Senate Makes Moves Toward Revisions

By NANCY SAUNDERS

The Student Senate, which has acquired a notorious reputation for doing nothing, has reversed its local consciousness and projected these new vibrations toward good things. Recently, a permanent E.O.P. fund was established and $300 allocated for its birth. The money will pay for the books of students who are in financial need.

Mike Ross, Senator-at-Large, presented a bill suggesting that the Senate sponsor a ten-week film series, featuring "big band" flicks for free. The proposal was accepted and possible titles are being considered.

Roach Discusses Slow For Extension

By MICHAEL ZLAKET

Fred Roach, Dean of Continuing Education, is the man in charge of CSCSB's new extension program which was started last winter quarter. Some people have said that the program was a failure, as many of the initially scheduled courses have been discontinued due to lack of enrollment. Dean Roach has taken this view that the program was not a failure; in fact, he believes that the termination of the program was as expected.

The extension program is a means of extending the resources of the college to a broader segment of the community than that covered by the college's standard program.

"Zero Population" Club Organizes At CSCSB

Turn Out Courses

By MICHAEL ZLAKET

Dr. Richard Goodman, a biology instructor at CSCSB, opened a drive to recruit members for the Zero Population Growth Club last Thursday in Room PS 122. He spoke generally of the population growth problem and other interrelated problems, and stated the primary beliefs and aims of the organization.

One of the goals of the Zero Population Growth Club is to bring about a total cessation of U.S. population growth by 1980, and to do so, the club feels that the program was effective, must start immediately.

The club strongly supports discarding birth control information and materials on a local, national and international basis. On a world-wide basis, the club supports large foreign aid appropriations to any country that wishes to limit its growth rate.

The organization supports the initiative, phone 787-5744 in Riverside, or 686-6190 in Grand Terrace, 792-3948 in Ontario, 886-8898 in Riverside.

"Great Decisions 1970," an annual eight-week discussion of key foreign policy issues, will start the first week in February in Inland area communities.

Discussion groups are open to the public and will meet once a week in February and March to discuss eight topics of major importance to the United States.

The informal program is sponsored each year by the World Affairs Council and University of California Extension. No special background is necessary.

Foreign students attending area colleges are being invited to participate, both as resource people and as members of the discussion groups.

A special effort will be made to bring opinions of the participants to the attention of the people who make foreign policy decisions. After each meeting, every person will be asked to fill out an opinion ballot. Results will be sent to all California congressmen and senators and to representatives of the United Nations.

The university president said his proposal would make student fees at the university be more than doubled within the next two years.

The university president said his recommendation conflicts with a resolution of the state's Coordinating Council for Higher Education.

Hitch speaks on Future Of University

BERKELEY (UPI) - University of California President Clark Kerr today proposed early this year that student fees at the university be more than doubled within the next two years.

The university president said his recommendation conflicts with a resolution of the state's Coordinating Council for Higher Education.

Hitch said the increase is necessary "to help pay for needed construction and financial aid." The alternative, he said, would be a reduction in the quality of education.

Student fees are currently $300 for an academic year. Under Hitch's proposal they will be raised to $450 next fall and $660 the following year.

Hitch said the fees would help to bring the cost of education at the state university among the highest in the nation.

MARIJUANA OR NOT?

Every time you pick up the newspaper, listen to the radio, or turn on television someone is discussing the narcotic problem of this country. The question of whether to legalize marijuana or not. Let's examine the facts.

Most of us have seen, read about, or experienced the horrors of drug abuse—broken homes, lies, thievery, deceit, prostitution, rape, suicide and murder. These terrible things happen as a result of drugs and can be verified in police reports concerning narcotic users. THINK about the sickening experiences such as these—an international model, on this way he could let more knowledge into his brain. — in building, believing he could fly, while on LSD — the death of a young boy — a prostitute, rape, suicide and murder. These terrible things are due to the use of narcotics. 

A multitude of studies have shown that from 90 to 100 percent of heroin addicts and hard users began with marijuana. The World Health Organization notes that "cannabis—a marijuana abuse—is a form of drug addiction, and that any publicity to the contrary is misleading and dangerous." There is no doubt that marijuana is harmful and a threat to the youth of today.

Yet, believe it or not — there are still people in this country who advocate legalizing it!! Yes, that's right! These hypocritical, pseudo-independent people. But if it is harmless and even beneficial — want it made available to one and all. I say—let's investigate these people—the legislators, doctors, and businessmen who want it legalized — find out why they are doing it, who is financing them and their campaign. Let's all be against it being legalized — for our good and the good of generations to come.

JOHN THWING

Open Editorial

The PAWPRINT needs you!!! Your suggestions and criticisms of the PAWPRINT are welcome any time, but right now we need your help!!!

Do you have a special field of interest you would like to share with the college community? Perhaps astrology or meditation or more mundane items such as how to get an A in writing really trying.

Do you have a great desire to express yourself in non-objective, non-paper terms with an immediate audience of several hundred rather than one (a professor)?

Do you often think of new angles on old ideas? like how to solve the war or the relationship of Eucalyptus leaves to Koala bear's nocturnal life?

Would you like access to camera plus film to do your own thing? What are the newspaper's limits?

Students of this campus (or any readers) this space is available to submit your views. Not as a letter but as an editorial or feature.

This space will stay available till readers reply.

By NACY SANUDERS

The Publications Board held an emergency meeting last Friday at 11:30 to discuss and decide on what to be done about the failure to print a B.S.U. article. I believe this board should do the same thing by going to the community and tell the public what has happened and something must be done to prevent this from happening again.

Another matter brought up was the "Collegeian," CSCSB's student newspaper. It states that neither B.S.U. nor M.E.C.B.A. was mentioned is flagrantly obvious. Doyle Washington proposed a new handbook which would not exclude any campus organization or group. The board felt unanimously that such a project is definitely in order.

The emergency meeting helped to clear the air over the crisis in part. Any future actions can only be summed at this point. I would like to use my column this week to publicly apologize for the earlier issue excluding the "Collegeian," of which I am happy to say I had no part. I am deeply sorry for the loud repercussions that grew out of my error and hope that the conflict can be settled in a way that does justice to the Black Student Union, CSCSB.

The PAWPRINT is published Friday of each week by the Associated Students of California State College, San Bernardino, 5,000 State College student members. The PAWPRINT office is located in the Heating and Air Conditioning Building. The editorial and business telephone number is 887-6311, extension 233.

Elizondo Analyzes Black & Brown Studies

BY MICHAEL ZLAKET

Professor Sergio Elizondo, chairman of the ad hoc committee on ethnic studies, which consists of faculty, students, faculty representatives, faculty members, and administrators, has new ideas for CSCSB's ethnic studies program. Elizondo noted that although the committee has been heavy pressure upon CSCSB to answer to the academic needs of ethnic students, it has formed a coalition rather quietly, the committee which Elizondo heads is one of the ethnic studies situation.

Last year the committee met with the Curriculum Committee and to the Faculty Senate and to the College's ethnic studies program to be approved. Now there are 23 ethnic studies courses. These courses are interrelated; they are built, drawn from existing curriculums. "Although this may seem to be a generous offering to the uninitiated student, it is actually a comparatively conservative and small program compared to the Black and Brown programs at other California State Colleges and Universities," says Elizondo.

Elizondo believes that the size of the ethnic studies program has not compiled a greater need for a larger program; this, while a student can take a course in Black and Brown experience, he cannot be more attuned to their needs to purchase a bust of King to be on display in the Library April 4th. Martin Luther King won the Nobel Peace Prize for having made the point of the furtherance of brotherhood amongst men. His death is our loss. This effort should be made by all to honor a great man.

Continued

Extension Courses

Were you one of the interested readers who began the article in reference to the extension courses offered at California State College, San Bernardino but couldn't find Dr. James Crum's closing statement?

There's a very good reason for that — it wasn't printed.

The article which was entitled, "Crum Gives Views of Dr. James Crum's closing statement?"

Martin Luther King, Jr. would have been 41 January 15.

He was assassinated on April 4th of 1968. America and the world will never forget the terrible things that were to be done about the failure to print a B.S.U. article. I believe this board should do the same thing by going to the community and tell the public what has happened and something must be done to prevent this from happening again.

By MICHAEL ZLAKET

Alfred S. Egge is the curator of CSCSB's Biology-Industry Department. He has held that position for the past two and a half years.

Stress biology is the study of how the organism reacts to stress conditions. There are many areas of stress biology; a few or them are population stress, crowding stress, surgical stress, and mental stress.

Marine biology is Dr. Egge's first love, but he is not as active in this as he once was, due to his other interests; however, he still keeps in touch with new developments in this field.

ASB In Trouble?

By MARLIN BROWN

Student government is in serious trouble. I wish I could be a little more optimistic, but I really feel that conservatism is creeping its way back into the campus. The Board of Trustees, state and national politicians, and school administrators are all under pressure from the voters who control the money. Education is reverting to its pre-Sputnik attitudes — there is no longer any unifying threat, people are no longer concerned about how many engineers, mathematicians and scientists are cranked out; in short, education is not earning its keep.

So what? First of all, the student is put in the position of proving his worth. Pressure is increasing to excel both from the school and society. The student is finding less time to become involved in decisions which will affect him later. He is no longer threatened from an outside foe — his voice was heard and heeded to Viet Nam, civil rights, and to a smaller extent, educational involvement. In the area of environmental pollution there is no contest.

Secondly, he seems at least partially content with his role in the educational process. He will serve on joint committees or "advisory boards," but he overlooks completely his actual role in his education. In his role as "advisor" he remains passively content with following traditionally prescribed guidelines. The ideal "student government" on any campus should be more than advisory; it should not only handle the traditional student activities, but it should actively participate in all campus decisions concerning his education. As it is now, it is merely the child of a protective parent, something which is not taken seriously. A perfect example on this campus is the recent conclusion reached by the committee, headed by Prof. Barkan, which, after at least four months, decided that students are still basically second class members of the college community.

Each of you should be concerned enough to at least look into your "defined" role on campus. You have elected officials to whom you may bring suggestions and complaints. You can become active in bringing about some significant changes, whether those changes be in restructuring student government, planning a dance, or contributing meaningfully to your education.

Every full-time student pays $6.50 each quarter ($19.50 a year) during registration. This money goes into a fund, which, by the end of the year, constitutes a budget of more than $35,000. The budget is controlled and allocated by the ASB Senate. So far this year the money has provided: The Pawprint, Student Handbook, Frickly Pear, Community University, Players of the Pear Garden, funds or services to all recognized clubs and councils, summer orientation, intramural sports, lifeguard, co-sponsoring of Lectures and Public Affairs, community-related programs, money to the Emergency Loan Fund (tentative), funds for some EOP programs, all social activities sponsored by or through the Activities and Housing Department, including dances, bonfires, bands and movies including the upcoming ten week top-run series.

I would like to elaborate more on each of these items, but the point is that your money does do something. More important each of the items needs students to run and direct.

Our problems are these: First of all, the tremendous restrictions placed on students are creating an in-loco-parentis situation. Either we reform and amplify our voice or remain in the present system and make the best of it.

Secondly, student apathy — use your elected officials. The AS Senate is your major voice. All of its meetings are open. You representatives and their attendance record is as follows: (there was occasional conflict with their class schedules). Numbers indicate meetings absent:

- Ronald Albright — Soph. — 1
- Marlin Brown — VP — 0
- Mike Clark — Jr. — 4
- Ken Harper — Sr. — 6
- Marty McClelland — Jr. — 2
- Kent Mitchell — Sr. — 3
- Mike Ross — At Large — 0
- Nancy Saunders — Fresh. — 1
- Kristi Selle — Soph. — 2
- Ronda Smith — Fresh. — 1

Until enough interest is created on campus for students to participate, the present system will remain. It’s up to you to use it, participate in it and support it or change it!
Zero Population

The club believes that the answers are primarily social rather than biological, and thus looks toward such solutions. The Zero Population Growth Club is not attempting to commit genocide; it is attempting to

insure a stable population in this country and the world. Births should not exceed deaths as is now the situation. There are not enough resources to safely support a world population which by 2000 will be double today's. There will be too much competition for survival; therefore, it is better to have a population that can live free from danger rather than to have one in which everyone would suffer.

Dr. Goodman first became interested in the population problem ten years ago. He found no opportunity to do anything about it until five years later, when he joined the Planned Parenthood Association. That

organization was effective in its stated aims, but was not effective in controlling world population. Approximately one year ago, Goodman joined the Zero Population Growth Club, which was then based in Connecticut. It has since moved its headquarters to California. Membership in the club, which is growing faster than the U.S. population, is now 3,000.

On this campus, faculty support for the club has been far stronger than student support. Most of the Biology instructors support it. If you wish to join, you may sign up either nationally or locally. Regardless of which way you join, the dues are the same — $4. If you join the national organization, all of the dues go to it. If you join the local Inland Empire Chapter, half of the dues are kept by it, the rest by the national organization.

For information please contact: Richard Goodman, B-305, Dalton Harrington, B-307, Fred Waters, TU 4-5955.

The newly formed French Club is sponsoring a trip to Los Angeles, Thursday, February 12, to see a French presentation of "Antigone." Reservations deadline is Monday, February 2. To reserve a seat for this magnificent performance, please contact Dianna Pelletier in Room A-174 between the hours of 1 P.M. and 4 P.M., Monday, February 2. The price per student is $2.25, a saving of 8.50 from the standard general admission price. The entire college community is encouraged to participate in this event. For further information, contact Dianna Pelletier or Mrs. Rydell in Room A-174.

We need help making the world turn.

Like it or not, money is what makes things happen in this world. In business, In all the worldly affairs of man. It takes money to discover medicines, to rebuild ghettos, to educate children, to feed, clothe, and house humanity. Money is an essential ingredient in solving man's day to day problems — and in promoting his century to century progress. In short, money makes the world turn. We're the world's largest bank and putting money to work is our business. We think it's an important enough business to hire the best people we can find to run it.

A Bank of America personnel representative will be interviewing on your campus soon. If you want to make a career of making the world turn, make an appointment.

BAN K OF AMERICA
AN EQUAL OPPORTUNITY EMPLOYER

Letters To the Editor

Dear Editor: (and anyone else who reads,)

I feel deprived because a letter which I wrote for last week's Pawprint was not published. Because of this mistake, 1800 ONCB students missed the celebration of the truly remarkable event: National John Sinclair Day (January 24). Good old John smoked dope, screwed around and, made revolution. He will again; we must carry on what he began.

To make some sort of compensation for this omission, I wish you all would take this opportunity to celebrate John's birthday. I hope you see fit. You might begin by seeing "One" tonight for free in P.S. 10. Whatever you decide to do, please do it. And remember good old John.

Love,
Nancy Saunders

BLACK AND BROWN

A selective bibliography entitled BLACK AND BROWN is available at the library. These are books about Blacks and Mexican-Americans, mainly in the field of history. Only titles in the current library collection are listed. Since our budget is somewhat limited, this material is available only upon request. Supplements in other subject areas are planned for future distribution.

PHILOSOPHY TALK

Dear Editor,

The philosophy department sponsors the Philosophy Forum several times each quarter. The Forums are debate-discussions on topics of some general interest featuring a member of the philosophy department and a faculty member from another discipline. Each participant makes a short statement on the topic of discussion and is given an opportunity to reply to the other's statement. Then the floor is opened to anyone who wants to ask a question, make a point, or a (short) speech. These are frequently quite lively sessions but we've found that interested people did not know about our session in spite of our efforts. If we were to send you about two inches of copy the week preceding our Forums, would you give us that much space? This quarter we have the following schedule:

Feb. 5 — The Revilement of History to the Present — with Elliot Barkan of the history department — a discussion of the value or values (if any) of studying history.

Feb. 17 — The Ethics of Research on Human Subjects — with Harvey Wichman of the psychology department. A film of Sidney Milgram's shock-obedience experiments will be shown preceding the talk.

Date Indefinite — "Can We Do Without Mysteries Within?" — with Clark Mayo of the English department — discussion of D.H. Lawrence's credo of respect for one's sensuous creativity or irrational impulses — that's the problem.

We would greatly appreciate whatever space you can give us, and will be happy to supply copy.

Yours truly,
Paul J. Johnson
Assoc. Prof. of Philosophy

Behind the Scenes...

CSCSB Drama Department At Work

"Spoon River Anthology"
To Appear In Near Future

Rehearsals are underway for the California State College, San Bernardino production of "Spoon River Anthology" to be presented by the Players of the Pear Garden Feb. 20-21 and 26-28.

The play, which is set in a small mid-western town early in the century, has been described as the "logical forerunner of 'Winesburg, Ohio,' 'Main Street,' and 'Our Town,' as well as 'Peyton Place.'"

A cast of eight students will interpret more than 70 character vignettes in the Edgar Lee Masters work, to be directed by Amanda Sue Rudisil, assistant professor of drama. The production marks her first directing effort since she came to the college last fall.

Miss Rudisil says of the play, "It has universal qualities, with an emphasis on character study. Masters was concerned with how people have dealt with what was given to them. He also focused on the interaction between people — of their inhumanity towards one another," she continued.

Interspersed with the character vignettes will be original folk music written by Michael Stapleton, a cast member. Actors will double as singers and musicians.

Appearing in the Winter quarter production are Burt Chowning, a music major from Banning; Juanita Karauski of Rialto, an English major; and six drama majors, including Stapleton, who is from Claremont; Teri Giannotti of Fontana; Linda Gausemel of Yucaipa; and Robert Forshay, Jerry Hasbrook and Philip West from San Bernardino.

Tickets for the production, to begin at 8:15 p.m. each night in the Little Theatre, will be available at the door or in advance from the Music-Drama office.

THE MAXI LOOK still the "in" fashion? No, the Ladies are members of the cast for the play which is reflecting the turn of the century fashions. Members of the cast are Mike Stapleton, Burt Chowning, Teri Giannotti, Juanita Karauski, Jerry Hasbrook, (bottom) Phil West, Linda Gausemel, and Bob Forshay.

SUE RUDISIL and Mike Stapleton casually discussing the musical aspects of "Spoon River Anthology." Rudisil will direct the production and Stapleton will compose the music for the show.
Project Concerted For Upcoming Date

Los Angeles — Chamber concerts featuring compositions of music department faculty members from five California State Colleges will be commissioned by a group touring the five California campuses in February.

The concerts are the first to be performed under sponsorship of the California State Colleges, according to Chancellor Glenn S. Dumke. Five students and faculty members and five professional musicians will participate in the tour.

The intent is to demonstrate some of the creative achievements of faculty members within the California State College system, said Charles Durnke said.

Faculty members whose compositions will be performed are:

Edward Applebaum, assistant professor, and Leon Dallin, president, CSC, Long Beach; Aurelio de la Vega, professor and Frank Campo, assistant professor, San Fernando Valley State College; Donald B. Michalsky, professor, Rodger Vaughan, assistant professor, and Frank L. McCarty, assistant professor, CSC, Fullerton; David Ward-Steinman, professor, San Diego State College, and Marshall Blakowsky, professor, CSC, Dominguez Hills.

The concerts will contain a wide representation from neoclassical to 2-tone "classical." Improvised and electronic compositions will be included. Each concert will be divided into instrumental and vocal sections.

Faculty members in the concerts are Myron Sander, assistant professor, viola; Joel Thalheimer, percussion, and Sylvia Dimantik, lecturer, mezzo-soprano, all of San Fernando Valley State College, and Rodger Vaughan, assistant professor, tuba, CSC, Fullerton.

Student musicians are Deborah Schumacher, piano, and Peter Kent, violin, CSC, Long Beach; Marjorie Tall, soprano, Lynn Schroeder, soprano, and Jennifer McKenzie, flute, from CSC, Fullerton.

Professional musicians, all from the Los Angeles area, who will participate in the concerts are John Gates, clarinet; Caroline Johnson, cello; John Sullivan, bassoon; Mary Lee Smith, flute, and John Roberts, bass.

All the concerts will be free and open to the public. They will begin at 8:30 p.m.

February 10 — Little Theater, CSC, Domingue Hills
February 11 — Recital Hall, CSC, Fullerton
February 15 — Choral Room, CSC, San Fernando Valley State College
February 19 — Choral Room, CSC, Long Beach
February 21 — Studio Theater, San Diego State College.

PROFILE ON DR. EGGE

(continued from page 2)

Dr. Egge has just finished serving on a statewide committee that was part of the Coordinating Council of Higher Education. The committee's mission was to investigate California's status, present and future, in marine programs, biology, chemistry, and oceanography.

The committee consisted of two representatives from each of the State Colleges, two from the Universities of California, two from private schools, one from the junior colleges, and two from industry. The committee's report has just been completed. It has been submitted to Governor Ronald Reagan for inclusion in new legislation.

Before he came to CSCSB four years ago, Dr. Egge was professor at Long Beach State College. After leaving Long Beach, he went to the medical school at the University of San Francisco.

After his first year at CSCSB, he was selected as the coordinator of the Biology Department.

His activities in the college have varied. He serves as a member of the Faculty Policy-Making Committee, which finished its assignment last year, and of the P-Faculty Committee that was formed to determine where students could be of greatest importance in future planning. The report of the committee has been submitted to the Faculty Senate.

Although the report has not been made public, Dr. Egge feels that those results should be granted greater participation in student government.

Dr. Egge was very instrumental in starting the Biology Club at the College. Under the sponsorship of Dr. Harrington.

When asked if the was interested in the Downtown Population Growth Club, which has the support of most of the Biology Department faculty, Dr. Egge revealed that he is a member of the club but supports its philosophy.

According to Dr. Egge, the population growth is one of the most important issues facing society today.

Editor:
Mr. Allen D. Leonard
8961 Sunset Boulevard
Los Angeles, California 90069

Dear Mr. Leonard:

During our recent meeting I wanted to give you the basis on which I had determined that (in my judgment) draft counseling as it relates to the achievement of educational goals is certainly a legitimate activity for the college to give to its own students. As I told you during our meeting I do feel that a service such as counseling should be provided by professionally competent persons. Attached is the Agenda item concerning this subject. Should you have any further questions concerning this please give me a call.

Sincerely,
Alvin Marks
Dean, Student Affairs

Information Item
Action Item
Brief Summary:
Section 42659 of Title 5 states that additional programs may be added to this section by appropriate amendment by the Board of Trustees. The California State College Student Presidents Association has requested that legal services, counseling services, and transportation services be added to the list of approved uses of student organization funds.

Recommended Action:
The staff recommends that legal services be discontinued; that counseling services be discontinued; and that transportation services be conditionally approved.

Editor:

Would anyone interested in horseback riding — at any level — for pleasure and/or P.E. credit, please contact the P.E. Dept., as soon as possible. If there is enough interest in this activity, a course will be offered in the Spring Quarter.

Agenda Item 6
January 27-30, 1970

Plans For Humanities

A HUMANITIES 160, "Contemporary Issues, class at San Jose State College is presenting a Survival Faire at San Jose State College the week of February 18-20, 1970. Survival Faire is dedicated to the survival of mankind and to the ecological problems that man's survival entails.

The purpose of the Faire is to present to the college community and to the larger society the problems of environmental survival, to create a general awareness of ecology, and then to stimulate the participants and visitors to act through their particular communities to solve these many ecological problems.

Survival Faire is a week of action, workshops, and exhibits intended to stimulate active participation in all aspects of ecology. The program will include speakers, panels, workshops, films, exhibits, plays, a funeral procession and a nine-hour "Take To Celebrate the Burial of a 1970 Automobile" and an ecology film festival. A photographic essay contest, a graphics contest, a poetry contest and a contest for the most creative reuse of garbage/waste. The Faire Program is enclosed.

imagery. Blended with this is still more, but I shall not disclose the nature of it all. You must experience it for yourself. Any open mind. You never know what to expect.

It was fortunate enough to hear an extemporaneous concert they performed at a pizza parlor on the outskirts of Redlands. It was not a complete production, consisting of four singers, two of whom played acoustic guitars. The action began when one of the group stood forward and began a powerful oratory. The management told him to stop, fearing the use of four-letter words would endanger the minds of any sixteen-year-olds who happened to be nearby. A skirmish ensued. The onlookers at the bar, who had not been paying much attention during the concert, jumped right into the action which caused more or less an explosion. But this situation cleared up as the cops arrived.

Sports Activities

In Full Swing

Basketball is only one of many intramural activities that the P.E. Department offers. There are sports such as swimming, handball, paddleball, tennis, softball, squash, and ping pong. There is a possibility that golf will be offered in the spring, if enough people are interested.

The CSCSB Intramural Basketball League opened its tournament season Jan. 2. The league consists of nine teams, one faculty and eight student teams. The captains are: Bob Stein and Clark Mayo of the faculty team; Dan Melges, Eddie Phelps, Mike Clark, Tim Crowley, Tom Fitzpatrick, Harry Seidman, Skip Fletcher and John Nagel of the student teams. Tim Crowley, the student coordinator of intramural activities, is in charge of the basketball tournament.

Not all of these activities are team activities. Aside from basketball, the only other team-competition sport is softball. Some sports, such as paddleball, handball, and tennis are played with double and single entries. Sports such as squash, ping pong, golf and swimming are played with individual entries.

As the facilities of CSCSB grow, and as student interest in recreational activity increases, the P.E. Department will offer a wider variety of intramural activities.

Newman Club To Visit Boys Club

The CSCSB chapter of the Newman Club and San Bernardino Valley College will sponsor an outing to the Verdemont Boys Ranch this evening. They will leave from the Newman Center, located at 1629 Kendall Drive, at 6:45 p.m. and return between 9 and 9:30 p.m. A typical visit to the ranch begins with a fast-moving game of volleyball, while the remainder of the evening is devoted to discussion. Upon returning to the Newman Center, the members hold a party. Subsequent visits to the ranch are planned for every other Friday. Those interested may attend the regular Newman meetings on Tuesday evenings at 8 p.m. or contact Father Petit or Pete Pichard.

Students Take To The Water

By MICHAEL ZLAKET

Last Fall, the Physical Education Department of CSCSB offered a scuba-diving class for the first time. Originally, it was to be offered only during the Fall and Spring quarters, but the course was so popular that the P.E. Department decided to offer it all three quarters. So far, each class has had peak capacity enrollment.

Scuba diving is today the most popular and fastest rising recreational activity, especially on the West Coast.

Scuba diving is not limited to recreational purposes: advances and improvements in scuba technology over the past fifteen years have made possible many new advances in underwater exploration, archeological discoveries, and scientific research.

Man now faces the possibility of "farming" the ocean, that is, growing food under the ocean. Archeologists have been able to recover some of the best treasures of the ancient Mayan civilization of South America.

What has made the P.E. department course so popular is the ocean check-out that is taken at Catalina Island. The course is primarily geared to scuba-diving in the ocean. Scuba-diving is not the same as skin-diving, but the course includes both.

All equipment used for the class is furnished by the CSCSB P.E. department. Students must furnish their own equipment, usually by renting it, for the ocean dive.

Students who enroll in this course may so do for the purpose of fulfilling PE credit requirements of the school, for certification by the National Association of Underwater Instructors, or both.

George Weiny, the course instructor, estimates that approximately ten percent of the students who enroll in the course do so because they are interested in scuba-diving careers. Mr. Weiny also notes that many students who are initially interested in scuba-diving only for recreation often later pursue a career in the field, such as training scuba-divers, marine biology, commercial diving, etc., because of their interest.

WANTED:

An artistic person interested to fill a position in the AS Education Department so popular is at Catalina Island. The course is primarily geared to scuba-diving in the ocean. Scuba-diving is not the same as skin-diving, but the course includes both.

On February 4, Mr. Darrel Milgrim will interview students interested in applying for counselors at the Calamigos Star C Ranch located in Malibu. The camp will be in session for 10 weeks beginning June 26 through September 4. For information regarding where to apply for the position contact the Placement Office, Library Annex 2B.
