The Adolescent Health Clinic offers a multi-discipline approach to medical, emotional, and social problems of adolescents aged 12 through 18. It is funded by fees and a subsidy from the United Community Services. It is operated daily from 3 p.m. to 6 p.m., and is staffed by professionals including physicians, psychologists, social workers, and psychiatrists.

These people are volunteers. They are also volunteer secretaries and nurses. Adolescents coming to the clinic either come on their own or are referred by other agencies or professional people.

There’s A Battle-Cry For Our Environment

Figures of nations’ consequence will gather in Santa Barbara, Calif., on Jan. 28, one year to the black day after the great oil blowout, to work on a battle plan to fight environmental blight.

At the center of events is a ringing document written by Dr. Roderick Nash, associate professor of history at the University of California and member of a community-wide committee sponsoring what is described as “not a conference but a strategy session.”

“We’ve had enough talk, so I confirmed The Santa Barbara Declaration of Environmental Rights to a few hundred words,” Dr. Nash said. “It is essentially a battery.”

Stewart Udall, Secretary of the Interior at the time the U.S. government leased to oil companies rights to drill off Santa Barbara, has confirmed that he will take part.

Udall was since described the leasing off a coastline that is a prime resource of natural beauty as “a tragic error,” and “my cancellation clause will not be binding but a strategy session.”

JOBS EUROPE, officials announced today that they still have 200 jobs available in their Summer program.

This exclusive program is only for California high school and college students 18 to 25 years of age by June 15th. Friends may work together or nearby if they apply together.

JOBS EUROPE is sponsored by The International Students Association, San Diego State College. The Secretariat is Princeton Research Corp.

The purpose of THE JOBS EUROPE Program is to give young Americans an inexpensive and unique opportunity and exposure to learn European cultures, languages and know the people.

The jobs are in French and German sections of Switzerland and in England. These salaried work opportunities range from general hotel/resort, child care with families, factory, office, hospital, camping counseling, to supermarkets.

For free details write to JOBS EUROPE, 15385 Cantara Street, Panorama City, California 91402. (213) 786-1602 after 5:30 p.m.

**Policy Established**

After change of editorship of any newspaper, a policy format should be stated to all readers, advertisers, and other interested persons.

Let it be understood from the beginning: this paper is the voice of, and shall be responsible to, California State College, San Bernardino.

It shall be the policy of this student publication to provide up-to-date news, to do feature stories on a variety of college personalities and activities, and to publish editorials that are based on facts and express the views of this paper. It shall provide news for the majority of the readers, including students of all ages, professors, staff, people within the community, and advertisers.

Columnists have the right to express their views and opinions, and any person who disagrees with anything printed by this paper has the right to answer in the "Letters to the Editor" column. This paper is printed with Associated Student Body funds and advertisers' revenue. Therefore, these people deserve new responsibility to today and also tomorrow.

Persons who disagree with the paper's policy of news and comments for "all" are welcome and encouraged to respond. This is a newspaper for the reader.

**Grand Theft Auto**

This is not the place to leave your car unlocked.

A student left his auto locked, but with one of the windows down. The result is the stolen. Campus Police later found the car in the front parking lot of the college, from where it had been taken.

Other students have not been so lucky. Fortunately, last year some $3,500 worth of personal property was lost or stolen from this campus. Grand theft auto has taken place more than once.

A car stopped located in the student lounge was recently stripped of the rem amplifier, changer, base, cover, and unprotected. Do not invite trouble.

**To Keep Record Straight**

stripped of the rem amplifier, changer, base, cover, and unprotected. Do not invite trouble.

possessions, you would be wise to lock your vehicle and roll cartridge. Total loss: $150.

from where it had been taken.

**Sensory Aware Sensory Awareness**

Want to expand your meditative horizons?

Want to expand your meditative horizons? Get back in touch with your feelings! Trust someone while your eyes are shut.

If so, then perhaps "Sensory Awareness" will become part of your life.

"Sensory Awareness" is described by Bernard Gunthor, renowned encounter group leader based at Easen, Big Sur, California, in this way:

"Sensory Awareness is a method which can help bring you back to your senses: to quiet excessive thoughts, to release chronic tension, to enhance direct sensory-reality in the here and now."

This process can show you how to allow greater sensitivity, feeling and awareness: aid you in letting yourself be more — your entire organism — open to the potentialities and possibilities with out/in you.

With these goals in mind, a local group formed almost a year ago and has been meeting each week since then. The leader, George Carver of Loma Linda, comments on the group:

"The members of the group are so attuned and conditioned to relaxation that it happens almost as soon as they walk into the room."

Since he is not a trained psychologist, Carver does not attempt to practice psychotherapy. In fact, he stresses that members not bring outside problems into the group (verbally). However, if some special problem interferes (coalesced on page 5)

**Control Environment**

Often, people expect the problems of our culture to be solved without the slightest effort on their part. Others, due to lack of knowledge, don't know what to do about many problems that society is faced with today.

California State College is offering to the people of the community — and to anyone willing to take time out to live — a class on how environmental problems have arisen and how they may be solved.

The course, offered by Dr. James Crum, professor of chemistry, is titled "Environment and Pollution."
Seven faculty members at California State College, San Bernardino are receiving promotions for the coming academic year, President John M. Pfau announced today. Promoted to full professorships were: Dr. Ernest Garcia of Rialto, in educational administration; Charles F. Sanford of San Bernardino, biology; and Dr. Edward Sanford of Claremont, business administration.

Advanced from assistant to associate professor are: Dr. Richard E. Goodman, biology; Dr. By. B. Khare, political science; Dr. Nikolai E. Khokhlov, psychology; and Dr. Kent M. Schofield, history, history. All hold Ph.Ds.

The seven men have come to CSCSB from a cross-section of educational institutions and with varying backgrounds in teaching and professional experience. Two are natives of foreign countries, with Dr. Khare coming from India and Dr. Khokhlov from Russia. Dr. Schofield has the longest tenure at CSCSB, arriving in 1966.

Pfau announced today.

The San Bernardino Chamber of Commerce is sponsoring this year's Miss San Bernardino pageant. The girl selected as Miss San Bernardino will be awarded special prizes along with the opportunity of participating in the National Orange Show Queen contest and the Miss California Queen contest.

If you would like to learn more about the requirements of the contest come to the conference room in the Library (L-114) Monday, January 19 at 10:00 a.m. A representative from the Chamber of Commerce will be on hand to explain the program to you.

Congressman Brown Airs Views

U.S. Representative George Brown, a Democrat from History Park, spoke to approximately 75 students at CSCSB yesterday morning. A representative reporter was present, but Brown had canceled a forum on Asia, but the event was expanded to include a question-and-answer session in which Rep. Brown made known his opinions on a number of issues. His appearance was sponsored by the ASB.

Brown is planning a race against Representative John Tunney, a Democrat from Riverside, for the Democratic nomination for the U.S. Senate seat now held by Republican George Murphy. Although he has been for some time considered a sure opponent of Tunney, he has yet to announce his candidacy formally. He told his CSCSB audience that he has no intention of running his candidacy during the first week of February. His reason for not yet doing so is due to the fact that he is busy setting up headquarters in various cities so that he can make known his intentions.

Brown predicted that his race against Tunney will be "comparative" due to the fact that the views of the two candidates are "very much the same" on most issues.

All there are differences between the two. Brown said that he would take issue with Tunney's position on the grape boycott, "a couple of votes (in the House of Representatives) that may hurt him in the black community, and a recent vote in support of organized labor.

Brown predicted that he will win the race because of his greater familiarity with problems and the fact that Tunney "took too long in recognizing that the Vietnam war was wrong."
Gilbert R. Rangel, CSCSB's Financial Aid Coordinator is a native of Arizona. He is from a pioneer family; grandparents on one side of the family came to Arizona before the turn of the century. Rangel was educated at the Arizona State University. He taught high school for four years.

In Phoenix, Rangel joined the Foreign Service in 1961, and worked in the United States Information Agency. After undergoing three months of training at the Foreign Service Institute at Arlington, Virginia, he was assigned to Leon, Nicaragua. There, he was an active director of the Bi-National Center operated by the USIA and was also a student affairs officer for the American Embassy.

In 1965, he was transferred to Managua, to capital of Nicaragua, as student affairs officer. His responsibility during the five years he spent in Nicaragua was to coordinate and initiate educational programs of the USIA with that country's two universities.

In the latter part of 1966, Rangel was transferred to Tegucigalpa, Honduras, where he served as an assistant cultural affairs officer in charge of youth affairs.

During his stay in South America, much of Rangel's efforts were concerned with scholarship programs, organizing educational programs, and arranging educational travels for Latin America students. He also taught English at some of the universities there. He also served as a field representative in Central America for the American Field Service.

From February to June of 1969, Rangel traveled in the United States. Last July, Rangel took his present position at CSCSB.

Although he has resigned from the Foreign Service, Rangel is still involved in Latin America for two reasons: First, there are still some students in the U.S. because of Rangel's efforts to obtain scholarships for them; there are also two students still to be brought here. Secondly, Rangel is a numismatist who still corresponds with friends and students there. His friends in Latin America are many, as he is familiar with all of Central America and all of the South American countries on the Pacific Coast.

We need help making the world turn.

Like it or not, money is what makes things happen in this world. In business. In government. In all the worldly affairs of man.

It takes money to discover medicines, to rebuild ghettos, to educate children, to feed, clothe, and house humanity. Money is an essential ingredient in solving man's day to day problems—and in promoting his century to century progress.

In short, money makes the world turn. We're the world's largest bank and putting money to work is our business. We think it's an important enough business to hire the best people we can find to run it. A Bank of America personnel representative will be interviewing on your campus soon. If you want to make a career of making the world turn, make an appointment.

Goodman spent a year at the University of Washington under a postdoctoral fellowship before coming to CSCSB.

Prior to leaving India in 1949, Share was an agricultural researcher and specialist. He supervised several pilot projects, including one supported by the Ford Foundation. He continued his research interests, turning to political science however, at the University of Missouri.

A specialist in computer applications, Khokhlov earned both his M.A. and Ph.D. from Duke. He has taught and worked in the Far East and has been a consultant in industrial management. The psychologist has also spent a number of years as a writer and lecturer.
Haney to Resign As L&PA Chairman

By NANCY SAUNDERS

Los Angeles - Students planning to enroll in The California State Colleges were reminded today that the application fee will increase to $20 effective February 3, 1970.

Funds ...

(continued from page 1)

The number of additional students to be admitted on individual campuses will be determined by the colleges in accordance with such factors as availability of qualified faculty, physical facilities and support services.

Mr. Brakbell said the Chancellor's Office initially requested an allotment promise of funds to alleviate the current year's enrollment situation, and that meetings were conducted with State Department of Finance representatives on the request.

"As a result of those meetings, it was decided that an allotment promise would not be forthcoming," Mr. Brakbell said. "However, the Department of Finance indicated it would authorize the use of funds that will become available as the colleges' overall appropriation to alleviate the enrollment problem."

The reminder was issued by Dr. David Kagen, Coordinator of Admission Services. He noted that the increase from $10 was approved last November 25 by the Board of Trustees to alleviate increased costs of processing applications.

When asked his opinion of the success of these programs, Rangel said, "I think that the programs have been very successful at Cal State in that there are approximately 45 students who definitely would not have been able to attend college anywhere because financial aid were not available."

Sensory Awareness

(continued from page 2)

relaxing, the group has non-verbal ways of reducing it.

Among the Gunther techniques used by the group is the "Trust Walk," in which one person closes his eyes and is led around the room or the house or yard by another group member. This is used during group meetings as a getting-acquainted technique and in which the group member is led through a way in which to build rapport and trust.

Corinne Schnur is now interested in starting a second group because of an interest that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time, Miss Schnur states that students have a limited amount of spare time."

Chemist ...

(continued from page 1)

The educator-author, who has a Ph.D. in chemistry and botany from the University of Wisconsin, has taught at his alma mater since 1942. He is one of the organizers of the integrated liberal studies department. Prof. Inde spent a year as a Carnegie Fellow in general education at Harvard where he was connected with a course in natural sciences organized by President James B. Conant.

The Lectures and Public Affairs Committee met Tuesday, January 13, to discuss the winter program and future endeavors. A film will be shown on February 27, but several are still under consideration and a decision was not reached. "On the Beach" was suggested and is currently being looked into. The coming months hold some potentially worldwide projects: an Ecology Poster Exhibit in early February; the Cal State Theatre's presentation of "One", a series of Math Department lectures; poetry readings, lectures and puppet show. Ray Bradbury will speak on campus Sunday, March 8.

Bill Haney, Chairman of L&PA, introduced to the committee two projects that could draw student interest and break the established pattern of apathy that has manifested itself in the past. A Chicoan Symposium is planned with speakers representing various aspects of the movement. A program entitled "Radical Feminism" was also introduced, which sounds revolutionary and a bit heavy for CSIRB in its present condition, but will probably turn into a memorable event in the history of L&PA.

Peter Nicholas, representing his Multi-Media McLuhanesque Rock Band, "One," tried to convince Mr. Haney to let them "play at CSIRB." The entire conversation resulted in a bunch of promises but no firm decision. The group has arranged for "One" to perform in the near future.

For two years as Chairman of L&PA, Bill Haney announced that he plans to resign sometime this year, which is unfortunately simple because he has done so many good things for the program. He wishes to complete successfully to present some really innovative projects for his program, and it is hoped that the new chairman will be able to keep up with standards set by Mr. Haney.

The next meeting of the committee will be Tuesday, January 27, at 10:00 in L114.
now heads a firm that develops service not available at the Center. This year the Center has worked with pharmacies on a plan which subsidizes student prescriptions issued through the Student Health Center.

Plaut said, "It's been enjoyable to help develop the Health Center and to deal with the students and faculty."

The thing that makes me feel good about the way this Center has developed is that we have been able to secure things, such as an ambulance, through the cooperation of student services and the campus police, while other campuses much older and larger than ours have not been able to.

"We found that 'new innovations' for health centers that come across our desk from other campuses have long since been common policy in our Student Health Center."

ECOLOGY - Environment Earth

Lectures

Jan. 30 NORMAN W. PETERSEN Consultant in environmental education "The Story of the Earth: People and Planet" 1:15 p.m.

Feb. 17 DR. IRVING S. BENGELSDORF Professor of physics, Massachusetts Institute of Technology "Fruition of the Baconian Dream, Based on Science" 1:15 p.m.

Mac. 2 BAY BRADBURY Director of science fiction writers, Los Angeles "Space Age: A Possible Challenge" 9:00 a.m.

Public is invited to all events.

California State College, San Bernardino

5500 State College Parkway/887-6311

Science Lectures

Jan. 12 DR. AARON J. IHDE Professor of Chemistry, History of Science and Integrated Science, University of Wisconsin "Philosophy of the Scientific Dream, History of the Technology, Based on Science" 1:15 p.m., Lecture Hall Physical Sciences Building

Feb. 10 DR. DONALD CRABERIAN Associate Professor of Chemistry, University of California, Davis "Chemical Problems in Elementary Chemistry" 11 a.m., Room 117 Biological Sciences Building

Film

Feb. 13 "The Cube"

All events held in Lecture Hall, Physical Sciences Building
