The dead return: El Dia de Los Muertos

By Joe Flores
Special to the Chronicle

Día de Los Muertos was an event on Thursday, November 1. It was sponsored and put together by the Cross Cultural Center, the Foreign Language Department, and Lambda Theta Phi. All three organizations and departments went through a lot of trouble and work to make the event a success. Of course, it was a success, with a turnout of at least 150 people.

The event started at 10am with a lecture by speaker Miguel Mona. He gave a lecture and slide presentation showing the historical and anthropological aspect of Día de Los Muertos. His speech was a success, with a turnout of at least 150 people.

A dancer stands in front of an altar to pay homage to the dead

The Cross-Cultural Center gave out free Mexican bread, also known as pan dulce. While the bread was given out, students took part in a procession around part of the campus. It was led by several students dressed in black robes to symbolize the dead.

During all of this, students and staff from the Foreign Language Department were at work putting together five different offering tables and preparing them to the students and staff that came to watch the festivities of Día de Los Muertos. Each offering was dedicated to a different person or group of people that the students decided to pay tribute to. One offering table was dedicated to Evita. Another offering table was dedicated to the victims of September 11th. An altar was dedicated to Cesar Chavez, and one was dedicated to a woman who died during the Mexican Revolution. The last offering table was dedicated to one of the student's relatives that was a soldier. The students and staff really did a great job as all the offering tables looked very beautiful.

At noon, the heads of the department, Professor Whitaker and Professor Gallegos-Rios, gave a speech about the cultural aspect of Día de Los Muertos. They also gave a descriptive talk showing every part of an offering table and the meaning behind it. They shared that in each region of Mexico, they celebrate it differently. After they finished their talk, a group called Danzantes de Aztlán performed dances from the indigenous Mexican culture, which the crowd really enjoyed.

I relished coordinating the event and working with Professor Whitaker and Professor Gallegos-Rios and Ezekiel Bonilla, whose efforts ensured that the event would be a success. I look forward to Día de Los Muertos next year.

Graduating Seniors Face Unpromising Job Market

By Jen Cooper
CSU Chico

When Jen Layton came to Chico State University in 1998 as a first-year student, she envisioned herself graduating in four years and landing a job in Silicon Valley, making computer games and earning around $70,000. But with graduation only eight months away, Layton has changed his post-graduation expectations.

Because of the tight job market and shrinking employment opportunities, he's now considering going to graduate school or taking a year off to travel before trying to find a job. "Right now the market's kind of dead for computer stuff," he said. "If I had graduated two years ago, I would have just gotten a job and been done with it."

As a computer science major, getting a job used to mean choosing between companies that were offering huge salaries and great benefits. "Now, if you desperately want to get a job, you've got to pursue about 20 companies at the same time," Layton said.

The National Association of Colleges and Employers released a survey in August that reported employers were expecting to hire 19.7 percent fewer new college graduates. College hiring appeared to be weakest in the West, where one-third of employers there were expecting college-hiring cuts of almost 44.8 percent.

Graduating seniors are feeling the pressures of job uncertainty to an already unsteady job market when terrorist attacks added an element of uncertainty to an already unsteady economy. Companies have already announced thousands of layoffs and many more are anticipating eventual cuts.

Chico State students aren't the only ones feeling the pressures of job searches. At universities across the country, recruiters, career counselors and students are worried about the slowdown in college hiring. Mark Finger, vice president of human resources at National Instruments in Texas, heads up his company's college recruiting program.

National Instruments hired 220 students last year, but he expects that number to fall this year. The National Association of Colleges and Employers reported that 19.7 percent fewer new college graduates were expected to be hired.

"It's been challenging," Finger said. "A lot of companies are having a lot of trouble filling positions."
Local elections to be held this week
City Of San Bernardino Prepares to Vote as Polls Open Tuesday

In a previous issue of the Chronicle there was an article about Coyote Radio, but it didn’t answer all the questions and so now it’s back for a second helping.

The students of CSUSB want to know more about the radio station. In the last issue it was said that the radio station doesn’t have a license so they can’t broadcast to too far away ranges but it can be heard here on campus.

The Coyote Radio has the ability to be heard throughout the Student Union, including the Fireside Lounge and the Event Center through underground lines that are hooked up to a speaker system.

It is left to the Student Union employees and the management to play the station daily or not. Unfortunately students want to hear the radio station in the Student Union, they should ask the management to turn it up.

So is the station on campus or an off campus entity that’s just a part of CSUSB? The station is currently located in the Performing Arts building but since the referendum was passed last school year for the Student Union expansion, renovation, and construction, Coyote Radio is currently negotiating on upgrading to a bigger location within the Student Union.

The staff at Coyote Radio believes that it is important for the station to be seen and heard, so they are working on moving the radio station to the Student Union so it is more visible to the students, public.

Coyote Radio is working on a new location because they want to be heard on campus as well as within the community. One of the only questions left is about the equipment. How prepared are they for a change? Is the equipment old and outdated? It’s taken viable, but the station obtained $60,000 in new equipment thanks to the College of Arts and Letters.

The equipment consists of state-of-the-art computers and software from the station’s daily operations. Two students are busy downloading hundreds of CDs in preparation for the new system and our demands.

With the help of the station’s engineer, Tom Richards, Coyote Radio hopes to have everything in place and operational by the winter semester.

To hear the student radio station log on at: http://cal.csusb.edu/KOTT/index3.html

Grad School Fair earns a degree in success

By Karen Sogard
Staff Writer

As the last participants of the Grad School Fair 2001 Information Fair straggled out, Stephanie Moya wiped her hair from her face, "Wow, it's over!" The Special Events Coordinator for the Office of Graduate Studies had overseen the largest fair held at CSUSB yet.

Representatives from over 60 institutions of higher learning arrived here on Halloween, Oct. 31, to hand out bright brochures and answer the non-stop questions from the juniors and seniors attending.

They might not have had the answer to Question Number One, "How am I going to afford this?", but they were happy to extol the virtues of their particular school. And because this was about expanding educational horizons, there was even pizza.

According to the Council of Graduate Schools, "The contemporary graduate student is typically a working adult with career and family obligations. They say new data from the Bureau of the Census indicates "a strong positive relationship between the earning of advanced degrees and individual income."

Valerie Olivo, a senior Kinesiology major, said she was surprised that there was a vision for their physical education. It is offered at Pepperdine University and CSUSB, but she said she was "just looking."

Dr. Mo Bahk, Assistant Professor of Communication, said several students expressed interest in the Integrated Marketing Communication degree that CSUSB has developed.

Law schools and business schools were represented such as Notre Dame, University of San Diego, and UC Davis. But one flower stood out - the Fashion Institute of Design and Merchandising.

It prepares students for careers in fashion, apparel design and entertainment industries. A quote from their brochure says, "If you would it of free, then you know that’s what will make you happy."

San Bernardino Community College District

Dr. Don Singer, retired College President

Dr. Singer sees colleges as stepping stone to four year colleges and universities.

Singer has been involved in education for over 40 years. In the last fifteen years, he has served as college President in Valley and Crafton, and as a professor at the university level as well as the ‘community college level and finally in the K-12 system. Singer feels he will work to promote and action plan for student recruitment and retention while continuing to develop partnerships with business and the community. Singer seeks to ensure that students will have the best education at the lowest cost.

Dr. Chuck Terrell, retired Superintendent

This is an election for three of the seven trustee positions for the San Bernardino-Community College System. These positions will be serving a term of four years and within those years Valley and Crafton will be going through changes of enrollment and size. There will also be a satellite campus opening at the San Bernardino International Airport. Terrell submits his candidacy because he is a product of the community college system, he's worked in education for over 40 years, he's been a professor at four universities and he has a vision to improve the community perception of the college system.

Ever since the suicide attacks on the World Trade Center and the Pentagon, the CIA has created a daily Top Secret document called the Threat Matrix. This daily report, read by the President and his senior security officials, lists all the potential terrorist threats against the United States and American interests abroad. The document contains 50 to 100 threats on any given day. Though nearly all threats have gone without incident, dozens more take their place everyday. The goal of the Threat Matrix is to prevent an incident, dozens more take their place everyday. **The goal of the Threat Matrix is to prevent an incident.**

Secretary of Home and Land Defense Tom Ridge, the man behind the Matrix

The information that goes on this list comes from intercepted communications, walk-in sources, e-mails, friendly foreign intelligences and FBI or CIA human sources. The

**Flu or Anthrax?**

By Omar Zubair

Staff Writer

Fifteen years ago the only anthrax that was making any news was the medical band, but today the country is in a major scare over the bacterium known as Bacillus Anthracis.

Though the thought of a killer bacterium is frightening one, there is no need to become paranoid as long as information about this tiny foe is known. If Americans are filled with fear in their everyday lives, then there is more danger than just the disease.

For many years many in undeveloped countries have been dealing with the anthrax bacteria. Before recent events, the only real threat of catching it was from exposure to infected cattle or sheep. The spores forming bacterium can cause infection in one of three ways: through cuts, through inhalation, and through ingestion. Unfortunately, the threat that most Americans fear is the most dangerous form of the disease, which is caused by breathing it in.

The initial symptoms of the infected bacterium resemble a mere cold with coughs, aches, and chills; however, within only a few days the symptoms may advance to shock and severe breathing problems. Without the proper treatment, this form of anthrax is almost always deadly; though with this form the spread of the disease from person to person is highly unlikely because direct contact must be made with the spores.

The current treatment for anthrax is the drug ciprofloxacin, but Richard Corling, director of the American Medical Association, says that this medicine is “state-of-the-art” anymore. Two groups, one from the University of Wisconsin in Madison and one from the Burnham Institute in La Jolla right here in California, are currently working on finding new and better treatments for victims of the disease. The researchers however, will not be ready for at least another year.

**Shortages in nursing departments across California cause for concern**

By John D. Parris

CSU Bakersfield

You’re lying on a stretcher, cold, frightened, alone and in pain. You have been lying there for what seems like hours with dozens of over-bleeding and seriously ill patients lined up along the walls. A lone bared nurse rushes by, avoiding eye contact and outstretched hands.

Will anyone help you?

There will be so one to help you if you the current nursing shortage in California continues. “This is a crisis like we’ve never seen before,” said Candace Meares, professor and Department of Nursing chair. “The crisis is not just in California, but worldwide.”

According to a news bulletin from California Assembly member Hannah-Beth Jackson, studies done last year report that the average age of California nurses was 46.5 years with 30 percent of full-time RNs over the age of 50. Many of them are retiring or looking for work elsewhere as the shortage takes its toll on working conditions.

In the bulletin dated Oct. 8, California was ranked 48th in the number of nurses per 1,000 residents. As of Oct. 19, according to Meares, California had slipped another point, to 50th.

There are several reasons for this severe shortage of nurses. “California currently only trains 10 percent of nurses it needs,” said Meares. “We have traditionally relied on immigration from other states.”

This stream of nurses has slowed to a trickle, as other areas of the country become more attractive.

Nurses, however, when working as a nurse, had no problem with the hours. “I could always arrange my work life around home life,” said Meares. “We work 12-hour shifts, but you have several days off in a row.”

Many hospitals consider three 12-hour shifts a full week. Several students have also opted to make a career of nursing despite the long hours and sometimes poor working conditions. “I think the rewards outweigh any negatives,” said Gwen Sterry, a first-year-nursing student at the CSUSB School of Nursing.

“People who go into nursing don’t go for the money,” she plans to earn her bachelor’s degree and to eventually become a nurse practitioner. The nursing program is demanding. Sterry spends 15 hours in class a week and about 40-50 hours studying. “The Nursing School is actively recruiting in the local high schools, holding open houses for potential students and their parents, and arranging for interested students to shadow nurses. They also cooperate with the surrounding community colleges, particularly Bakersfield College.

“The BC program is wonderful,” Meares said. “We work closely together.” State and private institutions have been responding to the crisis by making more money available.

“We are increasing scholarships targeted for nursing,” said Meares. “There is about $27,000 available.” Several bills have been passed at the state level, including one sponsored by Jackson.

“This would provide $5 million in grants to encourage increased enrollment in the community college system. I picture us being warehoused in a huge warehouse with no one to take care of us,” said Meares.

“We must increase the number of nurses to take care of us.”

**The Buzz**

Opportunities for international research

IREX and the government of the United States of America are announcing an open competition for fellowships in the United States and the New Independent States (NIS) through 2002-2003. Full information can be found at http://www.irex.org/programs/rsfindex.htm. The exchange is designed to support post secondary institutions to conduct academic research (maximum 9 months, no minimum) in Armenia, Azerbaijan, Belarus, Georgia, Kazakhstan, Kyrgyz Republic, Moldova, Russian Federation, Tajikistan, Turkmenistan, Ukraine, and Uzbekistan, or for the citizens of these same countries, to conduct research in the USA. Deadline for applications is Tuesday, January 15, 2002. Research is expected to begin in Sept. 2002.

Professor Blackey gets significant recognition

Professor Robert Blackey of the History Department has had two recent recognitions of quite considerable note. He’s a newly elected member of the National Academic Council of the College Trains, which involves national service as well as attending meetings of the College Board’s Western Regional Council. Blackey is this year’s recipient of the Eugene Alger Distinguished Teaching Award of the American Historical Association. It’s the highest teaching award of the largest and primary professional organization of U.S. historians. The competition was open to historians at any academic level in higher education. The award will be presented at the AHA’s annual meeting, next January in San Francisco.

International Education Week Coming Soon

International Education Week, November 12 to 16, 2001, the U.S. Department of Education recognizes the importance of educating students about people and nations throughout the world in preparing our students to live in a diverse and tolerant society and succeed in a global economy. Knowledge about the culture and language of our neighbors throughout the world is becoming increasingly important in the daily lives of all Americans.

Asking Students What they Think

If you were the Roving Reporter, which question would you ask students? Then answer it.

Ann Babin
Accounting
Junior
"Well, I want to know if people think Britney Spears' boots are real? I don't think they are and I don't think she is a virgin either. She dresses like a total prostitute. Maybe Justin should find somebody else new, like that girl he just did a video with."

Donny Templeton
Liberal Studies
Senior
"My question would be 'Do you think that since the attack everyone seems to be more happy?' I do believe that since the tragedy people have become less judging of one another. Not that I think the war is a good thing and I'm not glad it happened but maybe it took a tragedy to bring people together like it has. I think in knowing that your life could end at any moment."

James White
Theater Arts
Senior
"What are your thoughts on staying a virgin until marriage? I think that it is difficult in this society to maintain this ideal. The concern of pregnancy, loss of innocence, and other responsibilities that are associated with intercourse are some of the reasons that have been expressed for staying a virgin. Most people however, don't care about these and find bliss in having penetrative sex. This in turn makes one ask, "Well, how far are you willing to go?" I know it's mostly guys asking this question since it seems that virginity is mostly a female issue. Hmm, this could be a whole other question."

Rahsina Brown

On Halloween night, the Student Union hosted an admission-free carnival-like event called Fall Fest. The festival was started by the Student Union Program Board, and lasted from 6pm to 10pm. There were various booths and activities all sponsored by student groups and clubs.

Most of the booths happily gave candy away to eager trick-or-treaters, while wearing enthusiastic smiles and wishing them a safe and happy Halloween. Among these gracious providers were organizations such as Alpha Delta Phi, Mexican Connection (who also performed magic tricks), Kappa Delta, the Career Development Center, and The Student Alumni Association.

The Chemistry Club assisted children in their slime making endeavors, while listening to the bust of the Jack-o-Lantern candles shot out with water guns at the P.A.L.S. table. The cracker of the campfire at the Geology Clubs mock-campsite was surrounded with authentic rock samples, and they provided a free view of the moon through their telescope. Delta Sigma Chi had a beanbag toss, and Alpha Phi gave away goldfish to participants in their Pong-Pong ball game.

Faculty Spotlight

Juan Delgado

"Sometimes all you need is just one person to believe in you." For Professor Juan Delgado that was his sister Flavia. Delgado, an English professor here at Cal State San Bernardino and a poet in his spare time, was born in Guadalajara, Mexico and migrated to the United States when he was six. His parents were poor, with no higher than "a fifth grade education," and worked long hours to support the family. Delgado describes himself as having been a "normal kid...into wrestling, girls and cars." It wasn't until his sister, now in college, decided she would share her scholarship money with Delgado that he decided to go to college. "Her offer became the deciding factor for me to enroll," says Delgado.

It is here that Delgado had taken his first step toward success. Delgado started as an accounting major but decided to change it after his father died to something "more meaningful to me." Courses he has taken included writing and literature courses, and eventually poetry.

Since then Delgado has written two books of poems. One is titled "El Campo" in which are poems dramatizing the hardships of farm workers and Latino immigrants working in the U.S.

His second book is "Green Web."

While Delgado is still writing poetry and putting together more books, he has not had time to cut out for his teaching duties. He teaches creative writing graduate course and takes care of his family at home. Delgado plans to continue teaching more English courses during the next few quarters like Analysis of Poetry and possibly Chicano Literature, which he developed here at CSUSB.

As a message to students, Delgado suggests that students "hang out with people that believe in you and see your potential -someone who will push and challenge you. We're constantly growing toward success. Delgado started as an accounting major but decided to change it after his father died to something "more meaningful to me." Courses he has taken included writing and literature courses, and eventually poetry.

Coyote Costume Contest

By Susie Medina
Scene Editor

Some people at Cal State were brave enough to dress up on Halloween. For those very festive and courageous people, there was a contest for best costume. Although not many participated, it was a close competition for those who did.

First place winner was Sarah Dean, who was a cat woman. Elaborately dressed in a cat suit and heavy makeup, it was hard to tell there was a living girl underneath the costume. She won $75.

Second place winner was Casey Stout, who carved the 'skull' pumpkin, which she said "skull" pumpkin, which she said

Third place prize was a flashlight and fourth place won a radio alarm clock. All other contestants received Cal State pens, cases and calendars.

The second place winner was Casey Stout, who carved the 'skull' pumpkin, which she said took her the full hour to carve. Her prize was a CSUSB sweatshirt.

The Coyote Chronicle hopes you had a safe and sane Halloween Holiday.

The Scene Editor

On Halloween Day at Cal State San Bernardino in front of the Coyote Bookstore, six fat plump pumpkins that were provided by the bookstore. Each pumpkin had very distinct images carved into them, including a ghost, a skull, and a few smiley faces, each waiting patiently to be judged.

The judging was at 2:30, giving late contestants Erin Keller a deadline by which to finish her pumpkin. Judges included ASI's Luis Portillo, Coyote Bookstore supervisor Anthony Cautil, and student Adam Bowlan.

"We judge them based on props used, creativity, and patience we've seen in the carvers," said Casillas.

Even though the judging took place at its scheduled time, it took a while for them to come up with a winner. Participants joked that the judges acted as if they were judging a beauty pageant.

The first place winner was Casey Stout, who carved the skull pumpkin, which she said took her the full hour to carve. Her prize was a CSUSB sweatshirt.

Arroyo walked away with a Cal State sweatshirt. And I was Aphrodite that day. Reluctant to enter the contest, my friend convinced me that it was fun and I might win some money, so I did. Although I did not win any money, I did win a long sleeve Cal State shirt that was way too big for me to fit into. I guess my humiliation on Halloween paid off.

And last but certainly not least, and actually given special recognition, is Lorena Gomez, an ASI staff member. Gomez "shook 'em up" with her Elvis get-up and hairdo to go with it. I don't think she was qualified for a prize, as she is an employee.

Those of you who didn't come out and participate, perhaps next year you can get over your shyness or whatever it is and dress up. Halloween only comes once a year, and unless you're a theater major, you might get some strange looks doing it otherwise.

Take a Shot against the Flu Virus

Campus Health Center helps during flu season.

To combat the flu season, Cal State San Bernardino's Health Center is holding an influenza clinic every Friday for students and faculties.

The Health Center, which is located near the Jack Brown Hall and Commons building, will be offering its one-hour clinics twice-weekly, health officials recommend people go through a yearly flu shot.

"The strains change every year," said Debbie Galvan, the assistant director for the Health Center. "But a flu shot gives you three strains of immunity for the entire season, and each year our vaccines change to keep up with the different strains of the virus."

"A flu shot will cause minor soreness lasting for a couple of hours, and the shot could cause fever, muscle pains and some discomfort which could last for a day, but those effects do not constitute the flu virus."

If affected by the virus, a duration of six to eight days with symptoms of fever, headache, coughing, loss of appetite, muscle aches, fatigue, and sometimes stomach ache and diarrhea results.

Have you ever wondered where tattoos originated, why they originated, or how long people have been tattooing? To find the answers to these questions, I asked Professor Pete Robertshaw, the head of the Anthropology Department here on campus. He informed me that the Iceman, who is over 5,300 years old, was found with tattoos on his body. The tattoos on the Iceman are very simple sets of vertical lines and a few crosses drawn near or on various joints. Further research proved that the reason(s) why the Iceman had tattoos is not known. It could be for religious beliefs or to indicate rank or identity.

Religious ideologies are often expressed in tattoos. The word tattoo actually is derived from the Tahitian word, "tatu," which means to mark something. It has been claimed that tattoos have existed as far back as 12,000 BC. Tattoos can be found in Egypt at the same time the great pyramids were constructed. From there tattooing spread in cultures such as Greece and Arabia and about 10,000 years later spread to China. After spreading to China, tattooing spread to cultures-such as Greece, Rome, and Arabia and about 10,000 years later spread to India. Further research proved that the reason(s) why the Iceman had tattoos is not known.

There is a rich source of African-American history here on this campus. This history goes as far back as the early 1900's, and is still being upheld and available for all to see. This history is Black Greek Letter Organizations. You may be aware of the Greek presence on this campus. On your way to the library you may have seen the gigantic Greek letters of Sigma Chi or Tau Kappa Epsilon. Passing by the student union, you may have been approached by a lady of Alpha Phi or Kappa Delta asking you to rush their sorority. But did you know there was another group of Greeks on this campus? Members of Alpha Phi Alpha, Alpha Kappa Alpha, Kappa Alpha Psi, Omega Psi Phi, Delta Sigma Theta, Phi Beta Sigma, Zeta Phi Beta, and Sigma Gamma Rho can be seen roaming around the courtyard. They are your classmates, the staff, and yes, even your professors. You may have been accosted by the "Barking" of the "Omega’s" or heard an ear piercing "Skee-Wee" from the "AKA's" and wondered what in the world was that! That is the sound of history. From the rhythmic sounds of "stepping" to servicing the community needs. Black fraternities and sororities have developed a distinctive African-American style in both their social and philanthropic activities that extend well beyond the college years. Black Greek Letter organizations were founded in the early 1900's. Blatant racism prevented many African-American students on historically white campuses from joining general fraternities and sororities; therefore, African-American students on both historically white and black campuses established their own fraternities and sororities to enhance their college experiences. These organizations have played a major role in shaping generations of black leaders. Today, America's nine black fraternities and sororities are two-and-one-half million members strong and among the most powerful and influential groups in African-American society. This tradition continues here on our campus. BlackGreekLetter organizations have been here since the early 1980's. Phi Beta Sigma Fraternity was the first Greek organization, black or otherwise, on this campus. Since their first charting, the numbers of members in these organizations continue to grow. Soon, while you walk around the campus and you hear a loud "You Know!" or a high pitched "Z-Phi", you will no longer wonder what that was, but you will know that was the sound of history.

You Say

a graduate degree costs too much?

Here's a great investment tip: Cal Baptist.

A graduate degree is supposed to pay dividends for a lifetime—but not all graduate degrees are created equal. At Cal Baptist, you can count on personalized attention from talented faculty, widely recognized graduate programs, and an ethical focus that distinguishes you from the crowd. So don't think of your Cal Baptist graduate degree as money out of pocket. It's more like money in the bank.

Cal Baptist's Graduate Degree Programs

- Master of Business Administration
- Master of Science in Counseling Psychology
- Masters Degrees in Education
- Master of Arts in English
- Education Credential Programs

Cal Baptist also offers undergraduate degree programs in more than 20 areas.
Dia de los Muertos Comes Alive

By Hector Franco
Staff Writer

The history of the Mexican holiday 'Dia de Los Muertos' (Day of the Dead) began more than 500 years ago, when the Spanish conquistadors first witnessed this ritual that seemed to mock death. It was a month long ritual that the natives had been practicing for at least 3,000 years, a ritual that the Spaniards would unsuccessfully try to stop.

The Aztecs and other Meso-American civilizations kept skulls as trophies and displayed them during the ritual. The skulls were a symbol of death and rebirth. They also were used to honor the dead, which were believed to come back to visit during the month long ritual. Unlike the Spaniards, who viewed death as an end of life, the natives viewed it as the continuation of life. Instead of fearing death, they embraced it. To them life is a dream and only in death did they become truly awake.

The Spaniards considered the ritual to be sacriligious. They perceived the natives to be barbaric and pagan. In their attempts to convert them to Catholicism, the Spaniards tried to kill the ritual, but the Aztec spirits, the ritual refused to die. To make the ritual more Christian, the Spaniards moved it to coincide with "All Saints' Day" and "All Souls' Day". Previously 'Dia de Los Muertos' fell on the ninth month of the Aztec Solar Calendar, at approximately the beginning of August, and was celebrated for the entire month. Festivities were presided over by the goddess Mixtecaquitl. The goddess, known as "Lady of the Dead," was believed to have died at birth.

Today, 'Dia de Los Muertos' is celebrated in Mexico and in certain parts of the United States on Nov 1-Nov 2. Families make altars and place offerings of food such as Pan de Muertos (bread of the dead) baked in shapes of skulls and figures, candles, yellow marigolds known as cempazuchiitl and skulls made of sugar.

Most importantly, a photo of the departed soul is placed on the altar. Surrounding the photo is a glass of water, favorite foods and things the departed person likes. For example, an alcoholic drink for the drinker, a pack of cigarettes for the smoker, or deck of cards for the gambler.

It might sound somewhat morbid, but the Mexicans react to death with mourning along with happiness and joy. It is an acceptance for the departure of their loved ones. Memories of past relatives are much sweeter when celebrated, but more sour when mourned.

The World is Your ‘Oysterhead’

By Matt Schoennmann
A&E Editor

Deadhead, Phishhead, Spreadhead and Oysterhead? The latter of the four is not a contingent of fans but rather three alpha dogs ready to take the country by storm.

Les Claypool, Stewart Copeland and Trey Anastasio have both led their own bands (yes, Copeland led the Police before Sting’s ego ran amok and drove the trio to the ground), and are now joining forces in the outfit named Oysterhead. The band played to a sold out Hollywood Palladium on Saturday, October 27.

Anastasio’s band Phish and Claypool’s band Primus are both on indefinite hiatus and both men are making the most of the time that they have to play with different musicians. Claypool has a side project called “Colonel Les Claypool’s Fearless Flying Frog Brigade”, and Anastasio recently wrapped up a full scale solo tour. The trio of Oysterhead played their first gig as the “superjam” at the New Orleans Jazz and Heritage Festival in May of 2000, and have since put out an album and fine tuned their cohesiveness as a unit.

One of the obstacles of Oysterhead Saturday night seemed to be Claypool and Anastasio’s attempts at sharing the spotlight. Both musicians are the leaders of their other groups but in this instance they seem to try to avoid that. Claypool avoided his usual mid-concert ramblings and Anastasio avoided the constant noodling that has made Phish adored by so many. Instead, the bass and guitar freaks were able to mesh their licks together to make a sonic whole that rocked the Palladium.

Most impressive, though, was Stewart Copeland’s ability to hold the group together with his drumming while also standing out. Copeland used two drumsets, alternating between the two whenever he deemed it necessary. Yet to the dismay of many, Oysterhead only mustered up enough for one long set. Most music fans would be satisfied with this but those in attendance at the Palladium were used to being treated to two sets and an encore. There were also few surprises as the band stuck to numbers from their new release “The Grand Pecking Order”. Anastasio did manage to surprise, though, by unveiling a new guitar which had antlers attached to its headstock.

Most impressive, though, was Chris Chew’s bass lines and Cody Dickinson’s drumming proved to be a great rhythm section for Luther Dickinson’s earing slide guitar tickles.

Our freedoms were tarnished though, as the majority of the crowd was forced by Palladium security to miss the North Mississippi Allstars set because of their intense searching. After waiting in line for an hour to be searched, the fans were subjected to a metal detector search followed by the closest thing to a strip search I’ve been subjected to.

Fans paid good money to see two bands Saturday night and many of them got screwed. The Palladium staff made their patrons feel unwelcome and I for one will take it to heart. There are hundreds of Southland venues and the Hollywood Palladium is one that I will not be attending again.

That being said, Oysterhead is the superband it was cracked up to be, and I will anxiously await the return of the North Mississippi Allstars to our neck of the woods.

"A Funny Thing’ Happening at CSUSB

By Melissa Adamson
Assistant A&E Editor

Amidst the hubbub of students in the lobby, the sounds of "double bubble, double bubble gum", could be heard echoing in the hall.

As you entered the theater to catch the free preview of A Funny Thing Happened on the Way to the Forum, you were greeted by a whirlwind of activity. The house manager was in full swing, taking the students through their tech units needed for the show. The student performers, dressed in costume, were running between scenes, grabbing props, and making last-minute adjustments. It was quite a sight to see.

The play follows the actions of Hero and Philia from "A Funny Thing Happened on the Way to the Forum" as the final dress rehearsal for the opening night performance.

"A Funny Thing Happened on the Way to the Forum" is a musical with book, music, and lyrics by Stephen Sondheim and book by James Goldman. It is a humorous play set in ancient Rome, where the story revolves around the lives of a group of characters as they attempt to get married.

As the performance progressed, the energy in the theater was palpable. The actors were completely immersed in their characters, and the audience couldn't help but laugh along with them. The cast was comprised of predominantly high school students, and their enthusiasm was infectious.

The singing throughout the show was surprisingly good, although as an audience member, we frequently lost lines and words during songs when the singer wasn't facing your section. The acting was slightly overdone but then again, it's a musical, and that's to be expected. The singing throughout the show was surprisingly good, although as an audience member, we frequently lost lines and words during songs when the singer wasn't facing your section.

The dancing was enjoyable, but from time to time you could see that the dancers were uncomfortable, and the physical humor was appreciated time and time again. The acting was slightly overdone but then again, it's a musical, and that's to be expected. The singing throughout the show was rather good, although as an audience member, we frequently lost lines and words during songs when the singer wasn't facing your section.

As the show progressed, it became clear that the director Margaret Perry had put a lot of thought into the production. The set design was simple yet effective, and the costumes were well-suited to the characters.

The audience couldn't contain their laughter as four of the male leads sang of the virtues of having a female maid who aimed to please. The audience couldn't contain their laughter as four of the male leads sang of the virtues of having a female maid who aimed to please.

Overall, A Funny Thing Happened on the Way to the Forum was entertaining, but lacked energy. Luckily, I saw the preview, which many times serves as the final dress rehearsal for the cast. Energies are bound to pick up once the actual production begins and the actors are performing for a larger, more responsive audience.

The director Margaret Perry and the cast are to be applauded for pulling the production together in a mere four weeks in lieu of the standard 6 to 8 weeks they are accustomed to.

So, should you go see 'A Funny Thing' at CSUSB? ABSOLUTELY!

Live theater is always tons of fun and this show is particularly light and humorous. The play runs Nov. 2, 3, 8, 9, 10, 16 and 17 at 8pm and Nov. 11 and 18 at 8pm. Tickets are $10 for general admission and a mere $4 for students.

Come enjoy a night at the University Theater and perhaps A Funny Thing will happen to you on your way to the forum.
Student Art Displayed at Campus Museum

By Jessica Thompson
Staff Writer

Walking into the Robert V. Fullerton Museum last week was like walking into a Los Angeles art school. Erin Allen's first solo student show at CSUSB, was a collection of paintings and ink drawings. Erin's painting process is very involved. He likes to be spontaneous with his art. Painting over a painting several times is part of his process. This adds layers of concepts and colors to his work. Erin is also interested in maps. There are map inspired lines in his paintings. The lines lay over the human forms and give the character a sense of complexity. Erin also draws inspiration from science books like, Philip K. Dick's, "Do Androids Dream of Electric Sheep," which became the basis for the movie "Blade Runner." Both author and artist like to hide contemporary ideas in unusual settings. Erin's paintings "Bite Size Objectivity" depicts a man-bowing down to the viewer, instead he wants them to have fun with the art. He uses a combination of photocopies and original characters to add humor to the subjects that he is dealing with. The colors used change the entire mood of his paintings. If he didn't use pop culture/art colors like puke pink his painting would have a darker mood.

A lot though the show has already been taken down, you can still see his work at another gallery. He will be in the Subway series at Back to the Grind, 3575 University Ave., in Riverside (email: Word Alaska@aol.com). Erin doesn't stop at painting; he is also in the band Soma Disorder, which has a website www.SOMADISORDER.com. Catch Erin and his fascinating talents before you have to travel to Los Angeles to see him.

Minor Moods, Major Measures
CSUSB and Inland Empire Symphonic Choirs Unite

By Kofi Tawiah & Omar Zubair
Staff Writer

The hills are alive with the sound of music this fall in the Inland Empire. The chance has finally come to see not one, not two, but three great local musical organizations together. The CSUSB Symphonic Choir, the Inland Empire Symphonic Choir and the San Bernardino Symphony Orchestra are set to thrill and delight local fans of classical music. This concert is one of several in which Maestro Carlo Ponti Jr. will direct the Inland Empire Symphonic Choir. On Nov. 10, he will conduct a "Forza Italia" concert at 8:15 p.m. in the California Theatre. On Friday, the choir will be performing, along with the San Bernardino Symphony Orchestra, to the Grind, 3575 University Ave., in Riverside (email: Word Alaska@aol.com). Erin doesn't stop at painting; he is also in the band Soma Disorder, which has a website www.SOMADISORDER.com. Catch Erin and his fascinating talents before you have to travel to Los Angeles to see him.

Editor's note:
Please keep in mind that Erin Allen's artwork is displayed in the Fullerton Museum in full color. Due to the Chronicle's restrictions, we could not display his images in color. All photos were taken by Jessica Thompson.

THE CAL STATE CHALLENGE:
Get Up, Get Busy, Get Involved

By Bethany Anderson
Multicultural Editor

How many times have you turned on your local news, or flipped through People Magazine to see a celebrity smiling next to a life sized check, with the caption underneath saying that they have just given millions of dollars away to their favorite charity? Do you believe that their giving is all a publicity stunt, or out of the goodness of their heart? Do you develop that gut feeling that you wish you could do more to help others?

If you are one of the growing people across the United States who wants to be a giver instead of a taker, applaud yourself. I say this since most of the people in our society could not give a rat's ass about children, the elderly, or a struggling classmate. Don't get me wrong, there are those here at CSUSB who are working for their community in one way or another, but I have noticed it took an unprecedented act on American soil for many of you to take a time out on selflessness. I speak of our generation's day that will live in infamy, September 11, 2001.

So I offer a start or a challenge, however you want to view it, to the students here at CSUSB. The following are names and websites of four organizations that can aid you in starting your community service and volunteer search.

If you want to work with building your community literally, you might want to start with Habitat for Humanity. The global organization that has seen its buildings homes, spreading Christian ideology, and has even Oprah Winfrey picking up a hammer is a great place to get involved. Their web address, www.habitat.org has ten languages to aid you in your search and placement. Simply click on "Site Indexes," "Find Your Local Habitat Affiliate," or "Get Involved" to locate the Habitat House nearest you.

Maybe you are the type who needs to help children find their potential and strength instead of the weaknesses that are too often plaguing them. Then the Big Brothers and Big Sisters of America is the place for you. Their web address is www.bbbsa.org and their email National@bbbsa.org will give you a direct line to a representative that will not only aid in your search, but will assist you in placement.

If Big Brothers and Big Sisters do not have a site within your reach, then why not try the Boy and Girls Club of America. Their web site, www.bgca.org is full with links to begin your search. Click on "Find a Club" and dial their toll free number 1-800-854-CLUB, to get involved.

If you want to browse around the net to find an organization to lend your time, then try www.volunteermatch.org. This unique site asks you to enter your zip code and the site will provide you with multiple organizations with in a twenty mile radius, depending on your zip code.

The challenge I offer to our students here at CSUSB is to find a way to "get involved" and give back to your community. Whether it is through your church, sorority, fraternity, giving more time to your family, or just asking a total stranger how was their day, you are sure to gain the experience of a lifetime.

Under Melissa’s Influence

By Melissa Adamson
Assistant A & E Editor

Thursday night I went to a play, while I was waiting for the performance to start, I thought it would be interesting to ask a few of the people there why they came to the preview night instead of opening night. I nonchalantly approached five girls sitting on the stairs of the theater and introduced myself. As soon as they heard I was with the Chronicle, they were very rude.

That is not the first time I’ve encountered this. I don’t think it’s the Coyote Chronicle they didn’t like, it was more the idea that I was a reporter that bothered them.

Now, I ask you, why is this? Why do people have such a hatred and fear of reporters? It seems that every time I turn around, I hear someone else saying something slanderous about reporters. Yes, there are a few reporters without ethics, but the majority just enjoy informing people. When did it become a crime to ask questions? Believe me, the stereotype Courtney Cox played in Cranks is just that, a stereotype. So do me a favor, be nice the next time someone says they’re a reporter, they’re just doing their job.
Wake Up, America

By Mark Fretz
Staff Writer

Well, as we hit the books harder than ever this year, and swiftly move into post mid-term depression because we probably didn’t study hard enough, the war in Afghanistan continues to rage on with no end in sight.

“The evil ones continue to be hunted down,” says President Bush. “This is going to be a long struggle for the American people.”

For many younger students, this is the first time we have seen our country under so much tightened security. There have been many crises in the past, such as the JFK assassination, Pearl Harbor, and the Vietnam War. Now America is under attack once again, and this time you or I could be next.

I don’t want to alarm anyone, but it’s not the terrorists I’m worried about. What worries me are the new laws that are hurriedly being rushed through Congress under the guise of “self-defense.”

The only problem is. our rights are being put on hold for the sake of peace and security.

Many Americans feel that a little freedom is okay to give up if the government can guarantee our safety. Well, I’ve got a newsflash—No matter how many new laws Congress passes, our safety can never be assured. After all, there is still the common cold to worry about. My point is we need laws, one that are measured and balanced with our freedom. If the United States decides to pass legislation that violates our constitutional rights, then they have failed to protect us.

One example of this is the new Anti-terror bill that the president signed into law last week. There are many good measures in there that will do some important things that I agree with. Like making sure we don’t invite terrorists over and then lose track of them. Unfortunately, there are some things I feel a little jittery about, like the dissolution of the fourth amendment. Yes, you read that correctly, the people sworn to protect our liberties in Washington D.C. relinquished the rights of all Americans when they allowed this bill to pass.

The measure provides for law enforcement agencies to intercept not just terrorists, but Americans as well. Let’s say for example that a suspected terrorist that just happens to be your friend comes over to your house for tea and asks to use your phone. Since you have no idea he’s a terrorist you say sure and go ahead. What you don’t know is that the FBI can then tap your phone line, even after your so-called “terrorist” friend has gone back home. This my friends, is a violation of the fourth amendment, which ensures our protection against unlawful search and seizure!

This is just one example of how the American government has turned September 11th into an excuse to roll back the clock on our beloved constitution. By this time you may be wondering what can be done, to make sure more wrongs can’t be perpetrated on the American people? First you have to: WAKE UP!

“This whole anthrax thing is out of control. What might the government do to bungle this one as well? Well, they’ll probably use this to further stretch our liberties. Think about it, the only way to ensure we are safe from anthrax or other plagues is by allowing the mail to be censored through the mail—E-mail. This is a good idea if you don’t mind your government reading all of your personal information. After all, the anti-terror bill now allows the government to monitor all internet activity.

Personally, I’m not as concerned about getting anthrax as much as I am about taking the Cipro to cure it. One out of every six people in trial tests experienced serious side effects like vomiting, diarrhea, and bleeding. It makes me wonder if these drugs are even FDA approved!

An example of this is the proposed bill that would allow our government to use guinea pigs for the government. I wish I could go on and enlighten my fellow Americans further, but time is of the essence, actually I’ve said enough.

CSU Faces Cutbacks

The academic year is in full bloom, and most of us are going through what is the busiest time of the quarter. We've been busy too, so here's an update.

We are conducting a campus-wide survey to assess demand for extended student services on campus. The survey is being conducted in randomly selected classes, and has gotten the approval of the university's Institutional Review Board.

Institutional Review Board approval of the university's wide survey to assess demand for services.

The survey is being conducted in randomly selected classes, and has gotten the approval of the university's Institutional Review Board.

As the budget continues to shrink, the system will have to turn to other sources of funding, including increasing student tuition. This will put a freeze on new programs and lead to cutbacks on faculty hiring, class offerings and related support programs. In effect, all of us will be left with difficult choices, whether to increase fees or see decreases in the quality of education.

We can avoid all this by letting our legislators and the governor know that higher education must be protected. We encourage you to send faxes, emails and letters to our legislators in a widespread effort by the students of the CSU system to affect the outcome.

Another project on the launching pad is a grassroots campaign to protect the budget of the California State University (CSU) system. As you know, California continues to plunge into a recession, and there is a real threat that the governor will slash the CSU budget to cover other state costs. Gov. Gray Davis recently asked the CSU system to give back $25 million of this year's budget. If we believe, will literally put our fingertips. Students will be able to rent a laptop for a minimum of one day for $8 or for a maximum of a week for $25. A benefit to the laptop rental program is the freedom students enjoy in taking the technology anywhere they go. To put the idea in context, think of it as knocking down the walls that otherwise put constraints on ways students have traditionally used computers.

Students are really understanding the tightened job market, seniors are realizing they can't afford to procrastinate on a job search. Altho...

NFL To Realign Divisions in 2002

By Shane Vanderfin
Copy Editor

The NFL owners unanimously approved realigning the league for the 2002 season when the Houston Texans expansion franchise becomes a reality. The AFC and NFC conferences will now be made up of four divisions instead of three. The East and West will remain, and the new North and South divisions will replace the Central, with each division composed of four teams. Traditional rivalries will still be intact for the most part, but there are some significant geographical and other changes, such as the Seattle Seahawks moving out of the AFC West and into the NFC West. Teams will still play their division rivals twice each season, once at home and once away. At the time of this article, there was no information on how the playoffs will be affected, but now with eight divisions, there should be no need for wildcards anymore, with just the eight division winners making the playoffs.

By Jace Zylman
Multicultural Editor

Shaq and Kobe will look for Laker Three-peat

return of the greatest basketball player ever. All 82 Washington Wizard’s games will be without Michael Jordan due to his return to the Super Bowl. I’m sorry, Mr. Wilson, but your team didn’t beat the Chargers and the Bills are ten years away from Super Bowl contention.

Most Arrogant Coaches in the NFL: Baltimore head coach Brian Billick and St. Louis head coach Mike Martz.

The Best Conservative Quarterbacks in the NFL: (You know, those behaving like great running back and superb defense to succeed in the NFL.)

Baltimore’s Steve McNair-
- or the Associated Press' Player of the Year.

San Francisco 49ers and Buffalo Bills owner Ralph Wilson said NFL: Baltimore head coach Brian Billick and St. Louis head coach Mike Martz.

New York Giants.

Chris Berman would love this one: The Raiders are looking like the team to beat in the tough AFC.

The Los Angeles Kings and Anaheim Mighty Ducks are hockey’s biggest jokes.

Pat Riley: You’re a very good coach. One of the best of all time, but you continuously wear out your players and end up getting bounced out in the first round every season by the New York Knicks or some other team in the weak Eastern Conference. It’s time you go to the Phil Jackson school of winning championships.

Shot up, Chuckie: Charlie Barkley, just because you can’t play anymore because you’re too fat and lazy to work out doesn’t mean that you can bag on the NBA’s greatest player, Michael Jordan. MJ is going to be a bit rusty until he gets his legs back under him.

Kevin Garnett and the Minnesota Timberwolves will probably win their typical 45-50 games this season and then get bounced in the first round by a team with more size upfront.

Most overrated player in the NBA: Glenn Robinson. He’s a great player in the regular season, but average in the postseason.

If Antoine Walker ever wants to lead the Boston Celtics into the playoffs he needs to stop shooting too many threes.

Best point guard in the league: Jason Kidd, New Jersey Nets.

- Portland head coach Maurice Cheeks will have his hands full with Rasheed Wallace and the dysfunctional Trailblazers.

Seattle Seahawks, and last but not least, the NFC West.

Jackson school of Winning.

The Best Overrated Player in the NBA: Tracy McGrady emerging as a premiere player, a healthy Grant Hill, combined with the addition of Horace Grant, makes the Orlando Magic a force in the East. By adding Anthony Mason to be a rebounding thug in the middle, the Milwaukee Bucks, lead by Ray (swearing jump shot in the game) Allen, will bounce the Magic in the Eastern Conference finals and have the privilege of losing to the Lakers in six games.

It is time for the Coyote Chronicle playoff predictions. We looked into our crystal ball and here is how we see it:

Western Conference
1. Los Angeles Lakers-Kobe and Shaq are the two most complete players in the game at their positions
2. Sacramento Kings-Chris Webber is back and Mike Bibby is a better point guard than Jason Williams
3. San Antonio Spurs The Twin Towers will dominate but the loss of Derek Anderson will hurt their thin backcourt
4. Dallas Mavericks-More mature team has loads of talent in Finley and Nowitzki

5. Portland Trail Blazers-So much talent they can’t get enough PT for the egos on the squad, but they are loaded
6. Utah Jazz The prehistoric pick ‘n’ roll keeps going with Stockton and Malone

Eastern Conference
1. Milwaukee Bucks-Consistent players play well as unit; added Mason for size
2. Orlando Magic-Health is the biggest factor with this squad
3. Toronto Raptors-VinnyCache kept his whole team together in the off-season and added Hakeem in the middle.
4. Philadelphia 76ers-New rule changes may leave Iverson and Co. without the answers
5. Miami Heat-A healthy Zo means they have a chance
6. New York Knicks-Houston and Spree can play but they are weak inside

So how was your favorite team affected by the realignment? Check it out in this list of the new NFL divisions.

AFC - East: Miami Dolphins, Buffalo Bills, New England Patriots, New York Jets
North: Chicago Bears, Green Bay Packers, Detroit Lions, Minnesota Vikings

South: New Orleans Saints, Atlanta Falcons, Carolina Panthers, Tampa Bay Buccaneers

AFC - West: Denver Broncos, Oakland Raiders, San Diego Chargers, Kansas City Chiefs
North: Pittsburgh Steelers, Cleveland Browns, Cincinnati Bengals, Baltimore Ravens

South: Indianapolis Colts, Jacksonville Jaguars, Tennessee Titans, Houston Texans

West: Arizona Cardinals, San Francisco 49ers, St. Louis Rams, Seattle Seahawks

By Brian Short
Sports Editor

Add Jaguars head coach Tom Coughlin to the list of coaches, who are on the hot seat this season.

Just a thought: Buffalo Bills owner Ralph Wilson said that he would rather beat the Chargers than winning the Super Bowl. I’m sorry, Mr. Wilson, but your team didn’t beat the Chargers and the Bills are ten years away from Super Bowl contention.

The Best Conservative Quarterbacks in the NFL: (You know, those behaving like great running back and superb defense to succeed in the NFL.)

Baltimore’s Steve McNair- or the Associated Press’ Player of the Year.

San Francisco 49ers and Buffalo Bills owner Ralph Wilson said NFL: Baltimore head coach Brian Billick and St. Louis head coach Mike Martz.

New York Giants.

Chris Berman would love this one: The Raiders are looking like the team to beat in the tough AFC.

The Los Angeles Kings and Anaheim Mighty Ducks are hockey’s biggest jokes.

Pat Riley: You’re a very good coach. One of the best of all time, but you continuously wear out your players and end up getting bounced out in the first round every season by the New York Knicks or some other team in the weak Eastern Conference. It’s time you go to the Phil Jackson school of winning championships.

Shot up, Chuckie: Charlie Barkley, just because you can’t play anymore because you’re too fat and lazy to work out doesn’t mean that you can bag on the NBA’s greatest player, Michael Jordan. MJ is going to be a bit rusty until he gets his legs back under him.

Kevin Garnett and the Minnesota Timberwolves will probably win their typical 45-50 games this season and then get bounced in the first round by a team with more size upfront.

Most overrated player in the NBA: Glenn Robinson. He’s a great player in the regular season, but average in the postseason.

If Antoine Walker ever wants to lead the Boston Celtics into the playoffs he needs to stop shooting too many threes.

Best point guard in the league: Jason Kidd, New Jersey Nets.

- Portland head coach Maurice Cheeks will have his hands full with Rasheed Wallace and the dysfunctional Trailblazers.
Coyote Volleyball Schedule

*Friday, November 9 - @ San Francisco State, 7 p.m.
*Saturday, November 10 - @ Sonoma State, 7 p.m.

*November 15-17 - NCAA Pacific Regional, TBA
*November 29-December 1 - NCAA Elite Eight Championship

Support your Team, Go Lady 'Yotes!

Kim Ford, the CCAA leader in kills, continued her leadership on the court, garnering a team-high 43 kills combined in the three contests. A sophomore outside hitter from Etiwanda, Ford seems to be the deadliest offensive weapon on the Coyote squad. However, Ford also showed her defensive skills against Cal State Stanislaus when the Coyotes dropped a 30-17, 30-17, 30-20 victory. April Nicolson concluded with 40 assists which gave her 1,073rd assist of the season, and improved her career total to 4,200 which was set from 1990-94.

CSUSB goes 3-0 at home to win its 12th consecutive game.

By John Halcon
Staff Writer

Cal State San Bernardino took a giant leap towards winning its first California Collegiate Athletic Association volleyball title after posting three more victories during its five-game homestand which started on October 19 and concluded on October 27.

The Coyotes defeated Cal State Bakersfield 3-0 on October 26, romped past Cal State Stanislaus 3-0 on October 27, and handed Cal Poly Pomona a 3-0 defeat on Halloween night to remain atop of the CCAA conference standings.

CSUSB improved its league mark to 17-1 and 25-1 overall. Ranked No. 3 in the nation and No. 1 in the Pacific Region, the Coyotes will travel to San Francisco State on November 9 before ending its season on November 10 at Sonoma State.

With a three-and-a half game lead on Bakersfield, the Coyotes are in the driver's seat to win its first CCAA title.

The Yote's improved their record to 17-1 in league and 25-1 over all this past week

Kim Ford displayed an overall balance of attack collecting 12 kills and adding 19 digs to propel CSUSB past neighboring Cal Poly Pomona on Halloween night. 30-21, 30-15, 30-16. Kim Morohunfola, who was sidelined by a knee injury in the middle of the season, provided the Coyotes another source of offensive weaponry. garnering 13 kills and three blocks.

Finally, the Coyotes are in the driver's seat now to win its first CCAA title.

A Coyote offensive player shows her "hops" while trying to set up a teammate for the kill.

Third Playoff Spot in Football Still Undecided

By John D. Halcon
Staff Writer

El Tri kicks past soccer opponents and clinches top spot with 7-0 record

The intramural season capped week four with five different teams still posting undefeated records for the fall quarter session.

In what is considerably the toughest league in flag football, Sigma Nu improved to 3-1 after blanking Sigma Chi 41-0 during the AFC action on Friday, November 2.

After Sig Ep (3-1) shutout the East Siders 28-0, and Johnny Blaze (3-1) edged a tenacious 2 D.H. squad 18-14, both squads share the AFC lead with Sigma Nu.

The loss for 2 D.H. dropped them to 2-2 overall, however, with the likelyhood of an intramural playoff taking the top three teams in each division. 2 D.H. may not qualify despite the three-way tie in first place.

In the NEC, UFA remained at 3-0 after defeating Delta Sigma Phi 34-6 while the TKE (2-0) continued their dominance after posting a 21-14 win against Mexican Connection.

Delta Sigma Chi improved to 3-1 after outscoring the Jaguars 39-26 in other NFC action, and the Complimentados were idle with a bye.

UFA is currently in first place while Delta Sigma Chi remained a half game behind. The TKE and Mexican Connection both have two wins, but last Friday's outcome (along with both team sportmanship) could determine who earns the third and final spot for the playoffs.

Soccer

El Tri clinched the top spot for the Open One league after beating the Winners 7-0.

Sigma Chi earned its first win of the season after receiving a forfeit from the East Siders who dropped to 0-3. The Charismatics (2-1) were idle with a bye but clinched second place with a win in five weeks.

In the Open Two league, Sig Epi improved to 2-2 after receiving a forfeit against the Old Timers, and the TKE added another win to its unblemished 4-0 record after a 4-0 victory against Sigma Nu.

3-on-3 Basketball

All Net and Money Inc. Ballas continued its dominance on the court as both teams won decisively.

Money Inc. Ballas improved to 4-0 as All Net remained solid at 3-1.
The Coyote Chronicle Mens Soccer All-Stars

By Darrell Jackson Jr.
Staff Writer

The Coyotes men's soccer team finished short of the California Collegiate Athletic Association playoffs, but concluded a successful season at 9-10-1 and 4-9-1 in conference. The Coyotes, coming off a 1-18-1 2000 season, battled into the final games for a playoff spot before finishing two games short of qualifying for the playoffs. Here are the top performers for the 2001 Coyote men's soccer team.

**ADAM CANFIELD**
Senior, Defender, 6'1"
Henderson, Nev.

Senior defender Adam Canfield, a Social Sciences major, started 19 games and totaled one assist but Johnson says his stats don't tell all of his story. Canfield's defense was solid all season and helped lead the Coyotes to improving their defense over last season. Johnson said that Nordberg improved a Coyotes defense that last season allowed an average of 2.2 goals a game and reduced that to 1.55 thanks in large part to Nordberg. "He just goes full steam every play and hates to lose. Every time he is on the field he is trying to make the team better by creating plays to get the offense started."

**JASON KOZA**
Freshman, Midfielder, 5'9"
Whitter

Midfielder Jason Koza, a freshman from La Serna high school in Whitter, Calif., led the Coyotes with 12 points on three goals and six assists. Koza played two positions for the Coyotes, starting the season as a midfielder before finishing the season as a forward, created plays both on offense and defense and finished with 24 shots on goal, which ranked second for the Coyotes. Koza, a freshman, has yet to declare a major.

**JAMES NORDBERG**
Sophomore, Defender, 6'0"
Rancho Cucamonga, Ca.

Sophomore defender James Nordberg, a Human Services major transfer from Azusa Pacific University, had five points on two goals and one assist on only 13 shots. Leading the Coyotes with an experience Nordberg, called by Johnson a leader on and off the field because of his years of experience with club teams, was the most vocal of the players. Coach Johnson calls him a "...true soccer guy who knows what it takes to win and he brings that to the team. He goes 100 percent each play and tries to get everyone around him to play with that same intensity."

**BARRY STEELE**
Sophomore, Midfielder, 5'9"
Beaumont, Ca.

Midfielder Barry Steele, an undeclared freshman from Beaumont high school in Beaumont, Calif., was one of four players to start all 20 games in 2001. Steele led the team with 36 shots on goal, scoring two goals and adding two assists. Steele led the Coyotes with two game winning goals and head coach Christian Johnson says Steele improved his play every week. Steele improved each week and his play over the course of the season would be the strongest part of the Coyotes women's soccer team.

**LISA AMENT**
Senior, Defender, 5'8"
Lancaster

Senior defender Lisa Ament, a Psychology major from Paraclete high school in Lancaster, Calif., led the Coyotes with 28 points on 11 goals and six assists. Ament finished as the leading scorer in the southern division of the California Collegiate Athletic Association and third overall in CCAA. "Lisa has the ability to play at the next level," Johnson said. "She has the talent and dedication to take her game to the next level." Ament, a first team all CCAA in 2000, is sure to repeat that feat this season. Johnson said that he thinks, "Lisa is the most talented player in the CCAA, hands down. She just has the desire and heart to improve on every aspect of her game and does whatever is needed to do help her team."

**ROXANNE ESCATEL**
Freshman, Defender, 5'3"
Temecula

Freshman defender Roxanne Escatel, a Pre-Psychology major from Temecula Chaparral high school, scored one goal and one assist on ten shots during the season. Escatel plays a complete solid game on offense and defense and rarely get beat while she was on the field, according to Johnson. "She was a huge surprise and was even better than I expected. She didn't start early in the season, but her consistency became apparent early and was the main reason I couldn't start her," Johnson said. "She will get better and better and if she stays committed, will eventually be one of the top players in our league for the next few years."

**KAYLA HUMPHRIES**
Sophomore, Midfielder, 5'9"
Highland

Sophomore midfielder Kayla Humphries, a Biology major from Rancho Cucamonga high school in Highland, Calif., finished second on the team with 20 points. Humphries was the most balanced of the offensive threats, scoring seven goals and adding six assists. Johnson calls Humphries, "...tactically one of the stronger players and she did what was needed during the season." Humphries ranked fourth in scoring in the southern division of the CCAA. Humphries led the Coyotes with four game winning goals, including the season opening 1-0 victory over pre-season number three ranked Westmont College. "(Kayla) knew how to execute and what type of execution was needed at any level during the season."

**TIFFANY MARES**
Junior, Defender, 5'7"
San Diego

Junior defender Tiffany Mears, a communications major who transferred from Azusa Pacific University in San Diego, also started all 20 games for the Coyotes in 2001. Mears added two assists as a defender. While not scoring any goals, Mears was one of the defensive leaders and kept opposing offenses at bay. Mears is a tenacious defender who created plays to help get the offense started in each game. "If you look at her defensive play, that would be the strongest part of Tiffany's game," said Johnson.
