against including a handicap on resumes. If students prefer to mention it, she suggests expressing it in a positive manner, such as "confined to a wheelchair, but able to drive."

From Those In the Know

Going directly to the source is often the most efficient way to get your questions answered. A number of organizations offer students free information about their professions. A few examples:

Learning the Ropes: Advice for Women

The University of Utah offers a special counseling program that serves not only its women students but also older women re-entering the work force.

"Employment of women is different and needs to be approached in a different way," explains Beth Summerhayes, director of the placement center. "We're trying to help women overcome problems they face when competing for jobs. They're generally less sure of what they want than men are. They sometimes underestimate their ability and take lesser jobs than men."

Summerhayes adds that women often do not understand political hiring and take rejection personally.

"The placement office is in touch with the pulse of the community," she says. "We know where the jobs are for women and keep track of trends in business."

Independent Counseling

Independent counseling agencies provide an alternative to college career planning and placement centers. They give you individualized attention—but they also charge you a fee.

"College placement offices are responsible for so many students they can barely touch the surface of a student's needs," says Don Falkenberg, director of the Western Career Development Center in Pasadena, one of 16 centers in the nationwide Career Development Council Network.

Such groups specialize in self-help and decision counseling. Many college placement officers recommend them for older job seekers and persons wishing to change careers, but they add that campus counseling centers remain the best equipped to advise students.

Participants in independent counseling usually take a battery of tests on vocational and personal interests, then spend a full day at the agency discussing the results. "We don't set up interviews, but we help people know how to present themselves for interviews," says Falkenberg.

The Directory of Approved Counseling Agencies, prepared by the International Association of Counseling Services, lists reputable agencies around the country. It costs $6 and can be obtained from American Personnel and Guidance Association, 5203 Leesburg Pike, Falls Church, Va. 22041.

Freebies and Cheapis From The Government

Even Uncle Sam gets in on the counseling act with publications about career choices and available jobs.

Visit your placement office or library for a look at these:

- The Occupational Outlook Quarterly. Information on occupational developments that occur between editions of the handbook, includes results of Bureau of Labor Statistics studies.

The following publications can be ordered from the Consumer Information Center, Pueblo, Colo. 81009. Include code number when ordering:

- The Job Outlook in Brief (015G; $1.40).
- Matching Personal and Job Characteristics (099G; 90 cents).
- Merchandising Your Job Talents (016G; $1.20).
- Occupations in Demand (544G; free).
- Tomorrow's Jobs (101G; 50 cents).
John C. Crystal: “Know how to look for a job.”

“I have been a very angry man for 30 years,” declares John C. Crystal, founder of the creative life/work planning center that bears his name. What could so irk a man that he would make a career of venting his anger? It was the ineffective advice he received during his first job hunt following a World War II stint in Army intelligence.

Putting it mildly,” he says, “the traditional approach to job hunting is a national disgrace.”

Crystal takes pride in being a maverick, although the popularity of his opinions is growing—especially through college career counselors who have taken his seminar, or used Where Do I Go From Here With My Life (with Richard Bolles, Seabury Press, New York, 1974, $7.95). When it is suggested that his once-radical prescription for planning and positive thinking is becoming the new orthodoxy, he chuckles, and vows, “The day that happens, I’ll have to come up with something else.”

Because Crystal has hacked his way through the business jungle and back—he’s worked for Sears, General Motors, and the National Aeronautics and Space Administration, among others—he feels secure in chiding purely academic counselors. “A lot of people in this field never left the campus, and they call themselves experts,” he notes. “They should go work in industry and get experience.”

He is impatient with theorizing because he sees career planning as a life-and-death concern. “I’ve had people sent to me by their pastors because they were threatening suicide,” he says. “They just couldn’t find jobs.”

John L. Holland: “Let your dreams be your guide.”

Mention “SDS” on campus these days, and a lot of students will think of the Self-Directed Search, not the Students for a Democratic Society.

John L. Holland, professor of social relations and psychology at Johns Hopkins University, created the Self-Directed Search, a checklist process of identifying career interests and skills, after many years of clinical research and revision. Through the SDS and his book, Making Vocational Choices: A Theory of Careers (Prentice-Hall, Englewood Cliffs, N.J., 1973, $8.95), Holland has become an influential figure in career counseling.

For the past 20 years, he has been a researcher, but before that he spent 18 years as an active counselor. It was as a practitioner that he developed career approaches considered unorthodox at the time. “People didn’t get interested until ‘72,” he says. “Now, I look traditional.”

Holland approves of the current trend toward workshops and group sessions, but insists on the need for more individualized research. “We need more on instructional technology—which things help which people,” he says.

He believes your own career aspirations and daydreams are your best guide. “I would hate to see everybody planning all the time,” he says. “For maybe half the population, planning is no big thing.”

Tom Jackson: “Don’t wait by the mailbox.”

Tom Jackson is at a pay phone in Chicago’s O’Hare airport, being interviewed between flights. He’s heading to Los Angeles, where he’ll advise more than a thousand workers being laid off by a major company on how to break into “the hidden job market.”

The career expert and author spends nearly two-thirds of the year crisscrossing the country, holding workshops on college campuses and at corporations. His advice is based on the assumption that “it’s not the most qualified persons who get the best jobs, it’s those who are most skilled in job finding.”

Jackson advocates activism in career planning—being responsible for your work life and choosing your job rather than having your job choose you. He insists that the traditional, passive approach is “totally out of tune with the times. People who take this ‘I hope I can get something’ approach are operating out of a sense of scarcity, taking whatever they can get.”

President of the Career Development Team in New York, he readily admits he’s a risk-taker. “We’re pioneers of the front lines of the work ethic. We tell people there’s not a job scarcity at a time they’re being told there is. We say they should be assertive and positive, when they think they should be modest in an interview. My company takes risks and is willing to try the untried, to make a contribution.”

His personal ventures exemplify the “risk it” philosophy. When Jackson was a Navy test pilot, he set a world record for jumping from a plane—at 37,000 feet; he fell for 20,000 feet before opening his parachute.
THE HIGH MILEAGE 1980 FORD FAIRMONT.

The right mpg, even better than last year.

High mileage ratings can make you glad you bought a Fairmont. The 2.3 liter 4-cyl. engine has remarkable mileage for a five-passenger car, for a driving range of hundreds of miles between fill-ups.

And Fairmont’s 6-cyl. has EST. MPG of 21. No 6-cyl. car with standard 4-speed transmission beats it. Comparison excludes hwy, driving and Calif. models.

The right room, seats five comfortably.

The 1980 Ford Fairmont has been engineered for people, to be trim on the outside yet remarkably spacious on the inside, an ideal combination for the needs of today and tomorrow.

You'll discover on the inside there's ample room for five adults. Check out the trunk and you'll find Fairmont doesn't skimp on luggage space either. There's 17 cubic feet of usable space. In Fairmont wagons, there's 43 cubic feet of space. No other mid-size wagon has a higher cargo rating.

The right price, and more.

Whether you buy or lease, Ford Fairmont is extremely cost efficient.

$4,665 Sticker price for 2-Door shown, excluding title, taxes and destination charges.

And Ford's optional Extended Service Plan provides additional protection. With that kind of mileage, room and price...

You'll be glad you bought a Fairmont.

FORD FAIRMONT

FORD DIVISION
How do I get a job?
A step-by-step approach to getting hired.

The Chase Is On
The process of the career search is clear. You must know who you are and where your aspirations lie, your interests must be tested, your goals established, and your skills developed. All of these lead to the ultimate career activity: the job hunt.

The career experts we consulted offer sound guidance on every part of the process, from recognizing potential employers to handling painful—but inevitable—rejection.

The Complete Job Search Handbook presents 20 essential career-search skills and tells you how to use them to your advantage. The author provides helpful suggestions for developing a prospect list, establishing a personal referral network, marketing yourself, undertaking long-distance job hunting, and overcoming shyness when looking for a job. The Complete Job Search Handbook, by Howard Figler, Holt, Rinehart and Winston, New York, 1979, $5.95.

Picking Your Employer
Identifying the “right” employer is primarily a matter of attitude and awareness. Advisers say the best time to select your targets is while you’re still in school.

• Find out who the employers are, and determine which ones appeal to you by referring to trade magazines, the Yellow Pages, chambers of commerce, and professional associations. Consult your placement office and the state employment service. Ask your librarian for directories in your field, or consult The Guide to American Directories, which lists thousands of directories in almost all employment categories.

• Establish contacts through professors, friends, university alumni, and members of your professional organizations, says Richard Irish, author of Go Hire Yourself An Employer (Anchor Books, Garden City, N.Y., 1978, $3.95).

• Keep a file of contacts and prospective employers; include information such as company size, growth potential, and the head of the department you are interested in. Update the file often, and keep copies of supporting materials (news items, annual reports, etc.) that may be helpful when you are ready to approach the employer.

Who Are You? In One Page or Less
Some new-breed career counselors feel that resumes are a waste of time, and other experts agree that resumes alone will not bring results. Many suggest you call first for an “informational” interview, and leave a resume at the end of your meeting.

Still, “over 95 percent of all employment hires are introduced by a resume,” says John D. Erdlen, executive director of the Employment Management Association, a nonprofit group of employment and personnel managers in industry.

So whether or not you plan to rely heavily on a resume, you should prepare one that emphasizes your skills. Many career counseling centers can provide a model and individual guidance.

“Your resume should be brief and concise, highlighting your experience,” says Dr. Rita M. Brack, director of counseling and placement at Notre Dame College in New Hampshire. When describing past jobs, she suggests “using action verbs such as ‘created,’ ‘organized,’ ‘managed,’ and ‘took responsibility for.’ Avoid stilted, flowery language.”

Most counselors say a resume should be no longer than one page. Brack advises students to omit personal data like height, weight, race, salary desired, and marital status.

A cover letter should accompany your resume, and it should be interesting, with some hint of the candidate’s personality, and speak to items specified as prerequisites for the job,” she adds.

Mention any materials you can provide as evidence of your skills, or send along a small sample if it seems appropriate.

Don’t expect a resume to get you a job; but, along with a follow-up telephone call or a reference from a contact who knows you and the employer, it could generate an interview.

Q. AND A. WORKS BOTH WAYS
Questions you ask during an interview are as important as the answers you give, according to Robert Snelling, chairman of the board and president of Snelling and Snelling Inc. employment services. Use them to demonstrate that you have done your homework and show an interest in your future with the company. A few examples from Snelling:

• What are the duties and responsibilities of the job?
• Will the company provide formal training, or do I get on-the-job training?
• Would further schooling help me advance?
• What's the next step up from this job?
• Where does it lead in the company?

Don't ask about salary, vacations, sick leave, holidays, and hours until you are offered the job.
Torn Between Two Offers

Once you have a job offer, you are faced with deciding whether to accept or decline. If you’re really lucky, you’ll have to choose between two or more employers who want to hire you. There is no easy method.

Examine your own values—that’s the counsel from two placement directors. “Decide what is important to you,” says Kevin Pratt of Gonzaga University in Spokane, Washington. Factors to weigh include responsibilities of the job, opportunities for advancement or community service, geographic location, and the people you’ll work with.

Ask yourself if you’ll feel rewarded by the job, and if it will allow you to do what you do best, instructs Howard Figler of Dickinson College in Pennsylvania. Don’t feel obliged to take the first offer, but consider the possible advantages to accepting a job beneath your qualifications—if you won’t get bored with it.

“Hang in there,” says Figler. “You’ll make contacts, learn skills, and gain knowledge just by being there.”

Out of the Blues

Rejection shock is a common affliction among college graduates seeking jobs. Fran Wallace-Schutzman, career-planning director at Ithaca College in New York, cites the symptoms—anxiety, and loss of energy and interest.

She also offers a cure: Turn rejection into a positive learning experience. Call the person who interviewed you and ask what made him or her decide not to hire you. “It could prevent you from making the same mistakes again and again,” she explains.

Send the interviewer a letter, suggests Wallace-Schutzman; say you enjoyed learning about the company and would be interested in working there in the future. Request that your resume be kept on file.

Larry Crouch, placement consultant at Southern Illinois University, says you should expect rejection. He urges students to seek professional assistance from the placement office to determine why they’ve been turned down for a job. “You could be interviewing for the wrong positions,” Crouch says. “Or you might project a negative self-concept.”

### Profiles

**Monica Sena: Searching Successfully**

Job hunters, beware of tunnel vision, warns recent graduate Monica Sena. Sena, 23, profited from this advice in her own job search.

She earned a B.A. degree in Spanish from Colorado State University and is certified in secondary education. Immediately after college, she taught migrant students in Fort Collins, Colorado.

Although she now works at a Denver insurance agency, she believes that the business skills she is learning there—budgeting time, dealing with the public, and paying attention to the small details of contracts—will help her when she returns to teaching.

“Graduates shouldn’t limit themselves to one field, because they aren’t assured of getting a job in it,” says Sena. “It’s good to back up your major with a skill.”

Ford Fiesta
It received a seven-flag salute.

The car that wowed Europe is winning the hearts of America.

Ford Fiesta. The little front wheel drive car that comes from Germany. Applauded all over Europe by the experts for its engineering, design and overall performance. It was voted the most significant import of the year in 1978 by readers of Car and Driver. And when you understand how beautifully Fiesta performs, you'll understand why it continues to get rave notices.

Front wheel drive.

Through rain, ice, sleet, hail and snow, Fiesta's remarkable front wheel drive traction will help you keep your appointments.

A masterpiece of European engineering.

Fiesta is assembled by Ford in Germany. And its European engineering makes it feel right at home on streets and highways of America. It's quick, nimble and maneuverable. Ford Fiesta is sold and serviced by over 5,000 authorized Ford Dealers across America. There's even an Extended Service Plan available, providing longer protection over your car's basic warranty. So test-drive a Fiesta today. You'll discover why it's won international acclaim.

Fiesta. Wundercar from Germany.

**Foreign Film Festival**

**Therese Desqueyroux**

Therese Desqueyroux, a French film with English subtitles directed by Georges Franju, will be shown in PS 10 at 7 p.m. on Sat., April 26.

This film is the story of a woman’s struggle to find happiness and meaning for her life and the punishment she brings upon herself because of crimes and sins committed.

Therese becomes engaged, married and even has a child, yet she is still not happy. She attempts to poison her husband as a way out, but is caught. To save the family name from tarnish, her husband purges himself at the trial and Therese is acquitted. The husband decides to take Therese’s punishment into his own hands, but it is not enough to release her from the haunting guilt feelings. The personal torment she goes through is a classic portrait of the harsh world man lives in when not touched by divine grace.

There is no admission for the foreign film series, and students, as well as community members are welcome.

**More Than 500 High School Students To Be On Campus**

More than 500 area high school students will participate in a Cal State-hosted choral festival Wednesday, April 23. The day-long event will take place in the Recital Hall of the Creative Arts Building and will involve students from a dozen area high schools. Performances will be adjudicated by Dr. William Hall, director of the the William Hall Chorale, a highly acclaimed touring ensemble. Dr. Hall, who is also professor of music at Chapman College, will work with each of the groups providing a musical critique.

**Past, Present And Future Opens Wed.**

The three one-act plays, Aria Da Capo, Ferryboat, and The Last Word! Or What To Say About It! will begin the first studio production on campus. Directed by Corrine Soto, Don Gruber and Dr. Amanda Sue Rudstall, these one-acts each represent one specific era in the past, present and future. They will demonstrate three very independent types of theatre starting with Commedia del arte, Realism and ending with Absurdity.

Performances will begin at 8:15 p.m. on April 23, 24, 25 and 26 with a special matinee on Sunday, April 27 at 2 p.m. in celebration of the 15th Anniversary. All performances will be held in the studio-lab., CA-143.

Tickets for all performances are $3 for general admission and $1.50 for students and senior citizens. Reservations can be made in the Theatre Arts Dept. office located in CA or by calling 887-7452. Seating is limited.

**In The Pub**

**Weds., 9 to 11 p.m.**

**Sports Quiz**

by John Flatowens, Dan Kopulsky Gary Gerets

1. Which 1980 baseball team has two players who have won four batting crowns in the 70's?
   A. Philadelphia
   B. Pittsburgh
   C. California
   D. New York Yankees

2. What month is the Kentucky Derby?
   A. May
   B. June
   C. July
   D. August

3. Did any baseball player hit over 50 home runs in the 70's? If so, who?
   A. Roger Maris
   B. Mike Schmidt
   C. Harmon Killebrew
   D. Joe Rudi

4. Who was the last pitcher to win 30 games?
   A. Sandy Koufax
   B. Nolan Ryan
   C. Jack Northington
   D. Dave McNally

5. Who was the last pitcher to throw a perfect game?
   A. Nolan Ryan
   B. Ken Holtzman
   C. Jim Hunter
   D. Daryl Vanek

6. Who hold the strikeout record for a World Series game?
   A. Gaylord Perry
   B. Whitey Ford
   C. Sandy Koufax
   D. Bob Gibson

7. How many Masters Tournament has Jack Nicklaus won?
   A. Four
   B. Five
   C. Six
   D. Seven

8. Who was the last team to win Hockey's Stanley Cup besides Montreal?
   A. N.Y. Rangers
   B. Philadelphia Flyers
   C. Boston Bruins
   D. Toronto Maple Leafs

9. Which NHL team is second in Stanley Cup wins behind the Montreal Canadiens?
   A. N.Y. Rangers
   B. Toronto Maple Leafs
   C. Detroit Red Wings
   D. Boston Bruins

10. Match the NHL clubs with their nicknames.
    A. St. Louis: Blues
    B. Vancouver: Canucks
    C. Pittsburgh: Penguins
    D. New York: Rangers

11. Who is the 1980 N.H.L. scoring champ?
    A. Guy Lafleur
    B. Marcel Dionne
    C. Pierre Larouche
    D. Bryan Trottier

12. Who is the two hockey conferences?
    A. Potato-Nordiques
    B. L.A. Kings
    C. N.Y. Islanders
    D. Atlanta Flames

**Pro Hockey Playoffs**

by Gary Gerets

The National Hockey League playoffs are well under way, and for people who have been taking less than a passing interest in the game, now is the best time to want to see hockey in action. To know who, and what is going on in the N.H.L., determines its champion will give the viewer some insight into the games and the teams involved.

The Montreal Canadiens are the defending Stanley Cup champions, having won the title the past four seasons. Montreal's key player is Guy Lafleur, who is considered the league's best all-around player, but who is recovering from an injury. He is expected to be back for the finals. Pierre Larouche scored fifty goals for Montreal this year, and he should also be watched.

The Philadelphia Flyers will provide strong opposition for the Canadiens. They are the fastest skating team in the league, and have the most potent offense. Ken Linseman is the fastest man in hockey, and he along with captain Bobby Clarke lead the Flyers' attack.

Three other teams are also in contention this year. The Buffalo Sabres allowed the fewest goals against this year, and Gilbert Perreault provides the bulk of their offense. The New York Islanders have a solid team, and they are led by last years scoring champion, Bryan Trottier. Also, the Boston Bruins have found new life from a rookie defensemen by the name of Rod Langway, who broke many scoring records for a first year defensemen.

There are many people who say away from hockey because of its violent nature. Although some occasional rough stuff may occur in upcoming games, playoff time is the signal to return to passing, shooting, and skating. For the people who were impressed by the hockey played during the recent Olympic games, the National Hockey League playoffs will provide more enjoyable hockey action.

**V-Ball Triples**

by Robin Ballington

The guns of last years defending co-ed volleyball triples champions, The Turkeys, were silenced Monday night in the gym by an impressive "Kaos" team. Glen Alberni and Bresnan O'Malley, teamed with Peg Roffen and Janet Carr, showed excellent all around playing ability in shutting down the determined "Turkeys," led by Chris "old man" Grenfell, Greg "Drick" Price and Kathy Laskey. 15-6, 15-4, 17-15.

The "Turkey Hunters," behind the relentless spiking of Rob Wilson, exhibited great form in taking Paul Pierce's "Problem Children" 15-5, 15-4, 15-11. Jeff Waterseck and Heather Matthews also played well for the "Hunters." In the longest match of the evening, "Dogs and Puppies" rallied to win two of three from "Pillsbury 4-Palms." 14, 10-15, 15-12. Joe Awsomith and Dorothy Vandenberg earned great team effort with Joe Long and Mike Smith in controlling the spiking of Seakerise Taitoes. The blocking of Rob "Doughboy" Bullington and the serving of Dana Duncan and Steve McDonald kept the matches close.

This year in volleyball all the teams are generally equal in playing ability. As far as the men go the teams are equal and it will be the women that will win the coveted volleyball triples championship. After watching Monday nights matches, I was very impressed with the consistency of play of "Kaos" and especially of Janet Carr. My predictions for this year in co-ed triples are as follows:

**Baseball 1980**

by Dan Kopulsky

The 1980 Major League Baseball season, barring a strike, could be as exciting as last season. All four divisions have no dominating teams and all races should be tight.

Two major factors basically determine pennant contenders: (1) lack of injuries and (2) pitching. Injuries to key players, especially pitchers, can take a good team out of a pennant race, but injuries cannot be predicted. What can help predict how high a team will finish is pitching. Pitching is considered to be 75 to 90 percent of a team's strength. Using this criteria, we will look at the American League and next week, the National League. The American League East has two teams with very strong pitching, while other teams have just good pitching. Only the Toronto Blue Jays and Cleveland Indians figure not to be in the race. Of the five teams that will be in the pennant fight, the New York Yankees and Baltimore Orioles should come out on top, using pitching and defense.

The other five teams that will be in the pennant fight, the New York Yankees and Baltimore Orioles should come out on top, using pitching and defense. Of the five teams that will be in the pennant fight, the New York Yankees and Baltimore Orioles should come out on top, using pitching and defense. Of the five teams that will be in the pennant fight, the New York Yankees and Baltimore Orioles should come out on top, using pitching and defense.

The White Sox, who are plentiful in good young left-handed starters, should finish right behind the top three. The Twins are the only other team in this division capable of finishing with a winning record. The Seattle Mariners and Oakland's A's both have very poor pitching and should fight to stay out of the cellar. The A's will be helped by Billy Martin as manager, but they need more than him to become more than a joke.

Detroit and Chicago will be the most surprising teams throughout the year, but they will not be on top in the East. The Chicago White Sox, Californias Angels, Kansas City Royals and Minnesota Twins have close to adequate pitching. The White Sox have the best pitching of this quartet, but the Royals and Angels are much stronger overall than the Sox. The Angels and Royals will be close behind. Texas because of their hitting, but both teams pitching is questionable. The Angels are hoping for comebacks from Frank Tanana, Chris Kramp and Dave LaRoche, while the Royals hope that their starting staff of Dennis Leonard, Paul Splittorff, Larry Hoyt and Rich Gale can recover from their disappointment in 1979.

Shandin Wins Ladie's Slowpitch Opener

by John Flathers

Shandin Crazyhouse scored a 30-4 drubbing of the Powerhitters last Wednesday in the first ever intramural ladie's slowpitch game. This is the first year a ladie's slowpitch league has been organized. Three teams signed up, one under the minimum of four, but Joe Long, (Intramural's coordinator), decided to let the three teams play because this was the event's first year. Both teams enjoyed the afternoon immensely and many individuals were heard to say that they were glad they decided to play.

Shandin won the toss of the coin and elected to bat first. Shandin team captain and lead-off hitter Rhonda Booth walked to the plate like a close offensive battle was in store. The teams remained tied 3 all. The Powerhitters scored three runs in the first and added one more run to make it 3-0.

The Powerhitters had some very bright moments, however, at times they played brilliant defense stopping most grounders and Dawna Gregory is as good as any in the outfield. Also, Corrine Gorman played great defense at first base as she does not make errors. With practice they can be much better than was evident. They also have some hot bats, including Karen Green, but were unable to get hits when they needed them most — with women on base.

Shandin's defense, although shaky at first, showed great promise in later innings and should improve as the season progresses. Evelyn Garcia and Terry (Scop) Calloway, who was also a terror on the basepaths, form the cornerstone of that defense. Said coach Kirt Melvin: "With our rippin' of fense and an improved defense, we will be tough."

Kirt's boast will be tested next week by Sonia Jackson's team who look as good or better than Shandin. In any case, it should be a close contest. So come on down to the diamonds and watch. If you think 10-Person Softball is exciting, you haven't seen anything yet. And if any of you ladies want to play, you still can. Just call Joe Long in the Intramurals office. Get involved!

Soccer Finals

by Solomon Salvador

The Red Brigade and Montezuma played each other with great intensity and rivalry. The teams met twice during the regular season with the Red Brigade coming out on top both times. However, the Montezuma team was not to be denied the sweet taste of victory. They won the championship game, 3-2.

Led by Solomon Salvador, the Montezuma team rallied from behind to snatch the game away. Both teams were goalless in the first half because of some spectacular saves by Anthony Duncan and Steve Lee, coupled with brilliant defensive play by Pegi Rofers and Danielle Bachtelle. Both teams executed many good fast breaks but were unable to cash them in for goals.

Within five minutes of the start of the second half, the Red Brigade opened the scoring with Amad Hosen's goal. Again, a spectacular play by Hosen, dribbling past two defenders, made the score two goals to zip. This caused the Montezuma team to put out their best. With ten minutes to play, Jim Hitt exhibited some clever dribbling and passing to score Montezuma's first goal. Then, with six minutes to go, Mark Mosher scored his first goal to even the game.

A clever pass by Solomon Salvador to Hillary Clarke in the dying moments of the game resulted in the final and deciding goal. The results of the game were protested by the Red Brigade but the protest was disallowed and Montezuma clinched their amazing comeback championship.

Green Wins Award!

Karen Green is this week's Intramural participant of the week! If it wasn't for Karen's recruiting of a third ladie's slow pitch team, this new intramural event would never have gotten off the ground. They were allowed to play with three try blanks, may be secured from the Running Center in Rialto, which is cooperating in the sponsorship of the event. The Running Center will computerize the results.

Awards will be presented to the first-place finishers in each of the 16 divisions. Additional certificates will be offered.

The pre-registration fees are $5 which includes a T-shirt for the participant or $2 without a shirt. Late registrations will be accepted at the site for $6 with a T-shirt provided and $3 without. Pre-registrations must be received at the Running Center by April 22.

The public is invited to spend the entire day partaking in a sample of activities, programs, concerts, plays, recreation available on campus, added Dr. Price. The campus' tennis and racquetball courts and the swimming pool will be open to the public, without charge, from 12 noon to 9 p.m. that day.

The ideal time to find work at Western:

Western has many types of good-paying temporary clerical, marketing and light industrial assignments available. Look us up in the white pages.

Rare Buddhist Shrine Given To Los Angeles County Museum Of Art By James Coburn

Spectacular painted wall and ceiling panels from an 18th-century Ceylonese shrine have been given to the Los Angeles County Museum of Art by actor James H. Coburn, Ill. and his wife, Beverly. The panels, installed in an eight-foot-high reconstruction of a Buddhist temple, represent, according to Museum Senior Curator of Indian and Islamic Art Dr. Pratapaditya Pal, the only example of Buddhist architecture to be seen in an American museum, and the only Sri Lankan painted temple panels to be found outside that country.

The wooden shrine was of central importance in the monthly ceremony held in a Sri Lankan monastery. To celebrate the full moon, the monks would weave a white cord into sections and tie the pieces around their wrists for good fortune and protection from evil spirits. The temple is on view through mid-May in the Atrium of the Museum’s Ahmanson Gallery. Following a complete cleaning by the Museum’s Conservation Department, the shrine will be permanently installed when the planned extension to the Ahmanson Gallery is completed.

Admission to the Los Angeles County Museum of Art is $1 for adults and 50 cents for senior citizens and students with I.D. and young people 5 to 17. Museum members and children under 5 are admitted free. Museum admission is free to all visitors on the second Tuesday of every month; hours on these free days only are twelve noon to nine p.m. Regular hours are Tuesday through Sunday, 10 a.m. to 6 p.m. The Museum is located at 5905 Wilshire Boulevard, two blocks east of Fairfax Avenue.
CLASSIFIED

The following jobs are available at the time The PawPrint goes to press and are off campus unless otherwise indicated. For more information, please contact the Career Planning and Placement Center, SS-116.

BILINGUAL TYPIST: Permanent part-time position in a lawyer’s office. Must be able to type 20 wpm. Bilingual Spanish and English is required. The position pays $50.00 per hour and is available in Fontana. No. 343.
