CSUSB
Grant to foster US Security

CSUSB will receive nearly $1 million dollars to use in its National Security Studies Program.

The grant will require the program to report as increase in the number of students enrolled in areas related to existing National Security Studies.

Clark said the Office of the Director of National Intelligence (ODNI) is asking for 5% of set-amounts of where a student is in what areas, [a requirement of service at the national level].

Travel Abroad programs and critical language training areas that have not been funded, in the scope of the grant, according to Clark.

Clark said that students come from all over the country and the world to study in the field of security.

There have been students from abroad, Korea, Vietnam, even.

CSUSB press releases from the Public Affairs office are now accessible through new RSS feed technology.

Renews news feeds, press releases can be delivered via email, with browser, or through content-based news readers.

The RSS feed allows people to get news and about the campus from anywhere in the world, whether to an email provider or the "computer" desktop, said Sid Robinson, Assistant Vice President and Finance David Damianos said in a campus wide email.

According to Damianos, the press releases now stand at about $52 million.

CSUSB's insurance coverages will ensure, new claims administrators are continuing to provide the information about the coverage.

The campus had had 150 contract workers working day by day from Oct. 24, 2006, through Oct. 26, 2006. The contract workers have kept up to 12-hour work days, restoring all the damage caused by the flooding.

Begins workers are also bound to limit areas impacted by the flood. Final inspections were conducted to ensure that all aspects of the campus were safe for laboratory testing.

Damm Start said that some of the results from the swab samples were positive.

All of the samples taken at seven locations are different bacteria content. There were a few mass swab samples and other smaller amounts of mold were found.

These areas were now all been treated. There have been a total of as many as seven cases working at CSUSB since the floods occurred.

The begging advised the staff, workers, and students to health concerns.

An open forum for the students to ask questions will take place soon according to Damianos.

There will be experts at the forum to answer questions and explain the work that was done.

Not all of the work has been finished. There are still matters which would be better done because when there will be minimal impact is seen at the end of the problem.

A civil engineer has been on hand to provide the campus with temporary and long term solutions to the problem of water entry into buildings.

Damianos also praised the work of the campus community, calling it superb. "Thanks to all of you...President Thomas Pollard, and hard work," Damianos said.

Large amounts of rainfalls totaled the CSUSB campus during the weekend of Oct. 13, 2006.

CSUSB became engulfed with heavy rain, snow, and hail. There were also strong winds that blew through street pathways.

Grill: Good Times Labor Market

Extended Dialogue Speaker Series

Husing, who discussed the economic status of the Island Empire, described a reading of approximately 45 attended in the College of Extended Learning Center's Valencia Conference Room.

The event spanned with reminders and introductions from the Dean of the College of Extended Learning, Dr. Terrell Garcia, and CSUSB President Dr. Albert Karnig.

"The Island is truly a regional asset and is made in itself invaluable in terms of accuracy," Karnig said.

Hising, said the College continues in Radisson, has been studying the Island's labor market for 42 years.

"We got to do ones fact," Hising said, "I'm old.

Hising began his economic study of the Island Empire area in 1964 while working on his thesis at Claremont Graduate University.

In 1964, Hising began tracking employment rates and noted in 2007 that the Island Empire led job growth with 56,650 jobs according to statistics.

"Unemployment is the tightest labor market right now," Hising said. "We desperately need the labor force increased."

In terms of population growth, Hising explained that according to statistics, there are 24 states with fewer people than the Island Empire.

"We said that population growth works, "with this.,

According to Hising, people want affordable housing, jobs to go to the people, industrial projects, better jobs and eventually for people to be called back to work.

"We are the housing market," Hising said.

Hising explained that according to statistics, San Bernardino County has the lowest homes prices, with a median cost of $17,000.

As for determining where the marketplace is headed, Hising explained that no one really knows.

"Consumers are concerned about the workplace," Hising said.

"I don't trust data at the local level. I call people in the market that concern me. No one really knows, probably an 18-month page and the housing market is still the same," said Hising.

Hising described how important industrial supply chain management is to today's economic as well as California's logistical advantages.

These advantages include the West Coast location, deep water ports, beaches and telling California's only competition, and what's better by what information does the business.

"The Island Empire is an important retail market in Southern California," Hising said.

According to Hising, retailers ship 1 in 25 of their customer manage costs of goods from Continued Pg. 2

CSUSB Public Affairs goes online

Shane Olgren/Photo

Sid Robinson, Assistant Vice President for Public Affairs at CSUSB, is a supporter of RSS need technology at CSUSB.

RSS press releases from the Public Affairs office are now accessible through new RSS feed technology.

Renews news feeds, press releases can be delivered via email, with browser, or through content-based news readers.

The RSS feed allows people to get news and about the campus from anywhere in the world, whether to an email provider or the "computer" desktop, said Sid Robinson, Assistant Vice President for Public Affairs at CSUSB, where it is called "Really Simple Syndication," "Rich Site Summary," or even "Syndication Summary" among other names, and it is a form of extensible markup language (XML) for computers.

It is in the form of news feeds which contain summaries of news stories and links to their locations on a website.

The CSUSB website is now configured to publish RSS news feeds much like other major news publications, according to a CSUSB press release.

In order to view the RSS feed, subscribers would need to download and install software specially designed to interpret the feeds.

The feeds are free, part of program, what the company hopes to do is to professional editions of the software that cost, Robinson said.

The integration of RSS technology into the CSUSB web site did not require a significant amount of software, noted Robinson.

"We had some fees in our area to put this together," said Robinson.

"RSS technology can reduce the time a user spends browsing for the correct they want."

Chronicling Success

The Chronicle is the official student newspaper of California State University, San Bernardino. It is produced and published by students in association with their faculty advisor, the Department of Communication Studies.

The Chronicle is an independent student organization not controlled by or responsible to the University, its faculty or administration.

The Chronicle is covered by the Daily Republic on Monday by permission of the University of California, San Bernardino, California, October 30, 2006.
**CSU entry level Test websites**

The Math Success and English Success websites are intended to help students prepare for the Entry Level Mathematics (ELM) and the English Placement Tests (EPT). Continuing:

The Math Success and English Success websites began in 2004. Both websites have material such as practice tests and sample questions that can be used by students.

In some cases, the questions are ones that have been discontinued from earlier versions of the test.

In addition to the practice tests, the websites provide a personalized roadmap that gives students a to-do list to help them do well on the Math and English tests.

Students also receive e-mail messages to encourage them to continue their progress on the required tasks.

Prior to accessing the WCE Test website, you may be directed to take a tutorial. For more information, visit the Online Personalized Tutorial at a cost of $35. The tutorial has been specially designed for the Online ELM Exam.

The Math Success website also offers sample tests that are 10 and 50 questions long, respectively. There is also a printable sample ELM and EPT lists of 114 questions and is all free.

The Western Cooperative for Educational Telecommunication is a membership-supported organization open to providers and users of educational telecommunications, according to the WCE Test website.

The website states that members support the higher education community, nonprofit organizations, and corporations.

The WCET was founded by the Western Interstate Commission for Higher Education in 1999. It has also hosted 700 members in 46 states and 9 countries.

Successful students are not only the ones the websites are designed for.

"The websites are designed for students, parents, school counselors, and teachers to use as a roadmap to guide students so that they will be prepared to do well on the placement tests," said Fay Wong, director of the early assessment program.

Wong said, "This will also help new students avoid the need to take remedial Math and English classes that will not count towards a bachelor's degree so they can save time and money."

The Early Assessment Program launched the Math Success and English Success websites in 2004.

The WCE Test is funded by the Western Interstate Commission for Higher Education. It has also hosted 700 members in 46 states and 9 countries.

The Math Success and English Success websites are intended to help students prepare for the Entry Level Mathematics (ELM) and the English Placement Tests (EPT).

As a member of the CSU community, you know the important role the system plays in ensuring high-quality and affordable education for California's students. You also know that the CSU supports California's economy by preparing the workforce of tomorrow.

One way to ensure that our work continues to contribute to our important work is to make the best possible decisions about investments in our future.

**Conference seeks to market the Inland Empire**

Real Estate Sugar Jr.

The Executive Briefing Conference being held at the Ontario Convention Center is one of three-part series relating to the growth of the Inland Empire.

Friday, Nov. 3, 2006 will be the beginning of the series, and also the beginning of the conference at 7:30 p.m.

The title of the conference is "Inland Empire Growth on the Rise, now what?" The conference will be hosted by the CSUSB College of Business and Public Administration, and the Business Alliance.

The purpose of the conference is to explore how the Inland Empire is perceived and how unique branding and marketing opportunities can help shape the growth of the region.

According to the Wilkin Guge Marketing website, as of July 1, 2005 the population of the Empire reached 3,908,800. That is a huge increase since 1990, when only 1,280,000 people occupied the area.

Also a growing manufacturing center, Inland Empire employs hit the 130,200 mark as of 2005.

The question thus arises as to what the Inland Empire can be branded as. All major locations have brands.

Los Angeles for example has been branded "Silly City." According to the Wilkin Guge website, each slogan as "What happens in Vegas stays in Vegas" are destination brands that can benefit the region.

The website states that "When these three concepts are aligned and regularly adhered to, things happen. Oso, the message and positioning become more memorable février and now, it becomes more economical to run a successful marketing campaign - both because of consistency."

"If we are to market ourselves as a region, we should know our brand," said Karen Dill Bowserman, dean of the CSUSB College of Business and Public Administration on a press release.

There will be a number of speakers present at the Ontario Convention Center.

Guest speakers will include Executive Director of the Temecula Valley Chamber and Visitors Bureau Kimberly Adams, President of the California Speedway Gillian Zecker, Vice President of Marketing at The Press-Enterprise Karen Kohlke, and Managing Partner and Brand Strategist at Wilkin Guge, Gail Gage.

Speakers will discuss the marketing strategies that will make the Inland Empire stand out and profi t.

It is hard to stand out and profit as a region when cities like Calson, San-Bernardino and Riverside are all trying to do the same.

"With rapid economic development, cities in the Inland Empire publicize different aspects of the region and sometimes compete with each other," Bowserman said.

Bowserman also said that the executive briefing will explore whether it is feasible to have a collective, focused brand geared to promote the world outside of the Inland Empire.

Bowserman hopes that the conference will lead to discussion on how to overcome some of the negative images of the Inland Empire that people encounter.

This is only the first of a three-part Business Alliance Executive Briefing Conference series. The last conference will take place Dec. 1, 2006 on campus at CSUSB.

It will be presented by Jack H. Brown, Chairman and Chief Executive Officer, Sisters Bros. Markets.
Semesters versus quarters

Alexandra Gates
Staff Writer

CSUSB Faculty Senate has proposed the implementation of a Semester Conversion Planning Committee (SCPC) at California State University, San Bernardino.

The establishment of the SCPC is the next step for the Faculty Senate. The SCPC will be responsible for advising the Faculty Senate with a written report outlining the feasibility of a conversion.

If the committee provides evidence substantiating a conversion, the quarter system many students are used will be a thing of the past.

"We should have done this a long time ago. Although, a number of students may oppose the conversion, they forget that it comes with much more time to absorb the course material," said Hoffman.

Currently, there is a definite assembly other than the establishment of the SCPC.

In the event that the SCPC authenticates a conversion method along with a written report on the practicability of a conversion, it is expected that current students may not be affected.

"It could take years for a conversion to go into effect," said Hoffman.

While the Faculty Senate intends to establish the SCPC in the near future, students seem to be in opposition of the proposal.

"The current quarter system is straightforward and is diminutive compared to a semester system comprised of 16-18 weeks," said Ryan Hobbs, senior Ryan Hobbs.

The Faculty Senate isn't considering their objective to put together the committee, and students such as ASI President Anthony Corynta attended the Faculty Senate meetings on behalf of the student body.

On the contrary, students are perceived to attend the meetings and hear first hand the dispensation of programs from the Faculty Senate.

The most Faculty Senate meeting will be held Tuesday, November 14, 2006 at AS-145.

Imagining having famous theme parks, movies and more available on campus!

There is a need to imagine amusement because the Associated Students Inc. (ASI) Box Office has the ability to take them in just minutes.

"The ASI Box Office has tickets for several theme parks such as Disneyland, Knott's Berry Farms, Legoland, Magic Mountain, Sea World and Universal Studios, in order to give them when it comes to job placement," said Hoffman.

"The quarter system allows for classes to be held through mid-June which places faculty and students at a disadvantage for establishing association with fellowships at the federal and state levels that have a start date of June last," states the minutes.

Consequently, the atypical quarter schedule complicates the convenience of courses with some campus, again making it a strenuous learning environment for faculty and students.

"We should have done this a long time ago. Although, a number of students may oppose the conversion, they forget that it comes with much more time to absorb the course material," said Hoffman.

The seemingly impossible has become a reality, as scientists at Duke University's Pratt School of Engineering have developed the first working "invisibility cloak" just five months after it was announced that cloaking was theoretically possible. Still, scientists have a long way to go. The new, cylindrical experimental cloak measures a mere 5 inches wide and 0.4 inch tall, so there is no practical application for the cloak of now. Once further explored however, the possibilities of the new invention are endless. They would completely change the face of Hollywood by practically eliminating the need for special effects in terms of invisibility. Not only that, according to research reported by the Associated Press, if an object can be "cloaked" from micro-waves to microwaves and visible light, the object could even be hidden from radar, and the military implications of such a possibility are immense.

The state formed their design according to a new theory proposed by Sir John Pendry of Imperial College London, in collaboration with the Duke scientists.

The invisibility cloak offers endless possibilities attached to its successful, full-scale completion.

**Invisibility Cloak** coming soon to a store near you

**Costume plans, anyone?**

Michelle Graham  
Staff Writer

Forget being a witch, a goblin or a ghost! That is a long shot of the past! Halloween is here again and it's time to get in the spirit.

Costumes have morphed from creepy and terrifying to outrageous and unconventional displays! Our student even reported that he is going to be in a matricidal hand with all of his roommates this year for Halloween. They will roam the streets with pride, bearing their love for this holiday.

According to wikipedia.org: "Costumes became popular for Halloween parties in America in the early 1900s, as often for adults as for children. The first mass-produced Halloween costumes for children were designed to imitate celebrities, presidents, and well-known cartoon characters."

This year,csusb student jesse woccst said: "Halloween is cool because it gives everyone a chance to show a different side to than, either dark or sexy or wacky. It's just one thing about being in disguise that makes people feel more at ease. Plus you get free candy!"

Another popular trend is for women (and in some cases, men) to use Halloween as an excuse to wear particularly revealing costumes, showing off more skin than otherwise would be socially acceptable. This does not just apply to young high school and college girls, this also applies to seasoned women in the work place and young girls in elementary and middle school. In the last few years, it is hard to recall Halloween costumes as modest.

Woccst also said: "I think Halloween gives girls a chance to dress up very sexy and not have to worry about other girls calling them sluts or talking trash, and on a single guy, why wouldn't I fully support all the naughty nuns, sexy police officers and but with which?"

Women aren't the only ones that have been known to get suggestive costumes! Men dress up in a suggestive costumes. Sometimes there is a little exam! Men have dressed up as gynecologists, with a seductive nurse or W.N.I traffic cop. They have also dressed up as Chippendale's man, gestalt and "condom man."

If you are short on cash but still want to have a fabulous costume, then, do not despair! Throwing together a costume can be simple! Use stuff you already have or get a last minute costume.

**Costumes can be improvised with cheap things!**

Here are a few suggestions:

Mia Asia Minor: Use an old dress from high school prom or a bridal-maid dress, throw on some costume jewelry and make "Asia Minor" part of your name! Be a "bunch of grapes" by wearing green gowns or green peppers.

Oliver Mejia  
Staff Writer

Halloween is here! There are many fun activities to do in Southern California. From movies to haunted houses, there is sure to be something for everyone.

In San Bernardino there is an event called Fear Factory Scream Park. It is said to be the biggest haunted event ever in the Inland Empire. It is taking place from Oct. 13-31.

There are going to be 3 different "spine chilling" themes. They will be Carrie Freak Show, Frightmare and Frightmares. Many other attractions will be offered at this event including Frightmares film festival, celebrity special appearances, horror and gothic marketplace, monsters, frights, and live music.

The hours of operation are weekdays 7-10 p.m., Fridays 7-2 a.m., Saturdays midnight, and Sundays noon-10 p.m. Tickets are $10 and parking is $5. Entrance is gate 9 off Arrowhead Ave. For more details on the event you can visit www.sfright.com.

Another attraction available locally is at Knott's Berry Farm. Many people go there to have a fright time at night. The theme park gets decorated in a Halloween theme.

"Knick's professional "scare-panmers" transform it into "Knick Scary Farm" or "Halloween Haunt." Park employees, known as monsters and go through the night scaring guests. Different scare zones and mazes are put throughout the park.

The attraction runs from Sept. 28 through Halloween. The event calls for a teenager to young adult audience because it may be too scary for younger children. Visit www.knottsc.com for more info.

Another theme park that has changed its appearance for a Halloween theme is Six Flags Magic Mountain. With their "Fright Fest," they also decorate the park with Halloween decor. Similar events to Knott's are held in the park. For more info visit www.sixflags.com.

If you are too tired to drive to a theme park or attend some kind of scary event, you can always go to costume parties. There are many events that have been known to get suggestive costumes.

"Saw" is sure to keep you on the edge of your seat when it is released on Oct. 27th just as the previous two did. There's sure to be body parts and blood splattering all over the place in this film.

There are also many old Halloween favorites you could also watch. Spending $5 to watch a film isn't necessary. There are the "Halloween" movies, the "Friday the 13th" movies, or even the previous "Saw" movies. If you haven't seen them yet. There are plenty of films to choose from.

Surely enough there will be costume parties going on the weekends, or if you party any time during the week. Go out and have a good time with your friends, be safe, and don't drink too much!

Thank you! It’s back! Coyote Radio is offered again to students and again as a practice.

In the past students could sign up for the Coyote Radio station on campus. Due to budget cuts, however, the program offered for academic credit was eliminated. This fall is the first time since that students could have signed up for the radio station in Comm 243B.

Taylor Pettit

This practice allows students to get an inside look at how a radio station is run. When you sign up for the class you get to choose which between DJ, music staff, promotions staff, production staff, and news staff.

All of these positions offer different experiences. If you are not afraid of speaking in public and you like getting noticed, then you might consider this as a way to gain school credit and on-the-job experience.

Blogging offers you a chance to do almost anything you want on the air. It allows you to be extremely creative and spontaneous.

Although most of the experience in this course are mostly the only downside is that the show is not broadcasted over FM because Coyote Radio exceeded its one-watt power regulations from the FCC. The only downside is that the station back on the air. Coyote Radio decided to broadcast over the Internet since no license was granted.

Maestro Carlos Porto, Jr. conducts the San Bernardino Symphony at the California Theater.

"The sweet sound of symphony"

Symphony also accepts donations. Money received from donations will be used to support music education, programs, holiday performances, and maintaining the legacy of orchestral sounds in the inland Empire.

Performances are held at the California Theater at 532 West 4th Street, between E and F Streets in San Bernardino. The symphony’s next performance will be "Winter Dreams." The concert will be held on Nov. 11 at 8:15 p.m. and will feature "Tchaikovsky's 1812 Overture" and Symphony and Reid’s Dance of Comets. Virtuoso Howard Zhang and Jiaying Sun will join cellist Marek Szympaski in performing Beethoven's Triple Concerto.

Those interested in catching a performance should contact the San Bernardino Symphony. They can be reached at (909) 380-4650 or by visiting their website at www.sbsymphony.org.
Why do kids (and not just children) go out "trick-or-treating"? Why do kids (and not just children) go out "trick-or-treating"?

Chapman University College's Inland Empire campuses are now accepting applications for the upcoming session.

If 17,000 people died tomorrow, would you notice?

Of course you would. There would be 24-hour news coverage. Dramatic headlines. And a devastating effect on our country forever. But last year, driving and drinking did kill about 17,000 people. It injured half a million more. But because it happened over a year rather than in a single day, most of us hardly noticed. It's a growing problem, with a simple answer: If you drink, find a safe way home. And help remove the marks that drunk driving leaves on our country.
The most difficult part of life as an international student for Serguei Chamtikov is not understanding and speaking English, or surviving the heat Bakersfield summers. Nor is it the complicated application process, obtaining work permits, or navigating the overcrowded California freeways.

The biggest challenge faced by Chamtikov and other CSUSB students from abroad is money.

For Chamtikov and many other international students, the financial aspect of attending a university in the U.S. is a double-edged sword of high tuition and severe work limitations.

Tuition fees are more than three times higher than they are for California residents. According to a calculator on the university's website, international student fees for the 2006-2007 school year average a whopping $7,348 per quarter for 12 hours of in-state parking passes, compared to resident fees of around $1,500 per quarter.

In addition, strict regulations prohibit non-U.S. residents from working more than 20 hours per week.

"That's no way to work and survive on 20 hours a week," said Chamtikov.

To complicate the problem, the expenses of student work typically isn't covered in financial aid packages.

So far, what gives the financial constraints, why would anyone from another country ever consider studying in the U.S.?

For Chamtikov, it was the quality of the education that tipped his decision. He knew he wanted to live in Southern California, and chose CSUSB because it was the most affordable university in the state.

Chamtikov was born in the Ukraine and moved to Greece at age 20 before coming to California in 1998. He completed a Bachelor of Science in psychology here at CSUSB, and is currently working on a Master's in experimental psychology.

"The application process from overseas was a nightmare," he noted, but added that the staff was helpful and attentive, and eager to accommodate his needs.

In spite of the financial difficulties, Chamtikov is happy with his decision to attend CSUSB. "The education here is good, and the Cal State system itself is well-organized," he said. He is pleased with the faculty and the quality of the institution.

Chamtikov also finds time to socialize with friends, mostly fellow international students. Although he enjoys interacting with a variety of types of backgrounds, he says it is easier to connect with other students from other countries.

"We have gone through hard times to get here, and we have similar goals related to our education," he said.

Chamtikov says his university experience is more meaningful because of the financial and academic challenges.

He is married to a former international student who is currently working on her PhD. He hopes to begin work on his own PhD soon, in experimental and neuropsychology.

As for the future, he's not exactly sure whether he and his wife will stay in the U.S. or go to another country.

"We'll see what the future has to offer us."

- 1946 Robert L "Hoot" Thapliyal Cooperstown NY, USN/ast (STS 41B, 61C, 27)
- 1951 Harry Hamlin Pasadena Calif, actor (Michael Kuzak-LA Law)
I have just realized word that people in college are not supposed to have to work for their degrees. I know, I was shocked too! That then again, this is everyday today's college world.

It could not have been this way five, even ten years ago. Did people used to actually study? Were study groups a widespread thing? Because honestly, I have offered many a time to work in a group on a project, but it’s almost as if we are too busy (irresponsible) to step our personal stuff that we deal with on a constant basis, and get to business.

Experience, true, honest experience is one of the keys to a successful life in the long run. But I guess people these days do not value a college experience, we must not be the same think college students used to be. Or maybe we are more influenced by online and frivolous pop culture more than those of yesterday. I do not know. What I do know for sure, is that people are getting degrees, and cannot remember college students used to be.

In the world of academia, not to make a rash and premature decision, and that I use my time wisely as possible. I don’t want to have to do this again, and I want to be able to give back when I move on.

I took two years after high school, and I knew I would come back. I just knew I needed some time, I lived with my mother every step of the way because this was considered. I was making a huge mistake. And guess what? I am going to claim. I enjoy doing things the way I do it.

I may be involved in many other ways, but this academic challenge makes me happy. If not for a little cost off, I would not be in close in good shape that I am here.

If you are too afraid to take time off because, ‘I’ll never go back to school’, I know I would come back. I just knew I needed some time, I lived with my mother every step of the way because this was considered. I was making a huge mistake. And guess what? I am going to claim. I enjoy doing things the way I do it.

I may be involved in many other ways, but this academic challenge makes me happy. If not for a little cost off, I would not be in close in good shape that I am here.

Reality check: Everyone has emotions. When you see people who seem to be in total control of how they feel, work well under pressure, do not seem to allow themselves to be emotionally involved, and maybe even seem able to "turn them off" at will.

It’s called Emotional Management, or EM. It is the practiced ability to channel the energy of one’s emotions into another activities. In short, some people have practiced the art of using the emotions they have to benefit themselves. Saying that you will turn them off is a lie, and can be very damaging and potentially dangerous.

Living in touch with how our emotions affect us, and being aware of how it helps or hinders us, when you allow others to know the way you do. However, with EM, you must practice stress management techniques that work for you. If you utilize EM, there must be a way for you to blow off steam. Such in when you are at work, and after work you go to the gym, or find another way to work out. Maybe you write in a journal or blog. Play or listen to music that lifts your mood. Wrench with a moment. Cultivate a friend. And it does not matter where you are. You’ve gone the same behavior at universities of all kinds. So here’s a secret that you need to know: The way you work out the way you work out your life.

This is an example of my experience working in the cell phone retail business. I was dealing with a customer in the cellular kiosk, I was working for the day. I was a fairly new employee, (I was still learning all the ins and outs of what I am and cannot do). I have always been a big believer in providing excellent customer service, and this customer was usually polite, rude, and all-around the customer you hear people complain about. The way you deal with the kind of people is what separates you from the rest.

I have a very close friend, who has been keeping it real, and if you keep it real, people hear complaints about. The way you deal with the kind of people is what separates you from the rest. Let’s just say, that you need counseling.

The customer had a very demanding day. He had gone right from work, and had let that out into our interaction, something I am very familiar with, and have no problem letting off steam. I turned into a very peaceful setting, and met up with my client, and upgraded his service, and let him off the hook. When I turned into a very peaceful setting, and met up with my client, and upgraded his service, and let him off the hook. After spending close to an hour with this customer repeatedly getting heated with me and saying it was my fault, and continually keeping my demeanor and language under control, I was perfectly preparing for getting so ridiculous, and we just started talking like normal people.

Introducing The Manchester United Football Club, one of the best supported football clubs in the world

Chrysta Wong
Staff Writer

Though the CSUSB men's and women's soccer teams battled out a rough season, soccer still reigns supreme across 3,000 miles away in the United Kingdom.

The Manchester United Football Club is a world-renowned English football club (otherwise known as soccer in the U.S.), based out of Trafford in Trafford, Greater Manchester.

It is one of the most successful clubs in English football history, as it has won every European football award more than once and the prestigious FA Cup (the oldest football competition in the world) 11 times.

Ask any fan, and they'll tell you that Manchester United is the best-supported football club in the world.

The club itself has gone through rocky, all-too-familiar history. It was formed in 1878 as the Newton Heath LYFC, but was near bankruptcy by 1902.

It was then purchased by brewery owner John Henry Davies. Legend says that defender Harry Staffsford's dog ran over to Davies, leading to a conversation between the two men and resulting in Manchester United being born. It has won the UEFA Champions League, FA Premier League, and the FA Cup in the same season.

The post-Angle era for Manchester United has been, in past years, filled with ups and downs.

In the following five years the club had an average, officer-promo success rate, and caused great controversy during the 1999-2000 season when they failed to defend their title and entered the World Cup instead.

History and statistics aside, fans flock to Manchester United Football Club, that is.

The club then ran stagnant until 1999, when they became the only team to win the title.

The treble is in football what the Triple Crown is in horseracing: it entails winning the UEFA Champions League, FA Premier League, and the FA Cup in the same season.

The post-Angle era for Manchester United has been, in past years, filled with ups and downs.

In the following five years the club had an average officer-promo success rate, and caused great controversy during the 1999-2000 season when they failed to defend their title and entered the World Cup instead.

History and statistics aside, fans flock to Manchester United Football Club, that is.

Christopher Woods, 31-year-old American fan of Manchester United, friends United Manchester United fans out of its tiny studio in Palm Desert, CA. "You're one of the best teams in the world," he said, "and I support the best. We had 25 people crammed in here once, all wearing red shirts and screaming and cheering. The neighbors complained. It was great." 

If you are a fan and Woods' brother, "The sports bars really

With British flags painted on their faces and red shirts with United stamps out of their homes, too," said Woods. "The sports bars really only cover the United States teams. You have to ask around until someone invites you over."

So with an underground Manchester United network well-established in Southern California, it only takes a few discreet questions and a pint of red paint to get in the Club. The Manchester United Club, that is.

Across
1. Be-mining structure where the basket is attached.
2. The team with possession of the ball.
3. Any quarter, half or overtime segment.
4. The dribble a shot takes while driving to the basket.
5. Unnecessary or excessive contact against an opponent.
6. When a passer throws the ball to a teammate.
7. The area of the court within the end lines and sidelines.
8. A pass from a ball handler who does not see his receiver, but is estimating where he should be.
9. The rectangular structure where the basket is attached.
10. The crew chief, referee and umpire who control the game.
11. When a team takes the time to develop a play in its front court.
12. The use of a defender's body position to illegally prevent an opponent's advance.
13. The boundary line behind each basket.
14. Last pass to a teammate before a basket is made.
15. The point guard who generally sets up plays for his teammates.
16. An athletic, creative shot used to intimidate opponents.
17. Any pairing of players on opposing teams who guard each other.
18. Meets when one team scores several field goals in quick succession while its opponents score few or none.
19. Any quarter, half or overtime segment.
20. A pass from a ball handler who does not see his receiver, but is estimating where he should be.
21. An athletic, creative shot used to intimidate opponents.
22. The point guard who generally sets up plays for his teammates.
After a year of sitting on the bench and getting 34 doses, Johnson realized that this was the type of life he wanted. He worked on his conditioning, his technique and his opening up to taking his game to the next level.

Despite a seventh-place finish at the NCAA West Regionals on Nov. 4 at Chico State.

The goal, Alfaro’s second of the season on a positive note as the team pulled out best times. That’s just what we needed after a rough season, Johnson said. The team is prepared.

Every team member holds a division. The team is the toughest conference, Johnson said. The team is the toughest conference, Johnson said.

The Coyotes will be looking to take that renewed confidence with them as they head into the heart of conference play.

In the second half, the Coyotes offense was finally able to break through. After being shut out in the first half and a half, the Coyotes were able to score on the Golden Eagles. The game ended with a 3-0 victory for the Coyotes.

The Coyotes have had their ups and downs throughout the season, and they are looking to build on their momentum heading into conference play.

Chico State’s women’s cross-country team finished in 15th place at the NCAA West Regionals on Nov. 4 at Chico State. The team finished 15th out of 18 teams.

The team is coming off a strong showing at the California Cross Country Conference Championships, where they finished third.

The team is looking to build on that success as they head into the NCAA West Regionals on Nov. 4 at Chico State. The team is currently ranked 15th in the country, but they are looking to improve their standing in the West Regionals.

Despite missing the NCAA tournament for the first time since 1999, Johnson is going to do all he can to help get his team back to prominence.

"I think our chances are good. We’ve got a lot of talent. Our team is prepared. I think they’re ready."
