Mudslide Brings Out

Cal State Volunteers

Students And Staff Aid Flood Victims

by Mike Smith

On Sunday, February 10, a group of 20 Cal State students and administrators volunteered to help clear away the mud and debris from the flood ravaged Hampshire Avenue neighborhood.

The Harrison Canyon flood basin filled with mud and spilled over into the residential area on January 9, 14, and 28 causing damage to 33 homes.

The crew was organized by Serrano Village Council President John Flathers and Assistant Housing Director Wayne Hutchins. The majority of those volunteering were Serrano Village Residents.

The first workers checked in at the Volunteer Headquarters at Wildwood Park at 8:30 a.m. The clean up supervisors kept all those from Cal State together on the same projects. The first task assigned to the group was the clearing of air conditioning units buried beneath the mud. During this operation, Cal State senior John Conboy, made a few of his coworkers nervous when he cut through a 220 volt line. Luckily no one was injured.

Following the air conditioning units, sandbag detail. Both sides of Hampshire are lined with thousands of these bags, to say nothing of the ones closer in to the homes. Although Cal State does not offer any courses in sandbag filling, the students and staff managed to add several hundred more to the collection.

More of the afternoon saw the college crew removing mud from an inundated backyard on Hampshire Ave. Mud was shoveled in wheelbarrows which were coaxed up a hill and then dumped. A skip loader picked up the accumulated muck until it broke down late in the afternoon. Associate Dean of Students Doyle Stansel proved to be quite adept at handling his wheelbarrow. More than a foot of mud was cleared from the yard.

College President John M. Pfau visited the weary workers as they were putting the finishing touches on their landscaping work. President Pfau was informed of the work the volunteers had performed and was quite impressed. Wayne Hutchins announced to the group at the end of the day that President Pfau had contributed $100 from the President’s Club Fund to the Serrano Village Council for the efforts at disaster control in the Harrison Canyon area.

The President’s Club Fund was established by private citizens in the area to show their support for the college. Contributions are made on an annual basis and the fund is designed to allow the President of the College discretion in disbursement to promote the overall welfare of the campus community.

Some of the volunteers expressed dismay at the fact that not all those who signed up to work showed up. But according to the city workers in charge of volunteers, if Cal State had more people, they would have probably just gotten in the way. Co-sponsor John Flathers agreed.

"Take a look around. You don’t see anybody sitting down and watching by just what we've lacked in numbers we've made up with in effort. Everyone here today has put in a lot of work."

Many from the Cal State crew had already done work in the stricken neighborhood and had seen it when it was much worse. But for those who were seeing the site for the first time, it made quite an impression. The barren landscape and sandbag walls reminded many of scenes from war movies. It also reinforced their commitment to help. "If more people saw what we have seen today, they'd have to turn volunteers away", one Cal State co-ed was heard to say.

Volunteers were shuttled back to the headquarters at Wildwood around 4:30 p.m. and turned in their shovels. Coupons for a free hamburger and fries from McDonalds were given to all those who had worked during the day.

Tentative plans are being made for another group from Cal State to be formed to work on the inside of the homes. Interested persons should watch The PawPrint for further information.

Editor’s Note: Over the weekend, as The PawPrint goes to press, heavy rainfall has caused additional flooding which resulted in evacuation of the Hampshire Avenue and Sonora Avenue neighborhood.
The Students
Meg Greene is a freshman and a member of the Village Council. She voted for the helping-hand program because she felt it was a good idea for the school to get involved, and she knew the people really need help. Meg commented, "I just don't understand how they could build houses with the possibility of having floods like this."

Chris Barr is a sophomore at Cal State. He simply stated, "I came because people need help."

Jay Norvell works full-time for Cal Trans and she knew the people really need help.

"I just don't understand found stuff of value, we put it on the back ed help." •

simply stated, "I came because people need­

folks are going to say, 'What's

thursday," Russ ex­

"When 1 call home tonight, 1 know my

Philip is planning to encourage more peo­

Philip felt a
duty to come out and help. He explained, "When my father was stationed in Mississip­pi, there was a hurricane. Everyone got together to help, even the people from the outside area, so I felt that I should help here."

Philip is a freshman at Cal State, majoring in Bio-chemical Engineering.

Philip had hoped for a larger turnout from the college. He noted, "I think it's pretty sad that we have only 17 people from all of the dorms. We had a Casino night last night, so I guess with that and mid-terms, people just didn't make it."

Philip is planning to encourage more people to come out in a couple of weeks to help clean the interior of the houses.

John Conboy, also of the original three, plans to help clean out the houses when the students come back again. He stated, "We might as well be out here; otherwise, we would just be sitting around the dorms watch­ing television. If my house were here, I would want somebody to help me. At the college even though we aren't close to the community, we are still a part of it. If they (the community) need help, we should res­pond."

John is a senior, majoring in Economics.

The Original Three

The Original Three, Russ Castle. Philip Tardy, and John Conboy, were the only students there at 8:15.

Russ Castle is a freshman at Cal State from the San Francisco area. Why did he come to CSCSB? "Because it was away from home, and they accepted me!"

Russ took me around and showed me the various areas where the group had worked that morning. "We had to dig trenches around several air-conditioning units so that other workers couldn't lose them all down to­day. We threw away all of the debris that wasn't really worth anything. When we found stuff of value, we put it on the back patios. We filled lots of sandbags."

"When I call home tonight, I know my folks are going to say, 'What's sand-bagging?' I guess I've learned a new trade," Russ said. Russ tried to take me into a back yard to see the swimming pool, but I couldn't climb over the sandbags. Russ ex­plained "The pool has about two inches of water in it, and the rest is all mud."

Phil Tardy was one of the Original Three who arrived in the area at 8:15. Philip felt a

as a biologist and will start working on his masters degree at CSCSB in the spring. He graduated from UC Davis. Jay came out to help because he agreed with what the students were trying to do. He said, "Heaven knows that these people have been through a lot here, and this is kind of a nice way for students to do something altruistic and ser­vice oriented."

"I am happy to see that the whole dorm complex is doing something, not just a specific group. "Jay has an empathy for the victims because he used to live in Yuba City and can remember the people talking about the flood of 1955. "The people always talk­ed about the hardships they went through, and I guess it is the same thing here."

Jay Norvell works full-time for Cal Trans.

Interviews by Marilyn Heavlin

The Administrative Organizer

CSCSB's Assistant Director of Housing. Wayne Hutchins, co-organizer of Sunday's program of community help stated. "I think this is a good opportunity for the college to make a contribution. These are a lot of peo­ple in the community. "I know they are aware of the housing operation at Cal State. It is good to be able to make an impact on the community."

Hutchins noted that the Semano Village Council has appropriated $25 to purchase a community service award plaque for 1980 which will stay with the residence hall that wins it. Hutchins is keeping a log of the names of students from each residence hall who have helped out in the mudslide area. It is Hutchins' hope that the council will be able to continue with the service award program each year.

Apparently the mudslide victims were not the only ones who were reaping benefits from Sunday's program. Hutchins noted, "The number of students today isn't that great, but the quality is. I stressed the fact that we stay together because this way we are getting to know one another. We have had a great time, it has been a lot of hard work, but we are making some good friend ships."

The disaster area made an impact on Hutchins. "The situation out here is over­whelming. I have never seen anything like this. It is kind of like a blizzard of snow only, it's mud, and it doesn't melt away."

The Dean

Dean Stansel joined the workers early in the afternoon. He noted, "We have a lot of hard-working people here. Most of them have been working here since 9 a.m. That speaks very well of them. I think there are going to be a lot of tired muscles and blisters tomorrow."

Dean Stansel had been in the area earlier to help some friends. "When I came down after the second storm and saw how bad it was, I couldn't believe it. To be standing on top of the mud and looking down at the peo­ple in the street just blew my mind. The photographs in the paper only give you part of the picture."
Photos by Pat Heston

The Student Organizer

John Flathers, a senior majoring in Administration is the chairperson of the Serrano Village Council. He and Wayne Hutchins were the organizers of Sunday's helping-hand program. John has helped out victims of disasters before. He is from the Twenty-Nine Palms area where flash floods are a common occurrence. John stated, "I feel really good about doing this. They (the city) needed volunteers, and since we have a ready source of manpower, we thought it would be a good idea to help out."

Wayne Hutchins fills in President Pfau on the clean up operation as workers continue to fill sandbags.

The President

President Pfau came into the area to cheer the students on. He stated, "I think it is just marvelous that the kids would come down like this. The people who live in this area are in desperate shape. They are very dependent on people to help them. I think it is just great that our students are willing to volunteer to help. I want to give them whatever encouragement that I can."

Dr. Pfau lives just a few blocks north of the disaster area. He noted, "My house is not in immediate danger. A couple of my neighbors are having problems though."

"Dr. Ross Ballard, the CSCSB Health Center physician, lives just two houses to the north of me. The ground is eroding away, and his driveway is just hanging out half way in mid-air."

Dr. Pfau felt that the city and the county were trying to deal with the problem adequately. He said, "Down here where there is mud right inside the houses, the city must take precedence. I don't know that the authorities have had much chance to think about what they are doing to do up in the canyon."

"They're going to have to do something up there or otherwise they will just be getting more of these mud washes down here. The farther up the canyon you go, the more you realize the basic source of the problem."

The Residents

Carol Moore is a graduate student at CSCSB. She and her husband, Major Frank Moore, live on Hampshire Road. Fortunately they did not receive too much damage to their home. However, they have moved out of their home and are living in a motel. A Disaster Relief Committee of five people was formed right after the damage that occurred on January 14. The committee needed a spokesman, and Frank Moore volunteered to be the spokesman.

The committee's activity has been to keep pressure initially on the city and now on the county to rectify the situation on Hampshire Road, help the residents clean up, and to solve the problem up in the watershed which is where the problem originates.

Moore feels that they have been very successful in the city as evidenced by all of the volunteers. The continuing emphasis that the city placed on getting the neighborhood cleaned up, getting people back in their homes, and just restoring the area to its original condition.

However, Moore feels that work on the watershed area is quite a different story. He states, "Since the 9th when the overflow occurred, there has not been a single spade of dirt turned up there. It is a relatively small, but very steep watershed. It's a little over half a square mile, but it is mountainous."

"Back in the period of the forest fires, we could hardly pick up a newspaper without being told by someone that heavy rains, unusual runoff, and flooding would bring a reasonable expectation of something like this. But even with that being the case, nothing was done up there as a preventative basis to preclude or even reduce the effects we are seeing down here now."

The California Conservation Corps has suggested that blockages of pierced steel planking be erected in the watershed area. Others have suggested using helicopters to go up and place old car bodies in the area. Moore states, "That would be a very inexpensive approach to the problem. The county could probably buy 200 cars for $10,000 and helicopter them in. It is very steep terrain, and you need to think about how you could get equipment in there.

Moore was pleased that the Cal State students would come out to help the flood victims. "Tell the Cal State kids, 'Thanks very much,'" Cal State, the Boy Scouts, Norton Air Force Base — we couldn't have made it without them. We certainly hope that our continued pressure on the county and the Flood Control officials is going to be successful so that all of their hard work is not for naught."
A Community Effort

I've spent almost my entire life in the city of San Bernardino, the past seventeen within four miles of the CSCSB campus. During those years, I heard little or nothing of Cal State.

Even while I was a senior in high school, I was surprised every time I found out one of my classmates was planning on attending classes out here at "Tumbleweed Tech". How then did I decide to go to a school to go to. I was going to go to Valley College until I saw an ad in the Sun Telegram about CSCSB and decided I may as well go to a four year college since it was so close.

Three years have passed by and by no means am I sorry I ended up here. I live the proximity to the hills, the natural surroundings and the small classes. Besides, where else could someone with a C in Freshman Composition get a job as News Editor on the school newspaper?

The purpose of this editorial is not to reflect upon my educational highlights. No, I would like to give credit to a small group of people from Cal State who helped make the city of San Bernardino take notice of this institution of Higher Education nestled on the fringes of Mason Bob's Kingdom.

The local community has been aware of the talents of the Cal State Art Community through theatre music and art presentations over the years, but they have had little contact with the rest of the school. Well, they got a good look when both students and administrators joined together and did a great service to both the campus and the residents of the flood ravaged neighborhood of north San Bernardino when they volunteered their efforts to help clean up the affected areas. By doing so, they showed the folks of San Bernardino that Cal State IS part of the local community and not an independent body floating on the outskirts.

I would like to extend my thanks in print to Wayne Hutchins and John Flathers for organizing the clean-up crew; to Dean Scanlon for showing us that administrators sweat and strain with the rest of us; to President Pfau for taking time out to visit the workers and for donating $100 to the Serrano Village Council on behalf of the efforts of the students; and especially to all those who woke up Monday morning with sore muscles and blisters on their hands. Thanks.

-- Mike Smith

Part of a sandbag wall extending down both sides of Hampshire Avenue to funnel future mudslides down the street and not into the homes.

It was a sore and tired group from Cal State at the end of the day, but as one of them said, "If they need us, we'll be back."

A Writer's Personal Narrative

Last Sunday afternoon, I donned my grubbies and set out to visit the makeshift area to interview the college students who were working there. My husband and I drove to Wildwood Park where we had to check in at the Disaster Area Command Post.

We were being checked in and getting our identification cards, one of the workers at the command post called in to the disaster area on her radio to find out where the Cal State students were working.

Once we were all registered, we boarded a city bus that was being used to shuttle people in and from the area.

We were dropped off about a block east of the area. As we walked toward Hampshire, we saw a mountain of dirt blocking the intersection.

We had to skirt around the dirt and climb over several piles of sandbags to get down to the street level. Our entire visit was inundated with the roar of skip loaders and earthmovers.

It sounded like an old war movie you might see on television, and the area looked like a war zone.

Each side of the street was lined with two or three rows of sandbags piled three or four feet high. The houses looked abandoned. Most of the windows were boarded up, or all of the doors were reinforced with a pile of sandbags.

All of the landscaping was covered with mud except for a forlorn looking bush here and there.

I know six families who live on Hampshire and have visited them many times over the past thirteen years. But now I had trouble trying to recognize their houses. All of the familiar landmarks were gone.

How could something like this happen in such a seemingly quiet, stable neighborhood? It has not only happened once — this street has been flooded three times within a four week period.

I occasionally stop to listen to a radio newscast because it is raining, and it has been predicted that Hampshire Road will flood again tonight.

Could something have been done to prevent the property loss to the residents which is now estimated to have gone over the three million dollar mark, the inconvenience of having to live with friends or in motels for an indefinite period, and the serious trauma that has been inflicted on these people?

Most of the residents seem to feel that the city has been very cooperative in helping them get relocated, clean up their property, and apply for federally funded loans. But all of that help is after the fact.

Could something have been done to prevent this whole scene of devastation that we witnessed on Sunday? Certainly the preventative measures that the city and the county are suggesting now should have been implemented as soon as possible after the fires devastated that area.

But more than that, that area should never have been approved for residential housing when the city government knew that it had been designed to be a flood control area.

I hope the city has learned its lesson well so that others will not have to suffer as the residents of Hampshire Road have had to suffer. One trip through a mudslide area was enough for me.

-- Marilyn Hearvill

Volunteers Wanted

If you wish to join your fellow members of the CSCSB community in aiding San Bernardino flood victims contact John Flathers or Tim Hamre, or call The PawPrint at 887-7497. You will be contacted when another relief expedition is planned.
Dorm Residents Defend Rights

Dormitory residents are more actively demanding the same rights afforded other tenants.

A U. of Michigan sophomore is suing both the university and a roofing company because he claims repairs to the roof of his dormitory caused noxious fumes to enter his room and disturbed his sleep. A Hutchinson student has threatened to sue after an assistant director of maintenance confided a set of master picklocks and handcuff keys from his dorm room to a coed extermination. The student says he is a professional escape artist and used the keys for his act. The maintenance staff member claims he thought the keys were burglary tools. The keys have been returned, accompanied by a letter of apology, but the student says he will sue if no general assurance that the university will not remove other articles from dorm rooms without prior notification.

The California State Board of Regents recently got involved in the issue of dorm room rights by clarifying dormitory privacy regulations. The student's involvement got down to such details as emphasizing that if one resident consents to a room search, the search may not extend to the belongings of his roommate.

Over 200 residents of a Ferris, Mich. State College dormitory signed a petition protesting the college plan to paint their rooms.

The students said the painting would disturb study habits, create a health hazard and possibly lead to larceny and damage of private property. The university proceeded with its plans, however.

"Satisfaction is the most perfect expression of scorn." — George Bernard Shaw

Marijuana Petition Circulates

An initiative being circulated in the Pub and Student Union is designed to place the matter before the people in the next election.

California Initiative Statutory Amendment. Provides that adults possessing, transporting or cultivating marijuana for personal use will not be punished criminally. The state commission established to study potential agricultural, economic and tax benefits of regulating marijuana market. Measure does not affect existing laws against using or selling marijuana. A number of amendments regarding the award may be sent to the same address.
Workshop To Help Educators Cope With Stress

"Educators need to learn how to deal with stress or overload so that they can maintain their personal and professional growth".

The workshop is designed to provide participants with interactive behaviors to control stress.

The class should be of special interest to special education teachers, classroom teachers, learning resources specialists, administrators, aides, and parents.

Selected topics: Dr. Nummela will cover: the lifestyle inventory and how to identify stressors; how to design a stress reduction program that can be implemented within schools; and how to take time out for you.

Solo/Ensemble Festival

California School Band and Orchestra Association and Cal State Coordinators for the program are Keating Johnson, band director at the college, and Robert Sperry, band director at Capon High.

CFA Demands Relief For Department Chairs

The Congress of Faculty Associations (CFA) has filed two actions with the Public Employee Relations Board against the CSUC Trustees in behalf of Department Chairs.

The first of these is a demand for injunctive relief which would force the Trustees to discontinue their assessment of Department Chairs because they participate in the affairs of employee organizations.

The second action is the filing of an Unfair Practices Charge against the Trustees because CSUC Presidents have threatened retaliation against Department Chairs who participate in organizational activities.

The employer's flagrant violation of the rights of Departmental Chairpersons is readily apparent upon suspension of Government Code Section 3580.3, which provides that Departmental Chairpersons shall not be deemed supervisors employed simply because they perform the duties of chairpersons.

CFA President Bill Crist underscored when CFA's motions were filed with PERB in Los Angeles.

150 students from 11 area schools will participate in a solo and ensemble festival scheduled for Friday, Feb. 22 at Cal State, San Bernardino.

The event is sponsored by the Southern California Band and Orchestra Association and Cal State Coordinators for the program are Keating Johnson, band director at the college, and Robert Sperry, band director at Capon High.

Why? Why don't we talk today?

I pass you in the hall

And we exchange smiles

Just quick glances

Perhaps; or less.

Not a spoken word.

Why can't you tell me what you feel?

Why can't I see you when I want?

Why?

Just block it out of my mind.

I think of you too

While hate does not endure

It can also be filled with hate.

My thoughts of you will remain kind.

Written by my heart's endeavor.

For your place is secure

And the sound of your voice

You will forever own my heart.

Or something I forgot

But wherever you go

I must give out a call

Perhaps your school is interested in participating in a true time —

As tenor, bass and virginal. The sound projected is in a concrete way.

I pass you in the hall

Artz we exchange smiles

Even while it can love

For I refuse to see

At The Los Angeles County Museum of Art

February 15, 1980

Ceramics from the permanent collection. The exhibition of over 250 ceramic objects selected from Museum's permanent collection will be on view in the Buschmann Gallery in the Curators' Council Room through April 6. The exhibition includes pottery and carved stone which were former for some of the titles of this difficult medium; examples of the work of Gertrude Kasebier and Otto Natzler, the renowned husband and wife team of ceramists who operated the post World War II home ceramic renaissance. Permanent exhibition. Curator: Mrs. Fritz W. Sani.

Schools are invited to attend docent tours from the John Wise Collection. Twenty-three unusually preserved Peruvian textiles, porcelain figures, and ceramics from the Museum's John Wise collection are on view in the special display gallery on the Plaza Level of the Museum's Ahmanson Gallery.

The selection, representing each major pre Columbian culture ranging from 300 B.C. to 1700, reveals not only the social, political, and religious life of the various cultures but also their beliefs about afterlife. Many elaborate costumes were created, in mummies and coffins, by the ancient Inca who were buried in the Andes Mountains. Some of these burial mummies are former for some of the finest pieces of this difficult medium; examples of the work of Gertrude Kasebier and Otto Natzler, the renowned husband and wife team of ceramists who operated the post World War II home ceramic renaissance. Permanent exhibition. Curator: Mrs. Fritz W. Sani.

Selections from the permanent collection of Nepalese and Tibetan Art. Bronzes, sculptures, paintings on cloth, and ritual objects used by both Hindus and Buddhists in Nepal and Tibet as part of their religious worship are on view permanently in the Nepal-Thibet Gallery on the fourth level of the Museum's Ahmanson Gallery.

A docent tour will be offered on Tuesday, February 26 and March 4 at 2 p.m.

Ancient art of the Asian Steppes and Himalaya. A selection of more than 1,000 works from the Nasli M. Heeramaneck Collection of Ancient Near Eastern and Central Asian Art, in the Ahmanson Foundation. An international exhibition of the trousers of fine arts. The exhibition is located in the specially redesigned Heeran Gallery on the first level of the Museum's Ahmanson Gallery. The collection includes magnificent objects of bronze, silver, glass, pottery, and carved stone which reflect the artistic of ancient peoples from cultures that flourished thousands of years ago in parts of the vast land mass that extends from the British Isles to the Caspian Sea, the Iranian Plateau, across the country and lived until 1950. Intramural Participants Of The Week

Erv Caver and Mary Bosley

Erv Caver and Mary Bosley are this week's intramural participants. Erv and Mary tied for the honor when they rejected a win by forfeit. Their opponents were so upset by the tie that they, instead of taking the forfeit win, agreed to reschedule the match. The final score of their match was 0-2, but the true winners were Erv and Mary.

Lemire And Hoover Win

Knockdown, Dragout Fight

by John Flahers

Much improved Julia Hoover and the hustle of Paul Lemire proved to be too much for John Flahers and Terry Calloway in the closest match. Lemire and Hoover won the first game 7-5, but took about half an hour to do it.

Flahers and Calloway bounced back due to the awakened shooting eye of Terry Calloway, to win the second game 7-5. Lemire and Hoover won the rubber match, 7-5.

These were real fun games filled with “oops! Ouch! Ha! Ha! Tee Hee!” and “SHOOT HOOY!”

A Day On The Slopes

by Laura Neumann

The old nursery rhyme “rain, rain go away come again another day” should be revised to “rain, rain come today.” To the brave students of Cal State San Bernadino’s ski class joining meant learning to be hot doggers on the slopes. Instead they have learned to wedge through ice, and wade through slush.

The first time at Holiday Hill, the Monday was so cold that we had to get ready to become hot skiers. What a let down that rain was washing away all the snow. Our luck that the snow started to stick just as we were going down the mountain.

Our fearless teacher Chris Grenfield felt really sorry that snow conditions were pretty bad so he suggested that a trip to Snow Summit was in order. So Friday, February 8 was the big day for those who went.

Living in Redlands I had to get up at 5 a.m. to be at the Gym by seven. Once I got to the gym morale was high. The reason, no classes, and a whole day of fun skiing. Loading skis did not take long because everyone pitched in to help.

So eleven happy souls settled into a state van for a ride up the mountain. The ratio of male to female was pretty bad: 8 females to three males. One guy rode in the back enjoying the conversation of the females.

Traffic started to pile up. Cars, and people were everywhere on the road. Lo and behold, it was a Highway Patrolman blocking traffic. Chris Grenfield and Glen Albert thought we could just drive through since we were in a state van. We had to turn around and put on chains.

Plans changed as we got under way. We were now on our way to Snow Valley. Spirits were up and the snow looked great, although the wind was blowing.

Getting lift tickets was no problem, but ski adjusting was. When all the skis were ready it was look out everyone here we come!

First, we hit the Beginner’s slope enjoying the conversation of our fearless guide. With us was a fearless 18-year-old guy who had already conquered the mountain. The gentle man (who will remain nameless) was to be our guide at the top.

The ride on the lift was long, and the closer we got to the top the more we wanted to go down. Reaching at last we were ready to become hot skiers.

Believe it or not we made it down the mountain without falling once.

Our fearless guide was a little bewildered, for he had fallen going down for the first time.

The rest of the day it was great skiing. The wind had died down, and the sun felt good on the aching muscles. Lunch was eaten and the rest of the afternoon was spent on the slopes. (None really saw how Chris Grenfield and Glen Albert skied so none can vouch for them.)

By 4 p.m. eleven weary bodies made their way back to the van for the trip down the mountain. Since there was no radio Glenn offered to sing “My Country ‘Tis Of Thee”, but after a few bars we asked him to stop. We made it back without any injury.

All of us really enjoyed ourselves even if not many people showed up. The most of the ski classes that made their way back to the van for the trip down the mountain. Since there was no radio Glenn offered to sing “My Country ‘Tis Of Thee”, but after a few bars we asked him to stop. We made it back without any injury.

In other 8:00 games All in the Family swept three from Shandirt. 15-14, 15-9, and 15-7. Shandin watched a 14-3 lead completely disappear in the first game as All in the Family engineered a spectacular comeback with the help of Byron Wagoner’s serve. In game two, Shandin tried to make a comeback of their own. Losing 10-3, Shandin with Dana Birmingham’s sterling play, pulled up to a 14-8 score. But after a long volley, All in the Family’ssuperiority took over enabling them to win, 15-8. Even with two losses, Shandin didn’t give up hope in the third game. But Jeff Health’s playing helped All in the Family score an 15-7 sound victory.

Morocono was idle this week with a bye.

In the 7:00 League the M&M’s were dominated by the Best Team in all three games 15-1, 15-8 and 15-4. Steve Hensler and Resse Tuatoo were deadly with their spikes. Jim Ruffin played well and the M&M’s still lost, unfortunately.

In the 8:00 league the M&M’s were dominated by the Best Team in all three games 15-1, 15-8 and 15-4. Steve Hensler and Resse Tuatoo were deadly with their spikes. Jim Ruffin played well and the M&M’s still lost, unfortunately.
Shandin Wins 18-11?

In the closest game of this B-League Basketball season, Paul Esposito and the B-Bombers were nudged out by the Beylorussian Yacht Expedition 40-38 in an overtime game. Both team's shooting was cold in the first half as B.Y.E. managed only a 16-15 lead at halftime. But Esposito, Scott Shandin, and Steve Armentrout of B.Y.E. both switched on in the second half to sink four buckets each. This sparked both teams to 35-35 tie at the end of regulation time.

In the overtime period, Ted Krug scored 3 of his 5 points for the Bombers, but B.Y.E. went two better to win 40-38. Esposito led all scorers with 14 points and teammate John Heeren had seven. Oliver and Johnson both scored 10 for B.Y.E.

In a battle of ineptitude, Shandin Crazhouse outlasted the Celtics 18-11. After Shandin figured out what caused the funny men in stripes to blow their whistles, they were able to get the ball down the court and score every time and then. The Celtics were able to get the ball down the court but either would miss their shots or have the ball stolen. Shandin's first for Osmosis. Gary Stewart scored high for the Wallbangers with 10. and Jack McMahon had 7.

A1 Estrada scored 13, Alex Urijo 10. and Benny Cunningham 8 to win. The entire Osmosis team threw off the leg irons and pulled steadily ahead to win.

Bombers, but B.Y.E. went two better to win 40-38. Esposito led all scorers with 14 points and teammate John Heeren had seven. Oliver and Johnson both scored 10 for B.Y.E.

Rhodes Scores 22 In Losing Cause

by John Flathers

Tim Rhodes scored 22 of 27 points in their loss to Lloyd's Army, 53-27. The Rabbit, with 21 fouls, just never were able to zero in on the basket. At halftime the score was only 26-16 in the Army's favor but the Rabbit fell apart and allowed 23 second half points. Rhodes was high scorer with 22 points and the Rabbit's Steve Banks and John Grin had 3 and 2 free throws respectively.

In the last Friday 'A' league game, the Clippers slumbered Moringo 67-30. Even though they lost, Moringo was happy that they scored their highest point total of the season. Halftime score was 29-10 in favor of the Clippers. Ballington was high scorer with 10 points. Wilson, Seal and Macquire all had 6. The Clippers placed four of five players in double figures.

Phil Havens of the Knights, led all scorers with fifteen points. Teammates Steve Henkel and Rease Turbo both had seven.

Answers To Sports Quiz

    a. Bobby Unser
    b. Mario Andretti
    c. A.J. Foyt
    d. Al Unser

Aches & Pains Win, 48-44

by John Flathers

In Wednesday's open league action the Wounded Knees edged Aches and Pains 48-44. The Pains, unbelievably, were down 30-9 at halftime! But in the second half, a persistent offensive effort by Caffe and Fulton enabled the Pains to almost pull ahead. The Knees only scored eight second half points but threw in 10 free throws on 18 second half foul shots. This turned out to be the deciding factor.

The Wounded Knees scored 16 and Fulton scored 14 while the Knee's Frazier and Boul both hit in double figures at 20 and 10 points respectively. Standing to date:

Wednesday Open League

Aches & Pains 2
Wounded Knees 0
