MILLER EXPLAINS
PURPOSE OF THE POLICE FORCE

E. L. Miller, chief of internal security in Boston, in his talk to the Unit III block managers yesterday, explained the present functions, the aims and the purpose of the Poston Police is to protect the security of persons and property, not to suppress the activities as it is a physical impossibility for 103 men to police a community of 20,000 people, the force must work in conjunction and with the cooperation of the people to uphold the laws.

Due to the great scarcity of trained men today, Miller has asked all intelligent, physically capable, teenagers who are interested in the work, to go to him in person, to building H. The eventual plan is to have a force of 60 men for the three units, all to be given modern training in criminal law, the laws of arrest, first aid, police patrol, abnormal psychology, self defense, military drill and discipline, etc. Six investigators with specialized training in fingerprinting, hand writing analysis, etc. will be chosen from the ranks of policemen for their excellence of training record.

In answer to an inquiry Miller stated that there is no definite boundary around poston at present, but that plans are now being made to set one. He assured, however, that the line will be many miles outside of the edge of camp, the western limit probably being the river. Miller also clarified the duties of the K.P.'s. He explained that they have no jurisdiction whatever inside of this project, and that their only purpose is to patrol the perimeter to keep out people who could come in and cause trouble.
