CSUSB's budget is in a crisis state due to a loss of revenue in excess of $1 million. The loss is attributed to a decline in enrollment of resident and non-resident students.

The declines are thought to be influenced in part by a 40% welfare rate in San Bernardino and intense increasing competition for new college students.

San Bernardino County has the lowest percentage of eligible students attending college in the state of California (34.7%), compared to Orange County (51.6%). This may be due to the scarcity of funds available for scholarship and grant programs. California has a population of approximately 30 million and $234,500,000 allocated for student financial assistance. This is significantly lower than the $646,000,000 allotted to New York's population of only 18 million.

Two meetings have already been held, and two more are planned. At the last meeting, four vice presidents gave brief presentations on their budgetary needs.

During the meeting, each division presented their lists of "critical needs." The amount required to pay for all of these needs is more than $2 million, which is more than will be available. The purpose of these meetings is to determine which needs may be cut from the budget.

The next meeting will be held Friday, April 19. Students interested in attending the meeting should contact the Chronicle at (909) 880-5000, ext. 3940 for the time and location.

In California's primary election on Tuesday, March 26, Proposition 203 passed by 62%. In 1992, a previous attempt to pass a similar bond was defeated. Proposition 203, a $3 billion education bond measure, will provide much-needed money for California's schools. The money will be distributed to elementary and secondary schools, community colleges, the California State University and University of California systems.

According to the CSSA Bulletin, $2 billion will be allocated to elementary and secondary schools, community colleges, the California State University and University of California systems. Approximately $80 million for telecommunication projects, and $128 million for upgrading existing facilities, new buildings, and campus growth, according to the CSSA Bulletin. At CSUSB, the Commons and Visual Arts Buildings are two possible future projects for seismic upgrading. Colleen Bentley-Adler, the CSU's Public Affairs representative, stated, "This is a real indication that the voters think that something can be done about improving schools."
Hug a Bunny or Save Some Money?

By Christopher Hoback
Executive Editor

The environment is important to all of us, even those of us who value the economy. Preserving the lives of endangered species and protecting our natural resources and plant-life are important considerations. However, sometimes environmentalists are as guilty of sabotaging the economy as big-business is of destroying the environment.

We can probably all agree that saving endangered species is an admirable task. The area where most people disagree is over how much protection we as a society should give. Do we really have to save every rat, bird and bug that is in danger of extinction, even if it means drastic increases in taxes or some other detrimental effect on the economy? I believe that the economy and those it affects must also be considered in environmental policy.

Not too long ago, a building development in the Inland Empire was held hostage by the Stevens Kangaroo Rat. These rats were not armed, nor were they carrying explosive devices, rather their weapon was the ESA (Endangered Species Act).

Bottom right—Cadet Mike Ward instructs fellow AFROTC members in marching exercises.

Honest Cadet Returns Money

By Barry J. deCocq
Special to The Coyote Chronicle

What would you do if you stopped a robbery and found you were in control of a bag with $10,200 in cash inside?

It happened to Cadet Michael Ward of Det 055C, Cal State University, San Bernardino, and he knew exactly what to do. He immediately turned it in to the local police.

Ward was out for his usual early-morning run when he noticed a man tampering with the lock on a car door. Thinking that the man looked very suspicious, Ward yelled, "Hey, is that your car?" The man immediately stopped what he was doing and ran off with one of two bags he had by his feet.

Ward immediately went over to the bag and looked inside. What he found was $10,200 in cash.

"I couldn't believe what I was seeing! I had never seen that much money before in my life," said Ward. "I knew I needed to get home fast with the bag and contact the police."

Ward contacted the Anaheim Police Department and turned the bag over to them. The bag had been stolen from a car that was previously broken into and the would-be robber was working on another vehicle when Ward caught him.

The money was returned to its owner, a local high school student who had received the money from an inheritance and was going to use it to purchase a car.

The other bag, which contained a similar amount of money, was not recovered.

The department commended Ward's honesty. "He is a kind, courteous individual with the utmost integrity. This is the type of person who makes our job as police officers worthwhile." Police Chief Randall Gaston personally thanked Ward for his honesty.

Ward did not accept the reward offered by the Anaheim Police Department for the return of the money, stating, "I don't feel I should accept money just for being honest."

Ward did not complete his usual run that morning, but did note that he made it home from that spot in record time.
Job Fair Held Today

For the first time ever, Disneyland will take part in the annual Career Opportunities Fair coming April 17 to Cal State.
The 10 a.m. to 2 p.m. event, which takes place in the Student Union Events Center, will bring representatives from more than 65 private companies and government agencies. Representatives will take resumes and, in some cases, schedule interviews with prospective employees.

Businesses and companies include: Riverside County Department of Environmental Health, Riverside County Sheriff’s Department, American Bus Inc., California Highway Patrol, Canaundia Wine Co., Center Chevrolet/Geo, Circle K Stores Inc., Sav-On Drugs/Osco Drug, Community Hospital, Toyota Motor Sales, Federal Bureau of Prisons, Trident Data Systems, Loma Linda University Counseling and Family Science, La Quinta Resort & Club, L.A. P.D., Miller’s Outpost, Office Depot, Pizza Hut, and the Career Development Center.

“We encourage companies to have jobs available,” says Paul Esposito, who is coordinating the event out of the university’s Career Development Center. “But that’s not a requirement for them (the companies) to attend.” The emphasis, he explains, is on exploring career opportunities.

Most of the businesses are from Southern California, and last year more than 1,000 participants from the general public came to the campus. Questions should be directed to Esposito at (909) 880-5250.

Central Director Appointed

Dr. Rowena Santiago, Associate Professor of Education and coordinator of the Master of Education option in Educational Technology, has been appointed Director of the Teaching Resource Center, an organization created last year by the Faculty Senate to promote and support innovation in undergraduate and graduate classroom instruction.

Santiago will work closely with Keith Johnson, Director of Faculty Development, to engage faculty in a variety of new on-campus and statewide initiatives.

The goals of the Center include assisting faculty seeking to develop more effective teaching styles and strategies; serving to add impetus to training of faculty in the use of technology for classroom instruction; offering programs to assist faculty in acquiring knowledge and skills in multiculturalism, cooperative learning, assessment and other emergent interests; and funding development activities.

Santiago, who completed her doctorate at the University of Georgia, has had extensive educational experience in distance learning and instructional technology. In addition to fluency in English and Farsi, she can also speak Japanese and Spanish. She is the author of numerous articles on instructional curricular design and use of computers in the classroom.

Morale Discussed

By Kristen DeCicco
Coyote Chronicle Staff Writer

Disgruntled technicians, secretaries, and a few faculty members are concerned about the direction of the San Bernardino police department.

Employees contend they lack power in the decision-making process and have little support from the bus riders.

The early age of 14 when he served as a police explorer for the San Bernardino police department.

Brown also spent 10 years serving the city of Colton as a reserve police officer. He has experience as a welcome addition to the campus community. Biographies are available on the bus, or by calling Omnitrans.

New Natural Sciences Dean Hired

Dr. William B. Wehrenberg has been announced as the new Dean of the School of Natural Sciences, effective August 1. Wehrenberg brings to our campus a distinguished record of scholarly and administrative accomplishments.

Wehrenberg will assume the position currently held by Dr. Kevin A. Branch, who will return to his position as chair of the Department of Biology.

Wehrenberg earned his B.S. in chemistry from Valparaiso University, M.S. in Biological Science from Purdue University-Fort Wayne and his Ph.D. in Endocrinology- Reproductive Physiology from the University of Wisconsin-Madison.

He completed a two-year Post-Doctoral Fellowship at Columbia University before joining the Salk Institute as an assistant professor.

Wehrenberg has served the past seven years as the Associate Dean of Research, School of Allied Health Professions at the University of Wisconsin-Milwaukee.

Previously he was Chairman of the Department of Health Sciences as well as a Visiting Professor at the University of Geneva, Geneva, Switzerland. As Professor of Health Sciences, Dr. Wehrenberg has been the recipient of numerous research and teaching awards including a Fulbright Research Scholar Award, University of Bordeaux, Bordeaux, France.

Deadline Approaches for Graduation

The deadline to register for the Third Annual African/African-American Graduation Ceremony is April 30. Undergraduate and graduate students of African descent will be recognized for their achievement at the university.

The ceremony is open to the campus, and all students, faculty, and staff are invited to attend. The cost is $10 per person. The event will include entertainment, speakers, and a buffet. Contact Denise Earl-Bush at (909) 880-5567.

New Officer Hired

The Department of Public Safety has filled its last open officer position with Jimmie Brown. Brown was a Deputy Sheriff for the Riverside Sheriff’s department where he was a Deputy Sheriff for the past five years. Brown started his law enforcement career in 1976.

Bike Racks Installed

By Jennifer Harvey
Coyote Chronicle Staff Writer

This program is a great opportunity for students as a travel option. Omnitrans, the San Bernardino Valley’s public transit agency, now offers its Bike and Ride program.

As of April 1, bike racks have been installed on all local route buses, allowing people to carry their bikes on the bus. This program is designed to make traveling easier and is no extra cost to the bus riders. Each bus has a front-mounted bike rack which can carry two bikes.

According to General Manager, Duran Rall, “We’re hoping this new option will make our service more accessible to more people.”

It offers both physical fitness and economical transportation in one. Daily commutes can now consist of part bus ride, part bike ride.

It is suggested that riders consult the Omnitrans Bike and Ride Pocket Guide before attempting to load bicycles onto the rack. These guides are available on the bus, or by calling Omnitrans.

Any questions or comments can be addressed by calling 1(800)9-OMNIBUS.
It's Getting Easier to Be Green at CSUSB

By Michelle Dominguez
Copy Editor

The Network for Environmental Science Training (NEST) is a non-profit organization at Cal State, San Bernardino, which promotes environmental awareness and education. NEST links schools, businesses, museums, and various agencies to promote environmental education in the schools and community.

The organization annually hosts the Second Empire Environmental Expo, an environmental education fair. Last year, about 10,000 people attended the EXPO. Attendance for 1996 is projected at over 12,000. This year's theme is "Resources for the 21st Century."

The EXPO focuses on educators, students, and parents. However, all members of the community are invited to attend. Activities specially provided for teachers and students include: teacher workshops, the "Enviro-Solutions" contest where students display their solutions to environmental problems, Nature Bowl competition in which students test their environmental science knowledge, and the "All Species Parade" where children make masks or costumes of animals and plants and form a procession through the EXPO. Elementary, middle, or high school teams can enter the First Annual Environmental EXPO Multimedia Festival. Awards will be given for winning schools for all three grade levels.

The fair will also consist of exhibits presented by public agencies and environmentally-conscious businesses. Eco-tours of CSUSB will present some of the campus' environment-friendly projects.

Paul Cash, an eco-magician, will provide entertainment by showing audiences how to turn their trash into cash. Cash humorously emphasizes the value of reducing, reusing, recycling, and educates people on how to maintain a healthy environment. He is a Redlands resident who has entertained Southern California students for years.

The EXPO is under the direction of Darleen Stoner, Ph.D., a professor of Environmental Education at Cal State. It has been under her direction since 1987. She also directs the graduate program in environmental education. Dr. Stoner is recognized as an expert in the development of environmental education programs and in the design and execution of training programs. She has written several books and articles on environmental education. "Keep America Beautiful" and "Renew America" have awarded outstanding achievement citations to the EXPO in past years.

The EXPO will be held on Saturday, April 20, from 9 a.m. - 4 p.m., in the Cossouls Arena. Some events require preregistration. Admission to the EXPO is free. For more information, call (909) 880-5681.

John Futch
Vice Presidential Candidate

I am a grad student in the M.A. program of Social and Behavioral Science and received my B.A. in Political Science in 1995. I have been a student since 1992.

As a member of the award winning Model League of Arab States and Model United Nations' teams, I have had the opportunity to work with a diverse group of students. I am a member of the Afghani Student Alliance, the University Ambassador's Society and a representative on the ASI Board.

In my position as the Graduate Student representative, I have observed the direction the ASI is headed and wish to continue in this positive move. Through involvement with the students, I intend to work with the other board members to have as many members of this campus participating in the process of ASI.

Pedro Gaberoglio
Controller Candidate

My name is Pedro Gaberoglio, I am an international business major. For the past year I have been your Board of Director (BOD) representing the Undeclared Majors, as well as the BOD representative to the Finance Board, which oversees one-half million of your student dollars.

My goal as Controller is to ensure that your valuable student dollars are spent to maintain the quality you must expect from CSUSB. A vote for Pedro Gaberoglio would be the importance and integrity of the Club Allocation Budget (CAB) and see to it that your Student Government gives back money directly to student organizations to provide quality programs for the students.

Remember a vote for Pedro Gaberoglio is a vote to serve you, the students of CSUSB.
Community Service Pays Off

By Jason Armstrong
Managing Editor

Community service can really pay off.

That's what Karen Shinoki, president of the Cal State San Bernardino's Circle K Club discovered when she applied for and won a five hundred dollar scholarship from Circle K International as a result of her extensive work in community service endeavors as part of the club.

The scholarship, which Shinoki received in March at the Circle K District Convention in Visalia, will go toward furthering her education.

In order to qualify for the scholarship, Shinoki had to compose an essay describing her campus and community involvement. She also wrote about service projects in which she participated that contributed to the cause and goals of the Circle K club.

"Community service projects I have participated in as a member of Circle K include the Special Olympics and raising funds for Operation House, a safe haven for battered women," said Shinoki.

In addition to supporting the Special Olympics and Operation House, Circle K also raises funds to benefit individuals with Iodine Deficiency Disorder. "We raise money...to help people with iodine deficiencies," said Shinoki.

The Circle K Club supports strong ideals, including service, leadership and fellowship, which are valued highly by members of the club. "Along with service projects performed by members of the Circle K chapter on our campus, we also travel to other college campuses to help with their service projects," said Shinoki.

The club is affiliated with Kiwanis International, and has chapters nationwide and in seven different countries. Those in high school can also participate in the community service equivalent of Circle K, known as the "Key Club." The Key Club promotes similar ideals, such as raising money for charity and helping the needy.

"Many members of Circle K join to join the Kiwanis Club, and continue to serve their community," said Shinoki.

Anyone is welcome to attend Circle K meetings, which are held every Wednesday night at 6 p.m. in the senate chambers of the Student Union.

Take a Peek at "Greek Week '96"

By Jason Armstrong
Managing Editor

Sports and competition, along with education and philanthropy, are the themes of this year's Greek Week.

Beginning on Saturday, April 13, and ending on Saturday, April 20, members of Greek organizations will participate in events such as basketball, football, softball, hockey, relay races, a triathlon, and many more. Fraternities and sororities often practice months in advance to prepare for these events, which are held on campus.

Each event is worth a certain number of points; the fraternity and sorority with the most points at the end of the week is awarded the Greek Week trophy.

In addition to the sporting events, Monday night is the "Greek Speaker," an event designed to educate Greeks about topics relevant to Greek life. Past topics have included safe sex, anti-hazing, and alcohol awareness. This year's theme is "What is good about Greeks today?" and will be presented by Shelli Herman of Loyola Marymount University. The Greek Speaker event is also an occasion to recognize members of the Greek honor societies Gamma Sigma Alpha and Order of Omega.

Philanthropy is an integral part of Greek Week; fraternities and sororities participate in collective philanthropy to benefit the Children's Center on campus and the national Adopt-A-School project.

The finale of Greek Week is the Lip Sync Competition. In this event, each fraternity and sorority will put on an extravagant show of talent in which all dialogue and singing is pre-recorded. Each show is filled with elaborate sets and costumes, and demonstrates a great deal of work on the part of each organization.

Even though Greek Week is fun, it is also an opportunity for Greeks to engage in healthy competition, while at the same time contributing to the campus and community.
Internet 101: Education Research on the World-Wide-Web

Sherwin Smith
Coyote Chronicle Staff Writer

I'm sure you've noticed lately that almost every major corporation has a homepage on the World-Wide-Web? Not to mention minor corporations, small businesses, fly-by-night "scammers," TV and radio stations, movie companies, newspapers, kids, adults, friends, schools, churches and dog-lovers' associations? By now you get my point—the WWW is getting cluttered, so if you are going to do research on the Internet these days, plan to spend plenty of time.

I remember when I first started using the Internet for research, it was like a visit to the world's largest library. Around every corner were references, journals, periodicals, and other forms of digitized information. Now, I sometimes feel like I am at the mall instead of an environment created largely by the National Science Foundation. Nevertheless, there is hope. Students can go many places on the Web to find research information, on-line journals and publications, even mailing lists that specialize in educational information.

In order to preserve time, sanity, and (for those who pay for Internet services) CASH, consider Rule One for doing education research: Learn the importance of using Internet Search Engines.

Since I wrote about them in the Chronicle, the number and quality of Internet Search Engines has increased dramatically. Using a search engine is very similar to using a library's on-line catalog. It can be as simple as typing a general idea of what you're looking for, or as complex as being as specific as possible.

Depending on your subject, you may find anywhere from 0 to 100,000 references, which leads to Rule Two: Most of what you find is trash—our very own reference librarian Bonnie Petry put it best when she said: "...Net surfing is very much like shopping at a thrift store—you have to peruse an awful lot of polyester and acrylic before you find the few silk and cashmere garments."

Rule Three: Stick to a good thing. There are many education websites with their own database listings of journals, references and periodicals. So long as you have the right addresses, you have only to "click" your way through the list. I have several websites "bookmarked," so that I don't have to remember how I got there previously. All browsers that I know of support bookmarks, including graphic ("point and click") browsers like Netscape and text-based browsers such as "Lynx." Each of these applications is available in the Self-Instructional Labs (PL-1109).

After a couple of years of "Net surfing" for educational research, I have found a few websites that have provided me with ample materials. Here are just a few:

- The Educom Home Page
  http://www.educom.edu/
- Education Technology Journal
  http://tecfar.unige.ch/info-edu
- Lycos, Inc. operates three sites:
  Lycos, Inc. provides searches of the entire Internet. Point offers reviews and ratings of the top five percent of all internet sites. A2Z is a new service offering categorized directory of the net's most often hyperlinked sites.
- Six Quick Steps to Finding Any Subject:
  1. Before your visit to the lab, take the time to think of several key phrases to make sure you are targeting your subject from different angles.
  2. At the main menu click on "What's New?" to find resources that are updated regularly.
  4. Lycos will appear with a blank box asking you to input key words, such as, genetically engineered crops. Click on the box "go get it."
  5. Lycos will show the documents found using the key words. In this case, it was almost 200,000!
  6. Each listed document usually includes a brief summary. To retrieve the entire document, simply click on the title.

Copying Desired Information
1. Input a formatted diskette in the A drive. Copy the document by making sure your desired title is on the screen in front of you.
2. Click on File. Inside File click on "Save As."
3. A box will appear. On "File Name" simply keep or rename it with .txt.
4. Under "Save As Type" click on "plain text."
5. Under "Drivers" click on "A Drive."
6. Click on "OK." Allow a few seconds to copy. When the screen shows your document again, the copying is complete.

Lycos, library of the future

By Diane Williams
Coyote Chronicle Staff Writer

After you have signed up for your CSUSB computer account and know how to input your login and password, here's the process in which to conduct research on the Lycos search engine.

Lycos, Inc. operates three sites:
- Lycos, Point, and A2Z.
- Lycos provides searches of the entire Internet.
- Point offers reviews and ratings of the top five percent of all Internet sites.
- A2Z is a new service offering categorized directory of the net's most often hyperlinked sites.

Scholarly Journals Distributed Via the World-Wide Web
http://info.lib.csusb.edu/webjour.html
Chronicle of Higher Education
http://chronicle.merit.edu/almanac/links.html
Whether you're tracking down the latest journal report, or what food is best for dogs, doing research on the Internet is essentially the same. Plus, once you master the art of Internet Searching, everyone will think you are the coolest because you can do something "important" in an area that is quickly becoming less educational and more commercial.

Next week: Sherwin answers your Internet Questions. You can send questions by e-mail to the Chronicle. Our address is: sbchroon@acme.csusb.edu, or drop them off at the Chronicle Office (UH-037).

Sberwin Smith is the student electronic mail assistant for the Department of Academic Computing & Media. His e-mail address is ssmitj@acme.csusb.edu.
Do You Remember Your Spring Break?

By Gabby Heddin

Special to The Coyote Chronicle

Can you remember what you did during spring break? If your answer to this question is “No,” then you may want to ask yourself if you were under the influence of a controlled substance. A recent survey taken here on campus concluded that 86% of students drink alcoholic beverages.

Alcoholism and substance abuse can be prevented. Some of you may think you don’t have a problem and that you’re only having fun. You probably were fun because you acted like such a-(you fill in the blank) and your friends had fun laughing at you.

However, if you’re abusing substances to avoid your problems, then you’re just inviting trouble.

Come out and join us in pledging to be alcohol and drug free on the weekend of April 19, in the Lower Commons at the event, Free For The Weekend. Those who receive a pledge card at the Free For The Weekend sign-up booth on Thursday, April 18th, from 11-2 pm will have a chance to win free prizes.

Lower your cancer risks

By Heather Deogracia

Graphics Editor

Awareness and prevention can lower your risks of being diagnosed with this life-threatening disease. In San Bernardino County alone, the estimated number of cancer cases is 5,845.

Cancer is a group of diseases characterized by uncontrolled growth and spread of abnormal cells. External (chemicals, radiation, and viruses) and internal (hormones, immune conditions, and inherited mutations) factors initiate or promote carcinogenesis.

The American Cancer Society stresses the message that people can lower their risk of developing cancer by eating a healthy diet. Scientific studies show that up to 35% of all cancers may be linked to diet.

Nutrition guidelines include maintaining a desirable body weight, eating a variety of fruits and vegetables, and cutting down on total fat intake.

The American Cancer Society predicts that about nine million Californians will get cancer. Cancer prevention starts with a healthy diet and lifestyle. For more information, call the American Cancer Society at (909) 683-6415.

AWARENESS is your greatest advantage over the street criminal.

ALWAYS:
- Have your keys in hand before you leave a building
- Approach your vehicle from the rear
- Park in well lit areas away from places that could conceal someone
- Place purses and other valuables out of sight
- Don’t resist a mugger-Don’t turn a property crime into a violent one
- Use your ability to think to play mind games with a potential rapist

Have a plan that utilizes various strategies
- Do what you can to make sure that you do not appear to be an easy, low risk target

Health Center

Providing Services to Students

Dr. Joyce Jordan

Special to The Coyote Chronicle

The Department of Health and Human Services released a report in 1990 called Healthy People 2000: National Health Promotion and Disease Prevention Objectives. This report set national standards to help improve the health status of Americans. Accordingly, the American College Health Association adapted these health objectives to institutions of higher learning.

The Student Health Center at CSUSB is trying to implement their suggestions on campus. For example, tobacco usage is a health risk factor for young adults 20 years or older. The Health Center has smoking cessation information pamphlets, a video, tapes, and one-on-one counseling with Kathy Cole, RN, who has received increased training on patients education in this area. Nicorette gum has been approved for sale over the counter and is available in the pharmacy. If you are a good candidate for the nicotine patch, these are also available to the students at a cost of about $26.00 for a two week supply.

The Health Center will be sponsoring their second annual Health Fair on April 16-17. In addition, there will be outside organizations providing such services as immunization updates for MMR and TB, screening for anemia and high blood pressure, free cholesterol and sickle cell testing, information on smoking cessation and nutrition.

Also, the Red Cross will be holding their Blood Drive on April 16. For appointments, call the Health Center. Students, faculty, and staff are encouraged to attend. Prizes will be given and a live band will be playing. Come and take a look.

Free Health Careers Conference

Planning for a career in medicine or health will be the focus of a conference for college students on Saturday, April 27, at the University of California, Riverside from 8:30 a.m. to 3:30 p.m. in Life Sciences 1600. The conference is free and includes lunch.

The American Cancer Society at (909) 683-6415.

- Have a plan that utilizes various strategies
- Do what you can to make sure that you do not appear to be an easy, low risk target

Free Health Careers Conference

Let Your Babies Grow Up to Be Junkies

By Melissa Pinion
Coyote Chronicle Staff Writer

Let your babies grow up to be cowboys. Cowboy Junkies, that is.

The outside of the Mission Inn Coffee Company on Main Street in downtown Riverside was imbued in the lap of springtime orange blossoms, the smell of rich cappuccino, a vast array of every walk of life imaginable, and, of course, the sweet sounds of Margo Timmins of Toronto's Cowboy Junkies.

Complete intoxication of the senses. The KCXZ (103.5 FM, Lake Arrowhead's alternative station) sponsored concert began with the hush of a lone guitar played by Timmins' brother Michael and the motley audience came up to life as the dulcet singer drifted onto the stage, sipping at her tea cup. However, Margo was the epitome of the folk singer—not the typical country type, as the Junkies aren't really a country band. There were a few monologues shared with the audience, like that of a Janis Joplin or Jim Morrison. Talks of the beauty and perfection of spring were coupled with the irony of disaster when she spoke of a less-than-perfect experience at a Portland Hotel.

This was met with the introduction of "Common Disaster," a tune dedicated to the band's manager, and it was received with complete enthusiasm—not so much by the music, at first, but because a group of intoxicated gents were escorted off the grounds by security at that moment. With the events at hand, it became a universal feeling when Margo sang, "Share with me a common disaster." Disaster was not the word to describe the band's performance, however.

The inner peace and oneness that centered around the Junkies' performance was the most striking feature. Michael, content to sit book-ended with his amplifier the entire set, played his axe with a voice that beckoned to Margo's sweet melodies. To take one away from the other would be to kill the perfect romance.

Margo's olive, flower patterned dress rested around her crossed legs as she displayed vocals ranging from passionate high notes deep from the diaphragm to moderate-pitched whispers, like those of a wandering bagpipe far in the distance. She sat at the mahogany stool chair and the words of Lou Reed's "Sweet Jane" passed her lips into a microphone as if she were cooing a child who couldn't who couldn't sleep.

The often difficult task of categorizing the Cowboy Junkies could very well be because they branch out as a unit into the territory of bluesy chord progressions to jazzy sevenths.

And though the collaborative musical front could be compared to Joan Baez on heavy sedatives, some hard-hitting chords were hit at the end of the set by the guitarist and the only member outside of the Timmins family, bassist, Alan Anton.

The breezy afternoon began with Maisa, a mellow sounding group with a heavy dosage of acoustic guitars, and a voice highly reminiscent of blues singer, Alannah Myles. Though the show had a more than hesitant start (2 p.m. instead of the scheduled 1 p.m.), the turnout was astounding and contained a large amount of the Gen X crowd, their parents, and even parents of their parents.

The Cowboy Junkies were met with a standing ovation of over a thousand people—an ovation eight years in the making.

Don't See This One By Yourself

By Magaret Gholston
Coyote Chronicle Staff Writer

There are movies to inspire, excite, and frighten. Some movies carry a direct message of love and commitment, while other movies create new spins on old stories. Then, there are movies like "Primal Fear" that are just simply scary.

Silver-haired and silver-tongued Richard Gere proves he has not lost his ability to ensure the audience with his strong and gentle manner or heat up the screen with his easy-going looks gestures.

Gere stars as Martin Veil, a clever defense lawyer always looking. For the spotlight...and occasionally, the truth. In this thriller, that is exactly what Veil must do—find the truth to who really murdered the locally popular Arch-Bishop Rushman.

Enter Aaron, a young man of nineteen that Bishop Rushman took in off the streets and made a choir boy. Accused of murdering Rushman, Aaron seems to be an unlikely suspect even though all the hard evidence points to him. Veil believes in his innocence, even though he stands alone. Still, Aaron keeps things from Veil. Linda, a mysterious tape, and...Roy. In the end, the truth is revealed and that's when the real shock begins.

"Primal Fear is a piece of work. It's a good movie to see with a group of people, i.e. Friends. This participation movie depends mostly on its actors, who do a superb job of portrayal.

Of course, Richard Gere is at his best. Even though the plot begins with a lot of loose strings that are a bit annoying by the end of the movie, they are tied up. Other than that, the movie was excellent and I highly recommend it to all.

Feminism Takes Form at CSUSB

By Christopher Hoback
Executive Editor

Nancy Agabian opened the performance by placing several pieces of paper across the stage, throwing her head down, and creating boxes out of them. Apparently consumed with work and somehow looking up, she proceeded to cleverly weave a humorous story with which the audience could relate.

Occasionally during the monologue, another Smart Girl would come up and pluck out a single strand of Agabian's hair, placing it into one of the paper boxes, and then exiting the stage. This was apparently done to show that Agabian was so focused on her thoughts that she was oblivious to all else.

She began by expressing her resentment for those who treat her like a child, and then made a transition into talk about travel. She spoke of some trips she had taken, and focused on one trip in particular that she made by car when she was twenty-four. She also touched on subjects of multiculturalism from her Armenian perspective, lesbianism, drug use and masturbation.

Some of her language was poetic, and very articulate. Occasionally, she used profanity. Sometimes it was appropriate, but other times, it seemed forced. Overall, the audience seemed very intent, and thoroughly entertained by Agabian's humor.

Her performance ended when she stood, stomped on all of her paper boxes. Agabian bowed, and the next performer, Danielle Brazell, took the stage.

Brazell's performance was more dramatic and sexual. She didn't necessarily talk about sexual topics, but she exuded a sort of paraclinical sexual energy. Brazell wore a short dress and skimpy panties which she made visible to the audience during the show.

Her performance was intense and emotive filled. The entire twenty minute act entailed Brazell describing a trip home from another country, and the rehearsals about an old friend, some traumatic experiences with her parents, and love. She eventually realizes that she is lost, gets off the freeway, parallels being lost to her childhood, and remembers her mother telling her to follow her instincts, which she does, and she eventually arrives safely at her apartment.

The final performer was Jamie Burris. Her act was an expression of her feelings through motion. Initially, she appeared on stage clad only in a bra and panties. During her first five minutes, she moved very little. Eventually, Burris was throwing herself down and standing up again, and again and again. Then, inevitably, one side of her bra slipped off, and her left breast was exposed for most of the rest of her act.

There were some interesting aspects to her act, such as the large shadowy image cast onto the curtain behind her by a light placed on the stage, and the intensity she seemed to put into her dance. While I was unable to understand her at all, I am not a student of the theatre, I have absolutely no rhythm and I don't "speak" dance, so I judge her effectiveness is beyond my critical ability.

Overall, the performance was enjoyable, and the effectiveness of the Smart Girls' message was accentuated by a question and answer session afterwards hosted by Dr. Hilary Harris. One student commented to Burris that she "clearly didn't understand her work," and another asked how she would perceive herself if she were in the audience. Burris replied that she would describe herself as some strange woman on stage going crazy.

Agabian commented on the subject of feminism in her work. "I think that any time you have a woman on stage talking about her feelings and her anger... that's feminism to me." She and Brazell seemed to have a similar view of feminism in their work, but Brazell maintained that though they perform together, "I feel a kind of feel like I'm singular in what I'm doing," or that they each express feminism as individuals.

If you're looking for something "different" and you have an open mind, check out the Smart Girls. They'll make you laugh, they'll make you uncomfortable, and most of all, they'll make you think.

The dance was very reflective of the guitar music played by Colter. Burris' creative sense of body movement communicated a sense of body language, almost singing with the sound of the guitar. Other members of the audience interpreted Burris' use of body language as conveyed expressions of frustration, anger, and other emotions women can tend to feel from a society that continuously tries to hold them back and knock them down.

LA Smart Girls was a wonderful experience. As a female, it made me feel good about myself and helped me to understand why I have to go through so many trials in my own life and how to deal with them, as other women do. A lot of women were able to relate, as well as a few men in the audience. I was able to walk out of that theater feeling strong and in control. I knew who I was... a smart girl.

Picture are the LA Smart Girls (from left to right) Nancy Agabian, Danielle Brazell, and Jamie Burris.
THE STUDENT MIND DURING A FINAL EXAM.

The prof never covered this!

Actual knowledge on subject.

Summer break

The T.A.'s kinda cute.

Students interested in martial arts and self-defense should come see a meeting of the Aikido Club.

The art of Aikido is a physical process with a spiritual result. Practicing Aikido, students learn to foster mental confidence and physical grace, and learn basic defense techniques through "Ai" (being in harmony with one’s situation).

In addition to the standard hand-to-hand repertoire, Aikido is also practiced with wooden swords and staffs, as well as performing specific exercises for "Ki" (internal power). Aikido classes consist of demonstrations of techniques applied against specific attacks, where students emulate what they see, practicing as partners. Both partners depend on each other to safely and smoothly complete each technique. People often want to know what good Aikido is for self-defense. A few months of classes will not allow a person to subdue attackers effortlessly. A basic course in this art will not teach one to do things to others, but to avoid conflicts with others, which is a reflection of Aikido philosophy.

Balance is a very important component of Aikido. Balance must be maintained in the first instant of physical contact with another person, so that time will be allowed for self-defense. Aikido teaches that when attacked, do not strike back, but always keep your balance.

The Aikido philosophy is a valuable tool for many people who practice the art.

"One of the things I like best about Aikido is its philosophy of harmony. It teaches not to break bones but to become one with the attacker, and to subdue in a peaceful manner," said Ben Washington, Aikido club member. Many types of "attacks" in life are not physical. For example, if one person is criticized by another, common reactions are to either counter-criticize or collapse and give in. The "Aikido way" of dealing with this situation is to keep balance in all situations, clearly evaluating every aspect of each argument, and to keep an open mind.

Aikido was founded by Ueshiba Morihei. Morihei studied many martial arts, including jujutsu, swordsmanship, and spearfighting. After training for 30 years, Morihei developed Aikido, a new martial art.

The Aikido Club meets in the small gym, in the old P.E. building on Mondays and Wednesdays from 6:30-8:00 p.m. and Fridays from 4:15-5:30 p.m. The cost is $40.00 a quarter for club members. Those interested in joining the club are invited to attend a meeting and sign up.

For more information, call Dr. Prakash at 880-8390.

**Real Men Like Pain, and Our Men Do!**

By Christopher Malone
Coyote Chronicle Staff Writer

Sports fans will tell you that the teams that can play through injuries in the season will be the ones that will succeed in the playoffs.

Teams like the Houston Rockets and New Jersey Devils proved this saying to be true, and the Coyotes are hoping they can also.

Rompey has 11 RBI's and Fawcett 10, when there are two outs. This is a key factor that will help the Coyotes succeed in the playoffs, when the pressure is greatest.

Rompey leads the team with 30 RBI's and is hitting .332, with 2 HR and 22 RBIs. He and Rompey have shown that they can not only hit when one is on base, but also hit when the pressure is greatest, two out in the inning.

Average Season Expected

By Damian Secore
Special to The Coyote Chronicle

As the California Collegiate Athletic Association softball race begins to wind down to a conclusion, the Coos Light softball team will have to be content with an average record in the conference.

Unable to improve on their .500 CCAA mark, the Coyotes split a twin-bill with rival Cal State Dominguez Hills (CSUDDH), losing 6-3 in the opening game and rallying for a 2-1 triumph in the second game on Saturday.

After last weekend’s match up with CSUDDH, San Bernardino’s record currently stands at 5-5 in the CCAA, and 19-24-1 overall.

In one game, the Coyotes put up a quick 2-0 lead, but it was quickly negated by a five-run third inning for the Toros.

Sophomore pitcher Candi Caron, who threw the full seven innings in both games, was lit up for 15 hits. All six runs allowed were earned.

Sophomore shortstop Kim Basham, a product of nearby San Gorgonio High School, went 2-for-3 with a double and a run scored.

Real Men Like Pain...

losses. John “Lefty” Major leads the Coyotes pitching staff with a 6-3 record and in strikeouts, with 62. Pitcher Bobby Ray and Jim Allen have come through with key saves and wins and helped to bolster a rotation that has been erratic in past years.

The Coyotes have many important games left in the season and the stretch run has begun. The Coyotes are hoping to get their injured players back just in time for the playoffs. Parnell, however, is tentative about putting them right back in the lineup too early. If the Coyotes continue their strong play and the injured players return to form, the playoffs may be a scary place for the CCAA leaders, UCR and CSU Dominguez Hills.

Amateurs Welcome in Softball World Series

The first comprehensive, nationwide, mens slow-pitch softball championship, The Coors Light Presents USA Softball World Series, is rapidly approaching.

Amateur mens slow-pitch teams from across the nation will compete for the 1996 title. A series of 19 local qualifying tournaments will be held in San Bernardino on June 1 and 2 (location to be announced), and in Palm Springs on May 11 and 12 in Demuth Park.

These tournaments lead to 32 championships, three to be staged in southern California, and winners heading to the playoffs. The eight regional winners will square off in Space Coast Stadium, Melbourne Fl., October 12 and 13, for the World Series.

While only amateur slow-pitch teams can compete in the Coors Light Presents USA Softball World Series, the winner will be prize money for winning teams in the final three levels of competition, climaxing with a $100,000 check to the winners.

Entry forms for the series are now available on the special Coors Light softball display at participating southern California retailers. Forms must be postmarked by April 26, and teams will be selected on a first-come, first-served basis.

For more information, call the toll-free Coors Light Hot Line at (800) TO-COORS.

WE’LL HELP YOU EARN $30,000 FOR COLLEGE.

Now the Army can help you earn more than ever before for college, if you qualify...up to $30,000 with the Montgomery GI Bill plus the Army College Fund.

This could be the perfect opportunity to earn the money you need for college and the benefits that will help you succeed once you get there. For more information, call your local Army Recruiter.

**An Excellent Education For Those Who Qualify**

- **To the Editor:**
  - As a Christian who has studied some of the teachings of Islam and has visited a primarily Muslim country, and as a friend of many Muslims, I am compelled to respond to a letter by Octavia Flores in your March 20 edition. When false statements are accepted as the truth, the relationships between different people is damaged, and I refuse to permit that to occur.

- **Ms. Flores claims that her job is to "collect information from a variety of sources, being as politically correct as possible," and then states that "you cannot make everybody happy." Her first statement is false: a journalist is charged with presenting the truth without bias to the greatest extent possible. Even if she finds a thousand inaccurate yet "politically correct" sources, she has failed in her duty. Her second statement is true; however, printing incorrect and insulting statements will justifiably offend someone.**

- **Considering the Islamic nations extend from Africa to the Philippines and beyond, that there are well over a billion Muslims in the world, and that Islam predates most Christian groups by a thousand years, it is obviously a subject of fundamental teachings of Islam contained in the Koran rather than the assertions of some radical group which calls itself Islamic. As far as demonstrating that most Americans are ignorant of Islam, one might take a poll to see how many Americans know the 5 Pillars of Islam. (Hint: A ban on interracial marriages is not one of them.) However, Ms. Flores's article is evidence that there is a least one person who is ignorant regarding Islam.**

- **An apology is more appropriate response than further defense of indefensible, inaccurate and insulting statements. Better still would be actual research into the subject, so that Ms. Flores, and all journalists, may fairly and accurately portray this religion which is so often misunderstood in America.**

"Money..." Cont. from pg. 2

Species Act). The project in question was held up to protect these rodents, costing the developer millions, and for what? Apparently, to protect a bunch of rats!

Another critter that has caused considerable trouble is the Northern Spotted Owl. The government ordered 8 million acres off limits to chain saws to maintain a home for the bird. Thousands of jobs and millions of dollars in timber sales were lost, just to ensure the safety of the owl.

I'm not proposing that we simply kill off anything that gets in our way. There's nothing wrong with taking reasonable measures to protect endangered species. But the key word is reasonable. We can't go around declaring any place with a trickle of water a "wetland," nor can we continue to make so many outrageous environmental laws that doing business in our state or our country is not profitable.

PRINCIPLES of SOUND RETIREMENT INVESTING

There are a few ways to save the whales, roaches and bunnies without destroying the economy. Business is not unlike college students in their financial concerns. When our tuition is raised, we complain. If it is raised beyond our financial means, we are faced with the choice of dropping out of school, or finding another school that we are able to afford.

Businesses, when faced with rising tax and license fees to operate in a particular area, must make the choice of either going out of business or relocating to another area. California has experienced this problem, losing businesses to Mexico and to other states in our own country due to the high cost of doing business here. This high cost is largely attributable to environmental legislation.

We must be willing to give equal consideration to all these factors. Our environment is what makes our country a beautiful place, but it is our economy that has made this one of the most prosperous nations. Both must be maintained if we want to keep our country attractive and affluent.

The key to achieving a balance between the environment and the economy is to avoid extremes. We cannot save every tree and every species, anymore than we can develop every acre of land for industrial use. Environmentalists would be easier able to accomplish their goals if they would consider the damage done to businesses or people whose income is dependent on environmental development by excessive regulation. Likewise, businesses who self-regulate, when self-regulation is permitted by the government, are still able to make a profit and co-exist with the environment without causing it excessive harm.

With many situations in life, we must make a compromise. This is no exception. Business and the environment can and must exist in harmony.

For fast relief from the nagging ache of taxes, we recommend TIAA-CREF SRAs. SRAs are tax-deferred annuities designed to help build additional assets—money that can help make the difference between living and living well—after your working years are over.

Contributions to your SRAs are deducted from your salary on a pretax basis. That lowers your current taxable income, so you start saving on federal and, in most cases, state and local income taxes right away. What's more, any earnings on your SRAs are also tax-deferred until you receive them as income. That can make a big difference in how painful your tax bill is every year.

As the nation's largest retirement system, based on assets under management, we offer a wide range of allocation choices—from the TIAA Traditional Annuity, which guarantees principal and interest (backed by the company's claims-paying ability), to TIAA-CREF's diversified variable annuity accounts. And our expenses are very low,* which means more of your money goes toward improving your future financial health.

To find out more, call 1 800 8-42-2888. We'll send you a complete SRA information kit, plus a free slide calculator that shows you how much SRAs can lower your taxes.

Call today—it couldn't hurt.

Ensuring the future for those who shape it.™

*Standard & Poor's Investment Grade Analysis, 1995. Lipper Analytical Services, Inc. Morningstar Investment Data, 1995 (Quarterly). CREF certificates are distributed by TIAA-CREF Individual and Institutional Services, Inc. For more complete information, including charges and expenses, call 1 800-8-42-2888, ext. 4069, for a current CREF prospectus. Read the prospectus carefully before you invest or send money.
Humor

**Top Ten Recycling Uses for The Coyote Chronicle**

1. Handy placemats
2. Umbrellas for those unexpected April showers
3. Anti-geek shields for sitting in the Library
4. Really-cheap coffee table literature
5. Cleaning up those messy beer spills in the Pub
6. Those cool sailor hats everybody used to make
7. Last-minute diapers for the parents on campus
8. Paper airplane notes from the back of Lecture Halls
9. Gift wrapping for economically-challenged students
10. Kitty Litter Liner for Chewie the Bookstore Cat

**S.B. GIRLFRIEND**

I've come to realize how much I love this campus!

I love the trees...
I love the flowers...
I love the grass...
Did I mention the men??

---

**THE COYOTE WAY**

First day back and no more seats.
Sorry, there are no more seats.

---

**SCHOOL DAZE**

Are there any questions? OK, you in the VW bug...!
I know this is a commuter school, but this is a bit much!??

---

**STICKMAN**

Hey stick, she's checkin' you out, are you gonna go for it?
Nah, she's a little skinny for my taste!
