Help Wanted

Well, looks like its time for the old "Welcome to Cal State" editorial—you know, the one that usually kicks off the new year, brings gladsome tidings of the wonderful times ahead and all that sort of thing. However, since I'm bringing gladsome tidings of the sharpener knows it by heart, and after all we are a student effort and an exposition of what this paper's policies, hopes, dreams and dictator... we're interested in... reporting on new programs, the drama and music departments, clubs, street people, and workers... We have two mailboxes at this office (in the Student Services building next to financial aids), if you're too tired to write!! And if you're too tired to walk all the way over, give your letter to some friendly secretary and ask politely if she or he will drop it in inter-campus mail.

We shall not lay claims on being a totally unbiased objective paper, as after all we are a student effort and are interested mainly in the perspectives and needs of students. But we will try to maintain a semblance of fairness with an equal time for all approach.

We're really interested in running weekly interviews with various people on campus (like the one on Karen Newby, for example), covering beats such as administration news (you can uncover some real dillies on this one), faculty and class developments, reporting on new programs, the drama and music departments, clubs, street people, and workers dedicated to passing the initiative in 1974. We need your help in terms of money and volunteer work. Money is needed for mailings, office rent, publicity, printing, and the hundred odd expenses that register voters and simply talking to people about the issue.

I'm completely lost! My white middle-class background rises to the fore and sees the very word "machismo" in a negative light. My eyes light up with fury when I read that any positive male quality can be boosted by a woman's submissiveness. And yet that seems to be what Chavez is saying (last issue of the Pawprint, Community Supports Chavez). Surely Chavez does not mean that the negative aspects of machismo are the result of feminizing submissiveness. Surely he would not lay another trip on our heads about how we are responsible for sexual inequality and the male's need to dominate not only women and children but even each other. And if he means the positive aspects of machismo (which would very much like defined—does it mean, for instance, equality for Chicano men within the white male dominated system), surely even there a woman's submissiveness could only be a burden in the fight against oppression and capitalist exploitation of us all. At this point, with our present state of knowledge about the male member of the species (be he any color of the rainbow), it seems ridiculous to me to relate any of his behavior (either positive or negative) to women's and women's and women's. (Continued on P. 3 Col. 1)

"I Just Want You To Know I'm Behind You, Spiro... One Thousand Per Cent."
The High Cost of Breathing

By Tony Weathers

Air pollution’s true costs are obscured much as the San Bernardino Mountains are in the summer.

You can imagine the deleterious affects of breathing the same air that is killing 75 percent of the penderosa pine in the San Bernardino National Forest.

Air pollution debilitates our bodies with natural protective mechanisms, making it more difficult to ward off infection, viruses, and what is commonly called “common cold”.

Evidence exists that suggests that airborne pollution not only is taking its toll on this generation, but also on generations yet unborn.

Mutagens (contaminants that damage intelligence & cause mutations) and teratogens (pollutants that interfere with fetal development, causing deformations) are daily dopped by the tons into the air we breathe.

The fertility of human beings may also be adversely affected. When male and female mice were made to breathe clinically produced “smog”, a striking decrease in reproduction capacity occurred. Females conceived less often, and when they did, the size of the litter was smaller than average.

Ozone and nitrogen dioxide, the main culprits in air pollution, were the suspected cause. These chemicals are found in abundance in the atmosphere of the Inland Empire.

Since pollutants interact in unknown ways, it is possible that many substances which by themselves do not appear dangerous, may become more hazardous when mixed with others in the atmosphere.

Reductions in crop yields for farmers as a result of air pollution have been estimated at $500 million per year. But a dollar and cents approach to the air pollution problem ignores significant health implications. Emphysema is the fastest growing cause of death in the U.S., even though until recently, it was considered a chronic disease of old age. Cancer has reached epidemic proportions.

Statistical studies have shown that urban dwellers with high air pollution have a higher incidence of stomach cancers and cancers of the esophagus, prostate, and bladder.

Smog also has an impact on the weather. Some scientists believe that pollutants prevent the earth’s heat from escaping into space and that this will eventually result in the melting of the polar ice caps. This so-called “Greenhouse Effect” could raise ocean levels as much as 400 feet, submerging land presently occupied.

Other scientists predict a “feedback Effect” with the earth cooling as sunlight is blocked by the increase in air pollutants. An ice age in true in snow, hail, and a general lowering in the earth’s temperature could be expected.

Some scientists call for a patchwork approach to improvement of the air environment has limited action to importing smog-resistant pines from Oregon for the San Bernardino National Forest and half-baked, lack-on emission control devices for auto engines.

Russell Train, new administrator of the Environmental Protection Agency, the governmental agency supposed to protect us from further degradation of our air environment, two weeks ago said that he would accept delays in automotive emission standards for the L.A. area. Massive citizen action will be required to motivate our governmental agencies and elected representatives to enforce sanctions that will improve the air quality.

Send a c-e post card asking for strict enforcement of emission guidelines as contained in the 1970 Clean Air Act.

Next week: Natural resources, sulfur oxides, and Kaiser Steel.

CSCSB Onward and Upward

By Patty O’Neil

Exciting plans for the building and beautifying of Cal State, San Bernardino’s campus have already been laid out for the year says Dr. J.K. Thomas, Vice President of Administration.

Dr. Thomas stated last week that he and County officials have been working closely on the construction of a 5 acre lake to be built across Cal State campus. The recreational facility, for the use of the public and for the direct use of the college, will be opened next year. The shore will be lined by a sandy beach and a picnic area for the enjoyment of everyone, and it will also be stocked with fish.

The lake will be fed by a meandering stream to be built across the campus down through the buildings and empty into storage tanks behind the playing fields.

Preliminary plans are being drawn up for the building of a new and larger Creative Arts building. Construction on the project will begin one year from now and will be for the use of the Music and Drama departments. A restroom facility, two hundred and fifty will be added along with an experimental drama theatre. The building should be occupied by the Fall of 1976.

The Administration is proceeding with plans for a College Union building. The Union building will be for the general use of all students consisting of game rooms, T.V.s and lounges, according to Dr. Thomas. The College Union should be occupied by ’75 or early ’76, hopefully.

A new entrance is funded for next year and plans are now set for its construction. The main entrance to the college will be enlarged, making entering and leaving the campus much more effective, says Dr. Thomas.

Architects are now studying plans for a meandering stream to run through the campus. The six foot wide, 8 inch deep stream is planned to run from behind the campus down through the buildings and empty into storage tanks behind the playing fields.

The National Poetry Press

The closing date for the submission of manuscripts by College Students is November 5

ANY STUDENT attending either junior or senior college is eligible to submit his/her verse. There is no limitation as to form or theme. Shorter works are preferred by the Board of Judges, because of space limitations.

Each poem must be TYPED or PRINTED on a separate sheet, and must bear the NAME and HOME ADDRESS of the student, and the COLLEGE ADDRESS as well.

Entrants should also submit name of ENGLISH INSTRUCTOR.

MANUSCRIPTS should be sent to the OFFICE OF THE PRESS NATIONAL POETRY PRESS

3110 Selby Avenue Los Angeles, Calif. 90034

(Solution on p. 7)

Artist Judy Chicago speaks for herself in this excerpt from the Womanspace journal:

"I never belonged in the male art world. I was always on the outside of a world that men had wrought out of their own needs, shaped from their values, their ideas...and their loneliness and alienation. And when I showed them, work of my body and mind and my womanhood, nobody gave up their mistaken notions of what women are...and the work of many women who had been crying out their identities into an empty night...But, that was not enough. Women in Art Consciousness Raising—Maureen Glaeser Credit—Debbie Steele Education (or help fight sexism in our schools)—Nancy White Legislative—Sue Diaz Publicity—Kathy Klausner Rape—Jean Holtz Speakers Bureau—Jane Block Women in Prison—Maria Cranor care of the pawprint. Ed. note: we have phone numbers and more information.

Women interested in Consciousness Raising Group, meet Friday October 19 at 10:00 a.m. at the benches in front of Physical Sciences building, or call 793-3826, or get in touch with the Pawprint office, ext. 233.

---

Wood is a pleasant thing to think about. It comes from a tree; and trees grow, and we don't know how they grow, without paying any attention to us, in meadows, forests and by the side of rivers— all things one likes to think about. The cows swish their tails beneath them on hot afternoons; they paint rivers so green that when a moor-hen dives one expects to see its feathers all green when it comes up again; I like to think of the fish balanced against the stream like flags blown out, and of water-beetles slowly raising domes of mud upon the bed of the river. I like to think of the tree itself; first the close dry sensation of being rooted in the cold pressure of the earth; then the last storm comes and, falling, the tree's highest branches drive deep into the ground again. Even so, life isn't done with; there are a million patient, watchful, lives still for a tree, all over the world, in bedrooms, in ships, on the pavement, lining rooms where men and women sit after tea, smoking their cigarettes.

Dropout's Deadline
By Joanie Weiser

October 16th will be an important date for those of us too swamped to stick it out. Jo Ann Yoo Wald of the Admissions and Records office reminds us that the 16th is the absolute last day to withdraw from classes or from college altogether. The Chancellor has made it a bit more difficult to withdraw by requiring two signatures instead of one on the "of drop" card. You must go not only to the instructor, but also to the School Dean involved.

October 15—Petitions Available
(Candidates (Activities Office)

October 19—Petitions Due
(Commens Patio) 12:00 Noon

October 22—Campaigning Begins

October 24—Campaign Speeches

October 26—Campaigning Ends

November 5-6—Run-off Election

Library and Main Parking Lot

Carlos Montoya will appear in only one recital for Music Center

After his professional debut, he is a Spanish Gypsy, born in Madrid, continued to ride daily. At 87 years of age, he will will agree to contribute a specific amount for each mile completed by the cyclist. Adults taking part in the race may prefer to pledge their own contribution based on completed mileage. Mr. Page, said.

Top local riders will be given sponsor sheets with which to carry all messages from the sensors to the brain and back. Eastern scientific knowledge of the spine is known as the silver chord, the passageway by which the spinal nervous energy in the base of the spine spirals upwards and out through the top of the head, as the devotee attains enlightenment. These two views of the spine, Eastern and Western, are both true and complementary. It is an example of East and West which we see happening more and more in the world today. Western science and technology: machines, farming techniques, and birth control methods are going to the East, while Eastern culture; art, music, and religious philosophies, are coming West. This union of East and West will go far towards achieving One World.

Dear Spinal Column:
Why is this, an advice column? I mean it's cute and catchy and all that, but does it have any more significant meaning than before? Your Average Inquisitive (CSCSB) student

Dear Your,
Yes, as you have suspected, there is some significance. Western medical science knows the spinal column to be the center of the nervous system, the main sending and receiving station, carrying all messages from the sensors to the brain and back. Eastern scientific knowledge of the spine is known as the silver chord, the passageway by which the spinal nervous energy in the base of the spine spirals upwards and out through the top of the head, as the devotee attains enlightenment. These two views of the spine, Eastern and Western, are both true and complementary. It is an example of East and West which we see happening more and more in the world today. Western science and technology: machines, farming techniques, and birth control methods are going to the East, while Eastern culture; art, music, and religious philosophies, are coming West. This union of East and West will go far towards achieving One World.

ADULTS ONLY—NO ONE UNDER 18 ADMITTED
The opening kickoff for the 1973 intramural football season is almost upon us and from all indications, there will be a wide-open brand to determine who will wind up in the super bowl. The defending champion derelicts have indications, there will be a wide-folded, although a few of their multi-year contracts. As yet, the several of the contending teams for Kielman are negotiating with Free agents Jim Cassidy and Stan changed their name, in hopes that this will be their year. Led by the Alio brothers, the Cavs were runners-up in football, 3-man basketball, 5-man BASKETBALL AND SLO+PITCH LAST YEAR. faces, 'The Mickey Mouse Club" could go all the way in '73. Svohoda and Julio Silva, Los Village. If they can repeat the most certainly will be a contender. Kurt Nelson figure to provide most of the offense.

Sexual Inequality In Intramurals

By Becky White

Intramural sports for women here at Cal State are almost nonexistent. After an interview with Joe Long, organizer of intramural sports for women and men, I was left with some disturbing information.

Financial Aids

Money used to finance the intramural sports program is taken from the student body fees paid by all students. The program's cost last year was $2610. However, only $300 was spent on them! The rest is extra.

Financial Aids

The Financial Aid Office will be accepting applications for financial aid until further notice. Students are requested to contact the Financial Aid Office, Room 120, Student Services Building for information regarding work study, student loans, or grant assistance.

Intramural Football Kicks Off Season

The opening kick off for the 1973 intramural football season is almost upon us and from all indications, there will be a wide-open brand to determine who will wind up in the super bowl. The defending champion derelicts have indications, there will be a wide-folded, although a few of their multi-year contracts. As yet, the several of the contending teams for Kielman are negotiating with Free agents Jim Cassidy and Stan.

Intramural Sports Club

I. A.S.B. SPORTS COMMITTEE—This is for women too! Thursday, October 18 at 3:30 p.m., Rm. P.E. 122.

II. OUTDOORS CLUB—Most of you missed a great day hike to Devil's Punchbowl on Sept. 26. If you are interested in hiking, camping, backpacking, fishing, bicycling, horseback riding, etc., attend the next meeting on Friday October 12, in the upper commons at noon.

III. SKI CLUB—Will not meet until November, but get ready for trips to Mammoth, Snow Valley, and maybe Brian Head. Also lessons and maybe some extramural competition.

V. HANDBALL—Believe it or not, there is still time for handball. Why not sign up for a singles tournament. Get down to the gym and put your name on the sheet!

It is rumored that several people missed the meeting for the volunteer tutoring program because of the change in rooms. Wherever you are: COME TO THE ACTIVITIES OFFICE, TR 3c, to sign up.

Pacific Stereo's Studying Aids

A High-Quailty Marantz Receiver and a $96 Savings

Marantz' 2100 is an excellent small receiver with a 20-watt (rms) amplifier and a fine, low-distortion AM/FM tuner section. All the necessary controls are there, too, and the price is $199.95. The walnut case is extra.

The record player is Garrard's reliable 40B, and it has plenty of record-saving features. The $49.95 price includes the base and an Empire 999X/EX elliptical cartridge.

The Audio Design 506's are two-way system that deliver the kind of clear, natural-sounding bass lines you can't get just by turning up your portable's bass control. Their price is $99.90 a pair.

Price includes Pacific Stereo's five-year warranty

To purchase these separately, you would pay:

Marantz 2100 $199.95
Garrard 40B $49.95
Empire 999X/EX $49.95
Audio Design 506's (pair) $99.90
TOTAL $349.80

$254 SAVE $95.90

Keep Your Records Sounding Like New

You can permanently end needless dust attacks on your records with this Robins record cleaning brush. It removes the dust and also the static charge that attracts it, so your records will stay clean. We usually sell it for $2.99, but it's just $1.52 if you hurry down to Pacific Stereo.

Sartorial Splendor for $2

Pacific Stereo T-shirts are just the thing to add some color to your wardrobe. They come in a choice of attractive decorator colors with a subtle "Big Ain't Bad" motto on the front, and you'll find they're suitable attire for almost any occasion. And these versatile garments are just two bucks each.

Store Hours:
Mon-Fri 9-9
Sat 10-6
Sun 1-6

"The Place To Buy A Music System"
Intramural Schedule

OCTOBER 15—First day to sign up for 3-man basketball.

OCTOBER 29—Entry Deadline for 3-Man Basketball.

NOVEMBER 6—Co-Ed Badminton Tournament (no sign-up)

NOVEMBER 15—Turkey Trot Jogging Day (no sign-up)

DECEMBER 5—Free 'Throw Contest (no sign-up)

WHO MAY PARTICIPATE?
1. Anyone currently enrolled in regular classes at CSCSB.
2. Anyone currently on the staff or faculty at CSCSB, or

WHY?
To provide yourself an opportunity for exercise, diversion from studies, forming new social contacts, and participation in recreational activities.

NOTE: Additional activities, particularly for women, will be included if there is sufficient interest.

The merri-Mixers, a group of concerned area residents, are in urgent need of volunteer help with their social and recreation program for mentally retarded adults. Group activities include arts and crafts, bowling, trips, and picnics into the Community, and help with transportation.

A compassionate and understanding nature is a must. Hours vary, according to the Activity, usually half a day, starting at 10 a.m.

The College Plan.
More than just a cheap checking account.

College Plan is a whole new idea for college students from Bank of America.

First off, you'll get the COLLEGE PLAN CHECKING ACCOUNT with unlimited checkwriting privileges, and no minimum balance requirements. All for only $1 a month, and the summer is free. That's cheap.

But what else?
BANKAMERICARD, the universally accepted credit card whose identification feature can help you cash checks even where you're not known. You can even use it to charge your tuition at state universities. Ask for our Student Application.

INSTANT CASH can protect you against bounced checks.

When your application has been approved, Instant Cash automatically deposits the necessary funds—up to a pre-arranged limit—into your checking account to cover your check.

EDUCATIONAL LOANS, available to qualified students. Further information and student loan applications are available at your College Financial Aid Office.

SAVINGS ACCOUNTS for almost any need. There's no safer place for your savings than Bank of America.

SOMEONE WHO UNDERSTANDS.
Over thirty of our college banking offices are now employing students as Representatives. They have been especially trained to counsel students on money matters. Your Student Representative understands student problems and can save you time when it comes to solving them. In other offices a Bank officer will be happy to help.

Come in and find out about this unique College Plan Program. It's a lot more than just a cheap checking account. And no other bank has it.
