COLLEGE READING PROGRAM - OPEN FORUM

February 2, 2:30pm, C-116, sponsored by the College Reading Program Committee.
The Board of Trustees of the California State Colleges, meeting at Sacramento State College today (Thursday, January 26), passed the following resolution:

RESOLVED, That the Budgetary program for the California State Colleges for 1967-68 be approached on the basis of the following principles:

1) That the Board of Trustees of the California State Colleges strongly reaffirms its determination to maintain the high quality of education in the California State College System, in which the people of California have so great an investment.

2) That the Board of Trustees believes that its budget of $213,000,000 is necessary to educate the 192,000 students who are anticipated for this fall's enrollment, within the quality standards currently programmed. Any discussion of adjustments of these items, required by reason of financial stringency, should begin from the level of the budget as submitted. If, ultimately, it should become necessary to limit the number of student admissions in order to maintain quality, this will be done.

3) On the basis of the budget discussions as reported by the Chancellor, it appears that insufficient funds will be included in the approved State Budget to provide for all qualified applicants and if this assumption is correct, it is urgent that sufficient funds be inserted immediately so that the recruitment of competent faculty to instruct such students can proceed without further interruption.

4) In connection with the foregoing statement concerning quality, we should recognize that the teaching load of the State College Professor is currently close to the highest in the Nation.

5) In view of the reported fiscal problems of the State, the Board of Trustees of the California State Colleges hereby directs the Chancellor and through him the 18 State College Presidents to carefully re-analyze all items in our operations, to determine the possibility of further economies or new program deferrals, that can be achieved consistent with the maintenance of the quality of our educational offerings.

6) The Trustees urge that faculty salary increases be appropriated this year.

7) The Trustees urge that the legislature not abandon the historic principle of free tuition in California higher education.

8) In declaring these principles the Trustees are mindful of the unique and respected program of higher education which has been developed in this State during a period of over 100 years; of the strenuous efforts that have gone into the Master Plan; of the proven wisdom, social and economic, that our system of education has demonstrated and the necessity to provide for the maximum of educational opportunity for the people of this State.
