Dexter promotes Job Fair

Jack Dexter is the new Job Developer in the Career Planning and Placement office at CSUSB.

Dexter is a two-time graduate from Cal State. He received his B.A. in Fine Arts and his M.A. in Educational Counseling.

Dexter has a mission. It is to get the student body more aware of the possible jobs that are available in the Inland Empire.

One important way of doing this is by having job fairs. The job fairs will be the time for students to find out what kind of openings a company has.

The first fair this year will be a Holiday Job Fair. Many of the local businesses will have representatives on campus to talk with students and conduct interviews. Some of the companies participating are Pennys, Montgomery Wards, May Company, Broadway, Harris, and Miller's Outpost.

Dexter is hoping that eventually Inland Empire businesses will be hiring exclusively through Cal State. "I want to provide them with a continuing supply of employers," he added.

"What I really need students to do once they have obtained a job through these fairs, is to return their employed verification card," said Dexter. "This way I will be able to tell how successful the fair was."

Dexter is a believer in education and that students should stretch themselves. He feels that students should become "work aware" while they are still in school.

"It is better for students to try different jobs while they are still in school," said Dexter. "This way students can fall back and regroup. It is easier to do this in school."

Dexter is available in his office SS166 on Monday's and Friday's. Anyone interested in finding a job is welcome to stop by.

One day before the end

By J. Dean Grothe

The couch was a relic. If there was a reason that it was still around, nobody knew what that reason was. He knew that nobody wanted it. It was broken, as couches go. Most people said it was a piece of junk, which it was, and that it must be collecting fleas and spider webs and all sorts of wildlife.

Actually the couch was a symptom of a bigger problem. It was an illustration of everything that was never accomplished at his house. It should have been thrown away months ago, maybe even years ago, the way it would rot faster, maybe even before the next issue of cross-cultural Armageddon.

**Scientist visiting campus to research exotic diseases**

By John R. Horton

Cryptosporidium. It sounds like some sort of rock fossil to Superman, though not really. It could, however, be fatal to Christopher Reeve. And prevention of futility due to Cryptosporidium may someday require a superhuman feat.

To that end have many scientists from across the globe dedicated their lives to respond to the challenge. Dr. Magda Amin may well be among the new breed of super scientists devoted to the hasty defeat of diseases such as Cryptosporidium.

"Any disease begins as a rarity," explained Amin, seated at a desk located in her second-floor health education laboratory office. "Though the disease is now rare," continued Amin, "later it will be a problem. And it will be a problem not only in my home at Cairo, Egypt, but here in America as well."

Transmitted to humans by domesticated animals, the lethal ailment is one of some 300 zoonotic diseases, according to Dr. Amer El-Ahraf, director of Academic Resources at CSUSB.

A research colleague of Dr. Amin, Dr. El-Ahraf cites the research advances of Amin as significant. "This is the first international university relationship that CSUSB has established since its inception. CSUSB has established since its inception. Dr. Amin, who comes to us within the context of the university relationship, will serve as a model for other agreements with other international universities."

As a resident professor at continued with another probing question. Her dark eyes sparkling, within her country to lecture at other universities and scientific research facilities. During her 86/87 school year visit at CSUSB, the doctor's hours are busy spent in the field gathering animal specimens, peering into a microscope, and laboriously charting resultant data.

In fact, when asked how much of a day Dr. Amin devotes to her research, one student was baffled. The casual response heard by Dr. Amin.

"Oh, I suppose I spend on average about half a day at my work," Dr. Amin said. The student, puzzled at the comment, Dr. Amin chuckled, "Oh, I see," said the dark-haired, tall and slender doctor. "In Egypt, a half day means just that: 10 to 12 hours. Yes that's how many hours I put in, and most usually that means seven days a week."

Though Dr. Amin keeps a high level of dedication to her project on zoonotic diseases, she is not immune to occasional rest and recuperation. She and husband Salah El-Dahan, a mechanical engineer attending classes at CSUSB, and their two children recently vacationed in San Francisco, Mexico, San Diego and Las Vegas. Sessions on the tennis court and piano help keep Dr. Amin sharp, both physically and mentally.

Sharp she must stay to combat Cryptosporidium. Like rabies and T.B., other zoonotic Cryptosporidium is already present in humans and dogs in San Bernardino County. The disease will not simply vanish. At least not without the dedicated research of super scientists like Dr. Magda Amin.

**Resident Fulbright Scholar impacting comm. dept.**

Tatiana Galvan is somewhat unique at CSUSB. She is the first Fulbright Scholar to spend an academic year here. According to Sid Kushner in the Office of Sponsored Programs, numerous CSUSB professors have participated in the program abroad, but this is the first time there has been a visiting scholar on our campus.

Kushner said that the administration had been trying for several years to get a visiting scholar on campus, and for the past two years to get Galvan. "The first year we were recommended for funding, but there wasn't enough funding in the program," he said. This year the funding was available to make it possible.

Galvan will be teaching one class in the Communication Department each quarter. This fall Galvan is teaching Comparative Communicative Systems, a comparative study of media development around the world.

Also, as a Fulbright scholar, Galvan is required to lecture at other college campuses and to go out into the community. She said she is presently working on a schedule of lectures for the school year. So far she has been invited to Athens, Ohio, to give three lectures next January.

While here, Galvan will be doing research for a paper on the effect of Spanish-language media on the Hispanic community in Southern California. She said that these media "have much influence on the Hispanic population here, making the ties in the community stronger. "They play an important, needed social role, connecting people with social ideas."

She has already begun contacting people in the broadcast area and newspapers to start collecting the needed information.

Galvan received her Bachelor's degree in Journalism at the National University of Mexico and her Master's degree in Political Science Ph.D. program at the National University of Mexico.

**CIVIC LIGHT OPERA**

The San Bernardino Civic Light Opera will open its 40th anniversary season with Rodgers and Hammerstein's classic *The King and I* which will play November 14-22.

Starring are Nancy Dussault, known to television audiences as 'Miriam Rush' on the hit series *Too Close for Comfort*, and locally as a guest hostess on *AM LA*. Making his second appearance with the San Bernardino CLO, Robert Ito, remembered for his role as 'Sam Fujiyama' on the series *Quincy*.

Under the direction of Jack Balch, and produced by C. Dale Jenks, *The King and I* will play at the California Theatre of Performing Arts located at 562 W. 4th Street in San Bernardino. Tickets will go on sale October 15th and will be available throughout the CLO office located at 2079 N.E. Street or by writing the San Bernardino CLO, P.O. Box 606, San Bernardino, California 92402. Ticket prices are: Fri. & Sat. Evenings: $11.00-$15.00 & $18.50, Balcony $9 & $17.50. Mon., Tue., Wed., Thurs. Evenings & Sat. Matinee, Orch. $10.50-$14.50 & $17.50, Balcony $8.50 & $11.50.

For further information contact the San Bernardino Civic Light Opera at 714-882-2545 or 714-825-9452 Monday thru Saturday from 9:30 AM-5:30 PM.
Spikers get jump on rival teams

The CSUSB Volleyball team raised their season record to 9-2, winning both matches handily. "We are looking to continue the momentum of last week with three strong outings this week," said Lady Coyote Coach Naomi Ruderman.

Ruderman explains her teams winning record as a strong team effort complimented by the Lady Coyotes unity on the court. Leading the CSUSB squad on the court is newly elected Coyote Captain, Lisa McDonald (Redlands HS), a 5-foot-7 hitter. Also cited by Coach Ruderman for helping the Coyotes to their current record was a sophomore, Margaret Weaver (Big Bear HS).

Cal State meets two teams this week which they have already defeated this season, Pomona-Pitzer and the University of Redlands. The third match for the Lady Coyotes will be against Biola University. "Biola is a taller team, but we are much quicker and can defend a bigger squad," said Ruderman.

Results from last weeks match would not indicate the Coyotes as a team that specializes in defense. CSUSB defeated the University of Redlands for the second time this season and their next day whipped Occidental College in three games: 15-4, 15-10, and 15-4.

Tourney slated

The second annual CSUSB-Soroptimist Invitational Volleyball Tournament will feature eight teams including the defending champions- our Coyotes.

Play begins at 8:30 a.m. on Saturday, in the Cal State gym.

Action will continue throughout the day with all five teams playing a minimum of five other teams. All matchups will be decided by best two of three games.

The tournament field is comprised of CSUSB, Mt. St. Mary's College, Chino College, The Master's College, California Baptist College, Occidental College, Whittier College, and the University of Redlands.

"Our objective for the tournament is a full day of exciting and competitive volleyball," said Naomi Ruderman, Cal State coach.

The tournament championship round is scheduled for 6:30 p.m. An award ceremony will follow the championship round. Honors will go to first, second, third, and consolation, as well as six girls being selected to All-Tourney team.

The tournament sponsored by Cal State and the Soroptimist Club of San Bernardino.

Take Off On A Career As A Navy Pilot.

Be part of the Navy aviation team—a Navy pilot. As a Navy pilot, you'll fly some of the most sophisticated aircraft in the world. You'll gain early responsibility thanks to advanced technical training. And you'll have the chance for worldwide travel.

QUALIFICATIONS: Minimum BA/BS degree (summer graduates may inquire). Applicants must be no more than 26 1/2 years old, pass aptitude and physical examinations and qualify for security clearance. U.S. citizenship required.

BENEFITS: Excellent package includes 30 days' earned annual vacation. Medical/dental/low-cost life insurance coverage and other tax-free incentives. Dependents' benefits available. Promotion program included.

FOR MORE INFORMATION: Call Naval Management Programs.
1-800-222-6289 Mon-Wed 8 am-4 pm (California)
1-800-222-8961 Mon-Wed 9 am-5 pm (Arizona, Nevada)

Public safety comes first

Welcome to Cal State. We at Public Safety want your stay at the university to be a pleasant one. Take advantage of some of the many services we provide.

1. Escort services
2. Battery jumps
3. Assistance in vehicle lockouts
4. Delivery of emergency messages
5. Crime prevention seminars
6. Emergency medical services
7. Crime enforcement
8. Traffic enforcement
9. Building security

Each request is handled on a priority basis.

located within the same department is Parking Services. The University has three parking officers and one parking supervisor. These officers wear the blue uniform. They enforce parking regulations and are the repository for all lost and found property.

If you ever seen a crime, need a service, or just want to ask a question, call the Department of Public Safety at 887-7555. We're located north of the Biology building.

Navy Officers Lead the Adventure

with ten sworn officers. Each has graduated from a police academy and is well trained. We are on duty twenty-four hours a day, seven days a week, and are here for your benefit.
Space crunch scambles students, campus

By John R. Norton

"The space crunch has hit," Dr. Peter Schroeder succinctly stated to his opening day fall quarter Medieval Literature class, illustrating the English Dept. chair's comment that day were all the seats at the rectangle of tables being occupied while some ten folding desks filled the remaining space besides.

The space crunch has not stopped at one humanities classroom. For evening classes, cars have been seen circling the south parking lot for upwards of twenty minutes in an attempt to locate one solitary space; a faculty member in a portable desk. The space crunch has not involved, Zhao is interested in knowing more about new working, data base and operating systems.

"The department (Computer Science) does not have the funds for research, so all the research I do is on my own," said Zhao. "My research will have to be done through paperwork and the use of a computer." Zhao has taught courses in Computer Networks, System Architecture and Operating Systems.

Elaborating on the problem, Dr. Pritchard stated that the new faculty office facility, now in construction west of the library, is slated for completion by July of 1987. He further said that a major classroom facility to be built south of the jump, though okayed, is not expected to be completed until 1990, if the rate of growth of CSUSB continues. The new buildings will not ease the space crunch, and neither will the projected 400 space parking lot scheduled, to be constructed soon between the dormitory buildings and the existing south parking lot.

According to some students, the problem with quantity translates into a problem with quality learning in the classroom.

"The real victim of the crunch is the small class," said Donna Stone, a dual major. "What I have appreciated about the intimate class sizes of 15 to 20 at Cal State is the intense one-on-one learning experience. Soon that figure will inch to 25 or 30 students.

Already that sentiment is aggravated by teachers occasionally adding five or more students to a class already full. Many students suffer, consequently, as they wait for classroom textbooks to arrive in the bookstore. In one such incident, an humanities textbook has been delayed three class sessions, and at this writing it is still not available for students, even students who special ordered those books.

Keying into the main problem of not enough classrooms, though, is the fact that no new major classroom facility to do on campus for more than ten years. As a result of short sighted building plans the campus is now experiencing the worst space crunch in its 21 year history. Many night students must now attend classes at El Cajon High School.

Many students at CSUSB hope this mounting trend of student body growth and fewer classrooms will not translate next year into university students attending classes at nearby Shandin Hills Junior High.

"I want the students to think more," said Zhao. "I don't want them to limit their thinking to only the textbook.

"I hope the student's ask questions in class so that we can have discussions on what they don't understand," he added.

Zhao will be teaching here all year and then he will probably go back to China. He did say that if anything came up though, he may stay in the states longer.

---

Exchange professor bytes into research

Houzheng Zhao, an exchange professor in Computer Science from East China Normal University, lived in the States for the first time about a month ago.

Zhao's trip was made possible as a result of Dr. F. Liu, also a Computer Science Professor, who is a friend of Zhao.

Zhao is here to gain some firsthand experience and to do some research of his own.

Not quite sure of what exactly his research will involve, Zhao is interested in learning more about new working, data base and operating systems.

"The department (Computer Science) does not have the funds for research, so all the research I do is on my own," said Zhao. "My research will have to be done through paperwork and the use of a computer." Zhao has taught courses in Computer Networks, Computer Science in 1982.

$100 CASH PRIZES
French History in California Chronicated by Dr. Rydell

By Elrod Lawrence

A larger Student Union and a wider range of student organizations will be available to students—Carrying six units of units they carry.

The fee referendum, voted on during May 14, will raise the Associated Students fee to $68 a year (with a $5 fee during the summer sessions). The Student Union fee will be up to $70 a year.

Students Ok Fee Increase; Programs to be Expanded

By Ebron Lawrence

A larger Student Union and a wider range of student organizations will be available to students—Carrying six units of units they carry.

The fee referendum, voted on during May 14, will raise the Associated Students fee to $68 a year (with a $5 fee during the summer sessions). The Student Union fee will be up to $70 a year.

Out of the voting students, 70.5 percent approved the student government fee, while 68.4 percent supported the Student Union referendum.

The increase in Student Union fees will be used to build a $1.5 million addition to the eight-year-old facility. Funds must be accumulated for one year before the bonds can be offered for sale, construction would begin soon after. The expansion would provide students with a new Pub and snack area, additional meeting rooms, and possible commercial areas (such as a country store or barber shop).

Students first voted in 1972 for funds to build a Student Union; funding was collected for five years before construction began. However, the Student Union fee was not ready for occupancy in 2 to 2.5 years, according to an estimate by Dean of Students Peter Wilson.

Full-time students have been paying $30 a year since 1977 to support the services provided by the Associated Students fee. Part-time students—carrying six units or less—paid $10. Under the provisions of the May vote, all students will pay the same fee, regardless of the number of units they carry.

Kaleidoscope is published weekly by the Department of Communication to augment student government and administration reports and comments. All letters, communications and comments may be addressed to Kaleidoscope, care of the Department of Communication, California State University, Long Beach, 5500 University, Long Beach, CA 90840.

Pat Moreno

Alert CSUSB students may have noticed a new face in the Public Safety Department on campus.

Lieutenant Edward Harrison, formerly of California Highway Patrol, Long Beach, joined CSUSB as the New Police Services Manager last spring. Harrison had been employed at Cal State, Long Beach for the last 10 years. Harrison’s duties keep him in charge of the day-to-day operations of the campus police. Their duties include scheduling officers, handling complaints, working to ensure safety at various campus-sponsored events, as well as updating and enforcing policies and procedures, handling budget and recruiting issues.

Before coming to CSUSB, Harrison served as a patrol sergeant in the public safety department. He has a Bachelor of Arts degree in Criminal Justice from California State University, Los Angeles, and an Masters in Public Affairs from the University of LaVerne. He has also completed the Peace Officers Standards and Training Advanced Peace Officer course from the State Commission on Police Officers.

A native of Nebraska, Lit. Ed Harrison moved to California in 1963. He currently resides in Pasadena.

Lil. Ed Harrison Takes Over Campus

Kim Schneppe

Do high school college prep courses help students deal effectively with the pressures and expectations faced in college? There is evidence that many CSUSB students who have participated in college prep programs discuss the outcome of their high school preparation for higher education.

Melanie Wright, a San Bernardino High School graduate, feels her four years of college preparation for higher education. She had helped while at CSUSB.

The program put a harder, more stressful workload on us so we were prepared a little better for the hard work in college, she said. She claims that students in college prep classes had "extras" that other classes didn’t have. One such "extra," according to her, was a one-page letter written by the admissions officers.

"An economics, accounting, or sociology class would serve as a better guide to what you take in college," Wright said. Kelly added that she decided against college prep because of the foreign language requirement. "I haven’t changed my mind. It hasn’t hurt me at all because I haven’t needed it here at CSUSB."

"I'm positive I made the right decision," she said. She suggested that the courses could be changed for her now because in high school foreign language was not a requirement even in the CSU system.

"I have examples of how the courses could be better organized. ‘Have a syllabus, teachers wouldn’t have to follow it exactly. Lecture and make them college prep students take notes which they’d be tested on."

Kelly noted that in college, professors don’t accept ex-courses. ‘High school teachers need to be harder,’ she said.

A few additions and more rigorous requirements could help prepare students better, according to the three students. These changes may be on the way soon with the 1988 additional requirements.

Yet Hayes and Wright have experienced the rewards of college prep while at CSUSB. Both are ‘B’ average students and have had little problem in college life. If nothing else, college prep courses made them work harder to get used to lots of homework,” said Wright.
Fraternity open for business

Alpha Kappa Psi, the first professional business fraternity, was founded at New York University in 1904. This professional fraternity emphasizes the value of their members conducting professional and educational programs in addition to their pursuing regular undergraduate scholastic work. Projects vary as to the fraternity and the chapter, but their aim is the same: to educate and guide fraternity members. Programs may include addresses by persons prominent in various fields of endeavor, research projects, field trips, career conferences, and services to the University. Fraternity members also enjoy social events and travel to district and regional conferences. To become part of this growing, prominent business fraternity, please contact Pres. Cathleen Bright at 793-4145, or Steve Hekman at 887-7494. Pledge sessions start on Oct. 6th.

Gay and lesbian union meets

The first meeting of the Gay and Lesbian Union for this school year will be held on Wednesday, October 8, from noon-1 p.m. in Student Services 171. Begun in 1973, this is the fourteenth year for the organization. Our first meeting will be an organizational meeting. Students, faculty and staff are encouraged to attend. For more information, contact faculty advisor Dr. CraigHeaders, Dean of Students Office, 887-7524.

Luncheon set for Psi Chi

A get acquainted social and cold buffet luncheon for Psi Chi members and Psychology faculty (no charge) will be held Wednesday, October 8, in the Lower Commons, Panorama Room 104. Drop in anytime between 11 am and 1 pm. Dr. Chuck Hoffman, chairman of the Psychology Department, will be the speaker.

Psi Chi had their welcome luncheon for students this week.

Front Row: Connie Constantino, Secretary; Wendy Kellogg, President; Jackie Keeter, Vice President. Back row: Marcus Levine, Activities Chairperson; Laura Kimmick, Faculty advisor; Bob Cupp, Graduate student Leeson.

QUESTION #3.

WHAT EXACTLY IS AT&T’S “REACH OUT AMERICA”? 

a) A long distance calling plan that lets you make an hour’s worth of calls to any other state in America for just $10.15 a month.

b) A 90-minute special starring “Up With People.”

c) A great deal, because the second hour costs even less.

d) If you’d read the chapter on Manifest Destiny, you’d know.

e) Too good to pass up, because it lets you save 15% off AT&T’s already discounted evening rates.

If you can guess the answers to this quiz, you could save on your long distance phone bill, with AT&T’s “Reach Out America” long distance calling plan. If you live off campus, it lets you make a full hour’s worth of calls to any other state in America—including Alaska, Hawaii, Puerto Rico and the US Virgin Islands—for just $10.15 a month.

All you have to do is call weekends, 11 pm Friday until 5 pm Sunday, and every night from 11 pm to 8 am. Save 15% off our already discounted evening rates by calling between 5 pm and 11 pm Sunday through Friday. The money you could save will be easy to get used to.

To find more about “Reach Out America”, or to order the service, call toll free today at 1 800 CALL AT&T, that is 1 800 225-5288, Ext. 147.
Health Center offers wealth of new benefits

The staff of the Student Health Center wants to welcome you to a year of intellectual challenge and personal growth at CSUSB. Your health will be important to your success, and it is important that you learn how to protect and enhance your health.

One way in which we try to carry out this role is through weekly articles in the newspaper. We are beginning our fourth year of providing you with information about the services available at the Health Center as well as other programs in the community, and with information about those factors that influence your health and what you can do to maintain it.

We hope you will find it helpful and will suggest topics you would like to see addressed.

Many times students worry too much about exams, eat the wrong foods, lose sleep, or don't get enough exercise. As a result they become exhausted and get ill just in time for finals. This year, don't do that to yourself. Find a smart and concentrated on wellness and remember, your Student Health Center can help you. You might be surprised to know that aside from routine diagnosis and treatment of illness, your Health Center offers nutrition and diet information and counseling, men's/women's health and immunizations, and much more. This quarter, we have a student intern who is working on her Master's Degree in educational counseling and will be available to do individual or group counseling on stress management, and on wellness in general. (Additional information is available in a separate article.) So before you get too bogged down with school work, stop by the Health Center and learn how it can best serve you.

We encourage all students to use our services because in today's time of tight budgetary constraints, it is important that students use all available resources to save money and help survive the academic year. Health care is an area that can be very expensive to a student unless you have insurance coverage and/or have access to free or inexpensive health coverage.

Although in-patient services are not provided, the Health Center is just the place for all your outpatient needs. Toss any of your concerns, compare what we have to offer with outside sources and determine your savings. The following is a list of services and some important information about your Health Center.

Services available to all registered students who possess a current ID card include:
1. Diagnosis and treatment of illnesses and injuries.
2. Counseling.
3. Pharmacy (available at cost).
4. Family planning/birth control information and service.
5. Immunizations (measles, mumps & rubella, tuberculosis testing).
6. Pre-natal examination.
8. Health education and counseling.
9. Group or individual counseling on wellness or stress management. (Available through student intern.)

Hours: Mondays and Thursdays, 8-5 p.m.; Fridays & Quarter Break, 8-4:30 p.m.
Appointments: Call 887-7641.
Walk-ins are welcome, but may have a lengthy wait.
Staff: Two physicians, a nurse practitioner, a registered nurse, a pharmacist, and two clerical staff.
Location: East of the library between the Commons and the PE building.

National security studies is now the 10th official master's degree offered by CSUSB. The program, launched three years ago as a special major, was approved last week by Chancellor W. Ann Reynolds as an M.A. in national security studies, effective with the 1986-87 academic year.

The new program is a revised, upgraded curriculum from the special major, explains Dr. Richard T. Ackley, originator and director of the program, which is in the Department of Political Science. The two permanent faculty in the core courses are Dr. Ackley and Dr. B. Dirk Bruins, who joined the faculty this fall as associate professor of political science. Both men will teach courses on campus and at George Air Force Base. Faculty from various other departments teach additional courses in the interdisciplinary program.

The major was designed to meet the needs of career personnel in the military services, the civil service and the intelligence community. The curriculum covers the principles of strategic planning, arms control and national defense in relation to the contemporary international environment.

The degree program also is accredited by the Western Association of Schools and Colleges, under an agreement with the Department of Defense, which desires regional accreditation of programs on military bases. Cal State's program at George AFB is only the second or third time that the approval has been received for such a program, Dr. Ackley believes. The team which reviewed the program presented a laudatory report, citing as specific major strengths: the thought and care which went into the foundation and evolution, the fact that regular Cal State faculty teach and that the same caliber courses are offered on and off campus, and the need met by the program. The "distinguished and active" Advisory Board also was commended.

Latest Poli Sci degree: National Security Master's

There is a lot of talk today about something called "wellness". Just what all this means is confusing for many people. What does this word "wellness" mean to you? How do you act when you're not feeling well? How do you act when you are feeling well? Our definition of wellness is the continuous development of a whole person through the integration of the intellectual, social, physical, emotional, and spiritual dimensions of one's life. This includes not only learning how to work toward a healthy body, but how to interact with others, how to examine your own feelings, how to use resources to expand knowledge or improve skills, and how to search for a meaningful, peace, or inner self. If this sounds interesting to you, you have the opportunity this quarter to learn about your own "wellness" level. A student intern will be available at the Student Health Center to provide either group or individual counseling on this important concept. Contact the Health Center at 887-7641 for more information.

Check your wellness level at Health Center

Don't let your University Years Distress You!

As a university student you face many challenges, and challenges can be very stressful. It's natural for you to feel some anxiety about leaving home, or commuting to school, or managing finances, living with a roommate, having your values tested, or handling personal problems. Studying, dealing with test anxiety, and making choices about your courses, majors and careers also contribute to stress in your life.

Where can you go for help?

One place is at the Student Health Center, where a student intern will be available for group or individual counseling. Just call 887-7641 or stop by the reception area at the Health Center to set up your appointment.
