Kazlo elected N.O.W. Pres.

By John Patrick Whitehair

Martha Kazlo, Cal State psychologist and counselor, was recently elected president of the N.O.W. (National Organization for Women). Kazlo’s election makes her the president of the 100-member chapter in Redlands and Riverside, which includes both men and women members.

N.O.W.’s purpose is to take action to bring women into full participation in the mainstream of American society, and to share all the privileges and responsibilities in equal partnership with men, she said. The group is seeking equal rights and responsibilities for women in all aspects of citizenship, public service, employment, education and family life, and also freedom from discrimination because of marital status, parenthood, marital status, and women’s role in society.

Kazlo was elected president of the group in December. She prefers the title coordinator and chaired her first meeting earlier this month. She sees the local organization’s purpose as being one of information and referral.

Programs dealing with sexuality, abortion, assertiveness training and ways to avoid unbalancing stereotyping are often discussed at the meetings.

In an interview, Kazlo said it is a fun group. The ages of members range from 16 to 78 and cut across all social lines, including business people, retired persons, teenagers and others.

Currently the group is campaigning for the Equal Rights Amendment, and they are also actively protesting record companies that use images of women suffering sexual and physical violence on their album covers.

“Our group has done fund raising to help get the ERA passed in other states, and everyone in the organization is interested in getting it passed,” she said.

Kazlo said the immediate effects of the passage of the amendment are unknown, however she believes it would give the average woman more choice in being who she wants to be.

The ERA amendment was first proposed 92 years ago, and passage will ensure that women won’t have to prove they are first class citizens any more, she said.

Kazlo said that there are still laws on the books that say women can not own property apart from their husbands, and divorced women sometimes need their ex-husbands approval to acquire property.

She believes that opposition to the amendment comes from persons who do not understand the bill and what it can do for women.

“It has nothing to do with men and women using the same bathroom,” she said.

MARTHA KAZLO, the New N.O.W. president. Photo by Keith Legazer.

The group is asking people not to buy record albums manufactured by Electra, Warner and Atlantic record companies because their album covers picture women being sexually and physically abused, and the implication is that they are enjoying it, she said.

“Our protesting of these images has had an effect on the record companies because they are meeting with N.O.W. representatives in order to solve the problem,” she said.

Kazlo would like to see more Cal State students, faculty and staff join the organization.

Future plans call for increased public awareness of the group’s programs and projects, and a stronger effort will be made under her leadership to get all members actively involved in the group’s functions, she said.

The local chapter meets the first Thursday of each month at 7:30 p.m. in the Redlands YWCA, 16 E. Olive Street, Redlands. Child care is available.
Secretary uses Braille

Caroline Rounds is a clerical assistant for Cal State's Disabled Student Services. She assists the school's disabled student population in their problems and queries on campus. "I put work in Braille for blind students. I'm doing syllabi right now," she told the Paw Print.

Caroline rounds is blind. She is the only blind secretary on campus. "I work," she says. At 8" X 10" piece of notebook paper. When asked how she manages to do all the typing, filing, and writing her job requires of her, Caroline responded that the key is that "everything is Brailled. I Braille is a system of six raised dots on paper which can be arranged in various combinations to represent words or word forms." To write out a memo or letter Caroline first lists in the information which has been taped on cassette tapes and then she transcribes it in type. If she needs a copy for herself she Brailles one on the Braille writer. "I use the Braille writer for making labels, memos, and phone messages," Caroline said, "and all the files are Brailled. The files have typed headings on them also." Presumably for those blind to Brailled.

When asked how she makes appointments Caroline said, "I have, instead of a calendar, a Rolodex. I made it myself from one a friend gave me that was partially done." What Caroline has done is she has taken a standard mini-file system, a Rolodex, and divided it up into months and days of the year. These divisions have been labeled in Braille so she can "see" which appointments go on which days. Before Brailing an appointment on paper she slips it into the correct slot for its day and month.

"Anything l need to read I read on my closed circuit TV," Caroline told the PawPrint. This closed circuit TV allows Caroline to see anything it views to the size of an 8" X 10" piece of notebook paper. With this Caroline is able to look up names, addresses, phone numbers, and virtually anything that will project on the screen. "It enlarges and I can adjust the contrast. Also gives a negative picture for easy reading," she added.

When asked how she knows which phone rings on the office's four-extension telephone Caroline said that she is not authorized to answer the phone, but "I have a heat-detecting gadget that buzzes if held over a flashing extension button. There's even a gadget out now that can be put on the finger for answering telephones this way."

"A lot of it is a matter of being organized," she says, "I have to have things in their right places," she added, "That way I won't put a file memo on a telephone message slip."

Caroline has been working for Disabled Student Services since fall of 1976. "All the jobs I've held have been in the field of medical transcription," she said, adding, "I like this job because I do a variety of work and meet people."

Caroline's job is funded through the Disabled Student Services budget. "I'm funded through June of this year," she said. "This is the first year of the program and a lot of the refunding will depend on how important we are evaluated to be the school," she added. Caroline has taken a heat-detecting gadget for answering telephones this way. "That way I won't put a file memo on the finger for answering telephones this way." Caroline is married to her husband Glenn, a biology major at Riverside City College, and they have a daughter Emily whom they've enrolled in Cal State's Day Care Center adjacent to the campus.

Caroline is very enthusiastic about her job and being blind makes her extra special. "I attended college for a while and I can empathize with the blind student at Cal State," she said. "I know what it's like."

Committee discusses goals

By Ray Byers

A discussion of priorities for the next sixty days was the main order of business when the Student Union Planning Committee met Jan. 31.

Discussion centered around the need for decisions on the type of drapes, rugs, and furniture for the new student union building, scheduled to open at the beginning of the Fall quarter.

This item was referred to the Furnishings Committee along with a request to check the feasibility of contracting with a vendor for pool tables and electronic games for the facility, rather than a cash outlay to buy these items. If it is decided to contract these items, bids will have to be asked for soon so they will be available for the opening.

Discussion on use of the bar in the Student Union led to a tentative decision that a permit to sell beer would be secured on a one day basis, when needed, rather than applying for a yearly permit. The Alcoholic Beverage Committee will attempt to get the Board of Trustees policy against wine on campus changed to enable the sale of wine also.

The draft of the proposed Student Union Corporation By-laws was discussed at length, with several changes being suggested. The suggestions were referred to the Governance Committee for discussion and any further recommendations, to be presented to the full Planning Committee at its next meeting.

Tracy Fugues was appointed as a new member of the Governance Committee.

Free career guides

The Career Planning and Placement Center now has available for student use a booklet entitled "Guide for CSUSB Students." This 34-page guide is designed primarily for Seniors and Graduates who are registered with the Placement Office, and are currently or will soon be in the job search. Information on Placement Office policies and services, choosing a career, preparation of resumes and letters of application, and job interview, follow-up letters, and other general information concerning the job search is included.

Students registered with the Placement Office may pick up a copy in SS-122. For students not registered with the Placement Office, a copy of this guide and other career materials are available in the Career Information Room (SS-117) for year inspection.

Correction

An erroneous statement appeared in the Jan. 18 Pawprint story of the Jan. 12 ASB Senate meeting. ASB Senate President did not move the "ASB big be raised. He only placed the subject before the senate as a matter for discussion.

Just remodeled.

Enjoy a new more relaxing atmosphere.

Open: Friday and Saturday 10 a.m. - 11 p.m.
Sunday thru Thursday 10 a.m. - 10 p.m.

What is perhaps the all-time American film comedy classic is scheduled for tomorrow's offering at 1 p.m. in the Listening Facility on the Library's fourth floor: "It Happened One Night," starring Claudette Colbert and Clark Gable.

Students of Americana should put this on their "must see" list. The late, unmarked Literary Digest for March 10, 1934, underreviewed the film thusly: "... proves to be a diverting comedy, skilfully directed and attractively played. A lively and not too melodramatic comedy about the Taming of the Shrew, an affair of runaway heiresses, and a romantic, fireman, journeying by bus from Miami to New York, the film, despite excessive length, is one of the most entertaining of recent photoplays."

"It Happened ..." was directed by Frank Capra, and this film established him as an outstanding contributor to American entertainment.

One scene in particular -- no, not the "Walls of Jericho" -- has Gable listing items lost, and their prices, when his assassins was stolen. For Economics majors, this scene is a must. The prices quoted are historical. And hysterical.
Benchwarmer
College cafeteria is game

THE BENCHWARMER

Hi Bubba! I went down them cafes they call the Commons last week for lunch and couldn't get it. I could see that it was open because it was full of people. Since there is a Sahara that is so knobs on them, I didn't know what to do so I started pouting them. Some of them opened up and started walking towards me. Now I still had all my weight on them doors and all of sudden they opened up like a hen laying eggs and I fell flat on — you guess it — my eyes.

Next thing I knew I was being picked up by this guy and he was laughting his foot and gave it some mad at him, but anyone that can open doors without touching them is no one to mess with. I asked him how he did it and he said that there was somekind of an eye above the door that opens it when a person is a certain distance from it. Then he demonstrated it. It worked just fine until I tried it. Nothing and more Nothing. I guess I'm the only person on campus the eye doesn't recognize, being new an all.

Anyway, inside the Commons you know there's three cafes. One features a hamburger that is so thin that it only needs to be cooked on one side. Another features a Mexican variety which charges two more cents for Burritos than if you got it out of a machine. And the last is just a diner which features such tastees like lollipops and rice or whatever else is left over. Oh yes, I forgot about that sandwich you picked up by this guy and he was saying that it was the San Andries Fault or something like that. Made me real scared until I finished eating and decided I was going to make one up, 395, my registration number and gave it to him. I guess it wasn't the right kind number because he made me pay.

I sat down and enjoyed the view. You could see the mountains with the snow on it all. The wind was areally blowing. For the first time since I've been in the area I understood why people around here walk bent and why the school offers courses in wind walking and wind basketball.

Then this guy sat next to me and said that the next thing I knew he was pointing toward the nearest hills and saying there is a San Andreas Fault or something like that. Made me real scared until he reassured me that it was all over this area.

I finished eating and decided I better get something more to eat. You just don't get much for your money. Anyway I went back and looked for something more.

There was this ice cream machine, all you want on a cone for 28 cents. Well, I piled it on (that's one bargain at the Commons) like you wouldn't believe. When I got done my cone looked like candy cotton. This time when I went through the cashier and gave him a number he got real made at me, not because I won, but because my cone top fell in his cash register.

Well, I finished what was left of my cone and started waiting for someone to exit or enter, when all of sudden the Beef Dip started playing MacArthur and started to return. I soon discovered why they have those restrooms so near the doors.

The only thing I can say about the Commons now, is that we should do one of four things with it.

1. Take it out and shoot it.
2. Start writing odes to the dorm people and the rest of the people that have to eat there.
3. Write Jimmy and ask him to declare it a disaster area and have him send in emergency food relief, or
4. The worst of the alternatives, do like many schools in the South are doing, invite MacDonalds on the Commons.

By Hank White

When D. Clove of the VA, which had an eight percent raise and increased the entitlement from 36 to 45 months, the Veterans rejoiced. Little did most expect that along with these benefits came a new "get tough" policy towards Veterans using these benefits.

Congress in its rush to do something for the Vietnam veterans, just before the November elections, quickly passed the Bill without the careful consideration the Bill deserves. In the hands of the VA it has acquired two distinct themes:

1. The Government intends to crack down on Veterans who do not maintain what the VA considers to be a "satisfactory standard of progress." 2. VA payment will be based on the overall pursuit of an academic objective, rather than attendance in classes.

In terms of practicality the following are the results:

1. The NC and W regulations require that a Veteran pay back any monies he or she did not spent during the quarter if he receives a No Credit grade or a Withdrawal (see last week's article.) This is proportionate to the total number of units he withdrew from or received payment for in a quarter.

2. A Veteran must complete more than 50 percent of his course load attempted in order to be making satisfactory progress. If not, he must receive VA counseling before being allowed to receive further G. I. Bill benefits.

Add that to the existing rules of VA "standards of progress" and what you have is a system that is severe, punitive and offer no assurance of doing what they are intended to do: create financial need.

As the rationale behind these new regulations is that they are needed to "eliminate future overpayment and insure that Veterans are indeed proceeding, as they should be, toward some educational goal.

Yet, the new G. I. Bill will eliminate such overpayment only by, starting June 1, 1977, abolishing the present prepayment G. I. Bill checks. Under the new system checks will be mailed at the end of each month. Advance pay is delayed by filling out a certification form in which the veteran will have to demonstrate financial need.

In a matter of speaking there is no real overpayment. In theory, the VA can collect from him, if the veteran overpaid, widespread publicity of the situation resulted in public pressure on Congress and the VA to do so at all. But what is the cost?

The New York Times states that Harth is "clearly one of the finest violinists this country has produced." He has been ac­claimed by critics as a soloist of extraordinary musicality and technical brilliance and for his maturity, individuality, and imagination.

Tickets at $4.00 (general ad­mission) and $2.50 (students and seniors) are available at Harris' (Riverside and San Bernardino), Chayen's Music, UCR (University of California, Riverside), and at the door.

Violinist in Riverside

Sidney Harth, renowned violin virtuoso, concertmaster, will appear with the Riverside Symphony Sunday afternoon, Jan 30 at 3 p.m. at the Municipal Auditorium (77th at Lemon, near the Mission Inn). He will play Beethoven's Concerto in D for Violin and Orchestra.

Lawrence Christieann con­ducts the orchestra in two ad­ditional numbers, Mozart's Overture to The Abduction from the Seraglio and Symphony No. 2 by Sibelius.

Charlene — another forgettable album

By Kerry Kugelman

With all the success of upper­echelon rock stars apparently blinding their good sense, a lot of who would be smart forget that with few exceptions, successful careers are brought about through hard work, dedication, and above all, creativity. "Charlene," a good (or bad) example of what can happen when an artist is overwhelmed by a lot of good, inventive talent trying to help her out, and forced to lend any creativity herself, in this case with very negative results.

Sounding like a refugee from the days of bubble-gum pop, this album is all but a lost cause. Though graced with several arrangements by Gene Page, who is well known to Barry White and Elton John fans, and a song written by Stevie Wonder, "Charlene," fails miserably in its execution of these contributions. Almost every track sounds like two or three others, and the only song which begins to approach results.

Add that to the existing rules of VA "standards of progress" and what you have is a system that is severe, punitive and offer no assurance of doing what they are intended to do: create financial need.

As the rationale behind these new regulations is that they are needed to "eliminate future overpayment and insure that Veterans are indeed proceeding, as they should be, toward some educational goal.

Yet, the new G. I. Bill will eliminate such overpayment only by, starting June 1, 1977, abolishing the present prepayment G. I. Bill checks. News

News for vets

01. Bill gets tight

There are other considerations at stake. Who should do the educating? The VA or the schools? The idea of the VA or any other federal agency coming into schools and dictating the "standards of progress" and forcing this standard on schools is an unsettling thought. If it is not an infringement upon academic freedom, it comes close to it — too close.

My main objection to the new Bill is that the new rules on the "standard of progress" are black and white. They are, in effect, forcing Veterans to maintain a much more rigorous academic standard than other students. Veterans must main­tain a 2.0 each quarter. If, not, they are on VA probation. The VA doesn't look at the total GPA, etc., they only look at each quarter. It is possible to be on VA probation but have a 3.0 overall GPA. If a Veteran received two quarters of below 2.0, then he must receive VA counseling before receiving further G. I. Bill benefits.

So I take that to mean that those receiving federal aid and assistance should maintain a higher standard of progress, which would be one thing. But come on, it isn't. Recipients of the Basic Educational Aid and Training, and other federal aids have no other standard than those set by the schools.

The new law may slow down the overpayments, but the damage they may have caused would be more than any alleged good they offer. What other program has less than a two percent ripoff? What other program has produced so many College grads? With the new regs more than a few Veterans will probably be forced out of school because they are not liked or trusted among many Veterans as it is. The new regs will drive a wedge between the Federal Government and many veterans.

There are other considerations at stake. Who should do the educating? The VA or the schools? The idea of the VA or any other federal agency coming into schools and dictating the "standards of progress" and forcing this standard on schools is an unsettling thought. If it is not an infringement upon academic freedom, it comes close to it — too close.
Letters To The Editor

Hatchet job protested

To whom it may concern:

Recently, there has been a great deal of speculation over the quality of the campus newspaper. I must confess that I did not particularly care whether the paper was good or bad. However, since reading Jim Austin’s review of “Revolution and the Revolutionary Ideal,” I am convinced of the questionable quality of the paper.

Therefore, I am about to argue over its merits. What appears to be called into question more specifically, the lack of it, in the review. There appears to be basically a simple misunderstanding in this critique. Apparently, Mr. Austin’s bias is based upon a fundamental disdain for the authors’ beliefs concerning the revolutionary ideal.

New grading system to be checked

Dear students,

As a result of an editorial published in last week’s PawPrint about the new plus­minus grading system which has been directed by the ASB Executive Cabinet to investigate this issue, ASB government is primary concern at this stage is to establish whether or not students had an opportunity to provide formal input into the decisions regarding this new grading scheme.

It was my understanding that last year students were involved in this decision, but if this is not the case, I for one would be very upset.

What all the relative merits of this system as opposed to the present system are, I don’t know. There are, however, a number of questions I have about the new system. This is an experimental program and I feel that its implementation should be watched carefully by the students of this campus.

If you would like to help provide direction to your government on this issue, please write or call the ASB office (897-7481). We welcome comments and submissions.

Science and Health

Life expectancy changes

By Dr. David Hendrickson

To the Referee:

A male citizen of the Roman Empire reached 60 years of age, his life expectancy was significantly shorter than that of a 60 year old male citizen of the United States today. How could that be anything but “true”? After all, today we can clean prostatic obstruction, surgical pin broken hips, treat infection with antibiotics, place the heart attack victim in a coronary care unit, and treat cancer with surgery, drugs, and radiation. Yet, as you’ve probably guessed, the answer is “false.” Despite the progress medicine has made, modern medicine has lengthened the life expectancy of several ages, but our patients, simply do not support this.

The dramatic change that has occurred is commonly seen in the early years of life. For example, today in this country, a one year old male child has a life expectancy of early years, whereas in the Roman Empire, it was lower than the poor. Today, in our society, can expect to live 10 years fewer than females, however some 2000 years ago in Rome, they fared better than females by a couple of years, probably due to the high mortality of childbirth.

As we have seen, the causes of death in the early years have been reduced or eliminated. What would happen if the present first and third leading causes of death (heart disease and stroke) were eliminated? In that case, approximately 16 years of additional life could be expected. If the second leading cause (cancer) were eliminated, two more years of life expectancy could be added. Interestingly, this 20 year gain approximately equals that achieved in this country from 1900 to 1950.

The ultimate question in a discussion of this type is to ask the effect on human longevity in all causes of death and accidental death were eliminated. The answer is that we would live our lives free of the fear of premature death but with the knowledge that our physiological degeneration would result in death near our 100th birthday.

While the decrements in various human physiologic functions show variation with a few individuals, they all show a slow, usually linear, decline beginning about age 30. This loss is thought to be 6.0 to 0.9 per cent per year.

Thus the disease oriented approach to medicine can increase life expectancy to some upper limit, but it will not impact on the actuarial life table. The same can be said for choosing to lead a healthful life. Proper diet and exercise with doses of moderation and abstinence can increase life expectancy, and at a considerable cost saving to society, and of course, won’t increase life span.

If such an increase is desired, and that to me is a moot point, research will of necessity have to concentrate on the aging and death of the individual cells composing the organism, rather than disease. That type of research is being conducted by some physiologists and cell biologists.

In my own defense, however, and by way of conclusion, permit me to quote the comments by Professor Gerald Newman of Kent State University. “I’m convinced that Revolution and the Revolutionary Ideal really is an extremely good and important book as an intelligently written and thorough review in the concept of revolution, yet everything that follows the introduction gives proof of the depth and breadth of your interpretation...I admired the ease with which you combined a logical and chronological impression of the book, but I subject your comparison with an evolutionary and historical approach to the second they, over the past 2 centuries, in so many varied climates, of the concept of revolution. The book is liberally sprinkled with valuable insights into the nature of ideology and glitters with telling images and illustrations...Not only do you show grounding in intellectual and historical knowledge, but you come at it with this nice touches of political analysis.”

ASB wants to help

By Michael S. Messer

Every institution needs a form of government so that it may function in a logical and economical manner. Any college campus is in fact an institution of one form or another, and therefore “good” government is essential. In my opinion, “good” government should consists of the following: (1) communication between students and officials, (2) active participation in ASB government functions, and (3) to bring these two en­ties into light in the near future. Doug Cole and I recently enacted a bill which makes it mandatory for all ASB members to wear their ASB buttons while on our Cal. State Campus. If you have any “bitches,” “gripes,” suggestions, etc. please contact any one of us and we will do our best to help.

In the very near future there will be suggestion boxes placed in various locations around the campus. Once again drop us a line and let us know how we can serve you, the students, in a better fashion.

Interview

Hypnotism useful—requires caution

by Sydnee Moser-James

Mel Osburn is a 38 year old senior majoring in psychology. He is married, has three children, and works full time as a journey man electrician at Kaiser Steel. Mel is also a hypnotist and has been working and studying in the area of hypnotism and para-psychotherapy for more than ten years. After learning about some of Osburn’s experiences in these areas, the PawPrint decided to interview him.

Question: Was your interest in hypnotism what got you started going back to school? (Note: Osburn originally planned to be an electrical engineer, but decided during halfway through that program that it wasn’t what he desired.)

Answer: Yeah. Basically because I could use things like I knew it should be used. I want to be a clinical psychologist and I want to be able to use hypnotism as a tool. It’s not a panacea for everything. Some people, you just can’t think of treating with hypnotic therapy. But with a lot of cases, it’s a good tool.

Question: Did people get wrapped up in something like this and say, “Hey, this is the thing!” instead of being more realistic and saying, “Okay, it’s a tool. Use it when you can and when you can’t, go to other available modes of therapy.” You’re trying to help the patient, not further create something like that. But another interesting area for hypnotists which I can see, is not a tool for therapy, medicine, or psychology, but as a means for gaining an understanding into the human organism itself.

Question: How did you actually get started doing hypnotism? Where did you get your training?

Answer: I had studied everything I could get my hands on for several years; a guy at a local University, a retired electrical engineer, but decided during halfway through that program that it wasn’t what he desired.

Question: After I had studied everything I could get my hands on for several years; a guy at a local University, an electrical engineer, but decided during halfway through that program that it wasn’t what he desired.

Interview

Hypnotism useful

(Continued from page 6)

disturbances may originate at a subconscious level. Now if they have a person up there in front of the audience while they are being laughed at and all, now even though the hypnotist may not be able to control the audience, which is easy to do, where the subject has no conscious control over them, their subconscious never forgets. Their subconscious might work to the point where they would ridicule and laughed at. With some people, this could really do damage and manifest itself into the conscious state. It’s just not a good idea, to ever have a person laugh at, that’s for sure in the conscious state. It’s just not a good idea, to ever have a person laugh at, that’s for sure in the conscious state. It’s just not a good idea, to ever have a person laugh at, that’s for sure in the conscious state. It’s just not a good ide...

Q: There have been suggestions in the past few years that some of the more popular evangelists and religious leaders are actually performing a type of mass hypnosis on their followers. I think the references are to some of the ministers who elicit tremendous emotional response from the audiences and perform "healings" of the sick and afflicted. Do you think that this is a form of hypnosis?

A: That’s exactly it. This is a very valid assumption. When you

Q: I saw one such show in a night club and it left me with a lot of uncomfortable feelings. The hypnotist would make fun of all of the subjects and put them under. There were about 300 people in the audience and I was sitting toward the back, paying more attention to the audience than to the stage. Suddenly realized that quite a few people in the audience were slipping into the hypnotic state along with the one on the stage. People in the audience were nodding and slumping down in their chairs and a few even fell all the way out of their chairs. One guy fell out of his chair and toppled off of the stage on to the floor about three feet.

The hypnotist was aware that people in the audience were going unconscious and turned and talked to the rest of us not to worry about the people who were falling. He assured us that a person in the hypnotic state wouldn’t hurt themselves. I think the references are to some of the ministers who elicit tremendous emotional response from the audiences and perform "healings" of the sick and afflicted. Do you think that this is a form of hypnosis?

A: Well, this is like Jung’s Collective Unconsciousness. But on individual regression I don’t think this is the case. It’s too factual. Why would they be able to tap just a selective memory? If it was tied in with a collective unconsciousness, you would not be a selective personality. But in age regression you can get back and pick up that particular personality. No matter how many times you do it, you still get that one personality and past.

Foreign study forms available

The International Programs, which is responsible for sending approximately 360 students from the entire California State University and College (CSUC) system to foreign countries this academic year (1976-77) is now accepting applications for the next academic year (1977-78). This year three students from CSCSB are studying in a foreign country as the result of the International Programs. So far, five CSCSB students have applied for next year. The deadline for applications is Feb. 11; however, applications will be accepted after that date under mitigating circumstances.

The International Programs are sending students to the following countries: Denmark, France, Germany, Israel, Italy, Japan, Mexico, Republic of China, Spain, Sweden and United Kingdom.

The basic requirements are that the student be a junior, senior or graduate, attain an overall GPA of 3.5; be a citizen of Israel, New Zealand and United Kingdom; and a certain foreign language proficiency where required.

Expenses such as tuition and other instructional expenses are paid for by the State of California up to approximately what the State pays for a student’s education within the CSUC system. Overseas students must be prepared to pay for room and board, home campus fees, books, etc. Various financial aids programs, except work-study, are available.

Applications are first processed through International Programs’ Campus Representative Mireille G. Ryedell (UC-239). The application and all evaluation sheet filled out by the campus representative is forwarded to the Academic Standards Committee of the Faculty Senate. Their decision is based on the application, evaluation sheet, and the student’s transcripts.

Final decision is rendered by the Study Abroad Committee of the Academic Council on International Programs in Long Beach,
Ski areas report conditions still good

By John Patrick Whitehair

One of the best reasons for living in the San Bernardino area is the closeness and number of ski resorts in the immediate area.

With 30 minutes drive from Cal State there are several resorts that rival Mammoth and Lake Tahoe.

The hot dry Santa Ana winds last week did do a whole lot to improve the ski conditions at the local slopes, however most areas are reporting good to excellent skiing at the higher elevations.

The resorts that make their own snow say the skiing is excellent on a good packed base.

Mountain High Ski Area in Wrightwood is one of the oldest ski areas in southern California and is known to many as Blue Ridge.

Mountain High has two double chairlifts, groomed ski slopes, lots of parking, a lodge, restaurant, bar, ski school and guaranteed snow November through April.

The various slopes present trails which are gentle enough for beginners and other more gradual inclines perfect for intermediate skiers, still steeper runs for the more skilled skiers and lots of cross-country area for the more strenuous skiers.

The new chairlift near the top of Mountain High leads to several great trails. Lower slopes are ideal for beginners and are serviced by a double chairlift.

Races are held every Friday, Saturday and Sunday starting at 12 noon and are open to all.

Lift tickets are $8.50 on weekends and holidays, $7 on weekdays, half day tickets are $6 and $5 respectively. Lodging is also available nearby.

Holiday Hill, two miles from the village of Wrightwood, offers beginners, intermediate and advanced skiers slopes to meet their level of proficiency.

At both the top and bottom of the mountain are vendors, food and the usual facilities are available.

Snow Summit in Big Bear has one of the most extensive snow making facilities of all the local slopes.

Snow Summit offers night skiing from 4:30 to 10 p.m. on Wednesdays, Fridays and Saturdays. Lines to get on the lift are smaller at night and dedicated skiers can get in all the runs they want for less cost.

The Summit Inn at the base of the mountain has a bar on Saturday and Sunday afternoons. During Saturday evening, all the other usual resort facilities are available.

Located on Highway 18 near the Big Bear Village, Snow Summit is open seven days a week during the season, lift tickets are sold out early on weekends; long lines also on weekdays.

Goldmine Ski Area, two miles east of the Big Bear Lake Village and north of Snow Summit, has southern California's longest and highest chairlift that raises to 8,600 feet. There are two double chairlifts, rope tows, a poma lift, ski rental and ski instruction, and a ski chalet and restaurant serving cocktails.

Lift tickets for adults are $8.30 for adults and students get a $1.30 discount on weekdays. A beginners package includes one lesson, lift ticket and all equipment for just $18.00.

Snow Valley Ski Area near Running Springs has the only triple chairlift in California. There are 19 ski runs plus variations, 45 percent beginner, 30 percent intermediate and 25 percent expert. A total of seven chairlifts and three rope tows take skiers to the slopes, and Snow Valley has one of the better beginners slopes in California.

The usual facilities, a package deal including lift ticket, a lesson and equipment is $18.00.

Lift tickets are $9 for all day, and students get a $2 discount on weekdays.

Green Valley Ski Area near Green Valley Lake, north of Running Springs off of Highway 18, has two poma and two triple chairlifts, and two rope tows. Located off the beaten track, Green Valley is usually less crowded than other resorts.

Rental lift tickets for the poma lift and all tow tickets are $6 for the whole day. Equipment rentals and all the usual facilities are available.

Next week: A comparison of local ski shops and prices.

Heart problems

"Heart problems are our number one killer in the United States. Learn to handle chronic stress and tension before it becomes you.

Dr. David Kantorowitz, who gives this warning, will conduct a weekend seminar Jan. 28 and 29 on ways to manage these threats to good health.

The extension course, open to any interested adult, will meet from 6 to 10 p.m., Friday, and 9 a.m. to 1 p.m., Saturday, in Room 249 of the Library Building at California State College, San Bernardino.

Successful behavioral approaches for overcoming the irrational fears, stress and anxieties found in one's daily life will be studied in the course, says Kantorowitz, an assistant professor of psychology at the college.

An independent study format may be arranged with the consent of the instructor.

Cost of the one-unit psychology course, "Management of Anxiety and Stress," is $33. Registration may be arranged in advance through the Cal State Office of Continuing Education.

Juggle the books. Set fire to the factory. Supply women for the clients. Harry Stoner will do anything to get one more season.
Intramurals

Basketball
This quarter's big intramural sporting event is 3-person basketball. The games will consist of two 30-minute halves. These games will be played on Monday and Fridays, 2 to 6 p.m.

Basketball
The games will be "low key" competition or fun. Come on out to the gym for a little b'ball. The games will consist of two 20-minute halves.

Women's League
On Mondays from 2 to 5 p.m. there will be women on some of the "B" league teams. The "A" league players will tend to be the more "highly skilled" while the "B" league will be "low key" competition or fun. So, pick your league, and get out to the gym for a little b'ball. For more information, contact Joe Long or J. C. Wright in PE-124.

Women's League
On Mondays from 2 to 5 p.m. there will be women on some of the "B" league teams. The "A" league players will tend to be the more "highly skilled" while the "B" league will be "low key" competition or fun. So, pick your league, and get out to the gym for a little b'ball. For more information, contact Joe Long or J. C. Wright in PE-124.

Always freckled and burned in the sun? Can't keep your balls in the court? Well, wake up, Charley! Try TABLE TENNIS. The Intramural Department is conducting a one-day tournament Thursday, Feb. 1, at 3 p.m. Sign up now in the P.E. Department. Never get smashed on the courts again!

Basketball
This campus is still in need of players to form more teams as well as to fill out existing ones. So come on out and get involved.

Any questions — contact J. C. Wright, Joe Long or Sandy Carter.

Table Tennis
Is this how you "match up" or tennis courts:
You never scored in a love court?
You never looked good in tennis whites?
You never scored in a love match?

Reminder
Students are reminded that tomorrow is the last day to drop classes. Students are also urged to check their Student Assignments at the Information counter at the Admissions Office.

Wednesday, Jan. 26
External Assessment, 8 a.m. - 6 p.m., LC-500.
LDSSA, 8 a.m., C-219.
Early Childhood Club meeting, 12 noon, C-219.
Newman Club, 12 noon, C-125.
Faculty Development Panel Discussion, 2 p.m., C-104.
International Club meeting, 3 p.m., C-219.
Young Libertarian Alliance, 8 p.m., PS-105.

Thursday, Jan. 27
CSEA meeting, 12 noon, C-219.
Sociology Club meeting, 12 noon, LC-287.
Woodpushers Anonymous, 7 p.m. - midnight, SS-Atrium.

Friday, Jan. 28
Film: "Save the Tiger," (Rated R), 6 p.m., 8:30 p.m., PS-10.
Sunday, Jan. 30
Chamber Music Concert, 7:30 p.m., PS-10.
Monday, Jan. 31
LDSSA, 8 a.m., C-219.

"What is a Rugged?"
Attention CSGB Women
We are presently recruiting women 16 or older to play Rugby Football. We need strong-willed and/or strong-bodied athletic women who like contact sports, competition, travel and teamwork. We are the sister club to Riverside Christian Life Club and most members are currently members of CSGB campus.

Our schedule takes us to UCLA, UC San Diego, Berkeley, UC Santa Barbara, Belmont Shores, and other established Rugby Clubs. We just competed at a large tournament in San Diego where we enjoyed the fellowship of other male and female "Ruggers," free beer, parties and lots of Rugby. The season peaks in beautiful Santa Barbara in the spring where over 100 men's teams participate as well as women's competition — with more of the aforementioned as "fringe benefits."

If you're interested, we want you! Please call Joy Kimball 875-5050 (leave message) or 874-0755 (after 8 p.m.).

Wednesday, Jan. 25
ASB Senate, 7 a.m., C-219.
Business Management Club meeting, 11 a.m., LC-287.
Gay students Union meeting, 12 noon, LC-287.
Christian Life Club meeting, 12 noon, C-125.
MECHA Club meeting, 1 p.m., LC-245.
Inter-Organizational Council meeting, 3 p.m., C-219.
ASB Activities Committee meeting, 3 p.m., ASB Trailer.
Serrano Village Council meeting, 6 p.m., C-219.
ASB Executive Cabinet meeting, 8 p.m., SS-171.

Wednesday, Jan. 26
External Assessment, 8 a.m. - 6 p.m., LC-500.
LDSSA, 8 a.m., C-219.
Early Childhood Club meeting, 12 noon, C-219.
