Spaceship Earth Lecture Scheduled for Tuesday

An award-winning science writer, Irving S. Bengelsdorf of Los Angeles, will deliver a public lecture at 11:00 a.m., Tuesday, Feb. 17 at California State College, San Bernardino.

"Spaceship Earth: Population, Poverty and Pollution" is the theme given by Dr. Bengelsdorf for his lecture, which is part of the winter quarter emphasis on ecology at CSCSB. For the past seven years science editor of the Los Angeles Times, Dr. Bengelsdorf has served both as a research chemist and as a university instructor in his field. In the past few years he has won nine awards for his science writing, given by medical, scientific and journalistic organizations.

In addition to writing the current science column, "Of Atoms and Men," he also has authored scientific articles, pamphlets, translations and books. He taught the first course in the Russian language for science reading on television, over WRGB-TV in New York in 1958. The public is invited to the lecture, to be held in the Lecture Hall and will be open to all.

The ASB is also sponsoring a "Valentine's Day Dance to be held on Valentine's Day, Saturday, February 14. The happening will start at 8:30 p.m. in the little gym. Admission is $1.75; the dance is open to all.

The theme given by Dr. Bengelsdorf, the film is about a man who is physically brainwashed. The My Lai massacre is one direct manifestation of this frightening human phenomena. The forum should prove to be an insightful look into the patterns of modern sociological and psychological research.

Will Man Escape The Cube?

Tonight at 8 p.m. in the PS lecture hall, CSCSB will present "The Cube." "The Cube" is a film that was originally presented on February 6, 1968 on the National Broadcasting Company's "Experiments in Television" series.

The film is about a man who is put into a plastic cube; he must find his way out mentally and physically. It is a behavioral study of human ecology and is surrealistic in the sense that some of the events occur in the man's mind and others actually occur physically. It is left up to the audience to decide which events are real or imaginary.

The presentation of the film is free and all are invited to attend.

Are People Manipulated By Others?

By NANCY SAUNDERS

A Philosophy Forum is scheduled for Tuesday, February 17, at 3:00 p.m. in PS 10. The topic of the presentation is "The Ethics of Research on Human Subjects." Professor Johnsen, from the Philosophy Department, and Professor Wichman, from the Psychology Department, have arranged the forum and will provide information into the subject.

A 45 minute film will be shown about Sidney Milgram's shock-obedience experiments prior to the discussion. The subject raises some poignant questions as to what extent people are manipulated by others through orders and/or brainwashing. The My Lai massacre is one direct manifestation of this frightening human phenomena. The forum should prove to be an insightful look into the patterns of modern sociological and psychological research.

Anyone may attend. This opportunity for knowledge is absolutely free.

By MICHAEL ZLAKE

For some time there has been interest in attempting to obtain a student union building for the CSCSB campus. During recent months this interest has intensified. This year, for the first time, space in regular college buildings for a lounge, recreational area, meeting room, student newspaper and government offices has been severely restricted. Next year, no space will be available due to space shortage and higher enrollment.

The college facilities provided by the state are intended for use as classrooms and laboratories, offices, and research. Until now it has been possible to use some of these facilities, on an availability basis, for extra-curricular programs. However, the heart of the educational process is it is important that the out-of-class interaction and leisure activities. A well-planned student union, therefore, is a need for which these facilities are inadequate.

A student union serves many student segments of a college campus and provides a center for social, cultural and recreational programs.

The presentation of the film is free and all are invited to attend.

Students Speak Out: Is Free Speech in Danger?

By NANCY SANDERS

A CSUSB student, Thomas Lynch, wrote this essay in response to the following question: "What is your opinion and Mr. Lynch's, and probably a lot of other students who are similarly afraid, of the fact that this country is becoming (or has already become), "It can't happen here", that it is happening and is happening all the time. I would love to be free, but how much is it going to cost?"

Little more than two months ago, vice-president Agnew made a speech in which he strongly criticized, some say attacked, the media of this country. At the time, it was difficult to interpret the outburst; was the administration, speaking through Agnew, merely expressing some of the resentment the president surely felt, or was this the beginning of something far more menacing? Was it an attack on the fulfillment of an old and very personal presidential vendetta? Might it be, testing the reactions of the "silent majority" to an administrative attack on the most important amendment to the Bill of Rights? Was his speech a probing, a reconnaissance of the "silent majority" to an administrative attack on the most important amendment to the Bill of Rights? Was his speech a probing, a reconnaissance of the "silent majority" to an administrative attack on the most important amendment to the Bill of Rights? Was his speech a probing, a reconnaissance of the "silent majority" to an administrative attack on the most important amendment to the Bill of Rights?

There are other inferences. Small, perhaps, but growing steadily. Noise on them seem very loud and clear. No one doubts that they have caused an outcry among the freedom-loving, liberal, or democratic American public. But we must recognize that they were not meant to be. If they are meant to be, such is the way we are in trouble. Our land has sunk lower than we could ever imagine. In the shelter of our own over-abundance and under the protection of常委会, and the Superbowl, we have sat by and watched what was once a dream turn into a nightmare. The fact is, we are in trouble. Our land has sunk lower than we could ever imagine. In the shelter of our own over-abundance and under the protection of常委会, and the Superbowl, we have sat by and watched what was once a dream turn into a nightmare.

One hundred students concerned with the problem of air pollution will have the opportunity to closely examine possibilities for their personal involvement in the environment. The conference will be held on Idylwild Campus of the University of Southern California, and will bring selected students in direct contact with leading experts on environmental problems. Participants will be chosen on the basis of their interest and their interest in air pollution control work as student, citizen, or professional. The Southern California Environmental Coalition will consider careers, education offerings, and opportunities for personal involvement in air pollution control.

The Pawprint is printed at AAA Publishing Co., 345 N. 2nd St., San Bernardino, California.
Dr. John E. Hafstrom

By MICHAEL ZLAKET

Dr. John E. Hafstrom is the coordinator of CSCSB's Mathematics Department. He has held that position since he came to CSCSB in 1965. After Dr. Hafstrom received his B.S. degree from the North Dakota State University in 1936, he taught in high school for seven years. Dr. Hafstrom served in the Navy for two years; when he was discharged in 1945, he taught in high school for another three years.

In 1949, Dr. Hafstrom received his M.A. degree from the University of Minnesota. He taught there for sixteen years. He received his Ph.D from the University of Minnesota in 1954. Dr. Hafstrom's special interest in mathematics is analysis. He has written two books, one of which he completed after he came to CSCSB. That book, "Introduction to Analysis and Abstract Algebra," written in 1967, is the standard textbook for one of his courses.

Dr. Hafstrom's personal interests are railroads and music. He prefers two kinds of music: classical and Dixieland jazz.
