Questions surround shooting

Karla Buchanan
News Editor

As the shock of the October 5 shooting in the University Hall parking lot begins to wear off, the could have’s, should have’s and might have’s have become a blur thrown around in great numbers.

Should the event’s organizers have called for more officers?
Should the police have provided more officers, especially in the parking lot?
Could the incident be avoided?
And, what is on most people’s minds, what is going to be done to prevent something similar from happening again?

First to arrive on the scene was the CSUSB police. The Public Safety Department runs the independent department and, according to Lt. Brian Bodily, currently has 14 officers, all POST (Police Officers Standardization and Training) qualified with full peace officer privileges.

On an average night, there are two officers patrolling the campus. However, when there is a special event, additional officers are assigned. According to Vice President of Administration and Finance, David De Mauro, one additional officer was assigned on the night of the shooting.

To hold an event, organizations must first fill out a special events application, where they identify the purpose of the event and number of people present, explained De Mauro.

Next, according to De Mauro, a community event manager, public safety is notified. Because of the Omega Psi Phi event, it was decided that only one extra officer was needed because the expected turn out for the event was 200.

At the time of the incident, an estimated 800 people were in attendance. Generally, that would require at least four additional officers. The one additional officer present was in relation to the number of officers assigned. To be there, not the actual number that was there. The addition of nearly six hundred individuals changed the picture entirely.

This begs two questions: Why didn’t an organizer of the event, after noticing the extra people, call for more officers and why didn’t the officers, after realizing the massive numbers of people attending, call for more officers.

According to De Mauro, organizations are free to call for more officers at any time. These

New campus opens for desert denizen

Karla Buchanan
News Editor

Student commuting from the low desert area and its surrounding communities will now have a new option to gain their higher education in the opening of the new Palm Desert Satellite campus.

CSUSB has had a satellite campus in the lower desert on the College of the Desert Community College (COD) campus, but was housed in various portable, sharing bookstore space and having no space of their own.

The new $9 million building, the first of three phases, opened it’s doors to nearly 1,000 students. The second building, at the cost of $9 million, will break ground in November and the third and final building will be built in the near future also at the cost of $9 million. In total, the campus will cost nearly $28 million.

The cost of the campus was split between CSUSB funds and Cal State University System Operating Funds while the city of Palm Desert donated 200 acres of land.

Additionally, both CSUSB’s Bookstore and Students Union contributed funds to have space in the new building.

The campus currently offers about 90 classes per quarter in six undergraduate programs including Accounting, Management, Psychology, English, Liberal Arts and Criminal Justice, with the addition Communications soon.

Because Palm Desert is a branch campus, they can offer only junior and senior level classes.

The intention is that students will obtain their general education requirements at COD community college and then transfer. In addition, the campus offers four teaching credential programs, including single and multi subject, plus five master’s programs, four in Education and one in Public Administration.

By fall next year, according to Palm Desert Campus Dean Pete Wilson, the school will offer a B.S. in Nursing.

Classes are taught by full and part-time instructors from CSUSB.

“While the campus lies nearly 70 miles away from the main campus, the satellite is still dependant on CSUSB.

“As we offer more classes and have more space available, growth will accelerate. This area has a need for higher education to be more accessible,” stated Dean Wilson.

Already the campus has had a 119 growth in attendance and is expecting more in the future.

New roadways may ease traffic

Jose Lizarraga
Staff Writer

The city of San Bernardino plans to lower the amount of traffic on University Parkway by building a new roadway connecting Kendall and Fairview in what is to be the first phase of roadway building around the campus.

Bidding is currently taking place, and will be for ninety days in what is to be the first phase of construction done around the campus to reduce traffic congestion on University Parkway.

This is one of many of the projects that is currently being done by Cal State and the city of San Bernardino in order to make it easier on the commuting students.

"We are currently working with the city on traffic mitigation," stated CSUSB Vice President of Administration and Finance, David De Mauro. "There are a number of projects, and several more in the works."

This is one of the many projects that the school and the city have been working on together to help the students. One of the more recently completed of these projects was the construction being done on the 215 exit ramp onto University Parkway.

This construction created dedicated turn lanes instead of the merging lane that was there before.

These are not the only modifications that will be taking place on the roadways around Cal State San Bernardino. De Mauro stated that there were also some other projects they were planning on doing.

One of the projects will be the timing of the lights down University Parkway. The traffic lights are currently not timed and timing the lights would promote the traffic flow down University Parkway, cutting down on the time spent waiting to get on the freeway.

Another of the planned projects is to build dual left turn lanes on the corner of Kendall and University, beside the new Sav-on drug store.

This would decrease the amount of congestion on Kendall. With the completion of the various projects, the hope is that student travel to and from CSUSB will be less aggravating and less time-consuming.

Health Check-up
October: Breast Cancer Awareness Month
Tell A Friend Program

The goal of the American Cancer Society's Tell A Friend program is to make sure that every woman who needs a mammogram gets one annually and to dispel myths surrounding breast cancer.

The American Cancer Society's Tell A Friend Program

The American Cancer Society’s Tell A Friend program trains volunteers to contact friends and loved ones and encourage them to get mammograms.

Tell A Friend volunteers contacted more than 244,000 women last year.

Tell A Friend uses a peer-to-peer approach, which has been found to be very effective in increasing the use of mammography.

Tell A Friend seeks to provide services to everyone – especially those who are medically underserved or at high risk – and in communities where disparities in the cancer burdens exist.

The American Cancer Society seeks volunteers and collaborating organizations with close links to women who may need special encouragement to get regular mammograms and to women who may need answers to questions such as:

- Where do I get a mammogram?
- How much do mammograms cost?
- Do mammograms hurt?
- When should I get a mammogram?

Some Tell A Friend partners include churches and religious groups, service organizations, community action organizations, breast cancer advocacy groups, health care professional organizations, neighborhood organizations, tenant groups, women’s clubs, senior centers, health care facilities, TV and radio stations, and local businesses and industries.

Partners can contribute by recruiting volunteers, promoting community awareness of the importance of mammography, providing screening services, underwriting the promotional activities, providing incentives and gifts to volunteer callers, and sponsoring a Tell A Friend program with American Cancer Society support.

To become a Tell A Friend volunteer or partner organization, contact your American Cancer Society at 1-800-ACS-2345.

American Cancer Society 9/02

You Say

a graduate degree costs too much?

Here's a great investment tip: Cal Baptist.

A graduate degree is supposed to pay dividends for a lifetime — but not all graduate degrees are created equal. At Cal Baptist, you can count on personalized attention from talented faculty, widely recognized graduate programs, and an ethical focus that distinguishes you from the crowd. So don't think of your Cal Baptist graduate degree as money out of pocket. It's more like money in the bank.

Cal Baptist's Graduate Degree Programs

Master of Business Administration
Master of Science in Counseling
Psychology
Masters Degrees in Education
Master of Arts in English
Education Credential Programs

Cal Baptist also offers undergraduate degree programs in more than 20 areas.

CSUSB POLICE REPORTS

October 5

Incident: Shooting
At approximately 11:46 p.m., officers standing in front of the Event Center heard 8 to 12 loud shots while parking lot D. There was an Omega Psi Phi dance going on inside the Event Center. There was approximately 600-800 people attending the dance. Officers saw numerous people running from parking lot D towards the Commons. The officers were attending this dance. Officers saw numerous people running from parking lot D towards the Commons screaming. Officers went to investigate and found that an offender was injured while having alcohol in his room. Disposition: Report Taken

Incident: Medical Aid
At approximately 10:00 p.m. our officers responded to the PE field regarding a report that a CSUSB student had been injured during a flag football class. The student dislocated her left shoulder, which was the result of an old injury. She was treated by SBPD and transported to the hospital by fellow students for further treatment. Disposition: Report Taken

Incident: Suspicious Male
At approximately 10:15 p.m. our officers responded to the CSUSB Police Station regarding a desk report of vandalism, cause to a tampon vending machine. The subject was on probation for being in violation of Municipal Court. The officer advised that the resident was not interested in any follow-up on the resident status. Disposition: Report Taken

Incident: Intoxicated Student
At approximately 12:26 a.m. an officer responded to Tokay Residence Hall regarding a report of a female student who was intoxicated. The female told the male to get away from her. The heavy set male then left the area when the female told him that she was going to call the police. Disposition: Report Taken

Incident: Injured Student
At approximately 11:35 a.m. an officer took a report of a female student who was approached by a white heavy set male inside a vehicle who used offensive words towards her. The officer responded to the CSUSB Health Center and was released. Disposition: Report Taken

Incident: Vandalism
At approximately 10:00 p.m. our officers responded to D lot regarding a report that a CSUSB student’s vehicle had been vandalized. Unknown subject(s) had written CB, Beta-Beta, B on the vehicle with green and red chalk. Disposition: Report Taken and referred to Craig Henderson

Incident: Vandalism
At approximately 10:00 p.m. our officers responded to D lot regarding a report that a CSUSB student’s vehicle had been vandalized. Unknown subject(s) had written CB, Beta-Beta, B on the vehicle with green and red chalk. Disposition: Report Taken

October 7

Incident: Medical Aid
At approximately 10:00 a.m. our officers responded to the PE field regarding a report that a CSUSB student had been injured during the flag football class. The student dislocated her left shoulder, which was the result of an old injury. She was treated by SBPD and transported to the hospital by fellow students for further treatment. Disposition: Report Taken

Incident: Non-injury Accident
At approximately 4:22 a.m. officers responded to the third floor old gym building regarding a report from custodial personnel that a tampon machine had been burglarized. Unknown subject(s) were unaccounted for. Disposition: Report Taken

Incident: Medical Aid
At approximately 4:40 p.m. our officers responded to University Hall regarding a report of a sick student. A Student Professor felt that the student was having an asthma attack. The student was treated by SBPD and transported to the hospital by fellow students for further treatment. Disposition: Report Taken

Incident: Vandalism
At approximately 4:40 p.m. our officers responded to D lot regarding a report that a CSUSB student’s vehicle had been vandalized. Unknown subject(s) had written CB, Beta-Beta, B on the vehicle with green and red chalk. Disposition: Report Taken

October 8

Incident: Attempt Burglary
At approximately 4:12 a.m. our officers responded to the third floor old gym building regarding a report from custodial personnel that a tampon machine had been burglarized. Unknown subject(s) had written CB, Beta-Beta, B on the vehicle with green and red chalk. Disposition: Report Taken

Incident: Non-injury Accident
At approximately 10:00 a.m. our officers responded to D lot regarding a report that a CSUSB student’s vehicle had been vandalized. Unknown subject(s) had written CB, Beta-Beta, B on the vehicle with green and red chalk. Disposition: Report Taken

Growing Exponentially: Distributed Learning

Bethany Anderson
Asst. News Editor

The Office of Distributed Learning has pushed the concept of taking courses online to the next level. With the installation of the new Telecommunications switch, the campus can now facilitate up to fifteen simultaneous videoconference courses to various sites throughout the southland.

The Telecommunications switch was funded by the Title V Brimage Distance grant from the U.S. Department of Education. The pilot program instituted in 1999 at the Victor Valley campus, will now have the opportunity to branch out to regional community college sites within the service area of CSUSB.

The on-line courses will be entirely from the Cal State headquarters, courses are audio or video to campus. The Distributed Learning pointed website that, fully on-line classes may meet for orientations, meetings, presentations, and other factors related to the particular course.

Positive aspect of Distributed Learning through Cal State, is that students who have hectic work schedules, family obligations, and transportation problems can learn independently, free of the rigors of having to attend the physical Cal State campus classrooms. Another bonus of the on-line coursework is that students will ultimately have to learn multi media skills in downloading, program and software installation, and email that have become a requisite for college life. Students also have the option of purchasing textbooks at Cal State’s Coyote Bookstore or on-line at www.coyotebooks.com, clicking under “off-campus.”

However, the downfall of taking on-line courses is primarily that students must be self motivated, in order to anticipate the independent study type atmosphere. Students who are in need of classroom interaction will find the adaptation to on-line class discussions somewhat discouraging at first. Yet with the rapid change in technology has influenced the higher educational process, prospects of learning online or at a distance will soon become a way of life.
I was just two years old. "We were just playing around with him and talking to him in 'baby-talk," said Joriz’s dad, Edwin DeGuzman. "We said, ‘can you read?’ and he said ‘yes,’ and started reading to us." They took him to the library where he checked out short children’s books and sure enough, he read the books aloud to his parents, word for word, "credible" and all. That’s when Edwin and his wife Tess knew their son had a gift.

Ten years later, Joriz is a junior at Cal State, double majoring in computer science and math, but he’s already aspired to be a neurosurgeon, psychiatrist and politician after taking biology, psychology and political science classes. "Everything is interesting to me," Joriz said during a recent interview in the Student Union. "Every class I take is interesting and exciting. Every subject is my favorite. I just like to learn it.

He started taking classes at Cal State during summer school this year and registered for eight units after transferring from San Bernardino Valley College. His parents drove him off from their home in Grand Terrace Monday through Thursday for his five classes. Three math and two computer science. Sometimes they stay with him.

Original plans to go to UCR dissolved when he fell in love with Cal State’s campus after a visit. "I like the atmosphere here better," he said. "I think people might have thought I was a midget or something." he said. "My feet didn’t even touch the floor when I sat in the desk."

"One time when the teacher called on me, I started reading and my voice was like, 'whee, whee, woe,'" he said, demonstrating in a high-pitched voice. "That’s when the teacher was like, 'how old are you?' Things are different now, following a summer growth spurt. At 5-foot 6-inches tall, he now has a deeper voice and there’s some facial hair coming in too. But he’s used to being a little different than the other students at the schools he attended or his replubulicy and grade at Immanuel Baptist College.

Things are different now, following a summer growth spurt.

Focus: Joriz DeGuzman
12 year old boy genius.

Next week’s question: "What are you doing for Halloween?"

Name: Sarah Sabet
Major: Psychology
Year: Senior

"Not reaching my highest level of ability in my education or not being able to reach the goals that I have set for myself in life."
Married with an education:

Omega's Party....

By Desiree Hunter
Staff Writer

Before being prematurely ended, following the tragic shooting in the parking lot of UH, the Omega Psi Phi party raging inside the Student Union Event Center was a small one. The success of the event itself was almost lost in the shadow of the event that ended the evening.

"Before the shooting, which we had no control over, everyone was really enjoying themselves," said Ed Campbell, president of the Omegas. Party-goers who showed up "early" to the Omega Psi Phi back-to-school bash on Friday only got admission to a less-than half empty room.

"It usually takes a while for the party to get started," said Canade Ashford, a member of the Sigma

Coyote Karaoke

By Morgan Melendez
Staff Writer

Assail your ears and assert yourself, karaoke is back at Cal State.

For the past three years the Student Union has offered students a weekly chance to pull out all the stops and sing their hearts out! Every Wednesday night, from 4:30-8:30, the pub is full of people lining up for a chance to flex their vocal cords and belt out their favorite tunes.

"It's great! You can drink and watch people embarrass themselves...singing is fun too," says Greg Neal.

Standing Ovation Karaoke, owned and operated by Perry and Lanetta Moody, has been the highlight of campus Wednesdays nights for the past three years. Originally called in to entertain at on campus parties, word quickly spread of their popularity and success to the Student Union Program Board who arranged to book Moody on a weekly basis to provide entertainment to any and all students who had the guts to perform.

"We tested three nights a week and found out that on Wednesdays we had the best turn out, although this year is tougher due to overlapping classes and more classes being added," says Moody.

With everything from Hip-Hop to Country to Alternating, Standing Ovation Karaoke offers students a wide variety and eclectic choice of songs.

But why subject yourself to that kind of potential public embarrassment?

"It's just for fun!" says Lashawn Cole, one of last Wednesday night's performers. "What I've discovered was, I'm still nervous but, I've heard some people sing, and I can't be any worse," she says as she laughs and gets up and prepares for her next song.
'People of the Pines' Pow Wow

By Steve Shelton
Special to the Chronicle

Chants rang and drums banged at the annual San Manuel Pow-Wow held on Oct. 11 to 13 in the Upper Field here at CSUSB.

The three-day event hosted by the San Manuel Band of Mission Indians was expected to bring out more than 5,000 attendants from around the United States.

"We have tribes here all the way from Canada," said Cruz Chacon one of the major coordinators of the program. The Pow-Wow also served the community with cultural Native-American food, and numerous stands selling native artwork.

Pauline "Dimples" Murillo a member of the San Manuel Mission Indian Tribe said, "Many of the people here who are selling native crafts do this from event to event as a means of income."

John Futch, director of CSUSB's Cross Cultural Center, said of there were hundreds of tribes throughout North America, with the main attraction of each day being the "Grand Entrance." With concession stations circled around the baseball field, these dancers took center stage as they performed in the open field. This entrance was led by a United States military honor guard, followed by numerous tribal dancers dressed in their regalia to show off style. The dancers gained points towards cash prizes in competitions based on their performance to beats provided by the Pipestone Creek Northern Drum group from Onion Lake Canada.

Yuhaviatam is what the San Manuel Band of Mission Indians calls themselves in their native tongue. Directly translated Yuhaviatam means, "People of the Pines." The San Manuel Band of Mission Indians are members of the Native American Tribe known as, Serrano. The word Serrano was given to the tribe by the Spaniards meaning mountaineers, due to the fact that the ancestors of the tribe roamed the San Bernardino

Cultural Experiences Abroad

By Morgan Melendez
Staff Writer

Study abroad and gain the "Experience of a Lifetime!"

Last Friday at noon, The International Student Services office hosted a Study Abroad Fair in the upper commons. Several booths, from Cal State, independent travel agencies and various other study abroad programs were on site to give students a glimpse of what life in another country would be like. From Australia to Taiwan to the United Kingdom, The California State University International Program offers students a chance to study in 14 different countries.

What are the requirements? As with any scholastic application transcripts must be included. In addition a statement of intent, letters of reference and a minimum GPA of 2.75-3.25, depending on your university of choice, must accompany the application.

After the paper work is completed students are required to interview with a panel of professors who decide either to recommend you to the Chancellor or not. The Chancellor has the final say as to who goes and who stays.

Under the supervision of Dr. Mo Yariv from the Department of Finance and Accounting, 30 CSUSB students were sent to study in France last year. Dr. Luz Elena Ramirez took two students to visit Cuba last summer, and is planning another excursion for next summer. And Dr. Stacey Sowards took a small group of three students with her to study in Indonesia.

Students who decide that they would rather spend only a few weeks abroad can opt for the Short Term program offered through CSUSB. This program offers students a chance to visit Argentina, Indonesia, Mexico, Cuba or France. Students choosing to study abroad will be happy to know that, as with the National Student Exchange program, they will pay tuition to their home campus. This means that the cost of tuition is the cost of Cal State Tuition and therefore more affordable than most might think. Over all cost does vary depending on the country, but is all-inclusive. Everything from books to food money to cab fair is included.

Financial Aid is also available either through the Financial Aid Office, ASI, or through Phi Beta Delta. Applications for ASI and Phi Beta Delta aid can be picked up in the International Student Services Office in UH-235 or in the ASI office.

Rogelio Padilla, a Cal State student, spent last school year abroad in Madrid, Spain at La Universidad Complutense de Madrid. "I loved it, if I had the chance I'd go back and live there," says Padilla. "You tend to grow in a way that you wouldn't be able to here. You expand your boundaries and become more open minded."

"It would be a great experience to learn about other cultures," said Matt Spalten, one of the students who attended the fair on Friday. As Rosalie Giaccino-Baker, Ph.D. and professor in the College of Education says, "It's really important for students to get out and experience the world."

If you are interested in the study abroad program you can stop by the International Student Services Office in UH-235.

Healthy Lifestyles

By Susie Medina
Multi-cultural Editor

Students are learning that incorporating fitness into their lives improves academics. Essentially, eating right and exercising will increase ones metabolism and therefore increase energy level. This is the energy we all claim that leaves us just before that 8 a.m. two-hour class.

Some people workout to lose weight. Others workout to gain muscle and others for just plain good health.

Student Priscilla Platania says she goes "to stay in shape and tone up. Working out four days a week actively." Tianka Pharaoh would also like to maintain her physique as she keeps a regular exercise regime. She agrees that exercising gives her more energy than when she used to not workout regularly.

"I can get more studying done after exercising because I have more energy but I don't necessarily use it for just studying." Whatever the goal is, exercising has been known to build muscle as well as stimulate the mind, thus making ones capacities and abilities faster.

Professor Bryan Fadlock, who used to be a physical trainer and has a Ph.D in kinesiology encourages students to maintain a work out regime.

"Realizing that student's schedules are so busy, he suggests, "even if you can't work out in one shot, do ten minutes every chance you get. But you should try to work out at least three times a week."

Healthy foods, he says, such as fruits

French Film Fridays

By Susie Medina
Multi-Cultural Editor

Professors Terri Nelson and Aurora Wolfgang are spearheading the French Film Festival every Friday night in UH-106. Each week there is a different movie played for a crowd of 20-25. Last week they played "The Adventures of Felix" and the weeks before "Brotherhood of the Wolf" and "Amélie."

Next week "With a Friend Like Harry" will play at 7PM in UH. The movie is about a man named Michel who on a drive with his family to their summer home, runs into an old acquaintance who remembers him well. The man Harry and his fiancée join Michel’s family for the summer. Harry familiarizes Michel of his old passions of writing and in doing so, Michel finds another side of him. "Amélie" has won six film awards.

The Foreign Languages department has earned a grant from the French Cultural Services that pays for French films to be shown at college campuses nationwide, in hopes that these films will gain appreciation here in the U.S. The films are played on Friday nights at $4 a person, $3 for students. For more information, visit flan.csusb.edu.

Attention cultural groups on campus, please let the Coyote Chronicle know if you have any events coming up or if there’s any news that is relevant to the culture in which you represent. Email us at sbchron@csusb.edu.

Campus Culture: Voices

By Susie Medina
Multi-Cultural Editor

1. What is the name of your club? Voices
2. Who is the president? Jason S. Brown
3. What is the purpose of this organization? To create an outlet for college students to express themselves freely through slam writing, spoken word, poetry, speeches, and different forms of talent.
4. Who are your target members? Anybody with an open mind, that likes to work.
5. What time do you meet? Every Thursday at 8:30pm, in the Student Union.
6. How would one contact you if they’d like to join? Jason S. Brown at jason2brown@yahoo.com.
7. Any upcoming events? October 17, Thursday 6:30, in the Student Union. We will be hosting our first Poetry Lounge called "Voices", we’re different people will be sharing different forms of poetry.
8. Benefits of joining this club? Being able to express yourselves while helping others do the same.

The Coyote Chronicle

Welcome to mLife.
Bisexual: Not so superhero

By Jekardo Arispe
Staff Writer

Cal State San Bernardino is in grave danger. Though we need not fear, Skott Freedman is “coming out” to battle “biphobia.” You appropriately may be wondering what biphobia is, so it is not a new epidemic like the West Nile virus, but a fear of bisexuals, someone sexually attracted to both males and females. So how is this Singer songwriter “Battling Biphobia?” He is on a nationwide tour of colleges and Gay pride festivals lecturing and singing about prejudice from the gay and straight community against bisexuals.

Weather or not he conquers biphobia is yet to be seen, however there is one kryptonite like weakness to this Bisexual superhero, his music. At his website, the music is obscured by his politics and galleries of photos. However, after exercising much diligence, I was able to find some samples of his music, and lyrics.

His style is easily categorized as collage rock, mostly mid tempo ballads with melodramatic poems serving at lyrics. The piano takes center stage, which is a good thing. His skill as a pianist is his only real impressive musical quality. Though his website tours his “three and a half octave” vocal range, it’s actually about one and a half octaves of sing-worthy tone, and two additional octaves of other varied noises. He sings original songs, which is an increasingly rare attribute amongst the glut of pop divas and divos currently mirroring our airwaves. However, he lacks a sense of his own voice, causing him to sometimes place his melodies too low or high for his abilities. In what seems to be an attempt to separate him from other singers he employs a half back-up, half yodel, which is more humorous than attention getting.

Scott Freedman has everything he needs to become a huge star. He is good looking, and he has a gimmick. He is poised to join the ranks of Britney Sears, Enrique Iglesias, and countless other Music industry products. However if he is going to do this, he will need a better group of people behind him. Someone needs to write songs that fit, and by fit I mean hide his voice, and lyrics which are more mainstream. After all billing yourself as a “23 year-old bisexual, singer, songwriter and activist,” may get your attention, however it takes more to get them to pay dollars.

A woman’s work is never done

By Pleasance Brown
Staff Writer

Yes, a woman’s work is never done, at least not from the artist’s or performer’s perspective. These types of works were put on display at CSUSB, on Tuesday, Oct. 8 for the entire world to see.

A number of artists donned the stage and the floor to show you what their art and music was made of. The title of this exhibition is “Women’s Work.” The works, consisted of a number of talents, such as painters, drawings, musicians, dancers, craftsmers, fashion designers.

Visual Arts Department makes a fall debut

By Lakesha Troupe
Staff Writer

The Visual Arts department is booming with different projects and art shows just for you. If you are interested in the visual arts they are having upcoming events located on campus. A twenty-one painting showcase from LA is a showcase made up of 21 different paintings by 21 different artists. It has been going on since September 19th and will be coming to an end on November 16th.

Graphics from Latin America and the Caribbean is a showcase presented by the visual arts department that will be held on November 16th. Along with these showcases the visual arts department also offers the Egyptians Antiques. This display is apart of a permanent collection and can always be viewed for your pleasure.

Like every department, there are students who always seem to shine more than others. Joe Moran, the chair of the visual arts department, mentioned that there are several outstanding students within this department. To name a few, Mr. Moran said, “Juan Cruz will be returning for his master show, Cara Daniels who specializes in wood sculptures, and Mike Beckley who does outstanding work in glass.” Those are just a few of the many students who shine in the creative field of visual arts here at CSUSB.

Along with these miraculous students, James Gobel, a painting professor, is also showing his talents in this area. Gobel is the curator for 21 Paintings from LA. Mr. Gobel will be opening his own show coming up this December. It’s the New Faculty presentation. News from the Art Department Series.

Anyone who is interested in the Jesterfolk offered note on campus by our outstanding visual arts students and faculty may come out and take part. For more information you may visit the visual arts office or you may contact them at (909) 880-3802.
Rock show is a Split Decision

Orange County band Split Decision rocks it with the Dead Kennedy's

By Heather Hubbard
Staff Writer

If you're looking for some good old punk music then look no further. Five friends from Orange County came together six years ago to form Split Decision. Although the band is solely dedicated to creating good music for their growing fan base, it wasn't always the music that came first. The reason Split Decision was formed? So they could get into shows for free.

After playing a variety of shows for the Orange County area, the guys decided to explore venues elsewhere. After all the more free shows the band realized their music could get them a lot more than just free shows. They put on successful performances, made good music and were attracting fans from all over Southern California. Thus, Split Decision's motivation changed; it was all about the music.

Last year they even opened for one of their most influential bands, the Dead Kennedys at the Galaxy Theatre in Santa Ana. Even though they were nervous about playing with the legendary group, Harding says it was his favorite show. "The show was at the Galaxy and it was sold out. Most of the people there wanted to see Dead Kennedys and no one else so it was a tough crowd," remembers Harding. "But it didn't affect our performance at all and it turned out to be my favorite show we have played."

In recent months, Split Decision has been hard at work with their up-coming album, "Arm the Homeless." Most of the songs on the album were created when the guys were free-styling during practice sessions (every week the band practices a total of 15 hours). Their songs address whatever issues are currently on their mind, whether it be politics or just topics they find humorous. "There really isn't one person in the band that writes more than the other...we get the basic flow of the song then we go into writing the lyrics. The lyrics really depend on what's on our mind at the time," Harding explains.

Split Decision is a fast rising band that produces fun, music and entertaining shows. When their self-released album comes out in late November they are going to shop it around and see if we can be picked up by a record label," Harding commented.

With the success Split Decision has this far and with the talent they possess, it is hard to see it not being a problem.

The band (Scott Harding - vocals, Denny Canady - lead guitar, Ebby - guitar, Jeremy Blay - bass and Jim Jaked - drums) embarked on mini-tours throughout the west coast, sometimes renting their own buses and taking fans with them. They headlined at the Whiskey, the Dragon Fly and countless other popular venues.

Dead Kennedy's

Head boppin', Rump shakin', Finger snapin', And foot tappin'. What more could you want in music? Maybe the vibrant vocals of India Arie singing soprano to alto to tenor, and not in that order. In March 2001, India Arie, a Denver native, released the album ACOUSTIC SOUL. The CD was BOMB y'all. The style is unique; her tracks have a mixture of modern pop, blues, and hip-hop. It was amazing, what this woman did with her voice. In, "I AM READY TO LOVE," she has mesmerized by her passionate lyrics that express how much she yearned for love. India Arie is beautiful, natural, talented, and spiritual. Though "BROWN SKIN," catches us off guard with the, "Something magnetic pulls me...All I know is I wanna lay you down." She still sings the biblical truth that many of us seek for in, "I SEE GOD IN YOU." This twenty-six year old doesn't bite her tongue when it comes to singing what she feels. India is definitely not, "the average girl on the video." And her rejection toward materialism is ultimately genuine. She doesn't conform to the stereotypical beauty everyone was trying to make her. Though she didn't win any Grammy awards she had multiple Grammy nominations that lead her to write and sing more passionately. She released her new album Voyage to India in September 24. This album made me laugh, cry, relax and reminisce about, "The Little Things." India Arie sings her appreciation for love, family, God, and nature. Her lyrics are explicit and give wisdom and encouragement. Musically, she is a prodigy, says Lavance Colley, India Arie takes her voyage to India with the up beat tunes and the guitar that keeps you intrigued. When she sings you'll feel her words swarm into your heart. As if you feel the same pain, passion, and love as she sings. Self-discovery is what this CD is. The power to write and sing exactly what you feel is extremely hard for me at least. So when this...

**Coyote movie ticket**

By Marcos Landin and Ivan Fernandez

Snootchie Bootchies! We're back for another installment of the Movie Ticket. This year, we're moving on to a new, easier grading scale. It is as follows: Watch this film now = Bruce Lee
Catch the matinee = Jet Li
Rent this film = Jackie Chan
Bury this film = Some white guy in a J-cloth outfit

Snootchie Bootchies! We're back for another installment of the Movie Ticket. This year, we're moving on to a new, easier grading scale. It is as follows: Watch this film now = Bruce Lee
Catch the matinee = Jet Li
Rent this film = Jackie Chan
Bury this film = Some white guy in a J-cloth outfit

Marcos: What to say, what to say? Was it "Book of Shadows: Blair Witch 2" bad? No, but it was not "Silence of the Lambs" good. If it wasn't for the well-written script, it would've fallen into the Blair Witch 2 category.

Ivan: Brett Ratner did a good job...of surrounding himself with talented actors and screenwriters to make himself look good. Little did he know, I was onto his game. Yes, I saw through the crappy camera angles and directing style. If it wasn't for the actors and the screenwriter, this could've easily been a movie of the week on CBS.

Marcos: Yes, I do believe they tried to pull an "Aaliyah" on us by surrounding himself with a talented crew. Also, I didn't buy his foreign movie making by adding a "schlong" in this film. Was he trying to make me think I was watching a French film?

Ivan: When did Hannibal Lecter become a predictable joke? His presence was nothing like his first. I also suggest Brett Ratner spend two years each at USC, UCLA, Cal State Northridge and, if he has the time, the LA Institute of Film.

Marcos: Great. Let's wait for Harrison to be super-old, Spielberg to start losing his imaginative directing style and Lucas to grow a fourth chin to finally start filming this damn picture. I am kinda excited though.

Ivan: I wonder if Jar-Jar Binks will make a cameo.

Marcos: Me-as don't know Ivan. Don't forget to e-mail us at coyotemovieticket@hotmail.com. Include name and phone number.

**TRIVIA (you thought we forgot didn't you): This week's winners will receive a Darth Maul toothbrush. Don't worry, I didn't use it on my dog or scrotum.**

Marcos: Then what are those hairs Ivan?

Ivan:... 1) "It's Happening."

2) "Yeah baby, yeah.

Marcos: So change your bed pans and get ready to laugh. Let's see if Jim Carrey and the Farrelly brothers (if they are directing) can be funny again.

I started thinking about Jell-O the other day. I remember somebody telling me that Jell-O was made from pig bones and horse hoofs. I guess it would be counter productive for Jell-O to advertise with a horse and pig on the box emphasizing, "Now Jell-O comes packed with more bones and hoofs!" So I started getting curious, and found that consumers are being barred from knowing what we are putting into our bodies.

Genetically engineered foods, or GE foods, have attracted worldwide attention. GE foods have had genes from an animal or plant inserted into them, producing proteins that they could not normally produce. Some advancement in GE is crops that produce their own pesticides or that are immune to pesticides.

Australia, Brazil, the Czech Republic, Japan, New Zealand, Norway, South Korea, Switzerland, Taiwan, Thailand, and 13 countries in the European Union have all either implemented or are in the process of requiring proper food labeling so that the consumer knows whether or not they are buying a food with a GE ingredient. And no, I didn't forget to mention the U.S.

In June the Washington Post ran an article on GE foods titled "What's for Dinner?" In it, Alan Simpson, a British member of Parliament, gave his view of what Europeans think about the genetically engineered food issue:

"I am a co-founder of the Food and Environment Action* Association." Funny, his statement sounds like my sentiments towards the recent War on Terrorism and the impending war on Iraq. But I digress.

The federal government is working with the FDA to the office of Oregon's Gov. John Kitzhaber. The letter cautions, saying the measure "would impermissibly interfere with manufacturers ability to market their products on a nationwide basis." Why is it that an economical issue can be brought up in the form of a cautionary letter to a head of state, but not from the mouth of our President? Is the public's health less important than the welfare of the food industry?

The path you choose today can lead to tomorrow's success.

State Compensation Insurance Fund

If you're ready to apply your knowledge and skills in the post-graduation job market, then toss your hat in with State Fund.

State Fund, the leading workers' compensation insurance carrier in California, is interested in graduates seeking opportunity and stability. We offer a wide range of positions throughout California, plus an environment that will foster your continued growth.

At State Fund you'll find exceptional benefits, professional training to expand your horizons, and many advancement possibilities. Learn how you can join us by visiting www.scif.com or by contacting Human Resources at 415 565 1722. Then launch your career with State Fund and rise to new heights.

Career opportunities may be available in:
- Marketing
- Communications
- Underwriting
- Claims
- Risk Control
- Financial Services
- Customer Service
- Accounting
- Information Technology
- Finance and Accounting
- Human Resources
- Administration

State Compensation Insurance Fund

Don't Ask.
It's genetically engineered, and this one isn't. To make that choice seems basic to me. What amazes me is that this stuff's been on the market for 10 years without our knowledge," says Harris.

What do families on fixed incomes do with labels? Not everyone can afford the higher priced organically grown foods. I guess this is just another instance where the poor get screwed because they just can't move up that ladder. But I digress. Again.

PSRAST, or the Physicians and Scientists for Responsible Application of Science and Technology, publishes a site designed to help people understand safety problems associated with GE foods. There I found an article about a world-renowned scientist who lost his job for speaking out concerns he had with GE foods. Dr. Arpad PusztaI is known for his expertise in food safety, he worked at UK's leading food safety research lab, the Rowett institute. Dr. PusztaI ran into trouble back in the summer of 1998 when he went on to British TV and said "that he would not eat genetically engineered food because of the insufficient testing procedures they have undergone." His appearance at the research center where he worked to suspend and gag him from talking about what he had done at the research center to the media. The if the Rowett institute did everything they could to undermine his statements by pointing out his old age, 68, and that the quality of his work was "everett". Would it surprise you that Monsanto, one of the leading producers of GE engineered seeds, also made a substantial donation to the Rowett Research Services which funds the Rowett institute.

For being such a huge issue I don't think it has gotten the attention it deserves. I thought health has become more and more of a prominent issue within American society. New fitness centers go up everyday with plenty of workout nuts to fill them, you would think that the American public being used as guinea pigs for new scientific developments in agriculture would sound an alarm in people's minds. I'm fully aware of the fact that it benefits the farmers and manufacturers, but I can't see how it is benefiting people of the US who don't know what they are ingesting...

extra officers can be either paid overtime for coming or called from the city of San Bernardino, according to De Mauro.

This leads to the question of whether or not the tragedy could have been prevented.

"It's hard to say. It is easy to sit back and see what could have been," stated De Mauro.

The committee added that the task force will also be reviewing current policies and the need for additional signage at the crosswalks.

"It's not just my smart," he said. "It's including my parents' work and God, really. God, you can't ever forget Him." I think that anything that God gives us is a gift and everybody has a purpose in life. Those gifts, said God, designed us all differently in certain ways so we can all be a help to the world.

outside where it first seemed the real party would be.

University of California Riverside students Carolina Lopez and Michelle Perry decided to attend the Omega Psi festivities after getting flurts about it fom classmates.

They were part of an early crowd who came, saw and left. "I don't know why, he just hit his too early," said Perry, who arrived with Lopez and other UCR students around 11:30 p.m. "We go to it, we leave. It doesn't make sense. It means we're losing money dollars. We're not making any money come to another one of these parties for the future, but I'll come later next time."

Several attendees talked by putting the $10 cover charge that was eventually lowered to $5 as the night wore on. But it means we're losing the ten dollars-

---

Women Continued from page 9

Yes! A woman is not the last one to go on.

Here is a list of a few artists and performers who will be at this event so special: Laura Flores, is a student at CSUSB, and is quite a talented artist who believes that people who use her artwork, "should try and come up with their own interpretations of what they see."

Alicia Kempf hopes that after seeing her contributions to the art world entitled "ME" that people have a better understanding about "Expressions of life's essence and leave with a sense of calm, hope and purpose of how we are one with ourselves."

Debra Wasserman, says she is, "still exploring the possibilities," through her art. "True, the Master of Ceremonies (MC), is a photographer and a fellow artist for this groundbreaking even which is sure to become a tradition here at CSUSB.

Sharenna Clark is also a student at CSUSB, and was given an opportunity to show off her multi-colored talents, which is tie-dye art. "Angie Navarro, contributed her "ladder of colors," Olga Suaures, exposed people to the "Images of Poverty," Beck Meier, and Shawu West, presented the "Black Girl Gallery."

The day started with the inspirational speaker, Iris Jackson as she describes what "phenomenal women" are. Phenomenal women are women who come together to express themselves. These women simply used the platform of art to express themselves.

Artist Teresa Rael and Laura MacManus, played their guitars and graced those present with their talents through song. "Indra Patel played the piano and let people know that this event was through vocalizing. Marie Bahner and Brady Eldredge expressed themselves through the art of dance."

"We've been a lot of their activities," said Corente. "We try to go to as many as we can. They always play good music."

Pow Wow continued from page 6

Mountains.

Many people who attended the Pow Wow believe the most important reason for its existence now is for the celebration and recognition of their kinship. Murillo a mother of three and grandmother of eight, said, "always tell my grandchildren to not forget what they came from, and you can do anything you want to do if you just put your mind to it.""

The artists took this event as an opportunity to relax and celebrate the many riches that are their culture. The tremendous support they receive reinforces Murillo's advice to her grandchildren about achieving anything if you just put your mind to it.

Anti-Hate Vigil
Remembering Matthew Shepard

By Youree Martin
Staff Writer

The Cross-Cultural Center in association with the Gay, Lesbian Biseexual and Transgender club, held a vigil Thursday night from 6-8 p.m. on the lower Commons.

The purpose of this vigil was to memorialize those who have been murdered for their different, sexually oriented lifestyles. This annual event was started by Chani Beemon, a student who has been an active participant with the Cross Cultural Center.

Matthew Shepard, brutally hanged in 1998, while enrolled as a student at the University of Wyoming, was remembered for his courage to withstand the tribulations of an alternative lifestyle.

There were several prolific speakers for the sparse audience in attendance. Some speakers spoke as victims who have experienced the apathy of hate-mongers and some were sympathizers, having experienced discrimination in other ways.

John Futch, Coordinator of the Cross Cultural Center, expressed the purpose of memorializing the atrocities of people of diverse lifestyles.

He said, "We should lead the way to a better world and should learn to live together. The Cross Cultural Center is the arm of students who try to lead the way."

Professor Brian Levin expressed his support to the GLBT as a sympathetic to their cause. He has extensive knowledge and untiring dedication to the causes against hate crimes and extremists. To learn more about his efforts, you can find this information on his website at www.fighthate.org.

Angelic Navarro, a student on campus, thought the vigil was "informative and necessary for increasing awareness and for the celebration of differences."

Though there were no candles at this vigil, the light of Love and Hope for a better place to co-exist glowed through.

The Cross-Cultural Center is the arm of students who try to lead the way.

Youree Martin/Chronicle

Freshman Runner Strides for Nationals

Corinne Jamieson
Staff Writer

Sweat, practice and determination have paid off for Tanya Zeferjahn. In no time at all, she has become CSUSB's number one runner for the women's cross-country team.

"She's a tremendous young lady. Somebody every coach likes to coach," said Coach Burleson. "She wants to be the best she can possibly be."

Zeferjahn started running in seventh grade and has been running ever since. Before she came to Cal State, Zeferjahn ran for her high school, Hepnera High. There she was the number one runner and in the top three for the high desert area.

As a freshman, the 18-year-old runner has helped the Coyotes bring the level of competition up to coach," said Coach Burleson. "She's a tremendous young lady. Somebody every coach likes to coach," said Coach Burleson. "She wants to be the best she can possibly be."

"She's the number one runner and possibly be."

To prepare for a race, Zeferjahn has her own routine. She goes to bed early, eats her special breakfast in the morning and then pictures the race. "I know how I am suppose to feel at every point," she said. For Zeferjahn, running is not only physical but mental too.

Running isn't the only thing that Zeferjahn likes to do. She goes to bed early, eats her special breakfast in the morning and then pictures the race. "I know how I am suppose to feel at every point," she said. For Zeferjahn, running is not only physical but mental too.

For Zeferjahn, running is not only physical but mental too. She is focused on what she wants to achieve. I think she could be the first freshman to receive the All American Award."

As far as Zeferjahn's future, she is hoping to become one of the women's cross-country team. She says she plans to stay on the team as long as she is at Cal State.

---

Humphries Heading Yote Attack in Right Direction

Brian C. Short
Staff Writer

One of the young talented players that emerged on the scene for the II-8-1 Lady Yotes last year was senior midfielder/forward Kayla Humphries.

Humphries was second on the team in scoring last season with a total of twenty points and four match-winning goals.

The San Gorgonio High Graduate is now in her third year with the CCAA. Humphries has been one of the bright spots on the team this year. "I think for Humphries has been second on the team in scoring last season with a total of twenty points and four match-winning goals. The San Gorgonio High Graduate is now in her third year with the CCAA. Humphries has been one of the bright spots on the team this year. "I think for

However, Humphries has been one of the bright spots on the Lady Yotes this year, scoring five goals in a team loaded with a talented bunch of goal scorers.

When asked about the team's struggles this year, Kayla said, "I think this season has been a learning experience dealing with the expectations and reaching our goals."

Kayla Humphries is an English Literature major at CSUSB and hopes one day to become a high school English teacher.

She's also a superstar off the field with a grade point average of 3.1. When she's not on the soccer field or in the classroom, Kayla likes to sleep, shop, and donate her time at church.

For now though, Humphries just wants to help her team gel together in the hopes of becoming a good team this year. "I think for this particular squad we want to grow together and build consistency, so can be a true force to deal with in the CCAA."

As with any sport, soccer can especially be frustrating if you're not getting the results in the net or win column. Humphries has been able to channel her emotions, something she can credit to her coach. "Coach Johnson has taught me how to stay composed and how to control my emotions during the game."

All the great players who compete in sports have their ways of getting themselves mentally prepared or "pumped up" for the game and Kayla is no exception.

When asked how she mentally prepares for her opponents, she said, "I think about the opponents' strengths and weaknesses and how to exploit their weaknesses and getting scoring chances."

Humphries says that she wants to be the best player that she can and try to help her team win games. The CCAA recognized Humphries as player of the week in late September, and if she continues to play at a high level, and help team win games, she will probably have more player of the week awards to come.

But more importantly her team goals are for everyone on the Lady Yotes soccer team to bring their A-game against every opponent because she believes that they should be one of the best teams in the CCAA.
Golf Places Sixth at Grand Canyon Invitational

Jamaal Washington
Staff Writer

Cal State San Bernardino’s golf team spent October 7th and 8th battling it out on the green at their first invitational golf match. They were competing in the Grand Canyon University Oak Craft Classic at Estrella Mountain Ranch in Goodyear, Arizona. The Coyotes finished sixth overall in the tournament, with the top individual player of the team (David Backus) tied for twenty-second place. The tournament featured eighteen teams and ninety golfers (including some of last year’s top ten from the NCAA Division II championships).

Overall, the Coyotes finished two strokes behind the hosting Grand Canyon University, four strokes behind UC Davis and Cal State Stanislaus, and twelve shots behind the CCAA champions Cal State Bakersfield. The individual winner of the tournament was J.J. Jakovac of Chico State who finished the tournament at ten under par with a score of 206. Cal State Stanislaus was crowned the NCAA Division II runner up, UC Davis was crowned the West Region champion, while Cal State Bakersfield took the CCAA champion’s spot and sixth in the nationals.

Five Coyote golfers finished in the top thirty at the tournament. David Backus tied for twenty-second with a score of 219; Frank Firman (Soph.) finished tied for twenty-fourth place with a score of 221; Robert Mink (Fr.) finished twenty-fifth with a score of 220, followed by J.R. Reyes (Fr.) and Mike Ferris (Fr.) who tied for twenty-ninth place with scores of 224. "It was a pretty good performance considering that it was our first tournament of the season,” said head coach Greg Price.

"We were behind some of the other schools in our conference, but we beat a lot of the competition from the Midwest.” The outcome from this tournament could give the Coyotes some positive outlook on next week’s NCAA national preview tournament held at the Crosswater Country Club in Sun River, Oregon. "We’re just anxious for this Oregon tournament” comments coach Price.

The team’s best finish in an NCAA tournament is third (1997 and 1998). Considering that they placed about five strokes away from this is quite an accomplishment, possibly setting the pace for what is to come for the Coyote golf team this season.

"Da Noise: D-1 athletes and sports get it but what about D-2

Kermit R. Boyd
Sports Editor

Check it out: have you ever been part of an organization in which your position in that organization was classified in a lower division in comparison to the higher division? Did you ever climb to a higher position in the organization but your position in that organization was downgraded? It seems to be at the D-2 level where professional scouts are able to view potential draft picks but scouting is mostly in person and live.

Stills, D-1 athletes are always in the limelight, therefore professional (revenue seekers) or scouts are flocking to watch professional talent, which seems to be the next D-1 level or so. Many times when a scout is hunting for talent at the amateur level, the scout may hunt the prey which allowed them stay in the limelight.

If you’re tuned in either you understand what I’m talking about, or need more of a clarification, from the NCAA but exposure for sports is mostly provided by TV, which some D-2 institutions get none of. TV is one outlet where professional scouts are able to view potential draft picks but scouting is mostly in person and live.

Still, D-1 athletes are always in the limelight, therefore professional (revenue seekers) or scouts are flocking to watch professional talent, which seems to be at the D-1 level or so. Many times when a scout is hunting for talent at the amateur level, the scout may hunt the prey which allowed them stay in the limelight.

Lady Yotes hold even with UC Davis

John D. Halcon
Special to Chronicle

If Coach Christian Johnson could erase one mistake his team committed during his Coyotes' double-overtime 2-2 contest against visiting UC Davis, that mistake arrived in the 87th minute of regulation.

After a goal by Jennifer Martelle cut the Aggies' (5-1-2 and 7-2-2 overall) deficit to 2-1, UC Davis received an unconventional goal from Carly Broaddus, who also collected an assist to go with her four shots on goal.

Broaddus took a pass from Jacque Kocer and blasted the ball 40-yards to the net where Coyote goalie Amanda Hernandez came within fingertips of blocking the shot.

The goal served as the equalizer in a match up between a Coyote team that came in posting a 1-5 mark at home against the 20th ranked OtT'^lS"Stved the only yellow card of the contest after the freshman shot that proved costly in the upset bid against the Aggies.

Despite the loss, the Aggies showed great intensity and offensive power in the first half scoring two unanswered goals to grab an early 2-0 advantage.

Natasha Araujo scored the Coyotes first goal, which was assisted by Amber Cappello.

Later in the first half sophomore Stephanie Sheldonick accounted for the second goal on an assist by Erin Keller.

Yet, the Aggies managed to crawl back into the contest after Martelle and Broaddus tallied consecutive goals in the second half.

Two overtime periods were played and neither team was able to establish any scoring opportunities.

The Aggies remained in first place of the CCAA Northern conference while the Coyotes kept a firm position at third place in the South.

Coyotes' Lisa Fryer re-

The loss was the fifth in a row, inside the conference for the Coyotes. They lost the previous four matches by one goal.

The Aggies, ranked No. 4 in the Far West Region, celebrated the win because it keeps them in contention for a CCAA tournament spot even though they are in second place in the North Division.

The win was Davis' third straight over the Coyotes but trail in the all-time series 4-3-1. CSUSB's last win over the Aggies was in 1998.

UC Davis took advantage of two defensive lapses by Cal State, San Bernardino en route to a 3-1 CCAA men's soccer victory over the Coyotes before 150 fans at Coyote Field Friday.

The Aggies' Ryan Shaw notched his ninth goal of the season late in the first half with a shot that deflected into goal off a Coyotes defender for a 1-0 advantage.

Davis struck again in the 67th minute on a goal by Derrick Thomas (his third of the season) off a cross from the left corner by Jeremy Warner.

The Coyotes got into a 3-0 hole when a Davis shot was deflected into the Coyotes goal by a defender trying to head the ball away.

The Coyotes finally broke through with three minutes remaining on Steve Morales' first goal of the season off a pass from Matt Stevenson.

CSUSB had its chances in the first half. Jason Kraa had a one-on-one situation with keeper Nicholas Flatter but his chip shot attempt sailed over the crossbar. Later, Johnny Richardson blasted a line drive that missed the near corner of the net by inches.

They had one legit goal," said Coyotes Coach Christian Johnson, referring to Thomas' goal. "Our offensive players had multiple chances to put the game away. The inability to finish our plays is killing us. We're not finishing our chances."

The loss was the fifth in a row in the conference for the Coyotes. They lost the previous four matches by one goal.

The Aggies, ranked No. 4 in the Far West Region, celebrated the win because it keeps them in contention for a CCAA tournament spot even though they are in second place in the North Division.

The win was Davis' third straight over the Coyotes but trail in the all-time series 4-3-1. CSUSB's last win over the Aggies was in 1998.
