CSUSB
Hail, rain flood CSUSB: $2 million plus in damages

Matt Philips
Staff Writer

Large amounts of rainfall flooded a good portion of the CSUSB campus on the weekends of Oct. 13, 2006. CSUSB became engulfed with heavy rain, slosh, and hail around 11:00 p.m. on Friday the 13th. There were also strong winds that blew through school pathways.

The campus weather station reported 2.24 inches in less than two hours. In a half-hour period there was a 1.81 inch downfall.

The large amounts of water that flowed through the campus picked up mud, leaves, and hail. The water then carried the material into adjacent grounds. The drains became clogged as they could not capture all the flowing water. Vice President for Administration and Finance David Demauro reported that the entire campus was closed down.

"The areas that were affected are the University Hall basement, parts of the Student Union first floor, parts of the Social and Behavioral Sciences Building, the entire basement of the Coyote Bookstore, the Pitzer Library, the Visual Arts Building, parts of the Performing Arts Building, the Consolidated Arena, and parts of the Chemical Sciences Building," said Demauro.

The buildings became the site of the "wading pool" that was located there. Some of these facilities hold up to 3 inches of water in either the basement or first floor.

On-duty CSUSB campus police officers contacted CSUSB staff to alert them of the flooding. The staff, who served on campus by nightlight, viewed the situation and took steps toward fixing it. They brought additional staff on campus and hired a contract water extraction company to begin building repairs.

Throughout the morning there were eight water extraction trucks and crews that were able to vacuum out the water from the areas affected by the storm, Demauro said.

The areas that were affected are the University Hall basement, parts of the Student Union first floor, parts of the Social and Behavioral Sciences Building, the entire basement of the Coyote Bookstore, the Pitzer Library, the Visual Arts Building, parts of the Performing Arts Building, the Consolidated Arena, and parts of the Chemical Sciences Building.

"It was a great response," said Demauro.

"I think the response was greater than we anticipated," said Demauro. "We have a very large campus and we had to work in a limited amount of time." The rain turned to snow on Sunday which slowed the process.

"It was a very disheartening experience," said Demauro. "The staff, faculty, and students were affected by this storm.

The University brought in experts from ACR Services and Beller Property Restoration to inspect the areas and make recommendations.

"The companies' recommendations were to remove the basements, to remove drywall up to the height of the water level and to remove any insulation that was wet in the walls.

"After that, the walls that were exposed were then dried out and chemically treated. The drywall, removed, paint and the basements were cleaned up and restored." Continued on Pg. 2

CSU named one of top Green Power users

Shane Olguín
Staff Writer

The Environmental Protection Agency (EPA) named California State University a top 25 campus for green power in the United States.

The CSU also received second in the EPA's top 10 College and University Green Power Partners, with over 31 million kilowatt-hours (kWh) voluntarily purchased through Dec. 22, 2006.

Power Green is a program that is created to encourage programs that are environmentally friendly.

According to the EPA, the CSUSB campus sources 100% of their energy from renewable and conventional power sources.

The program was started in order to educate the public on the importance of using green power.

"CSUSB is in the process of installing new renewable energy sources," said Olguín. "Buildings will soon feature photovoltaic panels such as those pictured above."

Traditional light bulbs add up

Rodolfo Segura Jr.
Staff Writer

In an effort to change the world, Energy Star's new campaign which involves replacing one light bulb for a fluorescent light, may be the answer.

"Change a light, Change the World" is the name of the campaign. The program's main goal is for every single household in the nation to change at least one standard light bulb for a compact fluorescent bulb.

According to the California Energy Commission's Consumer Energy Center website, the program will run from Oct. 1, 2006 to Nov. 30, 2006.

"Together we can change the world by using more energy efficient lighting and appliances, which also reduces greenhouse gases in the environment," the website states.

In California alone, changing one light bulb for one compact fluorescent bulb can reduce energy use by up to 6,000 kilowatt-hours of electricity in one year. That's enough energy to light all the households in Sacramento for 606 days, or almost two years.

Fluorescent lights, the ones being promoted in this project, can last up to 10 times longer than an ordinary bulb. Fluorescent light bulbs also generate 70 percent less heat than a regular bulb. A regular bulb, on the other hand, creates greenhouse gases in the environment.

According to Environmental Protection Agency (EPA) reports, fluorescent bulbs can reduce energy use by up to 6,000 kilowatt-hours of electricity in one year.

"Energy Star's new campaign is a perfect example of how small steps can effect big changes," said Demauro.

"It's an easy way to help the environment in your own way," said Demauro. "Start by switching to energy-saving appliances in your home."

According to Demauro, changing just one 75-watt light bulb in your home is a more energy-efficient and clean 20-watt Energy Star bulb or fixture can be good for the environment as well as your pocket book.

"It will also save you money," said Demauro. "Working with Energy Star, there are many energy-efficient products available for your home that can save you money in the long run."

Based on the California Energy Commission's reports, the average American household uses $180 to $200 per year on utilities. However, the average household uses $130 to $150 on energy-efficient products.

"These energy-efficient products can save an average American household over $50 per year on energy costs," said Demauro.

"It's a great way to conserve energy and save money," said Demauro. "It's a win-win situation for everyone." Continued on Pg. 2

CSUSB offers computer engineering degree

Frank Beatty
Staff Writer

Six years of effort has lead to the birth of the new Bachelor of Science in Computer Engineering degree at CSUSB. Dr. Keith Schubert, assistant professor of Computer Science, explained that the new degree falls between the existing areas of Electrical Engineering and Computer Science.

Faculty members from both the physics and computer science departments, including Artemio Casas, Keith Schubert, Tim Udhe, Ernesto Gomez, Paul Distaso, Yusa Karetta and Yong Fu, helped design the program.

After the initial planning phase Schubert was hired five years ago to help develop this degree.

"Computer engineering started in the 1960s and it's still new and dynamic," Schubert said.

"This is a very unique program and students will have the opportunity to work in a wide variety of industries: computer engineering, software engineering, and also in industries that are not computer related," Schubert said.

"It's a great program," said Schubert.

"The partnership with Riverside Community College and San Bernardino Valley College will bring students to the CSUSB campus for a computer design course, while they are still students at their community colleges." Continued on Pg. 2

"Computer engineering is a very important field," said Schubert.

"It was accredited in the spring of 2006." Continued on Pg. 2

"Students who are interested in this program can apply for admission to the university," said Schubert.

"It was a great response to the demand," said Schubert. "I am very happy with the response of 11 percent which shows that students are interested in this degree." Continued on Pg. 2

"I think we could have had a lot more students," said Schubert.

"We have had a lot of interest from students," said Schubert. Continued on Pg. 2

"It was a great response to the demand," said Schubert. Continued on Pg. 2

Ethnic trends are also changing. There is more enrollment and graduate statistics. The biggest increase was in Latin American and Latino graduates, demonstrating the diversity of the CSU system, according to a CSUSB study.

When looking at CSUSB specifically, the Office of Institutional Research reports graduate statistics and trends similar to system-wide findings.

For the 2005-2006 academic year, CSUSB granted 2,657 bachelor’s degrees and 152 masters for a total of 3,839 degrees awarded.

Tina E. Ross, director of Institutional Research at CSUSB, attributes different factors concerning graduate enrollment statistics.

It is difficult to generalize because much of the action is at the Department level,” Ross said. “Social Work, for example, brings in students as interns which makes for enrollment stability.

The MBA program relies heavily on international students and they need to deal with the national phenomena of fewer international students, according to the study in the United States,” Ross said.

Ross also noted that the re-ranking process has changed the funding for graduate students.

Bringing in a full-time equivalent graduate student is defined by 12 units awarded, the term before the full-time equivalent student was defined for all students at 15 units attempted,” Ross said.

Ethnic statistics show increasing numbers of graduating minorities. Within the CSU, there is a rising number of graduating from the ethnicities listed in the graph above.

The CSOE Chronicle is published every Friday for distribution on Monday during the academic year by the Department of Communication Studies, California State University, San Bernardino.

The opinions expressed in the Chronicle are those of the student writers and editors and do not reflect the views of the university, administration, faculty or any other person or institution unless expressly noted.

Flood of pictures worth thousand words

Pictured above are images of some of the damage caused by the flooding. Rain water flooded lower levels of various CSUSB buildings. Hail compounded water collection in buildings and caused some collateral damage as well. Also shown are workers from Belfor Property Restoration, one of the companies contracted to execute repairs, who are working to restore CSUSB property.

Not rain, nor flood, open mic brought it down

Alexandra Gales
Staff Writer

Technological difficulty and the flooding of the Santos Manuel Stacker (714) 672-9042 did not stop the dedicated artists of Open Mic Night.

Despite the effects of the flood, Open-Mic Night, sponsored by Associated Students, Incorporated (ASI), turned out to be a shining event and many students displayed their many talents.

"Open-Mic Night is an opportunity for students to display their talents, whether it is through singing, reciting poetry, standup comedy or anything else the CSUSB students have to offer," said Taddy Rodriguez, the ASI Vice President of University Affairs.

"If you make an appearance, I will make it an even despite the circumstances," said the audio-technical manager, Eunny Paez, performing his own written work "Circle of the Water," which displayed the all behavior of individuals under the influence of alcohol.

"The poem is regretting but under the influence of alcohol, and the effects," Paez said. "I reached up, took a snort, but I felt like I was breaking the love," the poem read. Melanie Lintzar took the stage and made a profound impact on the audience with her poem entitled "The Whole Truth."

"This poem is about a student talking with a professor and asking why there aren't any African-American writers in the literature for required reading," said Melanie Lintzar about her poem "The Whole Truth."

Student Jamee Machair brought up many controversial issues regarding the student body and university affairs.

"Stop the rip-off and save the CSU system," said Machair.

"It is a pleasant surprise to see the talent displayed and interesting to see the political aspects that are included in many of the student's poems and music," said Joe Machair, the ASI Activities Board.

According to a press release in August 2006 before the beginning of the semester, Coach Checchi said, "We have the right mix to put together a good team."

The roster consists of 14 young women that range from freshmen to senior standing, and three in the nation and number one in the PacifiCity Region. Head coach Kim Checchi has been with the team for 16 seasons.

According to the ASI, the ASI Volunteers bring CSUSB to the community.

Not only produce custom Greek Corporate Gifts & Trophies but also able to do customized work but hate driving around two weeks it takes for some companies on the coasts. Not only produce custom Greek Corporate Gifts & Trophies but only produce custom Greek clothing, but they also are able to customize awards, laser engrave, make decals, embroidery, make wooden letters and symbols, interior signs, mugs, jewelry...anybody anything you can think of.

"For more information, contact Nancy Coria by email narlc@msn.com or contact Corporate Gifts & Trophies at (714) 872-0842.

"Paying with people from different backgrounds helps students get along with others, plus it is good cardio!"

Do you love having custom- made work but also driving miles away to get it?

Ben Barger, a vendor of Corporate Gifts & Trophies was invited by CSUSB Greeks to sell his custom work and organizations at CSUSB.

"Having items here on campus (provides) easy access to purchase student work (rather than going online)," says Nancy Coria, President of Sigma Pi Alpha.

"It's more expensive to get here and with me I don't worry about messing up orders. Also, it is closer than driving to our nearest Greek organization," said Coria, "and it's more convenient for everyone," said Coria.

Coria suggested bringing Corporate Gifts & Trophies on campus to not only promote the business but to also save on gas money.

Many students do not have the available time to take time to drive far for custom work, so they are rewriting their list from back from representing their organization.

"It helps the business but also helps Greek this kind," said Barger.

According to Ben it takes around two weeks for customers to receive their items which is comparable to the nationwide 4-6 weeks it takes for some companies on the coasts.

"This isn't in any way to advertise Corporate Gifts & Trophies but only produce custom Greek clothing, but they also are able to customize awards, laser engrave, make decals, embroidery, make wooden letters and symbols, interior signs, mugs, jewelry...anybody anything you can think of.

Your chance to be like Mike

America Saremonte
Chronicle Staff Writer

At CSUSB, everyone has the opportunity to be the athlete that they have always dreamed of.

The Intramural Sports program at CSUSB offers a chance for students to be part of the team with no experience, practice or tryouts necessary!

Since its establishment, Intramural Sports has offered students several sports to be part of throughout the school year. These include flag football, volleyball, dodgeball, basketball, kickball, soccer, tennis and softball.

Volunteer student fee allows 12 flag football teams, six kickball teams, six soccer teams, 20 volleyball and 20 three-on-three basketball teams to participate for this fall quarter.

The schedule for the games differ but are generally Monday's through Thursday's, 3 p.m. and 6 p.m. for the afternoon indoor sports, 7 p.m. and 8 p.m. for evening outdoor sports.

In order to participate in the Intramural Sports program, one must be a CSUSB student, possess a Coyote One Card, have signed a release waiver and also must be wearing the proper sports attire.

Winners of Intramural games receive champion tee shirts and a team picture that is displayed on the website. Recreational Sports, who sponsors the Intramural Sports program, is currently working on providing a trophy for the winners.

Ivanio Lopez, a member of the Picos Pero Locos football team says that "being Intramural champs has been a great experience just because of winning but also of how much fun we have just playing and doing something for our school."
Diabetic breakthrough

Clarissa Zuners
Staff Writer

The Food and Drug Administration approved a unique pill for diabetes Type 2 diabetes that will help control blood-sugar levels which affects about 20 mil­lion Americans. Januvia, also known as sitagliptin phosphate, enhances the body's ability to lower blood-sugar levels. It increases levels of a hormone that triggers the pancreas to produce more insulin to process blood sugar while simultaneously lifting the sign to let making glucose.

The pill is done by blocking production of an enzyme, called DPP-4, that normally inactivates glucagon, the hormone that increases blood-sugar levels.

Clinical trials show that the new pill works just as well as older diabetes drugs, but with fewer side effects such as weight gain, according to the FDA. Patients take the pill once a day. The inventor for this drug was Merck & Co. Inc.

Guidelines suggest diabetes cut their levels of an average measure of blood sugar levels, called A1C, to less than 7 percent. Many, if not most, diabetes exceed that threshold.

Helping them drop below it could reduce their risk of serious complications, like kidney failure and amputations, according to the American Diabetes Association.

Type 2 diabetes is the most common form of diabetes. With type 2 diabetes, either the body does not produce enough insulin or the cells ignore the insulin. Insulin is necessary for the body to be able to use sugar. Suffering is the basic fuel for the cells in the body, and insulin takes the sugar from the bloodstream into the cells.

Nearly 3 percent of U.S. adults—one-third of those with diabetes—do not know they have diabetes, according to a report in Diabetes Care.

The percentage of adults age 20 and older in the U.S. has grown from about 3 percent to 6.5 percent, according to researchers at the National Institutes of Health (NIH) and the Centers for Disease Control and Prevention (CDC).

More than 230 million people worldwide have diabetes, up from just 30 million in 1980, according to the International Diabetes Federation. Diabetes is expected to affect 370 million people by 2025.

Global warming, death of our Earth

Beau Price
Staff Writer

Global warming could cost the world’s economy $20 trillion by the end of the current century. Actions are not taken to address the urgently expanding issues, according to two American economists at Tulia University’s Global Development and Environmental Institute, through a report which was commissioned by Friends of the Earth.

Their report claims that the estimated figure of up to 6 to 7 per­cent of the estimated global eco­nomic output could even be underestimated due to the fact that it does not include certain unknown future expenses, such as the cost of biodiversity loss, or of urban events to storms.

What is global warming? The website Stop Global Warming.org defines the issue by stating that the Earth is an ecology­sting, atmospheric in great part to the effects of global­ization and man. More carbon dioxide is now in the atmosphere than has been in the past 650,000 years. This carbon dioxide stays in the atmosphere, acts like a warm blanket, and holds in the heat, hence the name “global warming.”

The ecological battle is just the beginning of the threatening real­i­ty of this very real problem. The effects of global warming on the environment can be seen already, and will continue to grow in severity.

Global temperatures have already risen by 0.4 degrees centi­grade above pre-industrial levels, and in this race temperatures could increase by more than four degrees centigrade by 2100.

The report of our environ­ment imposes a series of contin­­ental effects which will unavoid­ably cut into the well-being and quality of mankind.

Stat dramatic shifts in the weather and climate could result in decreased crops and farmlands, widespread drought and water shortages, the complete loss of the coral reefs, the extinction of vari­ous species, and even the north­ward spread of tropical diseases.

If actions were taken right now to prevent two degrees increase above current levels, the world could avoid $12 trillion in annual damages, according to the report.

If the temperatures increases by 3 degrees, effects could poten­tially cause the whole collapse of the Amazon canopy as well as the complete loss of all coral and alpine ecosystems.

According to www.stop­global­­warming.org, the U.S., with only four percent of the world’s popu­lation, is responsible for 25 percent of the world’s greenhouse gas emissions.

A rapid transition to energy efficiency and renewable energy sources will combat global warming, protect human health, create new jobs, protect habitat and wildlife, and ensure a secure, affordable energy future.

Global warming is not opin­ion. It’s a scientific reality. And the science tells us that human activity has made enormous impacts to our planet that affects our well-being and even our survival as a species.

Let’s get our act together.
If you are looking for a quick and affordable vacation, perhaps you should consider what Hollywood has to offer. Around 55 miles away is the heart of Hollywood. If you come to visit, you can watch the stars of the screen and catch the latest movie releases. The best way to prepare yourself for this vacation is by having a car rental service reserve a car for you.

To get to Hollywood from CSUSB take the 215 west to the 10 west. After approximately 45 minutes the 10 west will become the 101 north. Stay on the 101 north and turn left to Hollywood Blvd. Once you’ve made your way through Hollywood the fun will be endless.

Hollywood is filled with one of your favorite spots? Perhaps you can check out their own on the infamous Walk of fame. On the walk of fame you can see your favorite actors, actresses, and performers. “THREE-ONCE and personal destinations have come to no Hollywood visit.

When big Hollywood studios want to kick-off a new film release, The Mann’s Chinese Theater is usually their first stop. The theater is surrounded with vivid colors and hand and foot prints of famous personalities. This is a fantastic place to capture some fabulous pictures.

The theater is a part of Hollywood’s history with great taste and sense of legends from the screen. You can see the unforgettable theater by buying your tickets or by checking out the website that is playing at the moment.

If you are still looking for books, your visit on the website will give you a chance to check out top sales, books or movies located at the theater.

Hollywood after dark is definitely a new experience. If you still have energy for the night life, Hollywood has a lot to offer. You can check out tapings of television shows or movies located at the theater.

An interesting thing in Hollywood is that you should not be afraid to be in the street. You can see many people enjoying street performances and doing simple things to videos that actually have meaning.

You can watch music videos, home videos, television programs, and much more. You have complete access to different videos that were both shooting and broadcasting.

On Oct. 9, Google announced that they were purchasing YouTube, saying it was going to cost them $1.65 billion. For-weekends went through the deal then, and finally, the sale to Google happened.

The purchase was an all-stock deal, according to the Wall Street Journal. YouTube, which was founded with new offices in San Bruno and Mountain View, was now a part of the Google Empire.

One of the problems that came up with the purchase was the size of copyrighted materials. Many of the videos on the site are homemade, which is ok, but the copyrighted videos are causing problems for YouTube’s creators.

Chait and Flanery have spent time with media executives trying to convince them that YouTube can actually create large profits for them because of growing numbers of people spending their free time on the Internet.

We were watching Dave Chappelle on YouTube the other day and I wanted to watch it again. I went onto YouTube and was able to watch it. I had no problem with the ads anywhere. You can find almost anything you want on YouTube, trust me I have looked.

I have my own YouTube channel. It’s called “29-year-old’s thoughts.” My videos range from personal videos including videos I have created here at CSUSB, to clips from the concert in 2011.

Movie trailers and commer­cials as well as many other things can be seen on YouTube.

A recent 2010 episode aired a segment on how consumers are using websites like YouTube to get back at major corporations with faulty products or services. In one situation a man called a cable service to fix some prob­lems, and the service was not having it.

The customer finally got the serv­ices back on the line, but he had his bonus and posted it on the Internet.

The company fired the staff writer and posted it on the Internet. The comment was deleted on the same day and posted it on the Internet.

drink it the topicas boba balls got mixed up through the straws.

The theater is unforgettable with dinner. Juicy burgers and real ice cream shakes. The soup that I sampled was very good with a sweet taste that tickled your tongue. Plus Amata offers a buy one get one on this dish to a perfect combination.

Finally, the entire that I was served in was orange juice instead with strained rim and garnished with lemon. This was a simple meal, yet it was very successful.

The orange juice was not the best, I would recommend a fresh fruit food restaurant; it was very good and gave a lot of flavors.

On the inside, the chicken was very moist and delicious.

If you are hungry this is a great choice for a meal, I was rarely able to eat half of what was pro­vided for me. The best way to prepare yourself if you are looking for a quick show, this is a great choice. But, if you are looking for a really nice night out, this is also a good choice.

Amata is located inside near Pawn’s in the corner of Park Avenue and 5th Avenue. Amata is open seven days a week. There are no open orders on all nights with a wide list of local restaurant locations such as Chicken and Whiskey, which gives you a really nice night out.

The theater is usually their first stop. Johnny Rockets, a classical 1950’s restaurant, is located inside the theater. Most of the videos on the website ready for me to view.

Creating an account does not take much time and is an easy and free process, and an added bonus it’s free.

You can create a YouTube account by entering your personal information. YouTube continues to grow.

Some people create videos for a variety of different reasons, some do it to do their own free time while others do it with the intention of posting them on their YouTube page. This is a great site. Although you have an upload limit, but YouTube is still a good place when it comes to uploading your videos.

You can see the unforgettable prints of famous people. This is a fantastic place to capture some fabulous pictures. You have complete access to different videos that were both shooting and broadcasting.

September reception uled to perform at a scholarship $100 seating and a post-performance from the event will go toward Performing Hall. Tickets are free and the show starts at 7:30 p.m.

Carol Channing was scheduled to perform at a scholarship event for a Performing Arts Building Recital Hall. Tickets are free and the show starts at 7:30 p.m.

Members of the Lumen Valo choir have been performing for over 13 years in many different venues all over the world. The choir has been accredited life and singing. Their music is a vocal mixture from the Renaissance, medieval and contemporary sounds.

Valo has also been awarded special grants by the Finnish Cultural Foundation. The Finnish Choir, in 2002, was awarded special price for a high-profile recording from Finnish Boradcasting. This choir is a major musical group in Finland and has almost always been a festival since the group's existence.

Channing has performed in many memorable films such as "Gentlemen Prefer Blondes," "Rio Grande," and "The Best Little Whorehouse in Texas." She is known for her big eyes and larger than life smile, Channing will tell stories about her amazing life and song.

Throughout Channing's entire time performing "Hello Dolly" she never missed one of the over 3,000 more performances. Some might say that her distinct voice is what made her the star she was and is still.

"Her voice carries and she has great stage presence," said Ashley Scherner who has seen Channing in a paid performance.

In 1995 Channing received a lifetime achievement Tony award for her illustrious career. Do not miss these two opportunities for wonderful entertainment right here at CSUSB Arts Building Recital Hall. Proceeds from the event will go toward CSUSB scholarship programs for students.

If 17,000 people died tomorrow, would you notice?  

Of course you would. There would be 24-hour news coverage. Dramatic headlines. And a devastating effect on our country forever. But last year, drinking and driving did kill about 17,000 people. It is half a million more. But because it happened over a year rather than in a single day, most of us hardly noticed. It's a growing problem, with a simple answer. If you drink, find a safe way home. And help remove the marks that drunk driving leaves on our country.

The event will be held on death and burials in ancient Egypt, after life and the exploration of sary at its location in the Visual Museum. The Egyptian-decal program includes an introduction to the civilization and the exploration of death and burials in ancient Egypt. The event will be held on October 28 from 7 p.m. to 10 p.m. The celebration will include a tour of the Egyptian gallery and guests will have an opportunity to come to learn about this culture," she said.

Sarah Eberhardt, director of development at the Museum of Art and Letters, said the evening will be educational and entertaining.

"This is not a Halloween party, but a birthday party, Egyptian style," she said. The cost to attend the event is $21. If you would like more information about the evening, contact the Fullerton Art Museum at (999) 537-3774, or pick up a brochure for "The Secrets Of The Dead."

The local celebration was organized by the Pride Center in the San Manuel Student Union. 

Steve Valkenburg of the Island Counties Stonewall Democrats was on hand to talk with members of the LGBT community about the importance of political lobbying and activism. The evening was far from "all business," and participants wanted to appreciate the relaxed and social atmosphere. Videos played on a giant screen and music filled the air as those attending mixed pizza and mingle d with new and old friends. Steve Valkenburg shared the significance of such a celebration, saying that a community is important, and that this improves the quality of life experiences for gay, lesbian, bisexual or transgender people. It is often difficult to meet good people when you feel compelled to hide your sexual orientation from others, he said. While many people meet dating partners at work, for example, this is not possible for most in the LGBT community, he added. One of the services of the Pride Center is to provide helpful programs, resources and social events in an atmosphere of safety and acceptance. The name will deline many social opportunities this year, including movies, movies and other gatherings. "Activism is important, and that may come later," Amett said. For more information, call the Pride Center at (909) 537-5096 or email pride@csusb.edu.

The Cal State Community Counseling Center offers confidential one-on-one counseling serving individuals on campus or the community for personal or emotional problems.

"There are so many opportunities for growth and self-discovery that can improve your quality of life," one participant said. Another said, "I feel like I've gained a lot of insight and awareness of my own sexuality and identity."

For more information, please contact the Community Counseling Center at (909) 537-5569.
Chances are the only thing they have in common is that they are long-distance relationships. That is why they thrive. Long-distance relationships are often a way to keep the relationship alive when the people involved are not in the same place. Communication is key to making a long-distance relationship work. The Internet, cell phones, and other forms of communication have made long-distance relationships much easier than they used to be. However, it is important to make sure that both people are committed to making the relationship work.
The CSUSB men's soccer team kept a strong first half against Humboldt State.

CS San Bernardino... 2-0-2 Humboldt State... 2-0-2

SCORING SUMMARY:
29:39 CSUSB Camba, Tim (Frank, Russell) - headed in off of a cross.
31:50 CSUSB Puesty, James (Loreto, Loreto) - headed in an off of a rebound

Colwell knocked in goal off of a rebound. Eric Webster, who took the shot that was saved back into the box, keeper d it, then dropped it back in. Play continued into sudden victory overtime until Mark Nelson launched a shot from 3 yards out. sending it into the far post net and giving Humboldt the win.

Humboldt fed off the next counter attack a pair of goals in overtime until Mark Nelson ended overtime play and brought the score to 2-1.

Coast

Problems for the women's soccer team continued as they were unable to come up with victories against the Seattle University Seahawks and Humboldt State. The two losses extended the Coyotes winless streak to 16 games. On Oct. 15, the Coyotes traveled to the University of Washington to face the Seattle Seahawks, ranked sixth in the Pac-12 West Region. The two teams battled it out, leaving the Coyotes falling short in a 3-1 loss.

Coyote's freshman goalkeeper Laura Lyons was able to keep the ball away from scoring in the first half. The Coyotes defense is strong, as Lyons stopped the shot, but she was inside of the goal.
