CAL STATE, CITY SCHOOLS
HAVE NEW EXCHANGE PLAN

The School of Education and the San Bernardino City Unified School District are participating in a new cooperative schools venture. This new program expands relations between the campus and the district because, in addition to assigning Cal State student teachers to schools, the college exchanges expertise with two elementary schools, Arrowhead and Parkside.

As part of the program, fifth and sixth graders from the two schools have been visiting the microcomputer lab here to learn computer basics. In addition, Cal State professors teach lessons occasionally in the elementary classrooms, while Arrowhead and Parkside teachers lead sessions in the School of Education classrooms. Dr. Richard Griffiths (Education) coordinates Cal State’s role in this venture.

The Bulletin will be published twice during the quarter break: Friday, Dec. 11 and Wednesday, Dec. 30. Its weekly Friday publication will resume Jan. 8.
Scholarship Donations Are Holiday Greetings

In the past 12 years, with the help of the whole college community, Cal State Associates has contributed scholarships to deserving students in a unique way.

RECYCLE BOOKS

Students, faculty and staff may sell their used books Wednesday and Thursday at the Bookstore. A representative from a firm that buys and sells used books will pay cash for the texts. Bookstore hours are 8:30 a.m.-5 p.m.
The Board of Trustees authorized the chancellor to transmit to the State Department of Finance a tentative CSUC support budget request of $963.8 million, which provides for a fee increase of no greater than $216 per year, with any revenue shortfall to be made up by limiting fall 1982 enrollment.

The trustees decided the chancellor should develop an enrollment restriction plan for Board approval based on individual campus enrollment restriction plans. In other action, it declared the existence of an "enrollment emergency" for 1981-82 and authorized the chancellor to seek a supplementary appropriation of $1.3 million from the state general fund. This support would offset the 2.3 percent additional full-time equivalent enrollment that exceeds the budgeted projection in the current CSUC support budget.

The trustees voted to establish three groups to study budget-related issues. A special task force of students, faculty and staff will develop a new fee that may, if necessary, be charged to students beginning next academic year. This group will also develop a related financial aid program for review by the Board in January. A planning committee composed of the chancellor, trustees, presidents, faculty and students will study CSUC's long-term financial planning. An ad hoc committee of the trustees' Finance Committee will investigate means of securing non-state funds to support the 1982-83 CSUC budget.

In other action, the trustees:

--Modified admission requirements for entering freshmen, effective fall 1984, by adding requirements of completion of four years college preparatory English and two years of college preparatory mathematics consisting of algebra and geometry. The Trustees also resolved that the chancellor develop recommendations concerning additional preparatory course work including U.S. history and government.

--Directed the chancellor and presidents to continue efforts to ensure meaningful student input in the operation of student unions through their participation on governing and advising boards. (On this campus, the Student Union Board of Directors consists of five students, two administrators, two faculty and two alumni.)

--Establish the systemwide position of "trustee professorship," which may be conferred upon an active, non-retired president or vice chancellor who meets the eligible criteria.

--Accepted the trustees' audit staff report and campus reply on cash management at Cal State, San Bernardino.
