PROBLEMS IN MECHANICAL SYSTEMS AND CARPETING TO DELAY LIBRARY MOVE

Due to deficiencies encountered in the mechanical systems and carpeting, it is necessary to delay moving the Library into the new Library-Classroom Building until the end of the Spring Term, according to Executive Dean Joseph Thomas.

If, however, the carpeting problem is resolved in time it is possible that occupancy of the Second Floor and Basement may be accomplished at the end of March to relieve crowded classroom situations. The Audio-Visual and Data Processing departments may be included in the March move also.

Problems in the heating and air-conditioning systems are expected to be ironed out within 45 days. Problems involved in the carpeting are more complex. The State of California, which is contracting for the carpeting, specifies a static electricity preventative wire be woven into the fabric. The manufacturer had omitted this feature in his original shipment and is now making the correction. The carpet already installed will be replaced with that meeting specifications.
