It has been accepted for inclusion in Paw Print (1966-1983) by an authorized administrator of CSUSB ScholarWorks. For more information, please contact scholarworks@csusb.edu.
Nine students selected for overseas study

Nine students from Cal State, San Bernardino will study overseas during the 1982-83 academic year under the CSU international program. They are: Lisa Christensen, a junior this year majoring in business administration, who will study at the University of Copenhagen; Jim Daly, junior, business administration, Waseda University, Japan; Bridgette Duggan, junior, Spanish, University of Madrid; Iresema Guzman, senior, liberal studies, bilingual/cross-cultural, University of Madrid; Beatriz Montano, junior, business administration, Ibero-American, Mexico; Bernice Morrison, senior, French, University of Aix, France; Kirsten Noerr, sophomore, political science, University of Uppsala, Sweden; Susan Paull, junior, history, McGill University, Canada; Debra Thompson (who this past year attended Ibero-American University through the program), senior, Spanish, University of Madrid; and Son Kim Truong, senior, French, University of Aix.

The participants were selected on the basis of their ability to adapt to a new cultural environment, their home campus recommendations and their academic record. Selection is competitive and final decisions are made by a statewide committee of faculty members. Dr. Mireille Rydell (French) is the program coordinator for this campus.
Letters to the Editor

Letter to the student body

The California State Student Association has asked the Associated Students of CSCSB to take a position of support or non-support for the Senate Joint Resolution, number 49, authored by Senator Watson and co-authored by Senator Garamendi. The bill is calling for the President and Congress to make a commitment to advance worldwide reduction of nuclear arms.

The AS Board of Directors will vote on the bill at their next meeting. If you have an interest in this issue, please advise your school representative or attend this meeting.

The Board will also address the role student organizations should or should not play in addressing legislative bills concerning “the soaring cost of utilities.” Please remember that all AS Board of Director meetings are open to the public.

Elise Traynum
AS President

Keep Climbin’

by Larry Fehrenbach

Now that summer is rapidly approaching, finals are right around the corner and most of us are waiting expectantly for a break from classes, (studying and taking exams), but we should take this opportunity to recall the achievements we’ve made and the steps we’ve taken over the school year.

First, congratulations to all those students graduating this June. Also best wishes and thanks to Dr. Pfau who is retiring this school year. Over this past academic year we have made some significant developments expanding the services of our college and also developing a better more involved and concerned attitude and an improved atmosphere here at the college.

Since last fall the library has been given a new name; The Dr. Pfau Library. Also, the Office for Students with Disabilities has opened its new quarters in the library, many new clubs such as the Students for Economic Democracy have been organized and most of the previously existing clubs have grown and become better developed. Even the Alumni Association acquired a new chapter: The Education Chapter.

Over this academic year we have had some exciting and informative activities such as the Spring Festival and the lectures by Dr. Fouts and Dr. William Glasser. There have also been numerous productions put on by our Music and Theater Arts Departments.

The Pawprint under the very capable direction of Rebecca Weldon and Debbie Weissel has improved in its ability to both inform and stimulate its readers. I believe that our students this year have been more involved and more active in improving campus and in voicing their concern. The campus has also made some significant developments expanding the services of our college and also developing a better more involved and concerned attitude and an improved atmosphere here at the college.

The college experience is a vibrant force running through the fabric of all our lives, and we should always remember that this is our school and it will require our input, time and dedication to serve all our needs best. The quality of life here at Cal State can only become as good and meaningful as we, the students, choose to make it.

Theatre majors awarded scholarships

Thirteen theatre arts majors received scholarships this academic year, at Cal State, San Bernardino.

The scholarships were awarded to recognize excellence in students who have actively engaged in departmental activities. They were made possible primarily by the patrons of the Players of the Pear Garden, the campus drama club.

Honored were: Michael Galyon and John Higley, seniors; William Greetley, sophomore; Wendy Jo Murphy, freshman; and Veronica Smith, Junior, all of San Bernardino; Dawna Gregory, senior, Apple Valley; Mary Manthis, sophomore, Highland; and Lisa Scuderi, freshman, Huntington, N.Y.

16th Commencement ceremony

The 16th commencement ceremony for Cal State, San Bernardino will begin at 9 a.m., Saturday, June 19, on the lawn south of the college gymnasium.

As in the past, the ceremony will have no guest speaker in order to allow each graduate to receive personal congratulations from President John M. Pfau.

Dr. Pfau, who is retiring this summer after 20 years with the college, will deliver his final commencement message as its president.

In addition to conferring degrees upon the graduates, he will present the outstanding professor award to Dr. Frederick A. Newton of San Bernardino, associate professor of psychology.

The invocation and benediction will be given by Maura O’Neill, chaplain with the Newman Center of San Bernardino. Faculty escorting the graduates, faculty and platform party will be Dr. Judith Rymer of San Bernardino, professor of education, as faculty marshal; Dr. John Chaney of San Bernardino, associate professor of business administration, student marshal; and Dr. William Slout of San Bernardino, professor of theatre arts, college marshal.

Music will be provided by the Wind Ensemble, directed by Keating Johnson of San Bernardino.

The staff wishes you a fine summer and hopes to see you all again in the Fall.

This is the final issue of the PawPrint for 1981-82.

The staff wishes you a fine summer and hopes to see you all again in the Fall.
Outstanding Professor: Dr. Fred Newton

Research dealing with biofeedback is being conducted under the supervision of Dr. Fred Newton of our Psychology Department. Utilizing a biofeedback laboratory that was three years under construction, Dr. Newton and his students have conducted unique types of research.

Dr. Newton describes biofeedback as "the use of instrumentation for measurement of physiological responses that are not observable." Responses of the nature that can be dealt with in biofeedback research can be found in animals as well as humans.

Student projects have included an attempt to increase electrical impulses in the limbs of a quadriplegic young man. The project's objective was to teach the limb how to increase its own electrical output. An increase was gained and movement was increased, though not as much as had been hoped for during the actual project. However, electrical impulses increased, as did range of motion, after the actual project ended. Carl Coolbaugh is the student who conducted the research just described, and his research will be published very soon. Carl has the distinction of being the first researcher to explore this area of biofeedback.

Another student of Dr. Newton's, Rich Newman, has conducted research into the potentiality of the brain to produce two different states, utilizing the two separate hemispheres of the brain simultaneously.

Both inquiries were successful, in that the questions asked were answered in the affirmative and further research can be done along the avenues already explored. Coolbaugh's research is based on empirical data; research based on experimentally derived and observable findings. Newman's research is much more epistemologically significant in that its audience will tend toward results of esoteric value.

Dr. Newton's background allows him to function and guide students on both levels of inquiry. He has a strong Liberal Arts background as a result of a rigorous program of study at St. Peters College, New Jersey. St. Peters is a Jesuit administered and taught college, and Dr. Newton's diploma is printed in Latin. Though his first interest was in chemistry, he evolved into a natural science major and pursued his M.A. at Villanova University, in psychology. Participating in research and doing student teaching, he studied for and attained his doctorate at the University of Houston.

Utilizing his background in liberal arts, research, and his training in psychology, Dr. Newton has played a major part in developing what is considered one of the finest overall biofeedback research facilities in Southern California. Citing Dr. Fred Keller (Physics), Dr. Niccol Khoklov (Psychology), Cliff McDonald (Psychology), and electronics technician Cornell Ormsby, Dr. Newton expressed gratitude for all the help he has been provided with during his work with the facility.

In order to further expand the efficiency of the lab, a request has been made for a microcomputer to make even more sophisticated analysis of results gained in the lab a possibility.

Any campus students, regardless of major, interested in participating in research projects are encouraged to contact the Psychology Department when notices of experiments are posted. These experiments are usually conducted by senior level and graduate students.

Dr. Newton's contribution to our campus community, like so many others, goes largely unnoticed outside the actual department in which he works. We of the Pawprint just thought a few of you might like to know about it.
**The Nursing Program—a lesson in supply and demand**

by Viki Chavez-Regeski

The Cal State San Bernardino nursing program is doing its share to keep pace with the changing face of nursing, and that means trying to recruit more people.

Dr. Mary G. Patterson, a professor of nursing and the department chairperson, said both the new opportunities in nursing and the demand for nurses are the impetus.

"This profession has only about a one percent unemployment rate and that usually just reflects the people who are changing job locations or positions," she said.

"All you read about in the newspapers is the shortage of nurses," Patterson said.

As the population of elderly persons increases, the need for nurses increases as well, she said.

"But that portion of the population is not the only one in need of services. There is a desperate need for nurses who are bilingual in Spanish or Vietnamese or Cambodian and other Mid and Far Eastern languages," Patterson said.

And nursing opportunities aren't limited to women.

"Men are also desperately needed. Operating room nurses and industrial nursing are two fields male nurses tend to like in particular," she said.

There are currently 20 men enrolled in Cal State's nursing program.

To further illustrate the need, Patterson told of a letter she received from a state prison requesting her assistance in obtaining a nurse for the facility. But she couldn't help because all the students were already committed to full or part-time jobs, and to supporting families.

Because so many of the students work, nursing program classes are scheduled for both day and evening hours.

The classes offer variety, with such course titles as "Trends in Nursing Care," "Roles and Education," "Health Care of Women," "Nursing Care of Children in the School Setting," "Psychosocial Nursing," "Community Health Nursing," and "Nursing Research.

In addition to offering a two-year program leading to a Bachelor of Science degree with a nursing major, the program also offers a public health nursing certificate. The certificate enables the nurse to work in schools, industries, communities and as a visiting nurse.

It also prepares the student for graduate work in nursing administration, nursing education or in clinical specialties, such as pediatrics, public health or care of women's health.

Patterson said the department's enrollment has risen dramatically since the program was first accredited by the National League of Nursing three years ago. In August 1979, the department had nine full-time and 125 part-time nursing students.

Current enrollment is 246 students, one-quarter of whom are enrolled in the remainder part-time. Full-time student enrollment figures are increasing, Patterson said.

The nursing program is competitively selected in June by the college for the National League of Nursing in 1973. The study outlined the organization of the proposed department and its faculty, its financial support, administrative policies, the needs of the area, student and faculty responsibilities, and an overview of the curriculum.

The first students were admitted during the 1974-75 academic year. The program was accredited by the League in December 1979 for a six-year period.

Several factors contributed to the program's development. For example, a 1979 department report showed that the number of community college nursing graduates in the San Bernardino-Riverside area doubled from 1970 to 1978. It estimated that one-third of those graduates would pursue a B.S. degree with a nursing major. But the nearest public college offering such a program was California State University, Los Angeles.

Patterson said many residents of small communities in the desert and mountains now must drive many miles to get health care. A visiting or community nurse is desperately needed in those areas, she said.

One desert community even equipped an office to help lure a nurse to its area, Patterson said. All that, plus many letters from area nurses urging the establishment of a program, helped push the department through the academic planning stages.

Since then, it has continued to evaluate and update itself, Patterson said.

Requirements for admission to the program include the following:

- Complete an associate degree in nursing;
- Hold a current license as a registered nurse;
- Have junior status at Cal State;
- Complete one college-level course each in the areas of chemistry, mathematics, microbiology, anatomy and physiology and growth and development;
- And have one year's work experience as an R.N.

Additional information on entrance tests, grades, transfer units and application procedures is available in the department's brochure or by calling the department at extension 7366.

Information and support for student nurses is also available from the Cal State R.N. Association, which meets at noon Wednesdays in the Student Union.

**Concert on the Green**

A free Concert on the Green for people of all ages will be presented by the Cal State, San Bernardino Festival Orchestra and Chorus on Sunday, June 13. This special outdoor event is the second President's Campus and Community Festival Concert and will be dedicated to Dr. John M. Pflau, the college's founding president, who is retiring in July.

The program will begin at 7:30 p.m. on the Commons patio. Some chairs will be available, but the community is invited to arrive early and bring a picnic dinner and lawn chairs or blankets. The grassy area surrounding the patio forms a natural bowl for the concert.

Accompanied by brass, the Festival Orchestra, which consists of community members and students, will perform the remaining selections, seldom heard in the area. Dr. Richard Saylor, professor of music, will conduct.

Jane Cochran, a senior from San Bernardino, will be featured during Albion's "Concerto for Oboe," an early 18th century baroque composition generally considered his finest oboe concerto.

Kathy Argues, a senior from Rialto, will be featured at the piano during "Le Carnaval d'Aix," an early 20th century suite by Darius Milhaud. It combines 12 short and happy pieces composed for the annual carnival at Aix-En-Provence, France.

The Festival Orchestra will conclude the program with Schumann's lively and romantic "Spring Symphony."
Pictured above from left to right, top row: Kathleen Coles; Debbie Hansly; John Hoge, Tom Thornsley; Debbie Weissel; Ken Johnson; front row: Rebecca Weldon. This is the staff that actually put words to paper, pictures to film, laid it out, corrected it, and tried very hard to make it all come out a little bit better each time.

Absent from picture are Alyce Churchill, Kimberly Obbink and Gerald Colunga.

425 pay tribute to Dr. Pfau

More than 425 members of the community paid tribute Friday evening to Dr. John M. Pfau, who is retiring after 20 years as president of Cal State, San Bernardino.

Clamoring the evening was the announcement of the naming of the College of Letters and Sciences in honor of President Pfau. Dr. Glenn S. Dumke, chancellor of The California State University, said the Board of Trustees unanimously approved the action even though it has a long-standing policy of not naming buildings for people until they have been dead or retired for at least a year. The John M. Pfau Library is the first building on the San Bernardino campus to be named after an individual.

A portrait of Dr. Pfau, to be hung in the Library, was unveiled by Carol Berschbach, chairman of the College Advisory Board, and Mrs. Lorraine El-Ahiraf, past president of the Cal State Alumnae Association. The oil painting by artist Maxine Olson of Cal State, Chico shows the president in a relaxed pose.

They noted that Pfau's history as founding president of the college was outlined by master of ceremonies James K. Guthrie, a community leader, symbol, and supporter of the college, former publisher of the Sun-Telegram, and personal

Campus Children's Center

by Vidi Chovez-Regeski

One of the newest facilities on the Cal State campus will be the Youngest segment of the population.

Most of them can't read or write, but they communicate well with hugs, smiles and tears.

They can be found at the Children's Center, located west of the Student Services Building.

The center, which opened in its new building Jan. 7, 1981, provides care for children two to 14 years. But the majority of the youngsters are from two to five years old.

They are entertained during the morning hours with a pre-school program that teaches shapes, colors, numbers and other skills. The center also provides the youngsters with breakfasts, hot lunches and snacks. Naptime is another important part of the schedule.

Maggie Ongaro, the center's director, is very happy with the facility.

"The center is a definite asset to the campus," she said. "If it weren't here, many mothers couldn't go to school."

The majority of the children come from single-parent families in which the mother is a student. Three fathers have youngsters enrolled in the program. All participating parents must volunteer some of their own time to the center for each child enrolled.

The center's enrollment requirements are established by state regulations. Parents who are students are given first consideration.

The fee is determined by family income, the number of people in the family and by a sliding income scale that is provided by the state. All those wanting child care, including parents who had children in the program the previous year, must enroll each fall. Then, according to state requirements, an enrollment list is developed and priority is given to those with the earliest application dates.

The average daily attendance at the center is 30 children, but the official enrollment is 52, Ongaro said. The center is open from 6:30 a.m. to 6 p.m., since the children come and go at varying times through the day, Ongaro said. During the morning, most of the youngsters fall into the two- to five-year age group, Ongaro said. a smaller group of youngsters up to age eight.

The center is staffed by three teachers, 12 aides and the volunteer parents. All the teachers have children's centers background. Since the center opened, two teachers are working on B.A. degrees and one has an A.A. degree, Ongaro said.

Ongaro has worked as a child care program director for three years. She holds an A.A., a B.A. in early childhood development and has done work for a masters degree. She is thinking of going on to graduate school to further her child care education. She taught first grade and worked at a children's center in Colorado before taking the Cal State job.

"Aides to the center are mostly work-study students who have been with the program an average of two years. They are not required to hold any permits. There is no nurse at the center, but all teachers are trained in first aid and the recognition of illnesses.

Student nurses from the Cal State nursing department visit the center to perform health checkups on each child, Ongaro said.

The annual Juried Student Art Show will open with a reception in the gallery from 7 to 10 p.m. Monday. The Art Club will provide refreshments and live music.

Judging is being conducted today for the four outstanding pieces. On display will be works in ceramics, glass, drawing, painting, graphics, jewelry, metal sculpture, print making, photography, wood, weaving and fiber.

In addition to the show, the Art Club will open its student gallery in VA 102 for two weeks. The gallery runs from 7:30 to 10 p.m. Monday, and 11 a.m. to 5 p.m., Tuesday and Wednesdays.

Work: History and effects

The history and the effects of work, as depicted in the arts, will be the topic of a lecture by Jean S. Felton, M.D., an authority on occupational health

Tributes were paid by Dr. Pfau's assignment in 1962 to "create a college out of something, literally, more than a few scraps of legal document," to the selection of the campus site in the foothills north of San Bernardino, to the beginning of classes in 1965 and the educational philosophy that still exists today.

Among the highlights of the evening were a musical tribute to Dr. Pfau by the Chamber Singers of Cal State, San Bernardino, directed by Dr. Loren Filbeck, and a performance by operatic tenor Val Stewart of Antreen, a B.A., and wife, Dr. Loren Filbeck, and a performance by operatic tenor Val Stewart of Antreen, and administrative assistant to Lewis, who added her personal note, from the perspective of a former student, that 'not only have you succeed, but you did it with a 4.0.'

Dr. Pfau's plans for the future include travel and then return to the classroom. Dr. Felton will continue to teach history. He and Mrs. Pfau will continue to reside in San Bernardino.

Juried Student Fine Art Show

The annual Juried Student Art Show will open with a reception in the gallery from 7 to 10 p.m. Monday. The Art Club will provide refreshments and live music.

Freestyle Karate

A summer extension course emphasizing freestyle karate as a sport rather than as a combative activity will be offered at Cal State, San Bernardino beginning June 23.

Willis Neck, lecturer in physical education, will teach students the Shorin-Ru Okinawan system. Self-defense techniques will be explored. Basic techniques from Thailand are in free association with Okinawan system. Self-striking, striking, and kicks will be offered.

Courses for teachers in the desert

Seven courses leading to a master of arts degree in education will be offered by Cal State, San Bernardino through its extension program at the College of the Desert beginning in June.

"Teaching Learning Handicapped Students" will be offered by Professor Alex Weis. The class will meet from 6-8 p.m., Mondays and Tuesdays, beginning June 23. Registration is required by June 16.

"Reading in the Desert: Academic and Personal Development" will be offered by Professor Sylvia Kordich. The class will meet from 6-8 p.m., Mondays and Tuesdays. Registration is required by June 16.

"Creative Curriculum for Young Children with Handicaps" will be offered by Professor Sylvia Kordich. The class will meet from 6-8 p.m., Mondays and Tuesdays. Registration is required by June 16.

"Upward Bound program"

The curriculum will include English, mathematics, reading, social studies, study skills, and personal development classes. Individual counseling, tutoring, physical education, and social activities are part of the program.

"Extension courses for Nurses"

Two extension courses for nurses will be offered at Cal State, San Bernardino beginning June 23.

"Crisis Intervention for Nurses" will be offered by Professor Alex Weis. The course will meet from 5-9 p.m., Mondays and Tuesdays. Registration is required by June 16.

"Hand Health Assessment for Teachers" will be offered by Professor Alex Weis. The course will meet from 5-9 p.m., Mondays and Tuesdays. Registration is required by June 16.

"Classes for teachers of disabled youth"

A class for teachers of young children with disabilities and another for teachers of the language arts will be offered by Cal State, San Bernardino through its extension program beginning in June.

"Assessment, Planning and Programming for Young Children with Handicaps" will be offered by Professor Alex Weis. The course will meet from 5-9 p.m., Mondays and Tuesdays. Registration is required by June 16.

"Creative Curriculum for Young Children" will be offered by Professor Alex Weis. The course will meet from 5-9 p.m., Mondays and Tuesdays. Registration is required by June 16.

"School Community Relations" will be offered by Professor Alex Weis. The course will meet from 5-9 p.m., Mondays and Tuesdays. Registration is required by June 16.

For more information, contact the Office of Continuing Education at 887-7664.
Pouring bronze for lost wax casting was one of the activities students were involved in for weeks preceding the Student Juried Art Show.

**Positions Available**

**Activities Director**

**Executive Assistant**

**Activities AD** - Applicants must have administrative abilities and a strong interest in developing diverse student activities. Must have some knowledge of student government and Cal State, San Bernardino.

**Executive EA** - Applicant must have a strong background in Student Government and willing to make necessary commitment. Willing to put in summer hours. Typing skills necessary. Must have some knowledge of the CSUC and the structure of higher education in California.

**Application deadline - June**

**Classifieds**

**House for sale** near Cal State

$82,000 assume at 9 and one quarter percent. 3 brm., 2 baths, kitchen, DR, LR, FR, 2 and one half years old. Call Los Angeles at 887-6333 ext. 306.

If you had your picture taken at the Sadie Hawkins dance on May 27, please see Terry Swindell in Joshua rm. 231. Melody Mason in Joshua rm. 112.

**For Sale:** 1980 Toyota Tercel, Air, AM-FM cassette, equalizer/booster. Excellent condition, $4,200 or best offer. Call 887-9505 after 9 p.m.

**Typing Service:** Professional, fast, grammar corrected. Resumes and papers. Reasonable rates. Call 884-1596.
