Cultural Events Planned For 15th Anniversary

Cultural events will abound at Cal State, Sunday, April 27, when the college celebrates its 15th anniversary with an all-campus open house.

An open invitation is extended to community members to visit the campus and sample the activities and programs available at the college.

A wide variety of activities planned for the day will include: music and drama events, the previewing of an ambitious art show on 19th century symbolism, family lectures, demonstrations in the science laboratories and computer center, recreational activities and booths sponsored by student clubs. A tram will take visitors on a tour of the campus. All events are free except for one play. The major part of the day's events are between 11 a.m. and 5 p.m.

The Alumni Association will have an awards brunch at 11:15 a.m. in the college Commons where outstanding alums will be recognized for their achievements. The public also is invited. The cost is $4.50 for adults; $3.50 for children.

A favorite of past years has been A.S. Elections Planned For International Program

by Mike Smith

Dr. Mireille Rydell announced on April 7 that seven students from CSCSB would be spending nine months studying overseas next year in the CSUC International Program. The International Program is a system-wide foreign study program for upper division students enrolled in the California State University and Colleges.

The seven students selected are: Heidi Marie Fluhry, Peter Petrucci, Rebecca Bowman, Salvador Salomon, Pegi Roeffers, Karla De Sadier and William Krummeweide. Heidi Fluhry was born in Rottweil, West Germany and lived there for five years. Heidi will be studying at the University of Heidelberg in Heidelberg, West Germany. She is interested in her family ties in Germany as well as becoming an interpreter for an international business firm in the future. Heidi, 19, graduated from Beaumont High School and started attending CSCSB in the fall of 1978. Salvador would like to teach or work for the state Department in the future. He will be studying at the University of Madrid, Spain.

Pegi Roeffers, a 21-year-old Psychology major, will pursue child psychology courses in Sweden next year. The Banngt High graduate came to CSCSB in the fall of 1977. Pegi, who lives on campus, has a minor in Theatre Arts in addition to her work in psychology.

Karla De Sadier has been accepted for admission to the college next year and is presently attending San Bernardino Valley College. De Sadier has also had courses at U.C. Irvine. This native of Mexico has a Political Science/International Relations major with a minor in Spanish. Karla would like to work in the fields of Energy and Social Welfare in government. Karla, 20, will spend her nine months at the Ibero American in Mexico City. William Krummeweide will be going the spring barbecue. This event, continued on page 6

The Continuing Saga Of Tumbleweed Tech

Chapter XVI

Another battle for worshippers between the god of RockingRoll and the god of the Steady Beat took place at the province of Tumbleweed Tech last Thursday when both gods held simultaneous worship ceremonies in the Temple for Union.

Both gods were peaceful in the early evening as the god of RockingRoll gathered his flock together in the room where the spirited waters flowed. The multitudes gathered to listen to the words of wisdom and have a good time. And their numbers increased.

Later that evening, the god of the Steady Beat started his worship ceremonies in the same room and the worshippers arrived for those ceremonies. And they squirmed and wiggled to a steady thump, thump, thump.

And those who followed the god of the Steady Beat became angry. "They just want to sit around and drink spirited waters," they said of their rivals. "They don't care about anything else.

Those who followed the god of RockingRoll replied, "At least our god gives us words to listen to and think about," they said. "All your god does is give you a steady thump, thump, thump and wiggle to squirm to. You can't get much more mindless than that."

And the battle escalated.

The god of the Steady Beat decided to "crank it up" so his followers could put on their "dancing shoes", show their "hot stuff", "get down", and "boogie ooogie". But this did not phase the multitudes who were listening to the god of RockingRoll. For they had by now filled both the room where the spirited waters flowed and several others in the form of different gods, and the multitudes now comprised the "sounds of silence" about the "times that are changing".

Eventually, long after the god of RockingRoll was supposed to end his ceremony, he announced that he did have to leave. This disappointed the followers who were looking forward to seeing a show in their parting words,

"I'll be back," he said, "For it is written that RockingRoll has a here to stay."

-- Tim Hamre

Perspective

Blowing In The Wind

It was just another windy day here at Cal State as I attempted to make some sense out of this wind issue. While I was peering out of the window in the PawPrint office I happened to notice one of the College's electric cars going by the Commons. Not an uncommon sight on campus, I thought, except why was it moving backwards? Then I noticed that some talented individual had devised a zephyr engine to power wind. I hurriedly called Jane Fonda and Robert Redford to give them the good news, but they were both location. It was a good thing that I wasn't able to reach them, because at that moment I realized that I had forgotten to add a special steering mechanism to his creation. Something along the lines of a driver might have been a good idea. Powering vehicles isn't the only good thing about our windy conditions. They also keep out the smog that has a nasty habit of invading the valley. Too bad, though, about the fire being whipped up behind the campus by the same winds. Well, at least the wind is blowing the smoke away from the school.

A student suggested to me in the Union lounge that we should put up a big sail and mount the College on rollers and blow down to San Diego for the weekend. To this I had no objections, but when I questioned him on how we would get home, he replied that he had always wanted to go to Mexico. One other beneficial service the wind performs is in the entertainment field. Watching the people stagger against the wind from the parking lots to their classes is always good for a good laugh. A special treat for the more clueless males on campus is the fact that no matter how windy it is, some cute ladies show up for their classes clad in a windly whipping skirt.

Too bad I'm not there Friday since ther was hardly anyone here to enjoy it. One faculty member who was here was heard to add, "Blowing with this wind I thought A.S. campaigning had already started!!"

-- Mike Smith

Candidates for A.S. offices may advertise in The PawPrint. Inquire about details.
The Board of Directors sent Sulkin's funding request to the Appropriations Committee.

Kemenovich also discussed the possibility of providing additional equipment to add to their existing sound system. He explained that this would allow AS to put on their own discos and thereby save about $1,000 per quarter.

Other actions taken by the AS Board of Directors included the allocation of up to $120 to pay the PawPrint Supplement (appearing in this issue) covering candidates pictures and statements for the upcoming AS Elections.

The discussion on this issue produced heated exchanges between PawPrint Editor Mark A. Kemenovich and several members of the board. Members of the board stated they felt they were being blackmailed into paying for the supplement, one week before the issue was to come out.

Kemenovich responded by saying that the was "appalled" by these statements. He said that anticipating problems, he notified Elections Committee Chair Bruce Jeter on February 28 of the proposed changes and request for funds. Copies of his four-page memo, he said, went to the Dean of Students, Publications Board Chair, PawPrint Advisor and As President Kathryn Fortner.

Kemenovich stated his memo was immediately accepted and Jeter made arrangements to promptly place the item on the board's agenda. "As late as April 2, Fortner and I worked out details of payment," he added.

On April 4, however, Fortner approached the Publications Board questioning the request for funds. The Publications Board determined that this was not in their realm of decision at that time, and said the AS offices and Kemenovich had to work it out among themselves.

After the meeting, Kemenovich said he was angry because "thirty eight days separated my memo from the meeting, and it was also the third Board of Directors meeting since I had written the memo. It's evident that the AS Government made a mistake somewhere along the line and the situation at the Board Meeting was being manipulated to transfer blame from AS to the PawPrint."

The 10th anniversary of Earth Day will be celebrated here Tuesday, April 22 with a panel discussion by distinguished speakers and a variety of environmental information booths.

Supported by the Cal State chapter of the San Andreas Geographic Association, the event will take place from 10 a.m. to 2 p.m. in the Student Union multipurpose room and patio.

Information booths covering a wide range of environmental concerns will be scattered throughout the Student Union patio, where free literature, earth day buttons, biodegradable bumper stickers and more will be available, explained Jane Bennett of Crestline, graduate in biology, who is making arrangements for the event.

Among the organizations having booths at the event is the Alliance For Survival, the California Native Plant Society, Natural Audubon Society, California Conifer Recovery Program, the Mono Lake Committee, Cal State's Veteran's Club and Agent Orange, Second Forest, the Nature Conservancy, the American Citation Society, and the California Energy Commission.

Environmental concerns involving nuclear energy, solar energy, pollution, saving a variety of endangered species including the whales and much more will be represented.

From 12 noon to 1 p.m. in the multipurpose room, the panel discussion will be led off by Chuck Bell, environmental specialist for the San Bernadino County Planning Department.

His talk will include "An Energy Outlook for San Bernadino County." The status of various power plant and transmission line proposals in the county will be discussed, along with available alternatives to the county's energy problem.

Rick Eastvold, developer of "Desert Watch," an organization which patrols archaeological sites in the California deserts, will speak on the topic "Countdown for the California Desert."

He will show slides of wildlife and archaeology of the desert, emphasizing endangered species and increasing vandalism. He will also discuss his opposition to the Bureau of Land Management's proposed California Desert Plan.

Eastvold, a conservation chairman for the Sierra Club, recently held a meeting at the University of California, Riverside. Dr. LaPre, who has taught courses in biology and botany at UC Riverside and has worked as an environmental consultant, recently conducted a study of the San Bernadino Mountains.

Child Care Center Bid Awarded

by Mark A. Kemenovich

L.L. Neff Construction Co. of Ontario was successful bidder in the second round of bids to construct the new Child Care Center.

Their bid of $170,500 was within the limits of funds and it was reported that the company has agreed to include some of the features removed after the last bidding. Features had been removed to bring the cost of construction into line with funds available.

The County Board of Supervisors has already signed the contract and a job start meeting is scheduled for around April 15 with construction expected to start shortly. The building is supposed to be completed within 140 days and some grounds work has already begun to remove shrubs and trees at the construction site.

The U-shaped building with a circular drive will be constructed west of the Student Services Building which it will resemble in outside appearance. Forty children are expected to be accommodated and an outside fenced play yard will be available.

The Physical Plant reports that the job start meeting is waiting for contractor bonding and insurance verification. The job start meeting usually includes the architect, County and City administrators, contractor, school and the sub contractors. This meeting gives all parties an opportunity to get together to work out final details.

It is not known whether a ceremonial groundbreaking will be held.
Give us 1 hour.

We’ll give you the way to higher grades and more free time.

Would you like to:
- Raise your grade average without long hours over texts.
- End all-night cramming sessions.
- Breeze through all your studying in as little as 1/3 the time.
- Have more free time to enjoy yourself.
- Read 3 to 10 times faster, with better concentration, understanding, and recall.

Evelyn Wood’s new RD2 reading system makes it all possible.

Evelyn Wood works — over 1 million people, including students, executives, senators, and even presidents have proven it. A free 1 hour demonstration will show you how to save hundreds of hours of drudgery this year (as well as how to increase your speed immediately with some simple new reading techniques).

It only takes an hour, and it’s free. Don’t miss it.

Evelyn Wood will open your eyes.

LOCATION: THE SAN BERNARDINO CONVENTION CENTER, AT 303 NORTH E STREET IN DOWNTOWN SAN BERNARDINO.

The Village Idiot
by Shari Mills

Welcome back for the home stretch of the 79-80 school year. Since the Easter Bunny has come and gone, the only thing we have to look forward to this quarter is Memorial Day weekend! Already the village has been buzzing about who is going to go to Fort Ord this summer. Morongo will be holding its annual Pimp and Whore dance scheduled for the 25th of this month. Although prices will go to the best dressed pimp and whore, there will be no prizes given for talent! Additional programs for the Spring Dinner Dance. Shari Mills will be chairing this year's committee to arrange for the dinner and dance at an off-campus location.

Other events to look forward to include The Roommate Game on Wednesday the 22nd — Los Angeles Unified School District by appointment. — 9-4. Other events will be held on the Commons. Students are reminded that only those registered with the Placement Center and who have a final resume on file are eligible to sign up to interview those employers requiring appointments. Appointments may be made by contacting Ms. Michelle Melcher in the Placement Center (SS-116 or 887-7551). All students may visit with recruiters not requiring individual appointments. The recruiting calendar is as follows:

APRIL
Thursday the 17th — Federal Aviation Administration — 9-4
Tuesday the 22nd — Coachella Valley Unified School District by appointment — 9-4
Wednesday the 23 — Redlands Unified School District by appointment — 9-4
Wednesday the 23 — Western State University, College of Law — 9-4
Thursday the 24th — Wildfield School District, No. 3, Colorado Springs, Colorado, by appointment — 9-4
Friday the 25th — State Board of Equalization by appointment — 9-4
Tuesday the 29th — Allstate Insurance Company by appointment — 9-4
Wednesday the 30th — Security Pacific National Bank by appointment — 9-4

MAY
Thursday the 1st — Calexico Unified School District by appointment — 9-4
Thursday the 8th — Connecticut General Life Insurance Company by appointment — 9-4
Monday the 12th — Chico Unified School District by appointment — 9-4
Tuesday the 13th — Harris Company by appointment — 9-4
Wednesday the 14th — Swenson & Clark (Accounting Firm) by appointment — 9-4
Thursday the 15th — Internal Revenue Service by appointment — 9-4
Wednesday the 21st — Drug Enforcement Administration by appointment — 9-4
Thursday the 22nd — Los Angeles Unified School District by appointment — 9-4

Students participating in the program leave between August and September and spend one to two days of orientation in Long Beach before departure.

Participants apply at their home campus in February each year. Dr. Rydell told The PawPrint that a total of ten applications were taken over last year at Cal State System-wide, 681 students applied and 412 will be going abroad in the coming year.

A reception honoring the Cal State participants will be held late in May according to Dr. Rydell.

Students interested in the program should contact Dr. Rydell in L.C. 201 or Richard Rowland in SS-154.

Sprung Recruiting Schedule Announced

The campus Spring Recruiting schedule for the spring quarter has been established. Students are reminded that only those registered with the Placement Center and who have a final resume on file are eligible to sign up to interview those employers requiring appointments. Appointments may be made by contacting Ms. Michelle Melcher in the Placement Center (SS-116 or 887-7551). All students may visit with recruiters not requiring individual appointments. The recruiting calendar is as follows:

APRIL
Thursday the 17th — Federal Aviation Administration — 9-4
Tuesday the 22nd — Coachella Valley Unified School District by appointment — 9-4
Wednesday the 23 — Redlands Unified School District by appointment — 9-4
Wednesday the 23 — Western State University, College of Law — 9-4
Thursday the 24th — Wildfield School District, No. 3, Colorado Springs, Colorado, by appointment — 9-4
Friday the 25th — State Board of Equalization by appointment — 9-4
Tuesday the 29th — Allstate Insurance Company by appointment — 9-4
Wednesday the 30th — Security Pacific National Bank by appointment — 9-4

MAY
Thursday the 1st — Calexico Unified School District by appointment — 9-4
Thursday the 8th — Connecticut General Life Insurance Company by appointment — 9-4
Monday the 12th — Chico Unified School District by appointment — 9-4
Tuesday the 13th — Harris Company by appointment — 9-4
Wednesday the 14th — Swenson & Clark (Accounting Firm) by appointment — 9-4
Thursday the 15th — Internal Revenue Service by appointment — 9-4
Wednesday the 21st — Drug Enforcement Administration by appointment — 9-4
Thursday the 22nd — Los Angeles Unified School District by appointment — 9-4

Spring Recruiting Schedule

The campus Spring Recruiting schedule for the spring quarter has been established.

** Former International Program Participant Makes Good **

by Marilyn Hefflin

“Ever since I came to Cal State San Bernardino and got into the Economics Department, everything has just been peaches and cream for me,” states Charles McKenzie. After hearing his story, I was able to agree with Charles that things certainly have been going his way during the past two or three years.

Charles was an Economics major at CSUSB. During his time on this campus, he was President of the Economics Club and also served as an advisor to Dr. Ralph Charkins in the Economics Department. Charles saw a notice on one of the bulletin boards about an International Program wherein students from Cal State could be selected to participate in an educational program in another country.

Since his mother is Japanese, Charles has always felt a special interest in going to Japan, but when he discovered that the students would be attending Waseda University in Tokyo, this changed! If Charles had heard about Waseda University and knew that it was considered to be one of the best universities in Japan, Dr. Charkins encouraged him to apply and even helped him get a part time job through a Chancellor’s grant so that he could save money for the trip.

After going through several interviews, Charles learned that he was one of 15 students from the entire Cal State system who was chosen to spend a year at Waseda University. Charles discovered that the university was very different from Cal State. He said, “The shock was amazing. It was like going to an entirely different university with the big brick buildings and high towers. The professors in Japan lecture to you, they don’t lecture in class because of the cultural differences and the language barriers. Charles did have some adjustments at first. He recalls, “I wondered what I had done. I had been on a bus with 14 people that I didn’t know. I was going to an entirely strange school. I was terrified. That feeling lasted for maybe a week, then I began to realize that I had made the right move! For someone like me who wants to go into international business, the contacts that I made were very beneficial.”

Because his father was in the Air Force, Charles and his family had moved back and forth from the U.S. to Japan for several years, however, they had always lived on the Air Force Base and were usually isolated from the Japanese. He stated, “I wasn’t like being in America overseas. I didn’t pick up any of their culture or any of the language.” Since he felt that he had wasted those opportunities as a child, Charles was determined to make the most of his year in Japan. “Last year every minute was spent learning something of the culture or the language. Now I speak Japanese quite well,” he said.

One of Charles’ professors was in the Ministry of the International Trade Industry, and another was an advisor for the Prime Minister. The students were allowed to sit in on various meetings of the Japanese political leaders. Charles states, “I took classes in Japanese economics, finance and politics, and I’m convinced that I learned a bit about the Japanese system now, at least I know which party is in power.”

On his first trip through Tokyo, Charles was in for another shock — everything was so expensive! “A quart of milk was $2; a quart of orange juice was $3, and even lettuce was just out of sight: I took $1,000 with me, and that lasted me a few weeks,” he stated. Then Charles did what many of the other exchange students were doing: he got a part-time job. He became an English tutor and earned $50 per hour, and within a short time he had his own radio show and earned $200 per hour! The “peaches and cream” life has continued for Charles since he returned to California. Through contacts that he made at Waseda University, he has been employed by the Japan External Trade Organization, better known as Jetro, an agency subsidized by the Japanese government. Jeto is a branch of the Ministry of International Trade Industry (MITI) which has a great deal of influence over the Japanese economy. Jeto functions as an information and consulting source for American businessmen interested in doing business with Japan.

Charles is assistant manager in the Public Relations Department of Jetro. He travels to various American universities to present the Japanese system of economics and business and to explain the differences in the culture. Charles believes it is very difficult to understand the Japanese psychology. He states, “I tried to become Japanese last year. It was very difficult. I took flower arranging and tea ceremony to try to find out what the Japanese are thinking. The trip to Japan will have lasting effects on me, but even though I am Japanese, and I work for the Japanese government, I’m not Japanese.”

International Program...

continued from page 1

to Waseda University near Tokyo, Japan. Bill graduated from CSSC with a BA in History in 1975 and is currently a student with a special major in Education and Political Science. He has been to Japan before and is studying Eastern History and Culture. Born in Missouri, Bill graduated from Pacific High and now lives in Crealine. He is 25.

To be eligible for the International Program student must have a 2.75 GPA, be a junior during their time abroad, and for Germany, France, Spain, and Mexico pass a language competency test.

While in their host countries, students will live in dormitories, apartments, or families. They will study in special I.P. classes taught by professors from the host institution and may take regular courses from the host school during the second semester.

The cost to the student is $5,000 for the full nine months.

Applications Being Accepted For Sacramento Internships

Professor Elizabeth Moulds, CSU, Sacramento, announced today that the Sacramento Internship program is now accepting applications for Fall 1980 from students enrolled at all 19 state university campuses. Moulds, the program coordinator, explained that the state-wide program is a combined package of an internship within the state government and an internship in a California business, government and politics. The goal of this total immersion into the political scene is to give students a learning experience in public policy formation that would otherwise not be available to them.

The program which runs for one semester on the Sacramento campus, offers interns the opportunity to combine units of political science automatically transferred back to the student's home campuses through Intra-system Visitor Agreements. Students must secure additional units may select courses from any of the CSU, Sacramento offerings.

Since the program began 5 years ago, interns have been placed in offices representing nearly every aspect of state government. Many program alumni who now number over 250 are currently working in Sacramento at law firms, consultancies, or legislative staffs. Interested students should contact Dr. Carol Goss at 887-7256. Information can also be obtained directly from Professor Moulds through the CSU, Sacramento Department of Government, 6000 J.J. Jay Street, Sacramento, California 95819. The application deadline is Wednesday, April 30.
Chris Villa, the new outreach counselor for the Educational Opportunity Program, has a tall order there is now. "The time to begin thinking about what you want to achieve in life and formulating a plan for getting it there is now."

Because of the many different directions students can go these days, Chris encourages them to thoroughly research all of their opportunities.

As an outreach counselor, Chris travels to high schools and junior colleges searching out this type of student. By definition, the EOP seeks to provide individuals from disadvantaged backgrounds, who lack the high school grades or college entrance scores to qualify for admission to the college. These individuals include low-income persons, ethnic minorities, and those who experience language or cultural barriers.

By providing admission assistance and supportive services, the EOP makes it possible for them to pursue a college education, he explained. "From the time a student first applies to the college to the time he or she graduates, EOP is there to help," Chris explained.

The EOP staff realize that students require a variety of supportive aids to meet changing academic needs. For this reason, EOP provides a comprehensive program of services which includes orientation activities, academic advising, tutoring, counseling, financial aid and workshops to improve reading, writing and study skills. "Our goal in EOP is to insure the success of our students," Chris explained.

And who can speak better for the program than Chris himself, a Chicano and former EOP student at the University of California, Irvine.

Chris is like other EOP students in that he comes from a low-income background. He was very motivated and active in school however, and had strong family guidance. On a scholarship, he attended a private high school in Los Angeles, Loyola. He then went to UC Irvine and earned a B.A. degree in Social Ecology.

Eventually Chris would like to pursue a career in law, but for now he wants to help students who come from backgrounds similar to his and in many times much worse. The strongest asset he brings to his new position is the fact that he has been an EOP student and is very familiar with the type of student for which the program is designed.

"Having been there, I know what the EOP student is looking for and what type of motivation is needed," he said.

"I'm not trying to sell the idea of college as the only way to go," he emphasized. "I realize there are many options available to students these days. But college is a very worthwhile consideration and for students from disadvantaged backgrounds, EOP can help open the door."

Students interested in more information about EOP at Cal State, are urged to call the college this spring for information about the fall 1980 quarter. The number to call is 887-7395.
Careers in Health Care Open Up

continued from page 1

Counseling patients on birth control.

Career Guide reports that two years of college, with an emphasis on science, followed by two years of medical experience, such as a "nurse" or "technician," are the typical requirements to receive a "Credential of Certificate, associate degree, or BS degree" to become a Physician’s Assistant.

In addition to the social, scientific, art, and business side of Health careers, one fond of math and engineering might enjoy being a Biomedical Engineer. According to the pamphlet “200 Ways to Put Your Talent to Work in the Health Field (National Health Council, 1740 Broadway, New York, N.Y. 10019), these professionals "design patient care equipment such as . . . pacemakers (and) electrocardiograph machines which record heart action."

The Bachelor of Science degree in Physics offered by Cal State, as well as alternative Bachelor’s programs in engineering or a related biological science are the minimum routes one must take to reach this goal. A Master’s degree is required for some programs.

The Health Careers of Biomedical Engineer, Physician’s Assistant, Nurse Practitioner, Medical Illustrator, and Business Health are but a few among the multitude of careers opening up in the second largest industry in the United States, Health. The interested person who does not investigate them further is missing a bet for a career in a new and growing field.

Will Have A
CAL STATE NIGHT
to help celebrate the college’s 15th Anniversary
Wednesday, April 23

Special Prices
for the evening will include
