Cultural Events Planned
For 15th Anniversary
Cultural events will abound at Cal State. Sunday, April 27, when the college celebrates its 15th anniversary with an all-campus open house.

An open invitation is extended to community members to visit the campus and sample the activities and programs available at the college.

A wide variety of activities planned for the day will include: music and drama events, the previewing of an ambitious art show on 19th century symbolism, faculty lectures, demonstrations in the science laboratories and computer center, recreational activities and booths sponsored by student clubs. A tram will take visitors on a tour of the campus. All events are free except for one play. The major part of the day's events are between 11 a.m. and 5 p.m.

The Alumni Association will have an awards brunch at 11:15 a.m. in the college Commons where outstanding alumni will be recognized for their achievements. The public also is invited. The cost is $4.50 for adults; $3.50 for children. A favorite of past years has been the emergency room during the next year.
Two Campus Institutions Retire This Week

The PawPrint, as an entity, takes no stand on the candidates for A.S. officer positions. This week will remain nameless in the election. This does not prevent the staff, contributors or those writing letters to the Editor from making their opinions known in signed comments on the editorial page. Nor will it prevent any member of the staff from fulfilling their assigned duties. But the paper should provide coverage of the Associated Students although such staff members are going to great lengths to keep their coverage as unbiased as possible.

Perspective
Blowing In The Wind

It was just another windy day here at Cal State as I attempted to make some sense out of this windy issue. While I was peering out of the window in the PawPrint office I happened to notice one of the College's electric cars going by the Commons. Not an uncommon sight on campus I thought, except when it was moving backwards. Then I noticed that some talented individual had devised a way to start the cars on wind power! I hurriedly called Jane Fonda and Robert Redford to give them the good news, but they were both on location. It was a good thing that I wasn't able to reach them, because at that moment I realized that they had forgotten to add a special steering mechanism to his creation. Something along the lines of a driver might have been a good idea. Powering vehicles isn't the only good thing about our windy conditions. They also keep out the smog that has a nasty habit of invading the valley. Too bad, though, for the fire being whipped behind the campus by the same winds. Well, all the wind is blowing the smoke away from the school.

A student suggested to me that we should put up a big sail and mount the College on rollers and blow down to San Diego for the weekend. To this I had no objections, but when I questioned him on how we would take in the parking lots to their classes is always good for a good laugh. A special treat for the more choosy males on campus is the fact that no matter how windy it is, some cute lady shows up for their classes clad in a wind-whipping skirt.

{John W. C.}{Mike Smith}

Candidates for A.S. offices may advertise in The PawPrint inquire about details.

Earth Day Celebration To Be Next Tuesday

The 10th anniversary of Earth Day will be celebrated here Tuesday, April 22 with a panel discussion by distinguished speakers and a variety of environmental information booths.

Sponsored by the Cal State chapter of the San Andreas Geographic Association the event will take place from 10 a.m. to 2 p.m. in the Student Union multipurpose room and patio.

Information booths covering a wide range of environmental concerns will be scattered throughout the Student Union patio. Free literature, earth day buttons, biodegradable bumper stickers and more will be available, explained Jane Bennett of Crestline, graduate in biology, who is making arrangements for the event.

Among the organizations having booths at the event include: the Alliance For Survival, the California Native Plant Society, National Audubon Society, California Conqueror Recovery Program, the Mono Lake Committee, Cal State's Veteran's Club and Agent Orange, the Veteran's Club and Agent Orange, and the Nature Conservancy, the American Citation Society, and the California Energy Commission.

Environmental concerns involving nuclear energy, solar energy, pollution, saving a variety of endangered species including the whales and much more will be represented.

From 12 noon to 1 p.m. in the multipurpose room, the panel discussion will be led off by Chuck Bell, environmental specialist for the San Bernadino County Planning Department.

His talk will be titled "An Energy Outlook for San Bernadino County." The status of various power plant and transmission line proposals in the county will be discussed, along with available alternatives to the country's energy problem.

Like Eastvold, developer of "Desert Watch," an organization which patrols archaeological sites in the California deserts, will speak on the topic "Countdown for the California Desert." He will show slides of wildlife and archaeology of the desert, emphasizing endangered species and increasing vandalism. He will also discuss his opposition to the Bureau of Land Management's proposed California Desert Plan.

Eastvold, a conservation chairman for the Sierra Club, received the State of California Natural Resources Award of Merit in 1978 for his efforts in protecting archaeological sites.

"1980 — The Year of the Coast," focusing on the diminishing coastal wetlands, will be the subject of Dr. Larry LaPre, a research associate in biology at the University of California, Riverside. Dr. LaPre, who has taught courses in biology and botany at UCR and has worked as an environmental consultant, recently studied the Buena Vista Lagoon near Oceanside, analyzing it for pollutants and surveying area bird life.

SURVEYING ARCHAEOLOGICAL VANDALISM — Ike Eastvold, a guest speaker for Cal State's Earth Day celebration Tuesday, April 22, observes damage to Northern Mojave Rock Art.

Child Care Center Bid Awarded

L.L. Neff Construction Co. of Ontario was successful bidder in the second round of bids to construct the new Child Care Center. Their bid of $170,500 was within the limits of funds and it was reported that the company has agreed to include some of the features removed after the last bidding. Features had been removed to bring the cost of construction in line with funds available.

The County Board of Supervisors has already signed the contract and a job start meeting is scheduled for around April 15 with construction expected to start shortly. The building is supposed to be completed within 140 days and some grounds work has already begun to remove shrubs and trees at the construction site. The U-shaped building with a circular drive will be constructed west of the Student Services Building which it will resemble in outside appearance. Forty children are expected to be accommodated and an outside fenced play yard will be available.

The Physical Plant reports that the job start meeting is waiting for contractor bonding and insurance verification. The job start meeting usually includes the architect, County and City administrators, contractor, school and the sub contractors. This meeting gives all parties an opportunity to get together to work out final details.

It is not known whether a ceremonial ground breaking will be held.

Interim AS Activities Committee Chair Howard Sulkin presented a comprehensive plan for this quarter's activities to the AS Board of Directors at their meeting last Wednesday.

Sulkin, who was requesting an additional $600 in funding for the Activities Committee laid out a plan of activities to include something on every day of the week. These activities would include some kind of game tournament on Mondays (at noon in the Student Union), a cartoon festival or a lecture by a faculty member on a popular topic on Tuesdays (also noon in the SU), live musical entertainment on Wednesdays (at noon on the SU patio or nighttime in the SU Pub); a dance Thursday night (in the SUMP) and movies on Friday nights (SUMP).

The Board of Directors sent Sulkin's funding request to the Appropriations Committee.

Sulkin also discussed the possibility of adding additional equipment to their existing sound system. He explained that this would allow AS to put on their own discos and thereby save about a thousand dollars per quarter.

Other actions taken by the AS Board of Directors included the allocation of up to $210 to pay the supplement fee for the PawPrint Editor appearing in this issue covering candidates pictures and statements for the upcoming AS Elections. The discussion on this issue produced heated exchanges between PawPrint Editor Mark A. Kemcnovich and several members of the board.

Members of the board stated they felt they were being blackmailed into paying for the supplement; one week before the issue was to come out.

Kemcnovich responded by saying that the was "appalled" by these statements. He said that anticipating problems, he notified Elections Committee Chair Bruce Jeter on February 28 of the proposed changes and request for funds. Copies of his four page memo, he said, went to the Dean of Students, Publications Board Chair, PawPrint Advisor and as President Kathryn Fornter.

Kemenovich stated his memo was immediately accepted and Jeter made arrangements to promptly place the item on the board's agenda. "As late as April 4, Fornter and I worked out details of payment," he added.

On April 8, however, Fornter approached the Publications Board questioning the request for funds. The Publications Board determined that this was not in their realm of decision at that time, and said the AS officers and Kemenovich had to work it out among themselves.

After the meeting, Kemcnovich said he was angry because "thirty eight days separated my memo from the meeting, and it was also the third Board of Directors meeting since I had written the memo. It's evident that the AS Government made a mistake somehow along the line and the situation at the Board Meeting was being manipulated to transfer blame from AS to the PawPrint."
Give us 1 hour.

We’ll give you the way to higher grades and more free time.

Would you like to:
- Raise your grade average without long hours over texts.
- End all-night cramming sessions.
- Breeze through all your studying in as little as 1/3 the time.
- Have more free time to enjoy yourself.
- Read 3 to 10 times faster, with better concentration, understanding, and recall.

Evelyn Wood's new RD2 reading system makes it all possible.

Evelyn Wood works — over 1 million people, including students, executives, senators, and even presidents have proven it. A free 1 hour demonstration will show you how to save hundreds of hours of drudgery this year (as well as how to increase your speed immediately with some simple new reading techniques).

It only takes an hour, and it's free. Don't miss it.

Evelyn Wood will open your eyes.

LOCATION: THE SAN BERNARDINO CONVENTION CENTER, AT 303 NORTH E STREET IN DOWNTOWN SAN BERNARDINO.

SCHEDULE OF FREE LESSONS

| MONDAY, APRIL 14 | 5:30 p.m. | 8:00 p.m. |
| TUESDAY, APRIL 15 | 5:30 p.m. | 8:00 p.m. |
| WEDNESDAY, APRIL 16 | 5:30 p.m. | 8:00 p.m. |
| THURSDAY, APRIL 17 | 5:30 p.m. | 8:00 p.m. |
| FRIDAY, APRIL 18 | 12:30 p.m. | 3:00 p.m. |
| SATURDAY, APRIL 19 | 12:30 p.m. | 3:00 p.m. |

SEATING IS LIMITED, SO PLEASE PLAN ON ATTENDING THE EARLIEST POSSIBLE LESSON!
THE END OF CRAMMING

The Village Idiot  
by Shari Mills  

Welcome back for the home stretch of the 79-80 school year. Since the Easter Bunny has come and gone, the only thing we have left to look forward to this quarter is Memorial Day weekend! Already the village has been covering in the forecast weekly weather. Morongo will be holding its annual Pimp and Whore dance schedule for the 25th of this month. Unfortunately, $5 will go to the best dressed pimp and whore, there will be no prizes for talent! Attendees are reminded to reserve tickets to the Spring Dinner Dance. Shari Mills will be chairing this year's committee to arrange for the dinner and dance at an off-campus location.

Other events to look forward to include The Roommate Game on may 2nd. Lynda Smith and Terry Calloway will be arranging this activity from the house to help raise money for the in-hall. The garden has been turned over to the UC greenhouse and the flowers are blooming. The game will be held in the commons during dinner, with prizes going to the first, second, and third place winning houses.

The fourth annual Track Meet will be held May 19th at San Bernardino City College. The meet will be at 9 a.m. Ribbons will be given to the first five winners in each event plus doorprizes will be given out during the day. Sign-up sheets have been placed in each dorm.

Arroyo will be having a Spring Flower Sale within the next few weeks to welcome in Spring. Flyers will be posted in each house with information concerning the flower sale.

Nominations for this quarter's SVC officers will be open until this Wednesday's meeting. Those nominated thus far include:

Chairman: Russ Castle  
Vice Chairman: John Fishers  
Secretary: Russ Castle  
Treasurer: John Fishers  

Anyone interested in a position on the Village Council should attend this week's meeting. Having made a clean sweep of nominations, Russ Castle shows a good chance of walking away with at least one of the available positions. But then he just likes to see his name in print!
Chris Villa, the new outreach counselor for the Educational Opportunity Program, has a tall order there is now: "The time to begin thinking about what you want to achieve in life and formulating a plan for getting it there is now."

Because of the many different directions students can go these days, Chris encourages them to thoroughly research all of their opportunities.

For many students at this stage of the game, college is the next logical step. But what about those equally socio-economic reasons, don't feel they can afford college or would even qualify? That's where Chris and EOF come in.

As an outreach counselor, Chris travels to high schools and junior colleges searching out this type of student. By definition, the EOF seeks to provide individuals from disadvantaged backgrounds, who lack the high school grades or college entrance scores to qualify for admission to the college. These individuals include low-income persons, ethnic minorities, and those who experience language or cultural barriers.

By providing admission assistance and supportive services, the EOF makes it possible for them to pursue a college education, he explained.

"From the time a student first applies to the college to the time he or she graduates, EOF is there to help," Chris explained.

The EOF staff realize that students require a variety of supportive aids to meet changing academic needs. For this reason, EOF provides a comprehensive program of services which includes orientation activities, academic advising, tutoring, counseling, financial aid and workshops to improve reading, writing and study skills.

"Our goal in EOF is to insure the success of our students," Chris explained.

And who can speak better for the program than Chris himself, a Chicano and former EOF student at the University of California, Irvine.

Chris is like other EOF students in that he comes from a low-income background.

He was very motivated and active in school however, and had strong family guidance. On a scholarship, he attended a private high school in Los Angeles, Loyola. He then went to UC Irvine and earned a B.A. degree in Social Ecology.

Eventually Chris would like to pursue a career in law, but for now he wants to help students who come from backgrounds similar to his and in many times much worse. The strongest asset he brings to his new position is the fact that he has been an EOF student and is very familiar with the type of student for which the program is designed.

"Having been there, I know what the EOF student is looking for and what type of motivation is needed," he said.

"I'm not trying to sell the idea of college as the only way to go," he emphasized. "I realize there are many options available to students these days. But college is a very worthwhile consideration and for students from disadvantaged backgrounds, EOF can help open the door."

Students interested in more information about EOF at Cal State, are urged to call the college this spring for information about the fall 1980 quarter. The number to call is 887-7395.

*Elect People Who Have Proven That They Accomplish Things!*

**Elect**

**Tim HAMRE**

— Has proven his effectiveness by causing improvements in food service.
— Has proven he gets things done by putting a Rock & Roll Dance together — something AS refused to do!
— Has proven his leadership by recruiting a winning team to run for AS office, including every candidate for the AS Board of Directors.
— Has proven, over and over again, that he is the most knowledgeable person on student government this campus has.

**FLATHERS**

— Has proven his leadership in Serrano Village by:
  - Organizing student demands for improved food service
  - Organizing original volunteers to aid flood victims
  - Organizing continual support for student rights
  - Reviving the defunct Serrano Village Judicial Board
  - Providing leadership as the president of the Serrano Village Council.
— Plus, for the Board of Directors

**Veronica RODARTE**

— In her first year at CSCSB has become a leader in MEChA.
— Is concerned about how your money is spent.
— Wants effective and efficient spending of AS funds.
— Will not let your money be wasted on unneeded or unwanted programs.
— In her time here has shown leadership potential, and is truly a leader on the rise!

Careers In Health Care Open Up

continued from page 1

Permit in "biology or zoology, comparative vertebrate anatomy, embryology, physiology, and histology" in order to be competent at the heart of the profession — technical anatomy drawings.

In addition to Business and Art, other avenues in Health careers, with a dual emphasis on the social and scientific sides, have also opened up. One such example is the "Nurse Practitioner."

Much more than a nurse, reports Vivian McEachem, who has been with Cal State's medical team for more than ten years and has been a Nurse Practitioner for five, the Nurse Practitioner can "use her/his own initiative and learning" to perform Health care treatment ranging from physicals, to making the Doctor's "rounds" for him, to counseling patients on birth control.

Cal State offers the Bachelor of Science degree in Nursing which is acceptable to such universities as Loma Linda for admission into the Nurse Practitioner's Program.

Similar to the Nurse Practitioner is the Physician's Assistant. This person can be seen as the "old family practioner," according to The Black Collegian, performing treatment ranging from "simple surgical procedures," to "delivering babies," to "counseling and educating patients in preventative health care techniques."

Career Guide reports that two years of college with emphasis on science, followed by "two years medical experience," such as a "nurse" or "technician," are the typical requirements to receive "a Credential of Certificate, associate degree, or BS degree" to become a Physician's Assistant.

In addition to the social, scientific, art, and business side of Health careers, one fond of math and engineering might enjoy being a Biomedical Engineer.

According to the pamphlet "200 Ways to Put Your Talent to Work in the Health Field (National Health Council, 1740 Broadway, New York, N.Y. 10019), these professionals "design patient care equipment such as . . . pacemakers [and] electrocardiograph machines which record heart action."

The Bachelor of Science degree in Physics offered by Cal State, as well as alternative Bachelor's programs in engineering or related biological science are the minimum routes one must take to reach this goal. A Master's degree is required for some programs.

The Health Careers of Biomedical Engineer, Physician's Assistant, Nurse Practitioner, Medical Illustrator, and Business Health are but a few among the multitude of careers opening up in the second largest industry in the United States, Health. The interested person who does not investigate them further is missing a bet for a career in a new and growing field.
