Cultural Events Planned
For 15th Anniversary
Cultural events will abound at Cal State, Sunday, April 27 when the college celebrates its 15th anniversary with an all-campus open house.

An open invitation is extended to community members to visit the campus and sample the activities and programs available at the college.

A wide variety of activities planned for the day will include: music and drama events, a previewing of an ambitious art show on 19th century symbolism, family lectures, demonstrations in the science laboratories and computer center, recreational activities and booths sponsored by student clubs. A tram will take visitors on a tour of the campus. All events are free except for one play. The major part of the day’s events are between 11 a.m. and 5 p.m.

The Alumni Association will have an awards brunch at 11:15 a.m. in the college Commons where outstanding alumni will be recognized for their achievements.

The public also is invited. The cost is $4.50 for adults; $3.50 for children.

A favorite of past years has been continued on page 3

Good News For The
Commons
Statistics Indicate Student Satisfaction
by M.A. Kemenovitch
Dormitory students appear happier with the food service and quality at the Commons since the Fall 1979 controversy led to changes in the PFM/Foundation contract.

The number of missed meals by students dropped by a dramatic twenty-six percent between November 1979 and February 1980 indicating increased satisfaction with meals.

36.54 percent of all contracted meals were missed by students in November. This dropped to 27.14 in February for a 9.5 percent change or a 26 percent drop in missed meals.

The missed meal pattern is a standard industry computation based upon experience which allows companies to predict how much food to buy and prepare for each meal. Despite contracts for certain numbers of meals by students, they inevitably miss some. For example, only about fifty percent of hot breakfasts contracted for are consumed.

The missed meal pattern is used to predict annual costs and is in turn used to lower the dormitory students board rate. In effect, if students did eat all meals contracted for, the board rate would be considerably higher.

It is felt by the PawPrint and PFM that the increased consumption of food and lack of complaints by students is the result of greater student satisfaction both with the food and the service.

The effectiveness of the hard work put into correcting student complaints by the Foundation for CSCSB and PFM is reflected in the statistics.

A.S. Elections
Candidates Statements
In This Issue
A.S. elections will be held on April 23 and 24 (Wednesday and Thursday of next week). The polls will be located at the crossroads between the Library and the Creative Arts Building. They will be open from 8 a.m. to 8 p.m.

The candidates are also scheduled to give speeches on Monday, April 21 at 1 p.m. on the Student Union Patio.

This issue, in a special supplement funded by the Associated Students, The PawPrint is publishing the pictures and statements of the candidates. This special supplement can be found on pages 9 thru 12.

Candidates for executive officers (in the order their names will appear on the ballot) are: President — Tim Hamre, Jim Fuentes, Kathy Fortner, Vice-president — John Flathers, James Lyne, Paul A. Woodruff, Sandy Case, Treasurer — Veronica Rodarte, Wayne Thies.

Candidates for seats on the Board of Directors are: Administrators — Tisha Larmore; Education — none; Humanities — none; Natural Sciences — Anthony Duncan; Social and Behavioral Science courses — Mike Smith; Interdisciplinary, Special and Dual Majors — Rhonda Booth; Undeclared majors — Omar Masoud.

7 Students Selected
For International Program
by Mike Smith

Dr. Mireille Ryswell announced on April 7 that seven students from CSCSB would be spending nine months studying overseas next year in the CSUC International Program. The International Program is a system-wide foreign study program for upper division students enrolled in the California State University and Colleges.

The seven students selected are Heidimarie Flitch, Peter Petrucci, Rebecca Bowman, Salvador Salomon, Pegi Roefers, Karla De Sadier and William Krummeweede.

Heidi Flitch was born in Rottweil, West Germany and lived there for five years. Heidi will be studying at the University of Heidelberg in Heidelberg, West Germany. She is interested in her family ties in Germany as well as becoming an interpreter for an international business firm in the future. Heidi, 19, graduated from Beaumont High School and started attending CSCSB in the fall of 1978. Her area of concentration is German.

Karla De Sadier has been accepted into the program and is at the University of Aix in Aix, France. The Cal State graduate wants to earn her Masters and Ph.D. in French and is the son of Ralph H. Petrucci, Dean of Academic Planning here at Cal State.

Becky Bowman is a Serrano Village resident and will be going to Ibero Americana in Mexico City.

Still another, a professional called the Biostatistician, applies the techniques learned in Business Statistics and related math courses to determine such health research problems as "what percentage of people will have side effects to a particular drug or use the emergency room during the next year."

If you major in Art and always seem to have your nose in a biology book, then a possible career in Medical Illustration might be available. This field requires competence in "drawing, painting and modeling," reports The Black Collegian, together with continued on page 8

Wondering what to do this summer? If so, see the special travel section on Page 13.

Two Campus Institutions Retire This Week

Two campus institutions retire this week. Kathy Kohler and Barbara Note have been with the school almost from the beginning. Their well deserved reputation among the students for writing assistance and advocacy for their peers will certainly be missed. Under the leadership of Barbara, our newspaper has seen a steady growth. Her unfailing, steady job performance gave her an outstanding opportunity to intercede for her behind the scenes. Barbara, with the true spirit of American enterprise entered the school administration as a secretary and went on to create an empire. She now makes all graduation arrangements, publishes the College Bulletin (which I have always admired for its timely and interesting news items) and runs the Campus Tours. Many other jobs float around in the College Relations Office.

Editorial

Dear Editor,

At midnight on May 5 millions of Californians will vote to elect either the god of Rocking Roll or the god of the Steady Beat to the governor's position. The god of Rocking Roll, who by now has filled both the room where the spirited voter registration drive is in progress and the parking lots to their classes is always good for a good laugh. A special treat for the more chauvinistic males on campus is the fact that the god of Rocking Roll is a special treat for the more chauvinistic males on campus is the fact that the god of Rocking Roll will be back. He said, "For it is written that Rocking Roll is here to stay."

James D. Lyne

Blowing In The Wind

It was just another windy day here at Cal State as I attempted to make sense out of this whole issue. While I was peering out of the window in the PawPrint office I happened to notice one of the College's electric carts going by the Commons. Not an uncommon sight you might think, except when you consider what was happening backwards? Then I noticed that some talented individual had devised a way to run the carts on wind power! I hurriedly called Jane Pacheco and "boogie oogie". "You can't get much more mindless than that."

Mike Smith

The Continuing Saga Of Tumbleweed Tech

Chapter XVI

Another battle for worshippers between the god of Rockin' Roll and the god of the Steady Beat took place at the province of Tumbleweed Tech last Thursday when both gods held simultaneous worship ceremonies in the Temple for Union.

Each group met in the early evening as the god of Rockin' Roll gathered his flock together in the room where the spirited water flows. The multitudes gathered to listen to the words of wisdom and have a good time. And their numbers increased.

Later in the evening, the god of the Steady Beat started his worship ceremonies in the sump, and the worshippers arrived for these ceremonies. And they squirmed and wiggled to a steady thump, thump, thump.

And those who followed the god of the Steady Beat became angry. "They just want to sit around and drink spirited waters," they said of their rivals. "They don't care about anything else."

But this did not phase the multitude who were listening to the god of Rockin' Roll. For they had by now filled both the room where the spirited water flows and the air was brimming with the "sounds of silence" about the "times that are a changing".

Eventually, long after the god of Rockin' Roll was supposed to end his ceremony, he announced that he did have to leave. This disappointed the followers who said they would have to take him in their paring words. "I'll be back," he said. "For it is written that Rockin' Roll is here to stay."

The PawPrint is published 24 times during a school year. 1979-80 publication schedule is Spring Quarter 1980

Apr. 15, 22, 29
May 6, 13, 20, 27

It is published by the Associated Students of California State College, San Bernardino. The PawPrint is located in the Student Union Building at 5500 State College Parkway, San Bernardino, CA 92407. The telephone number is 623-2626. Office hours are MTW 10-12 A.M. and 1-4 P.M. All persons, including editors, are those of the author and do not necessarily represent the views of the PawPrint, the Associated Students Administration of CCSR or the College Union Board.

Advertise your organization to the Business Manager at the address above. Classified ads up to twenty words are free for staff and students. Other rates for classified ads are $2 per line, or $1 per 10 words after that. Advertising deadline is the Thursday prior to publication at 12 noon. Any questions after this time go to the paper on a space available basis.

The final deadline for all copy is Thursday, 12 noon in the week prior to publication. All submissions must be double spaced, typewritten. Copy paper is available on request from the PawPrint offices.

Letters to the Editor should be kept to a maximum of one and one-half typewritten pages. Letters that attack any individual may be held until the recipient of the attack has been notified. If a response is thought the same issue as the letter, letters must include a handwritten signature with address and phone number. Unsigned letters will be withheld upon request.

The PawPrint reserves the right to edit and copy to copy with space requirements. Headlines, and good taste.

The Continuing Saga Of Tumbleweed Tech
A.S. Activities Planning Full Schedule

The Board of Directors sent Sulkin's funding request to the Appropriations Committee.

Sulkin also discussed the possibility of obtaining additional support to add equipment to their existing sound system. He explained that this would allow AS to put on their own shows and thereby save about a thousand dollars per quarter.

Other actions taken by the AS Board of Directors included the allocation of up to $210 to pay the cost of the luncheon (appearing in this issue) covering candidates pictures and statements for the upcoming AS Elections. The discussion on this issue produced heated exchanges between PawPrint Editor Mark A. Kemenovich and several members of the board.

Members of the board stated they felt they were being blackmailed into paying for the supplement; one week before the issue was to come out.

Kemenovich responded by saying that the was "appalled" by these statements. He said that anticipating problems, he notified Elections Committee Chair Bruce Jeter on February 28 of the proposed changes and request for funds. Copies of his four-page memo, he said, went to the Dean of Students, Publications Board Chair, PawPrint Advisor and as President Kathy Fortner.

Kemenovich stated his memo was immediately accepted and Jeter made arrangements to promptly place the item on the board's agenda. "As late as April 4, Fortner and I worked out details of payment," he added.

On April 8, however, Fortner approached the Publications Board questioning the request for funds. The Publications Board determined that this was not in their realm of decision at that time, and said the AS offices and Kemenovich had to work it out among themselves.

After the meeting, Kemenovich said he was angry because "thirty eight days separated my memo from the meeting, and it was also the third Board of Directors meeting since I had written the memo. It's evident that the AS Government made a mistake somewhere along the line and the situation at the Board Meeting was being manipulated to transfer blame from AS to the PawPrint."

Earth Day Celebration

To Be Next Tuesday

He will show slides of wildlife and archaeology of the desert, emphasizing endangered species and increasing vandalism. He will also discuss his opposition to the Bureau of Land Management's proposed California Desert Plan.

Eastvold, a conservation chairman for the Sierra Club, received the State of California Natural Resources Award of Merit in 1978 for his efforts in protecting archeological sites.

"1980 — The Year of the Coast," focusing on the diminishing coastal wetlands, will be the subject of Dr. Larry LaPre, a research associate in biology at the University of California, Riverside. Dr. LaPre, who has taught courses in biology and botany at UCR and has worked as an environmental consultant, recently studied the Buena Vista Lagoon near Oceanside, analyzing it for pollutants and surveying area bird life.

Child Care Center Bid Awarded

L.L. Neff Construction Co. of Ontario was successful bidder in the second round of bids to construct the new Child Care Center. Their bid of $170,500 was within the limits of funds and was reported that the company has agreed to include some of the features removed after the last bidding. Features had been removed to bring the cost of construction into line with funds available.

The County Board of Supervisors has already signed the contract and a job start meeting is scheduled for around April 15 with construction expected to start shortly. The building is supposed to be completed within 140 days and some grounds work has already begun to remove trees and shrubs at the construction site.

The U-shaped building with a circular drive will be constructed west of the Student Services Building which it will resemble in outside appearance. Forty children are expected to be accommodated and an outside fenced play yard will be available.

The Physical Plant reports that the job start meeting is waiting for contractor bonding and insurance verification. The job start meeting usually includes the architect, County and City administrators, contractor, school and the sub contractors. This meeting gives all parties an opportunity to get together to work out final details.

It is not known whether a ceremonial ground breaking will be held.
Give us 1 hour.

We'll give you the way to higher grades and more free time.

Would you like to:
- Raise your grade average without long hours over texts.
- End all-night cramming sessions.
- Breeze through all your studying in as little as 1/3 the time.
- Have more free time to enjoy yourself.
- Read 3 to 10 times faster, with better concentration, understanding, and recall.

Evelyn Wood's new RD2 reading system makes it all possible.

Evelyn Wood works — over 1 million people, including students, executives, senators, and even presidents have proven it. A free 1 hour demonstration will show you how to save hundreds of hours of drudgery this year (as well as how to increase your speed immediately with some simple new reading techniques).

It only takes an hour, and it's free. Don't miss it.

LOCATION: THE SAN BERNARDINO CONVENTION CENTER, AT 303 NORTH E STREET IN DOWNTOWN SAN BERNARDINO.

©1978 EVELYN WOOD READING DYNAMICS/AURS COMPANY
The Village Idiot
by Shari Mills

Welcome back for the home stretch of the 79-80 school year. Since the Easter Bunny has come and gone, the only thing we have to look forward to this quarter is the Memorial Day weekend! Already the Village has been pining for the Marigolds and orange blossoms. Morongo will be holding its annual Pimp and Whore dance scheduled for the 25th of this month. Although prices will go to the best dressed pimp and whore, there will be no prizes given for talent. According to Shari, the Spring Dinner Dance. Shari Mills will be chairing this year’s committee to arrange for the dinner and dance at an off-campus location.

Other events to look forward to include The Roommate Game on May 2nd. Lynda Smith and Terry Calloway will be arranging this activity which has proven to be a most of the best kept secrets in the Village! The game will be held in the commons during dinner, with prizes going to the first, second, and third place winning houses. The fourth annual Track Meet will be held May 19th at San Bernardino. The meet will be 27 track and field events starting at 10 a.m. Ribbons will be given to the first five winners in each event plus doorprizes will be given out during the day. Sign-up sheets have been placed in each dorm.

Arrowhead will be having a Spring Flower Sale within the next few weeks to welcome back the Village. Flyers will be posted in each house with information concerning the flower sale.

Nominations for this quarter’s SVC officers will be open until this Wednesday’s meeting. Those nominated thus far include:

Chairman: Russ Castle
Vice Chairman: Shari Mills
Secretary: Russ Castle
Treasurer: Bill Leicht

Anyone interested in a position on the Village Council should attend the Wednesday’s meeting. Having made a clean sweep of nominations, Russ Castle shows a good chance of walking away with at least one of the available positions. But then maybe he just likes to see his name in print!
New Outreach Counselor Speaks Out For EOF

By definition, the EOF seeks to provide individuals from disadvantaged backgrounds, who lack the high school grades or college entrance scores to qualify for admission to the college. These individuals include low-income persons, ethnic minorities, and those who experience language or cultural barriers.

By providing admission assistance and supportive services, the EOF makes it possible for them to pursue a college education, he explained.

"From the time a student first applies to the college to the time he or she graduates, EOF is there to help," Chris explained.

The EOF staff realize that students require a variety of supportive aids to meet changing academic needs. For this reason, EOF provides a comprehensive program of services which includes orientation activities, academic advising, tutoring, counseling, financial aid and workshops to improve reading, writing, and study skills.

"Our goal in EOF is to insure the success of our students," Chris explained.

And who can speak better for the program than Chris himself, a Chicano and former EOF student at the University of California, Irvine.

Chris is like other EOF students in that he comes from a low-income background. He was very motivated and active in school however, and had strong family guidance. On a scholarship, he attended a private high school in Los Angeles, Loyola. He then went to UC Irvine and earned a B.A. degree in Social Ecology.

Eventually Chris would like to pursue a career in law, but for now he wants to help students who come from backgrounds similar to his and in many times much worse. The strongest asset he brings to his new position is the fact that he has been an EOF student and is very familiar with the type of student for which the program is designed.

"Having been there, I know what the EOF student is looking for and what type of motivation is needed," he said.

"I'm not trying to sell the idea of college as the only way to go," he emphasized. "I realize there are many options available to students these days. But college is a very worthwhile consideration and for students from disadvantaged backgrounds, EOF can help open the door."

Students interested in more information about EOF at Cal State, are urged to call the college this spring for information about the fall 1980 quarter. The number to call is 887-7395.

Last Year

AS President Kathy Fortner promised:

More activities — we've had less

A better book co-op — which was a flop

Evening child care — which never materialized

Ongoing communication — when she's never here

Last fall she said she had "many more activities and services planned"

What Happened To Them?

DON'T BE FooLED AGAIN!

This Year

Elect Proven Leaders, Elect Proven Achievers,

Elect People Who Have Proven That They Accomplish Things!

Elect

Tim HAMRE

- Has proven his effectiveness by causing improvements in food service.
- Has proven he gets things done by putting a Rock & Roll Dance together — something AS refused to do!
- Has proven his leadership by recruiting a winning team to run for AS office, including every candidate for the AS Board of Directors.
- Has proven, over and over again, that he is the most knowledgeable person on student government this campus has.

- In her first year at CSCSB has become a leader in MEChA.
- Is concerned about how your money is spent.
- Wants effective and efficient spending of AS funds.
- Will not let your money be wasted on unneeded or unwanted programs.
- In her time here has shown leadership potential, and is truly a leader on the rise!
Careers In Health Care Open Up

continued from page 1

petence in "biology or zoology, comparative vertebrate anatomy, embryology, physiology, and histology" in order to be competent at the heart of the profession — technical anatomy drawings.

In addition to Business and Art, other avenues in Health careers, with a dual emphasis on the social and scientific sides, have also opened up. One such example is the "Nurse Practitioner."

Much more than a nurse, reports Vivian McEachen, who has been with Cal State's medical team for more than ten years and has been a Nurse Practitioner for five, the Nurse Practitioner can "use her/his own initiative and learning" to perform Health care treatment ranging from physicals, to making the Doctor's "rounds," to counseling patients on birth control.

Cal State offers the Bachelor of Science degree in Nursing which is acceptable to such universities as Loma Linda for admission into the Nurse Practitioner's Program.

Similar to the Nurse Practitioner is the Physician's Assistant. This person can be seen as the "old family practitioner," according to The Black Collegian, performing treatment ranging from "simple surgical procedures," to "delivering babies," to counseling and educating patients in preventative health care techniques.

Career Guide reports that two years of college with emphasis on science, followed by "two years medical experience," such as a "nurse" or "technician," are the typical requirements to receive "a Credential of Certificate, associate degree, or BS degree" to become a Physician's Assistant.

In addition to the social, scientific, art, and business side of Health careers, one fond of math and engineering might enjoy being a Biomedical Engineer.

According to the pamphlet "200 Ways to Put Your Talent to Work in the Health Field (National Health Council, 1740 Broadway, New York, N.Y. 10019), these professionals "design patient care equipment such as . . . pacemakers {and] electrocardiograph machines which record heart action."

The Bachelor of Science degree in Physics offered by Cal State, as well as alternative Bachelor's programs in engineering or a related biological science are the minimum routes one must take to reach this goal. A Master's degree is required for some programs.

The Health Careers of Biomedical Engineer, Physician's Assistant, Nurse Practitioner, Medical Illustrator, and Business Health are but a few among the multitude of careers opening up in the second largest industry in the United States. Health. The interested person who does not investigate them further is missing a bet for a career in a new and growing field.
