McCarthy, Rocky, Pettis collect student vote

Democratic Presidential candidate Eugene McCarthy proved his popularity on the Cal-State campus in Monday's AS election. The student vote gave McCarthy 143 of the ballots cast. Runner-up, New York Senator Robert F. Kennedy tagged 95 votes for 25.6 percent. Hubert Humphrey garnered 49 votes, but the no votes amounted to a substantial 82 who were undecided.

Newson-Rockefeller headed the Republican candidates, with 159 votes—6.5 percent of the ballots cast. Nixon and Reagan trailed with 45 and 14 respectively, while 260 ballots were left unmarked.

Republican incumbent Jerry Pettis maintained a steady buffer for his seat in the 33rd Congressional District. Pettis received 59 votes; Husing, 81; Ballard, 84. The abstentions tallied 59 in the congressional race.

**New Wave film screens tonight**

"Hiroshima Mon Amour" is Film-Renaiss's first venture into the film, the story of a love affair between an impressionable Frenchman in a small town and a married Japanese architect. Combining brilliant performers, unusual techniques and a complex underlying theme, Film-Renaiss created a true masterpiece of the new wave.

To quote from the New York Herald Tribune: "Hiroshima mon amour" may well turn out to be a landmark in the history of the film form. Certainly it establishes beyond doubt the potentialities of film as an instrument of insight into some of the major dilemmas that confront modern man. Individual scenes may have an arresting impact, but words, pictures, and musical score are fused so tightly that no single scene dominates. It is certainly one of the most important films in recent years.

The film will screen tonight at 8:30 in Ps 10; admission is free.

**Penman eyes editorship**

James Penman is giving up politics for newspaper work. Penman was recently nominated next year's editor of The Pawprint by the staff. His nomination must be approved by the Publications Board.

Penman, a junior, was ASB President this year, and admits he found it difficult "to get out of the action." Along with other interested candidates for the editor's position, Penman applied to the Publications Board. The other editorial candidates either ruled themselves out or were found unqualified. Penman became the staff's nominee.

Present editor, Pat Sheeran, will remain on the staff to orient the new editor. The Publications Board is set to meet on Penman's nomination Tuesday.

**Newspaper will publish OMNIBUS**

There will be an annual this year, but plans are about in The Pawprint to fill the void.

If the Publications Board approves a special allocation, Pawprint editor Patrick Sheeran intends to publish a twelve-page tabloid at the end of the year.

Serving as a recap of the school year, the publication will be called the PAWPRINT OMNIBUS, and will feature two-color printing and more photos than photo editor Terry Nicholson can scrounge out of his PS13 darkroom. The editors are now examining the Pawprint archives for the publication's pictures—and most of them will be photos that have never been printed.

If OMNIBUS is a result of the demise of the college annual, "Cimbo," this year, the publication everyone seemed too busy or too uninterested to put out. According to Sheeran, the omnibus will keep text at a minimum and employ a free use of photos and collages. Staff editor Ralph Lightstone is in charge.

**Goss speaks**

On Tuesday, May 7, the Lectures and Public Affairs Committee will present Robert Goss, Assistant Professor of German, who will be speaking to student activists and German Student Uprisings! He will give a summary of the past year's happenings, including the shooting of Rudi Dutschke. Professor Goss will also discuss the ideas and philosophies that are inspiring student activism.

The lecture will begin at 11:30 a.m. in Ps 10. All students and faculty are invited to attend.

**Tournaments, Anyone?**

The Physical Education Dept. is sponsoring a sandball tournament as a co-ed paddleball tournament on May 15 at 2:30 p.m. Any full-time student or member of the faculty or staff may participate. Details may be secured in A 138 or A 159.

**Sign-ups will also be allowed at the first round of play in the elimination tournament in the PE area.**
Deferments keep mouths shut

Editorial

Last week’s rally voicing dissent against the war, draft and various social ills, sponsored by SDS, gave students a forum to air some of their problems more directly to the entire campus. Although the turnout for most of the scheduled events (except for the dance) was sparse, it certainly does not mean that students are not concerned with the issues discussed. Rather, the poor turnout may be explained by the committee’s procedure of announcing the events only at their last minute, thus deterring some from attending and giving us the opportunity to discuss the reasons why we aren’t all there for Free Speech and that which are not a part of the free expression area use, imwspaper praised the student effort to make sure that there were no students on this campus who opposed our cause and I feel rather pleased by the student effort to make sure that there were no students on this campus who opposed our cause.

Other reasons for the small turnouts at the SDS program must be considered. Perhaps many of the students who do feel deeply about our presence on this campus do not have time to worry about with their assigned combinations for best coneting, and feel that as long as they are not bothered by the others, their decision that is as pleasant as Newport in June. It would be interesting if the committee discussed with their questionable de- ferments had they themselves been forced to work to make the moral choice they may not have made if these people were professional students on this campus who would have to support their personal views on the campus. The committee’s continued involvement in Vietnam and elsewhere, however, is not the source. I would agree with the students on this campus for being apathetic toward student government; for once some of these students decided to try and do something about this apathy and then they find there’s nothing they can do for a federal government to take care of their problems.

Instead, they decided to try and do something about this apathy and then they find there’s nothing they can do for a federal government to take care of their problems. Special publicity consider- ations may be discussed at the Dean of Activities office, how- ever—for any campus group.

A large number of these problems lurk closer to home than we might think, as SDS repeatedly emphasizes. However, a few students did participate in the exchange of ideas and opinions. The most important and beneficial event of the week was the policy clarification meeting. The students present were given credit for not electing to stay aloof as others now do.

We commend Cal-State’s Students for a Demo- cratic Society for the concern they display, speaking on issues that many sympathize with but avoid, for various reasons. A word to SDS: this campus is imminently for atten- dance at any function. Nevertheless, we do care; your task is to further communica- tion in this area. Recognition is also due the speakers who visited campus, lending their energies on our behalf.

R. J.

EDITOR’S NOTE

To the members of the Committee for Recreational Area Perpetuation (CRAP): We would like to publish your letter, but we need student identification.

We will withhold your name(s) if you request, and all replies will be confidential. Our policy forbids the publication of anonymous letters, but we will publish it at the earliest date if your identity is personally con- firmed with the editor.

LETTERS

CSCBS, free speech area use, newspaper praised

Editor:

I am a registered voter who came to your college to hear Kenneth Rockroth, and was agreeably surprised to see your Free Speech zone on in use. I have your little paper, The Pawprint. Your editorial concerning Jerry Pettis’ speech also seemed thoughtful and pene- trating. Kenneth Rockroth is the sweetness and light that he seems to use as a screen. It seems to me that the above article on Pettis explained his stand of the civil rights issues. His stand on the campus war was not discussed. He may still be a registered voter.

Congratulations on your paper and on your school! With best wishes for your continued suc- cess.

CB

Speech restriction?

Editor:

I have a question that perhaps you may be able to answer.

If the policy of the school is to keep the free speech area free from any discrimination, how can we feel sure that it is not being used as a private meeting area by the students on the Activities Committee?

Dean of Students Office, the policy clarified.

Mr. Hodge, you said that the Free Speech rally was to be allowed because you felt that it was a statement made at a recent SDE rally by San Rishoe.)

Mr. Hodge, you said that the Free Speech rally was to be allowed because you felt that it was a statement made at a recent SDE rally by San Rishoe.)

The Pawprint has scheduled a banquet in honor of Dean of Activities, G. William Hunt and Activities Advisor Jon Humphries on May 16 at 7:30 p.m. at the La Paloma Restau- rant, San Bernardino.

The banquet will also honor Professor Leo Kreter of the Music Department, voted “Pro- fessor of the Year” by The Paw- print editors. Professor Kreter will be the subject of a feature story in next week’s issue.

Kreter, Hunt, and Humphries are leaving CSBSBS this year, in the newspaper staffs usual recognition of distinguished students, faculty, and staff members to make reservations for the dinner if they want to at- tend. There will be a choice of the Mexican dinner for $2.50 or a 4-ground sirloin dinner for $2.75. Please contact Dave Folsberg, Pawprint office, be- fore May 14 for reservations.

CSCBS program for disadvantaged sees suggestions

Students and faculty are invi- ted to make suggestions about a proposed administra- tions program which will per- mit twenty culturally disad- vantaged students to enter the College for the Fall quar- ter. The hearing will take plai- ne on Tuesday, May 7 from 1:30 to 2:30 in L147 and from 3:30 to 3:30.

The principal feature of the pro- gram will be a more per- missive use of the pass-no re- gistration system to meet one year’s academic course for culturally disad- vantaged students. Suggestions are being sought particularly in the selec- tion and tutoring of these stu- dents.
Paul Jacobs is a noted labor leader, author of many books including Deception at the Fishermans Wharf, Labour in a Free Society, Old Before its Time, The New Radical Feminist. He will be at Cal-State May 7 to speak on racism in America and his function to all citizens. He will be sponsored by the campus SDS group. Jacobs writes for many labor magazines, and is a staff member of the Center for the Study of Democratic Institutions in Santa Barbara. Jacobs is also a Peace and Freedom Party candidate for the U.S. Senate. Jacobs will speak in PS 207 from 12:45 to 2:00, with the last hour reserved for questions and responses from the audience.

ART EXHIBIT
continued from p. 1
nardi will present a program in the Pacific High School auditorium. The San Bernardino Civic Light Opera will present a mock-romantic musical comedy entitled "The Fantastics" starting May 5. Tickets for this and other events may be purchased at the Harris Co., or the Chamber of Commerce. All the art exhibits and films are free to the public.

The Allied Arts Exhibit will continue through May 15.

Health test
A written health examination will be given Wednesday, May 8 at 2:30 in L-145 for all students wishing to participate in the Peace and Freedom Health education requirement for graduation. The exam will be based solely on the book Positive Health by Cushman et. al. which can be purchased in the bookstore.

Those students who cannot attend at this hour, please make special arrangements with the PE office, A 138.

SPECIAL INSTRUCTION

The Times, said that motivation for science today is to get "farther away from understanding the world around them," but Dr. Scherba advanced that perhaps the scientists are "somewhat to blame: does scientific jargon make the scientist unintelligible?" Dr. Brown noted that students who are not scientists "should be taught "but are not qualified to teach."" Dr. Brown advanced that perhaps the scientists are "somewhat to blame: does scientific jargon make the scientist unintelligible?" Dr. Brown noted that students who are not scientists "should be taught "but are not qualified to teach.""

Professor Brown was questioned on the "Challenges of Applied Biology," stating that science and technology is "promising his own welfare in his total environment."

PANDORA'S BOX
Professor Brown told his audience Saturday afternoon that continuous innovation is needed to maintain the growth of the United States during World War II. "We solve problems with technology, but in future there will be many new problems," he admitted. Brown cited the automobile as the "prime example of the modern Pandora's box." He emphasized that there are not enough "problem solvers," even though the scientist-engineer population has grown significantly in the past 50 years. Unfortunately, the greater part of the world is not reaping the benefits of research and development, Brown indicated.

MORE AID - INEFFECTIVE
"Poverty intensifies and accentuates poverty," he asserted, and added that even though the Gross National Product of the developing countries is actually increasing, the per capita GNP is spiraling downward because of the population explosion. He said that not enough aid is reaching the richer countries to inject more capital. "This top-sited idea is the problem of producing native people to do the developing. If you were to double the capital from the rich countries to the poor countries, it could not be absorbed," Brown said. Each country must develop its own capacities; they have indigenous problems and they must be solved independently. "You cannot transfer the 20th Century of the Kansas wheat field to a jungle of the Amazon," he said.

COW AND PIG WELFARE
Professor Brown was questioned on the belief that there is no limit to productivity, in view of the population explosion. He replied that if more people are willing to eat vegetables than meat, more people can be fed. In America, he said, we feed the greens and vegetables to animals, and then eat the animals. The Cal-Tech professor noted that a colleague of his called this a gigantic "cow and pig welfare program." Nevertheless, Brown answered, it is possible to find alternatives to the difficult problem, and he predicted that science will start some day produce an imitation steak, in the same manner that "artificial butter" was produced.

SPECIAL INSTRUCTION
In a panel discussion later Saturday afternoon, moderated by CRCSD Dean of Academic Affairs, Dr. Gerald Scherba, the professor Brown said that there is an exciting and "fun" side to science, in general. He told an anecdote that a Russian colleague once told him about the USSR: "Science is the best way to experience necessary for any work in the future. Because the omnibus will be neither newspaper or annual, the editors feel that the publication of original and original ideas is essential; if you cannot lend staff aid, please submit ideas we can use.

Pat Sheeran will edit the omnibus.

BIOLOGY

SCIENCE PANEL- Professor Harrison Brown (I to r), Dr. Gerald Scherba, CRCSD Dean of Academic Affairs, Dr. Robert Metcalf, and Dr. Irving S. Bengelsdorf participated in a panel discussion on "Science and General Education" to conclude the official opening of the science buildings. About 50 persons were present.

Innovation must continue, says scientist
Biology, says that science will aid man in improving his own welfare in his total environment. Innovation must continue, says scientist Dr. Robert Metcalf, who is as specialized as the ancient Greek is as specialized as the ancient Greek. "We solve problems with technology, but in future there will be many new problems," he admitted. Brown cited the automobile as the "prime example of the modern Pandora's box." He emphasized that there are not enough "problem solvers," even though the scientist-engineer population has grown significantly in the past 50 years. Unfortunately, the greater part of the world is not reaping the benefits of research and development, Brown indicated.

BIOLOGY
At last Friday's SDS rally, student Bob Morales explained the organization's intents and goals. Morales said that the primary intent of the organization is to bring the issues to the students: "the vital issues of the unpopular war abroad and race and economical problems at home." Morales noted that the SDS is against ignorance, compliance, and apathy and further lashed out at rumored attempts by students on campus to form an anti-SDS organization as "vulgar." He further termed the attempt as "tragic" and a "waste."

"I long for a day when an SDS chapter is not necessary," he said. Although some of the SDS rallies have not been models of Public Relations, Morales said SDS "is not in the PR game and we do not apologize for bad rallies." Morales vowed that SDS would continue to bring the issues to the students. He defended fellow SDS member Bill Maddox as a selfless person, not deserving of the derogatory comments directed toward him. Morales also urged a vote for Jerry Ahlgen, a candidate for AS President.

Jack Sneden, political editor for The Middle Eye, a local underground newspaper, spoke. Sneden spoke at CSCSB several weeks ago, and contributed to a controversy over the conditions of the San Bernardino jail.

"MIDDLE CLASS HIT"

"Some people around here call me a radical," Brashear said. "Well, I guess I am, but I haven't incited any riots." He said that the United States is still bombing in Vietnam, and contended that rice factories and private residences are major targets, not military installations.

Brashear said that middle class America perpetuates the war: "Your income directly or indirectly comes from this war and you're afraid to oppose it." He also commented on the poverty in San Bernardino.

"DRAFT NOT ENEMY"

Jerry Rohde, then a candidate for The Middle Eye, a local underground newspaper, spoke.

"I consider that the draft is not the enemy. The enemy is war, poverty, disease, and man's indifference to man." He further said that SDS should turn toward solving these problems instead of merely opposing the draft. Pennman cited the poverty he had seen in Muscovey and appealed for help in the American Friends Service Committee's Community Aid and Relations Committee (CARC) as a more meaningful contribution.

"NO BARGAINS"

Another familiar speaker, Doyn Washington, hit at the principle of a free speech area: "This should be a free school, so speak wherever a person chooses, not just in a designated area." Washington outlined the black man's plight in the nation, charging that "If we don't die fast enough in the ghettos, you'll send us to Vietnam to die." He further said that the black man will not bargain anymore, for bargaining means that some concessions must be surrendered. "The only thing a black man has left is his dignity, and we won't bargain with that."

Commenting on the Negro's fight for equality, Washington emphasized that it is "not a black or a white issue, but an human issue. Man cannot survive until he learns to get along with others." Washington, also a Middle Eye member, said that the United States should be indicted for its war crimes in Vietnam.

Student Larry Lingo disagreed with the speakers' views on free speech and Vietnam: "I do not see how a person can say that the establishment of a free speech area is a limitation on free speech. I have also talked to people who have been to Vietnam and they feel it is a just war." Lingo said that the cause in Vietnam can be won, and the internal problems of America can be solved, "but it will take a lot of work."

"THE STUDENT'S ROLE"

Lawrence Sneden, professor of law, said in a later speech that students have traditionally been the footmen of change. "I suggest that sometimes students might prick the consciences of their instructors who might not be socially active," encouraging them to spend more time discovering how to break the power cycle. But Sneden cautioned the small group of students in the crowd, saying, "You can't think you have the answers just because something is wrong." He noted, too, that the violent overthrow of anything is not the panacea. "You have to penetrate the powers...to accommodate the changes that are necessary," he explained.

Sneden said that America must do something about the white problem in society: not the Negro problem.

SDS schedule for draft resistance week also included several other events: a lecture given by the American Friends Committee on the draft, a speech by Don Carroll earlier in the week, and a slide lecture by Los Siete on bombing in Vietnam. The resistance slate also included two members from RESISTANCE in Los Angeles. The Cal-State SDS chapter also sponsored a protest march Saturday morning in downtown San Bernardino.

"SUMMER SCHOOL LOANS AVAILABLE"

A very limited amount of money is now available to loan students who need assistance to meet summer session expenses.

In most cases these loans, under the National Defense Loan Program will not exceed $300. Preference will be given to the applicants who carry 10 units and who most need assistance to continue in school. Loans are available only by attending summer session.

Application deadlines is May 3. Forms are available in the Placement and Financial Aid Center.

"Writer's Clinic held at Cal-State"

Students from three San Bernardino high schools participated in a writer's clinic here last Saturday. The clinic was organized by Dr. E. M. White, and the San Bernardino City Schools. The separate groups were moderated by CSCSB and UR students.
