Hail, rain flood CSUSB: $2 million plus in damages

CSU named one of top Green Power users

Traditional light bulbs add up

CSUSB offers computer engineering degree

Continued on Pg. 2

CSUSB is in the process of installing new renewable-energy sources. Buildings will soon feature photovoltaic panels such as those pictured above.

Rodolfo Segura Jr.
Staff Writer

In an effort to change the world, Energy Star's new campaign, which involves replacing one light bulb for a fluorescent bulb, may be the answer.

"Light a Change, Light the World" is the name of the campaign. The program's main goal is for every single household in the nation to change at least one standard light bulb for a compact fluorescent one.

According to the California Energy Commission's Consumer Energy Center website, the program will run from Oct. 1, 2006, to Nov. 30, 2006.

"Together we can change the world by using more energy efficient lighting and appliances, which also reduces greenhouse gases in the environment," the website states.

In California alone, changing one light bulb for one compact fluorescent bulb can reduce energy use by up to 6 kilowatt-hours of electricity in one year. That's enough energy to light all the households in Sacramento for 60 days, or almost two years.

Fluorescent bulbs, the ones being promoted in this project, can last up to 30 times longer than an ordinary bulb.

Fluorescent light bulbs also generate 70 percent less heat than a regular bulb. A regular bulb, on the other hand, creates greenhouse gases in the environment.

According to Joseph Desmond, current Energy Advisor to Governor Schwarzenegger, this is a perfect example of how small steps can effect big changes.

Desmond also said that if you cut your home energy use, you could reduce pollution from power plants.

According to Desmond, changing just one 75 watt light in your home to a more energy efficient 20 watt Energy Star bulb or fixture can be good for the environment as well as your car for more than two weeks.

Desmond was the Chairman of the California Energy Commission in 2004. For forward Continued on Pg. 2

Fluorescent light bulbs last longer and generate less heat than regular ones.

CSUSB offers computer engineering degree

By Frank Beatty

Six years of effort has lead to the birth of the new Bachelor of Science in Computer Engineering degree at CSUSB.

Dr. Keith Schubert, assistant professor of Computer Science, explained that the new degree falls between the existing areas of Electrical Engineering and Computer Science.

Faculty members from both the physics and computer science departments, including Arturo Concepcion, Keith Schubert, Tim Usher, Ernesto Gomez, Paul Ostos, Yvonne Karamet and Tong Ya, helped design the program.

After the initial planning phase Schubert was hired five years ago to help develop this degree.

"Computer engineering started in the 1960s and is still newborn," Schubert said.

Five students have started preparing for the new degree and will be able to officially change their majors any day.

"The idea and a half ago the final stages of the program was submitted to the state university system's Chancellor's office.

After completing the plan to all of the other Cal State programs, it was accredited in the spring of 2006.

This is anticipated that the science and engineering departments between campuses will lead to a larger number of people who can pursue their degrees.

"The College Science Foundation was impressed enough with this approach to give a nearly $100,000 grant to the effort according to Schubert.

"However, a few universities have tried this kind of approach and are struggling with it," Schubert said.

A year and a half ago the final stages of the program was submitted to the state university system's Chancellor's office.

After completing the plan to all of the other Cal State programs, it was accredited in the spring of 2006.

Ethnic trends are also changing. The number of enrollment and graduate statistics. The biggest increase was in Latin American and Latino graduates, demonstrating the diversity of the CSU system, according to O'Toole. When looking at CSUSB specifically, the Office of Institutional Research reports graduation rates and trends similar to system-wide findings. For the 2005-2006 academic year, CSUSB graduated 2,657 bachelor's degrees and 502 masters for a total of 3,159 degrees awarded. Ross T. Fina, director of Institutional Research at CSUSB, attributed different factors concerning graduate enrollment statistics. It is difficult to generalize because while most of the action is at the University, Social Work, for example, attracts students ascheckout which suits for enrollment ability. The MBA program relies heavily on international students and they need to deal with the national phenomena of fewer international students in the study, United States, Ross said. Ross also noted that therenching process has changed the funding for graduate students. "Starting this fall, all full-time Equivalent Graduate student is defined by 12 units attended for the term, whereas before a full-time equivalent student was defined for all students as 15 units attempted," Ross said. Ethnic statistics show increasing numbers of graduating minorities. Within the CSU, there is a rising number of graduates from the ethnicities listed in the graph above.

Incident Reports

Date: 10-12-2006
Incident: Gas Theft
Description: Around 4:30 p.m. officers conducted a foot patrol on a campus residence at the Student Union regarding a possible burglary. They identified the suspect who was an employee and recovered the victim's property. Property was returned to the Student Union.

Date: 10-16-2006
Incident: Gas Theft
Description: Around 10:45 p.m. officers conducted a foot patrol on Campus Village. They observed an approximately 3:30 p.m. officers conducted a foot patrol on Campus Village.

Date: 10-19-2006
Incident: Gas Theft
Description: Around 1:37 p.m. officers responded to Lot B regarding a report of a burglary. They observed a young male who was the only one in the area. They believe the victim's property was taken without permission. No leads or suspects were identified at this time.

Date: 10-20-2006
Incident: Gas Theft
Description: Around 2:43 p.m. officers received a call regarding a gas theft. They observed a young male who was the only one in the area. They believe the victim's property was taken without permission. No leads or suspects were identified at this time.

Flood of pictures worth thousand words

Pictured above are images of some of the damage caused by the flooding. Rain water flooded lower levels of various CSUSB buildings. Hail compounded water collection in buildings and caused some collateral damage as well. Also shown are workers from Belfor Property Restoration, one of the companies contracted to execute repairs, who are working to restore CSUSB property.
Not rain, nor flood, open mic brought it down

Alexandra Gales
Staff Writer

Technical difficulties and the flooding of the Santan Manuel Stache (Taco Bell) did not stop the indic­tomed artists of Open-Mic Night.

Despite the efforts of the flood, Open-Mic Night, sponsored by Associated Students, Incorporated (ASI), turned out to be a stunning event and many students display their many talents.

"Open Mic Night is an opportu­nity for students to showcase their talents, whether it is through singing, reciting poetry, standup comedy or anything else the ASI students have to offer," said Taddy Rodrigues, the ASI Vice President of University Affairs.

"If you make an appearance, I will make a note of the circumstances," said the ad­visory technician, James Fukazawa. (13) can turn a hyperactive crowd onto one that will "kick it."

The evening began with tech­nical difficulties that did not allow the microphone volume to increase.

This was due to the fact that the event was moved to the Taco Bell Lounge from its original loca­tion on the first floor of the food. Fukazawa did all he could to ensure that the flood did not cause any catalytic difficul­ties for the Open-Mic Night.

The opening act of the evening was student Henry Vasquez, performing his own writ­ten work "Ripple of the Water" which displayed the ill behavior of individuals under the influence of alcohol.

"The poem is regarding how the influence of alcohol, and the effects," Vasquez said. "I reached up your bra, but it felt like I was breaking the law." the poems read. Melanie Lindley took the stage and made a profound impact on the audience with her poems entitled "The Whole Truth, .."

"This poem is about a stu­dent talking with a professor and asking why there aren’t any African American writers in the lit­erature for required reading," said Melanie Lindley about her poem "The Whole Truth.

"Student Jane MacMaster brought up many controversial issues regarding the student body and university affairs.

"Stop the CPI and save the CSUSB system," said MacMaster. "It is a pleasant surprise to see the talent displayed and interesting to see the political aspects that are included in many of the student’s poems and music," said Jim Delgado, member of the ASI Activities Board.

The ASI Activities Board works with the Vice President of University Affairs to make Open-Mic Night and other events such as Karaoke Night and Movie Night a possibility.

Open-Mic Night is held every other Wednesday at 7 p.m. in the Santa Manuel Student Union Taco Bell Lounge. Karaoke Night which is offered during Open-Mic Night’s off week also at 7 p.m. in the Santa Manuel Student Union Taco Bell Lounge.

Your chance to be like Mike

At CSUSB, everyone has the opportunity to be the athlete that they have always dreamed of!

The Intramural Sports program at CSUSB offers a chance for students to be part of the team with no experience, practice or tryouts necessary!

Since its establishment, Intramurals has offered students several sports to be a part of throughout the school year. These include flag football, volleyball, dodgeball, basketball, kickball, soccer, tennis and softball.

Voices student fees allow 12 flag football teams, six kickball teams, six soccer teams, 20 volleyball teams and 20 three-on-three basketball teams to participate in this fall season.

The schedule for the games differ but are generally Monday’s from 3 p.m. to 6 p.m. and 3 p.m. for the afternoon one­ door sports, 7 p.m. and 8 p.m. for evening indoor sports.

In order to participate in any intramural sport, one must be a CSUSB student, possess a Coyote One Card, have signed a release waiver and also must be wearing the proper sports attire.

Winners of intramural games receive champion’s trophies and a team picture that is displayed on the website. Recreational Sports, who sponsors the Intramural Sports program, is currently work­ ing on providing a trophy for the winners.

Ivan Lopez, a member of the Pocos Pero Locos football team says that "Being Intramural champs has been a great experience but just because of winning doesn’t mean that we have to just play and doing something else for the rest of the season.

Recreational Sports does not just offer the Intramural Sports program, but it also offers the Fitness and Wellness program, the Outdoors program, as well as the Aquatics program.

"We are a universal lan­ guage," said Sports and Facility Coordinator Radmilla Guzman. "Playing with people from different backgrounds helps students get along with others, plus it is good cardio!"

**Global warming, death of our Earth**

Britt Price

Global warming could cost the world's economy $10 trillion by the end of the century. Such actions are not taken to address the quickly expanding issues, according to two American economists at Tulah University's Global Development and Environmental Institute, through a report which was commissioned by Friends of the Earth.

Their report claims that the estimated figure of up to 6 to 8 percent of the estimated global economic output could even be underestimated due to the fact that it does not include certain unknown future expenses, such as the cost of biodiversity loss, or of uniform events to storms.

What is global warming?

The website Stop Global Warming.org defines the issue by stating that the Earth is an ecosystem that is changing, attributable in large part to the effects of global warming and man. More carbon dioxide is now in the atmosphere than has been in the past 650,000 years. This carbon dioxide stays in the atmosphere, acts like a warm blanket, and holds in the heat, hence the name "global warming."

The economic battle is just the beginning of the threatening realities of this very real problem. The effects of global warming on the environment can be seen already, and will only continue to grow in severity.

Global temperatures have already risen by 0.6 degrees centigrade above pre-industrial levels, and at this rate temperatures could increase by more than four degrees centigrade by 2100.

The result of our environmental influences are a series of detrimental effects which will unavoidable affect the well-being and quality of mankind.

Starch dramatic shifts in the weather and climate could result in decreased crops and farmlands, widespread drought and water shortages, the complete loss of the coral reefs, the extinction of various species, and even the northward spread of tropical diseases.

If actions were taken right now to prevent a two degree increase in greenhouse gases, the world could avoid $12 trillion in annual damages, according to the report.

If the temperatures increase by 3 degrees, effects could potentially cause the widespread collapse of the Amazon rainforest as well as the complete loss of all thermal and alpine ecosystems. According to www.stopglobalwarming.org, the U.S., with only four percent of the world's population, is responsible for 22 percent of the world's greenhouse gas emissions.

A rapid transition to energy efficiently and minimization of energy sources will combat global warming, protect human health, create new jobs, protect habitat and wildlife, and ensure a secure, affordable energy future.

Global warming is not opinion. It's a scientific reality. And the science tells us that human activity has made enormous impacts to our planet that affects our well-being and even our survival as a species. Let's get our act together.
Google faces with the purchase is finding the balance of artists sleeping on the job while others are doing something new. The customer filmed the service, and YouTube is a great way to get your own video out there for everyone to see. Creating an account does not take long and is an effortless process, and as an added bonus it is free.

Myopia's has had a huge increase in volume since it started up. By posting they added the business of creating a new buzz for their business. People often create videos for a variety of different reasons, but none do it to have something to do in their free time while others do it with the intention of posting their videos on their Myopia page. Myopia's has an upload link, but YouTube is still my preference when it comes to uploading my videos.

Two great performances are scheduled to perform at a scholarship event. Valo has been performing for over 13 years in many different venues all over the world. The choir has been awarded special grants by the Finnish Cultural Foundation. The Finnish Choir, in 2002, was awarded special price for a high-profile recording from Finnish Broadcasting. The choir is a major musical organization in Finland and has almost never missed a festival since the group’s existence.

Channing has performed in many memorable films such as “Gettolen. Preise Blondin.” 

Michelle Graham Staff Writer

Imagine being paid to enjoy a night out with the stars! Seat-filling also offers people the opportunity to go to concerts, television tapings, game shows, and many other events for free.

Seat-filling also offers people the opportunity to go to concerts, television tapings, game shows, and many other events for free. Compensation can be offered too. CSUSB’s Latino Business Student Association is offering seat-filling as a fundraiser for the Horizons Program. The event will be held on Saturday, Oct. 29 at the Arts Building Recital Hall.

The Lumen Cultural Foundation has handled the fundraiser for the last 15 years. The group raises over $300,000 a year through the fundraiser. The LBSA President Lopez said, “This is a great way to fundraise! It is a lot of fun and it is easy!” The LBSA members have sat in on several shows such as “According to Jim” and “The George Lopez Show.” Lopez said, “The shows only take a couple hours, they do each show 1-2 times.”

The group goes to different studios such as CBS Studio, Warner Brothers and ABC. This has been a fundraiser for the LBSA for several years now, however this year they are doing it more frequently than ever before!

There are multiple agencies that organize these seat-fillings. Becoming a part of a red-carpet event or a fancy award show is as easy as simply creating a profile on the website Seatfiller.com. On the 25, you will have the opportunity to go to concerts, television tapings, game shows, and many other events for free.

The Horoscopes for this month are provided by Astrology-Yourself.com.

Sagittarius November 22 - December 21: People want to hear what you have to say! On the 25, enjoy all the good friends, food and work lighting up your year to be great for fulfilling a long held dream. The answer to the question of what makes you happy in your work is important – and you should spend the whole month thinking about it.

Aries March 21 - April 19: With friends, there is never anything better than the present for taking a long hard look at how things are, how we like it, how we can change it, and how you can make them into what you want them to be. The trick is having a realistic perspective and a grounded sense of self and faith in the world. There’s beauty in all of it, you know.

Taurus May 20 - June 19: Enjoy this month, because you have a special light shining on you. Around the 25, you will have the opportunity to go to concerts, television tapings, game shows, and many other events for free.

Scorpio October 23 - November 21: If you are late to the party, you may not have experienced since you have never been turned down. Around the 27 and 28, give yourself a hard look at how things are, how you’d like them to be and how you can change it. For more information check this site next summer for more information about the 2007 Teen and Education.

Cancer June 21 - July 22: On the 20, it’s time to get creative and by the 25, you are guaranteed a fun, easy and free night out.

Aquarius January 20 - February 18: Enjoy this month, because you have a special light shining on you. Around the 25, you will have the opportunity to go to concerts, television tapings, game shows, and many other events for free.

Pisces February 19 - March 20: Around the 20 and 21, you are really good at what you do! It is easy to let things push into your life (or push in something). On the 25, go back to answering out your internal situation.

Leo July 23 - August 22: On the 20, it’s time to recollect an entertaining job of demonstrating some of the challenges and excitement that being a seat-filler can bring. So go ahead and check out the seat-filling business. With seat-filling you are guaranteed a fun, easy and free night out. You can also go back and make up for something that happened over a year rather than in a single month, most of us hardly notice. It’s a growing problem, with a simple answer. If you drink, find a safe way home. And help remove the marks that drunk driving leaves on our country.

If 17,000 people died tomorrow, would you notice?

Of course you would. There would be 24-hour news coverage. Dramatic headlines. And a devastating effect on our country forever. But last year, drinking and driving did kill about 17,000 people. It is killed half a million more. But because it happened over a year rather than in a single month, most of us hardly notice. It’s a growing problem, with a simple answer. If you drink, find a safe way home. And help remove the marks that drunk driving leaves on our country.

Arthritis Month 21 - April 19: With friends, there is never anything better than the present for taking a long hard look at how things are, how we like it, how we can change it, and how you can make them into what you want them to be. The trick is having a realistic perspective and a grounded sense of self and faith in the world. There’s beauty in all of it, you know.
Party with ‘the Dead’

The Fullerton Art Museum is hosting a “Secrets of the Dead” event to commemorate the 10th anniversary of its location in the Visual Arts Building at Cal State Fullerton. The Egyptian-themed program includes an introduction to the culture and the exploration of death and burial in ancient Egypt. The event will be held on Saturday, Oct. 26 from 7 p.m. to 10 p.m. The celebration will feature a tour of the Egyptian gallery and guests will have an opportunity to view the cloth from the “The Concept of the Afterlife,” “Magnificent,” and “World Rituals.”

One of the rituals that Egyptians performed was a technique called “tying weighing of the heart,” which is an idea that the Egyptians had about the afterlife judgment. Another ritual that Egyptians performed on the deceased was the reopening of the mouth, which is an icon of “cycle of life.”

Within this ritual, they open the mouth with the same tools that they used during the embalming ritual and drink from the artifacts.

There will also be Egyptian dancers with athletic live music and reenactments of Egyptian rituals. There’s coffee, self-serve beverages and fine wine will be served. Gazette professor Margarita Vazquez, who teaches Ancient Mediterranean Art History and Archaeology at the University of Maryland, will attend and talk about “Egyptian Frescoes from Athens to Las Vegas,” which will focus on ancient Mediterranean cultures.

The CSUSB museum has the best ancient collection in all the western states,” said Eva Kirsch, director of the Robert V. Fullerton Museum. “People should really come to learn about this culture,” she said.

Sarah Ebehachi, director of development in the Office of Arts and Letters, said the evening will be educational and entertaining.

“This is not a Halloween party, but a birthday party, Egyptian style,” she said.

The weekend was a big success, as officials estimated that 1,000 people showed up to watch the event.

Jennifer Veal/Chronicle

The evening was far from over as those attending the event continued to dance, drink, and enjoy the event. The crowd filled the room and the area was filled with music, dancing, and good energy.

The crowd continued to dance and enjoy the event and many vendors were on hand to sell their goods to the participants.

The event was a great success and many vendors were on hand to sell their goods to the participants.

The rain forced the event to move back up campus to the old gym and vendors continued to sell their goods.

The event opened Friday night with the dancing portion of the event, but it was moved back up campus to the old gym.

Long-distance romance

me, or anger that some people in this country have not mastered English. I don't know if they believe in the idea of the United States being a land of opportunity. Whatever the cause, I believe that the English language should be the standard we hold up for our immigrants to learn. It is not to keep them ignorant, but to keep them united with the rest of us.

Chances are the only thing people have left in common is the distance relationships that they have. I can tell you that I am sure there are some truth from the experts, people who are, or have been, in long distance relationships.

When the term "long-distance relationship" is met with cynical remarks and warnings against engaging in it, it seems like everyone who gives you advice against it has only ever heard horror stories and tales of heartbreak.

Despite the negativity surrounding long distance relationships, people still find themselves caught in love. If they were truly that bad then they most likely would have slowly slipped away.

To find the answer to this put-putting question, I believe either are or have been in this type of relationship for them. Surprisingly, there were relatively few negative comments from those who have shared their personal stories. On the other hand, responses were similar from each person who shared their thoughts on it: what is it like to be in a relationship of this kind?

What I found from these people is that they believe the distance allowed them to truly get to know the person they were involved with. Communication was the only medium they could have with the person they were with, forcing them to escalate more quickly in their relationship, than in a face-to-face relationship.

Their communication was more frequent, but also deeper, because with those distant dates, they were where and when they came. It allowed for less disclosure of privacy likes, beliefs, and values, which created a sense of beauty and intimacy.

The couple felt that the intimo­ sity of their communication allowed them to focus on getting to know the person the other was involved with in a way that was eventually limited by the distance or other outside distractions. People often talk about the distance allowed those involved to be more exposed to their inner person. People get lonely, and although they are happy with the person they are involved with, they may tend to the empty for comfort. Another negative about long­ distance relationships is there is no physical contact. While you can write or communicate, there are no scenes for engaging in activities. You cannot know how they are communicating, there is no physical contact in it.

Truthfully, there is both good and bad aspects to long-distance relationships, but I tend to side with those distant dates, they were where and when they came. It allowed for less disclosure of privacy likes, beliefs, and values, which created a sense of beauty and intimacy.

The distance might allow for those in the relationship to be unfaithful, but it is really any more than traditional relationship? You hear countless stories of partners cheating in relationships, leading to all types of consequences.

They say that communication is a key to a healthy relationship. When communication has been broken the relationship is bound to fail. It is also more likely to fail. Of course, we all know that the best thing to do is break up, however, the question becomes the distance when this closes.

Low distance love can sometimes be the hardest relationship to keep. Do we go do it?

For those willing to believe

Conservative Union Staff Writer

"I well regulated Militia, being necessary to the security of a free State, the right of the people to keep and bear Arms, shall not be infringed." Some today deny this great amendment and wish to dis­ arm America's citizens.

They claim that it is outdated, or that it prevents a great risk to the American people, or even argue that this clearly worded amendment does not guarantee the people their right to own and bear arms. Those people, those who wish to take away billions of our freedoms, are the same people who wish to take away billions of our freedoms.

President Theodore Roosevelt summed up the prevalent attitude when he said, "The more men feel, the more they feel that the government should be managed by the government."

The Second Amendment is as valid today as it was when it first was written down and is as essential to those in the relationship to be unfaithful, but is it really any more than traditional relationship? You hear countless stories of partners cheating in relationships, leading to all types of consequences.

They say that communication is a key to a healthy relationship. When communication has been broken the relationship is bound to fail. It is also more likely to fail. Of course, we all know that the best thing to do is break up, however, the question becomes the distance when this closes.
The CSUSB men’s soccer team kept a strong first half against Humboldt State. The Coyotes fall to 5-1 overall and 4-8-2 in CCAA play.

CS San Bernardino... 2-0-1 - Humboldt State... 0-2-1

SCORING SUMMARY:
9:30 CSUSB Eseman, Jon (Ramirez, Tony) - line drive from top of the box, keeper d
71:49 HSU Colwell, Matt (Webster, Eric) - knocked back in off of a rebound

Colwell knocked in goal off of a rebound. Eric Webster, who took the shot that was saved back into the game, was credited with the assist.

Play continued into sudden victory overtime until Mark Nelson launched a shot from the box, keeper Lucas Pepi then made the save, Nelson ended overtime play and giving Humboldt the victory in overtime.

Humboldt wins 4-3 victory over CSU San Bernardino for the Lumberjacks’ final home game of the 2006 season.

The Lumberjacks improve their overall record to 11-5-2.

Jon Eseman hammered in a line drive from top of the box, which was caught, then dropped, by the Coyotes’ keeper Lucas Pepi to bring the score to 2-1.

Women’s b-ball throws it down with high hopes

Cal State San Bernadino’s women’s basketball season could not have started on a better note. The Coyotes return all five starters from last season and all five players were able to win the Season Opener against former conference champions California Baptist.

The Coyotes flew to Monterey Saturday and won 67-63 against the Seawolves. The Coyotes were out-shot as they travel to Humboldt State and Sonoma State.

Concerns for the women’s team came from the opening losses to Sonoma State and Humboldt State. The Coyotes were unable to come up with victories and were unranked.

On Oct. 13, the Coyotes traveled to Sonoma State to face the Seawolves, ranked sixth in the Far West Region. The two teams battled it out, leaving the Coyotes falling short at a 5-8 loss.

Coyotes’ freshman goalkeeper Laura Lyons was able to keep the Seawolves scoreless from the first half, allowing four goals. Lyons stood the game with seven saves.

In the second half, the Seawolves were finally able to penetrate the Coyotes defense in the 77th minute when a Sonoma player was able to beat Lyons. Lyons initially stopped the short, but she was inside the goal line.

The Coyotes were dominated on the offensive side as they were shutout 1-3-3 for the game. Defensively, the Coyotes stayed aggressive, although they committed 12 more fouls than the Seawolves.

The loss dropped the Coyotes record from 1-4-0 overall and 0-2-0 in conference play.

On Oct. 15, the Coyotes, again on the road, had an opportunity to steal a victory away from the sixth ranked Humboldt State Lumberjacks. But a penalty kick in the goal was overruled for the deciding factor, giving the Lumberjacks the win. Again, the Coyotes were able to keep the game close throughout the match. Neither team was able to score in regulation resulting in overtime.

Lyons, the freshman goalkeeper for the coyotes, again played well collecting saves for the game.

The deciding goal came with two minutes left to the first overtime period. A lumberjack player was fouled inside the penalty box resulting in a penalty kick. The penalty kick was a shot on the top right corner, beating Lyons.

Sophomore Krista Feer and senior Amy Collins tried to provide some offense for the coyotes as they both collected two shots and five attempts.

Freshman setter Kassie Mehlert had 13 assists for the Coyotes.

The victory improved the Coyotes to 7-3 in their all-time series with the Otters. And, the win assured the Coyotes of their 10th straight season of 20 wins or more. For the Otters, Katie Box had 15 digs to lead all players. The best offense came from Nicki Sandemken with four kills and eight assists.

Women’s soccer is fresh out of grass, with five wins on their record they look forward to next year to start over.

The Coyotes were out-shot in a 1-0 loss.

This is the fourth game in a row and ninth time this season the Coyotes have been shut out.

The loss for the Coyotes dropped their record to 1-3-3 overall and 0-2-0 in conference play.

The Coyotes finish up their season on the road as they travel to California State Bakersfield and California State Los Angeles.
