## OPEN HOUSE PLANNED FOR EVENING OFFICE

## PLACEMENT CENTER CHARTS EMPLOYMENT IN EDUCATION

The Placement Center has surveyed the employment activity of individuals who completed credential programs here and registered for placement services during the 1981-82 academic year.

A total of 127 of the 159 registrants responded. Of the respondents, 79 percent with credentials in elementary education, 60 percent in secondary education and 82 percent in special education are employed in teaching or related jobs. This compares with a 1980-81 survey in which 84 percent of those students receiving credentials in elementary education and 60 percent in secondary education had teaching or related positions. Because of the small size of the special education program prior to 1981-82, an insignificant percentage of students was found working in that area.

The bulk of the remainder of the 1981-82 respondents are employed as substitute teachers and are still seeking positions. A small percentage--3 percent in elementary, 5 percent in secondary and 12 percent in special education--have left the field. Many of the individuals who take substitute positions upon completion of their credentials are offered regular teaching jobs during their second or third year out of school.

Also responding to the recent survey were 79 of the 145 earlier graduates who have returned to the Placement Center for employment assistance. About one-half of these respondents are still in teaching, with the exception of those with credentials in special education, where 89 percent are still in the field.

## PROGRAM DESIGNED TO REKINDLE MATH TEACHERS' ENTHUSIASM

To prepare for administrative roles in education and to rekindle their enthusiasm for their field, 12 math teachers from area high schools are participating in a special program of workshops here. Dr. Robert Stein (Mathematics) is director of the project, "Academic Excellence in High School Math," which is funded by a \$23,000 grant from the Chancellor's Office. Dr. Pamela Clute, an education and math instructor at UCR, is assisting.

A purpose of the program is to help stem the flow of math teachers out of the classroom and into higher paying jobs in industry by introducing the participants to new and fun ways to apply math. Another goal is to encourage them to think about larger educational issues, such as curriculum and the use of computers in education, so they will be able to take leadership roles in the future.
