Dr. Rene F. Dennemeyer, professor of mathematics, has written a college textbook published this month by the McGraw-Hill Book Co.

Before joining the CSCSB faculty in September, 1966, Dr. Dennemeyer was a member of the technical staff in the computation and mathematics center at Aerospace Corp. in San Bernardino. He was an associate professor of math at Long Beach State College and a senior scientist at Lockheed Aircraft Corp. before joining Aerospace.

His first textbook is designed for advanced undergraduate students of mathematics, science and engineering. It is one of the few introductory textbooks for undergraduates in the field of partial differential equations.

Dr. John E. Hafstrom, chairman of the mathematics department, also has published a college textbook while at CSCSB. His "Introduction to Analysis and Abstract Algebra" was published by the W. B. Saunders Co. of Philadelphia and London last year.

A display of recent faculty publications is being planned for a display case on the first floor of the Physical Science Building.

Members of the faculty are encouraged to give one copy of their most recent publication to the Library for this display. The copy may be given to Miss Jeanette Bernthaler at the circulation desk.

Copies of the publications will be returned, if the faculty member so desires. However, the Library is trying to maintain and develop an extensive collection of publications by the CSCSB faculty. To make this collection as complete as possible, Librarian Arthur Nelson encourages all faculty members to contribute a copy of each of their publications to the Library.

The publications on display will be changed at intervals.
