PHYSICAL PLANT ACTS TO SAVE ENERGY THROUGH CUSTODIAL HOUR CHANGE

The College's Physical Plant will put into effect, beginning Monday, December 17, a program which will result in substantial savings of energy.

By moving up the work hours of the College's evening custodial staff two hours, with night custodians reporting to their respective areas at 2:30 and working until 11 p.m., savings in use of electricity in building interiors, parking lots, walkways, roads, heating and/or air-conditioning will result, according to Herbert Brown, Physical Plant Administrator.

Office and classroom personnel might suffer slight inconveniences such as sound from vacuum cleaners or waxers, but it is hoped that members of the College community will understand the importance of the need for the new working hours and cooperate.

All buildings, consequently, will be darkened two hours earlier each night and heating or air-conditioning will be turned off two additional hours sooner.

No classes will be cleaned while occupied and where possible, no offices. Work will be done in unoccupied areas wherever feasible.
