Faculty Senate Approves Student Award

Selection Criteria

1. Senior class standing with all graduation requirements completed at the time of commencement. Nominees must have at least five (5) quarters attendance as a full time student at CSUSB.

2. 3.5 (minimum) CSUSB gpa and 3.0 (minimum) gpa in all college work and demonstrated academic excellence.

3. Demonstration of service and leadership in campus and/or community organizations and activities.

Application Process

1. Self-nomination or nomination by a member of the faculty, staff or fellow undergraduate student at CSUSB

2. Submission of three (3) confidential letters of reference supporting the nominee's candidacy.

When A God Falls

by John Purcell

The headlines made me cringe.

When Dwight Gooden fell from the pitcher's mound, it was like a god falling from Mount Olympus. Gooden posted god-like numbers in 1985 when at the age of 20 he won 24 games and posted an earned run average of 1.53. He earned the nickname of "Dr. K" because of the incredible 268 strikeouts he recorded.

But last season, Gooden's numbers dropped. He won only 17 games. His ERA rose to 2.84. Gooden simply did not dominate the game the way he had before.

Many people remarked on Gooden's less-than-perfect season, saying, "Oh, he's human, too." Others argued, "I wish I could throw like that and be 17-6." But when the story came out, the "I-told-you-so's" did not shoot up in great numbers.

God is a gift from God, our greatest minds couldn't discover Him on their own, using crude and imperfect humans such as empirical observation and science.

As an example: a Chemistry major who secures an internship allows the intern to "test water" while still in a dream that men have thirsted after for close to a hundred years. And it wasn't enough.

Others argue, "I wish I could live in a dream that men have met some wonderful educational learning, and personal networking. internships can help you discover areas of work which are personally satisfying and fulfilling.

As an example: a Chemistry major who secures an internship developing analysis procedures for a paint manufacturer discovers that, although she is educationally prepared to do the work, and had thought analysis in the classroom lab was exciting, she did not care for that type of work on a daily basis. However, an internship doing analysis with a polluting control firm turned out to be rewarding and confirmed her career direction even before her graduation.

I am graduating this June. I have met some wonderful instructors and fellow students during my stay at Cal State. I hope that we all graduate to Heaven and that one day in the distant future I will see all of you there.

God loves you because all of you are lovable and may He give the bravery and wisdom to accept His gift of faith that He extends to all people.

by Eloise Nogues

Internships can Help

You're in your Junior or Senior year. You've made a solid commitment to your work. Seeing what has happened and the choices feel good. School is going well and graduation seems just around the corner. It's time to think about applying your education in ways that will help you secure your first job...but not as a job. How will you be sure your future work will be satisfying and rewarding beyond the paycheck? Internships can help.

Aside from the obvious benefits internships provide in areas of work experience, application of educational learning, and personal

The idea that professional athletes have set an example for a whole society is ludicrous. Fans have the right to live out their dreams through other people.

Wrong. Completely wrong.

Grant Gooden did not ask to be made a "god." It doesn't matter whether he wanted it or not. He had a responsibility to live up to and he failed. Gooden has a great gift. With great gifts come great responsibilities. He or anyone else cannot take one without the other.

Responsibilities are not optional. They come with the territory.

Disingarding the fact that professional athletes are paid well to display their skills, there is still enough reason for fans to require such high standards of them. They are symbols for our children to look up to.

Yes, we do have the right to require them to live up to a standard, just as we have the right to require our professional athletes' private life should be private. He shouldn't have to explain himself to fans. He should be as accountable as his chosen career than a bank teller or a construction worker or a cashier.

When A God Falls

Getting more than the good life

by Eloise Nogues

Dear Faculty and Students,

We all place a high value on getting degrees. What are our motives? The good life with all that our money can buy or a desire to make this a better world for our living? I believe in Heaven and perfect happiness after death as reward for having faithfully kept the 10 commandments that God gave to the entire human race. I believe that we can be a success in life only if we graduate upon death to a happy eternity. This will truly be our greatest commencement.

All earthly knowledge will have been gained in vain if we are strangers to God when we die.

God is a gift from God, our greatest minds couldnt discover Him on their own, using crude and imperfect humans such as empirical observation and science.

To live for the love of God and our fellow human is the only kind of living worth our efforts. It is fashionable in academic circles to exclude God, but aren't the people who forget Him the most ignorant of all humans? To worship ourselves and our own very, very finite mind is to be lost. "A man wrapped up in himself makes a pretty small package." Faith in

It is distributed free to students and the community. The Chronicle is published under the control of the CUSA Media Commission. It is published weekly during the school year, excluding summer breaks and holidays, as a project of the Cal State Development Center.

Contact your school department advisor to find out more about developing an internship experience for yourself.

The Chronicle's Policies

Sorry, contributions from students and faculty are welcome. Copy deadlines are the Wednesday of 12:00 noon, preceding the day of publication.

Letters to the Editor must include the writer's name, address, phone number, and signature. All submitted copy must be typed, double spaced. Editorial or controversial comments are unsigned and may not necessarily represent the opinion of the Cal State Chronicle.
Egg Hunt Contract is Awarded for Bookstore Addition

A $414,800 contract was awarded this week to Oakview Construction on the two-story, 1863-square-foot addition that is expected to begin in about two weeks, said William Shum, facilities planner. Completion is scheduled for early December. A ground-breaking ceremony will be held Friday morning, April 24. The upper floor of the addition will be an extension of the Bookstore and will permit expansion of the services provided to the growing student body. The lower level, set in the downward sloping terrain, will contain five classrooms to be housed by Extended Education. The configuration of the classroom level calls for one major-size classroom, the medium-size and one small, plus restrooms. Two campus projects are expected to go to bid in April. One is the Serrano Village Multipurpose Room, to be built as an addition to the pool area. The 1536-square-foot room will have an adjoining small kitchen. Occupancy of the addition, to cost about $100,000, is set for September. The other is an additional 400-space parking lot, located between Serrano Village and the existing smallest lot at the front entrance to the campus. Working drawings have been completed and approved is waiting from the Chancellor's Office, which administers parking lot construction. The target date for completion also is September.

Hiking Club's nest

With water bottles and a sack lunch in our day pack, the CSUSB Hiking Club set off on a pleasant, sunny afternoon on the Salton Sea with a curiosity about what we would see. The trail started upward to the top of a ridge. Existing stories had us expect a sandy wash but no such thing was encountered. We tracked north and headed up another wash. Gradually the trail grew high and steeper until suddenly forming a switchback to a ledge with palm trees nearby. What an awesome sight!

After following the wash a short distance, we turned north and headed up another wash. Gradually the wash grew high and steeper until suddenly forming a switchback to a ledge with palm trees nearby. What an awesome sight!

Material from student joke-writers wanted

If Walker uses the material, he will pay the writers. A less tangible, but probably more consequential, reward will be that the writers will have established comedy-writing credits with a comedy TV/film personality which can only be of benefit to the students in their efforts to get started in Hollywood.

Campers-Backpackers: In an effort to better serve our customers, the Student's Outdoor Recreation Office moved.

Outdoor recreation office moved

Students' Outdoor Recreation Office has moved. Our new Student Union location is at the service counter just outside the main building. There will be a lot of planning to do, from where to put the stage to security for over 1000 people, so that Walker can make the most of his 12 hours budget. With water bottles and a sack lunch in our day pack, the CSUSB Hiking Club set off on a pleasant, sunny afternoon on the Salton Sea with a curiosity about what we would see. The trail started upward to the top of a ridge. Existing stories had us expect a sandy wash but no such thing was encountered. We tracked north and headed up another wash. If you were not present for this breath-taking hike, and would like to participate in our next jaunt, please come to our next meeting in PL 54 on April 30 at 12:00pm. You might be surprised by how refreshing the out of doors can be!

Photos of historical San Bernardino in Library

Our area received its name on May 10, 1810, when Father Dumett of the Mission San Gabriel selected it as a site for an "assistance," or way station for missionaries. May 10th was the feast day of San Bernardino de Siena, an Italian saint. San Bernardino was incorporated as a town in 1853 and as a city in 1854. If you would like to see San Bernardino as it looked from the mid-1800's through the 1910's, come view the photographs on display on the first floor of the Library.

The 85 photographs provide a glimpse into San Bernardino's past-Third St. in 1882, San Bernardino High School in 1892, the Telephone Office in 1900, the Orange Show in 1911, the first Hose Cart of the Fire Department in 1890, the Santa Fe Depot in 1897 and 1910... The photographs are part of the Library's collection of local history materials. They were purchased from Steel's Photo Service, a local business which has served San Bernardino nearly this entire century. The captions identifying the photographs were provided by Steel's and help to further document San Bernardino's history. The photographs will be on display the month of April.

Hispanic Scholarship awards banquet to be on campus

A Hispanic scholarship awards banquet will be held Saturday, April 25th at CSUSB. Three scholarships will be awarded during the dinner/dance benefit hosted by the Hispanic Faculty and Staff Association at Cal State. Recipients will be chosen based on the students' economic need, grade point average, and interest in the Hispanic culture, heritage or community. Two additional scholarships will be awarded by the Hispanic student organization, MECHA, and a memorial award will be made by the Friends of David Montano. The keynote speaker will be Dr. Manuel Riveras, president of San Bernardino Valley College. Held in the university's Upper Commons, the program will begin at 6:30pm, with no host cocktails. Dinner will be served at 7:30pm.

Beatles' nostalgia band to perform

The Beatles' nostalgic band to perform at CSUSB. Their playlist consists of over 40 songs spanning all aspects of the Beatles' career. A "large-scale concert has never been held at Cal-State. There is a lot of planning to do, from where to put the stage to security for over 1000 people," Brian says. Ticket prices will be reasonable, with $30.00 admission for students and $80.00 admission for the general public. Ticket information can be obtained at the A.S. office in the Student Union, extension 7494 or through A.S. Activities, extension 7498. Wherever more information is available, this will be an exciting event for the continued expansion of student activities here at Cal State.
Delta Sig Charters

On March 20th, 1987, the San Bernardino Colony of the Delta Sigma Phi Fraternity was honored with a Charter Ceremony at the Red Lion Inn in Ontario. The Ceremony included a buffet, dinner, speeches by various fraternity and campus representatives, the Charter presentation, and a dance. E. Allen James, the Executive Director of the national Fraternity, presented President Dan Healy with the Charter document. The Charter contains the names of the founding members of the fraternity, location and home campus, and the date which the fraternity was recognized by the National Organization.

Peter Wilson, Dean of Students, spoke on Brotherhood, Fraternity values, and reminded the Fraternity that "Their journey is just beginning."

Following Mr. Wilson's speech, the Fraternity presented a slide show depicting the struggles and achievements of the Fraternity prior to their Charter.

Derby Days promises to be exciting week

On the dates of April 14th through the 17th, you'll be witnessing some very strange events going on around campus. Don't worry, the world didn't go crazy while you were sleeping—it's just SIGMA CHI OMICRON DERBY DAYS in full swing. It's Derby Days all right, that magical time of year when the Sigma Chi Omicron Fraternity is overwhelmed by the spirit of fellowship and the joys of giving to those less fortunate than ourselves. The revenue derived from this non-stop period of events will go to local charities, but why not have fun at the same time? The strange, yet fun-filled activities will range from athletic tournaments to the featured Air Band Competition on Wednesday, April 15th at 7:00 in the Theater Arts Amphitheater.

Most of the scheduled events below will take place on the hill right in front of Pfau Library for all to enjoy. All events are open to the public, which means that you don't have to belong to fraternity or sorority to have fun. While being part of this select audience, feel free to partake of readily available refreshment stands thanks to the cooperation of Coca-Cola and Domino's Pizza who will be selling pizza by the slice for $1.00.

The grand finale for this celebrated charity fundraiser will come in the form of a Hawaiian Luau Dance from 8pm to 1am on Friday, April 17th in the Upper Commons. Show your spirit by attending dressed in your favorite Hawaiian outfit and pass through the doors for only $2.00 or pay $5.00 if you lack such attire. To the first 100 persons in attendance, your reward shall be a lei, free on us.

The following itinerary of events are planned:

APRIL 15
10:00am Pledge T.P. (front of library)
11:30 a.m. Eating Contest (front of library)
1:00pm Egg Joust (front of library)
2:00 Tug-of-War (front of library)
7:00pm AIR BAND COMPETITION (Theater Arts Amphitheater)

APRIL 16
5:00pm Volleyball Tournament (Ridgegline Park, at College and University)

APRIL 17
10:00am Obstacle Course Relay (front of library)
12:00 noon Closing Ceremony (front of library)
8:00-1:00am Hawaiian Luau Dance (Upper Commons)

Solo

ARTIST: DON DIXON

If one were asked, “What is the largest common factor shared by such bands as R.E.M., Grandson’s ‘Diary, The Smithereens, Beast Of Bourbon and Wednesday Week?” the answer would have to be Don Dixon. These are only a few of the many bands that have experienced the magic touch of Dixon’s producing talents which have then contagious effect of creating college radio chart-toppers and club headliners. Yet, there is another side to Dixon that has been recently rediscovered, that of a singer, songwriter and musician.

Though Most of the Girls Like to Dance But Only Some of the Boys Do is technically Dixon’s debut solo album, the South Carolina native has long been a part of that region’s rock scene as a musician. As a bass player and vocalist, Dixon was part of group called Arrogance for over ten years, with the band releasing various regional recordings and making a career out of opening up for Dick Mab and Black Sabbath. However, Dixon’s time was not spent solely as a musician but also working during his time with Arrogance. Dixon acquired the skills in music, knowledge and experience to become one of today’s most sought after producers. Since his first big break co-producing an album by R.E.M., his reputation as a producer of college and commercial radio alike, Dixon has contributed much to the success of several other bands. Some of Dixon’s most recent endeavors were The Smithereens’ Wednesday Week and his own debut album which should establish him as a solo artist in the marketplace he helped to create.

Art of the Dance

The public is invited to hear the free advice of the well-known motivational books, John Molloy April 16 at California State University’s Student Union multipurpose Room.

Molloy’s clients emanate from more than half the Fortune 500 corporations in the country. His books, which also include “Live for Success,” have sold over 2.5 million copies and are considered by some to be reference manuals for the upwardly mobile corporate executive.

Molloy has been researching the psychological impact of clothing and other non-verbal behavior of people for more than 20 years. In 1990, while participating in a government-funded research project, Molloy’s tests indicated that a teacher’s clothing directly affected the instructor’s authority and credibility in the classroom.

His findings drew national attention when Time magazine dubbed him “America’s first waradrobe engineer” in the early 1970s. Since then he has appeared regularly on talk shows and the lecture circuit. He continues to write as a contributing editor for Success Magazine and has been a nationally-syndicated columnist for the Los Angeles Times.

Molloy’s appearance at Cal State, San Bernardino is sponsored by the Student Union’s Special Events Committee. More information is available through the Student Life Office at (714) 887-7407.

Dr. Elaine Lomax, April 16

The sixth annual SFCA Distinguished Lecture in Nursing will feature Dr. Elaine Lomax, professor of nutrition education and director of research and service in nursing education at Teachers College, Columbia University. A reception at 4:15 p.m. in the Creative Arts Building will precede the 7 p.m. lecture on “The Power of Health Relationships in Nursing.” Registration fee is $5. Two-thirds of the extension credit is available for an additional $10.50. The author of several books, Dr. Lomax is one of very few nurses who have spent more than $2 million in research grants and is a management consultant in nursing.

Dr. Herman Belz, April 16

Another in the bicentennial series sponsored by the Department of Political Science will be Dr. Herman Belz, professor of history at the University of Maryland, who will discuss “Constitutionalism and the American Founding” at 8 p.m. in Rooms A-B of the Student Union.

Dr. Bruce Cooperstein, April 17

Dr. Bruce Cooperstein, associate professor of history at UC Santa Cruz, will give an overview of some modern problems in algebra and combinatorics for an undergraduate-level audience on April 17 in BL 129. Dr. Cooperstein is planning a trip to the Soviet Union soon to consult with mathematicians there.

Dr. Nancy Rose, April 17

Dr. Nancy Rose, assistant professor of economics here, will speak on “Economic Situation of Women in the 1980s” at noon in the Paragone Room. Commons. Mrs. Ross, placement advisor in the Career Planning and Placement Center, will speak briefly on the economic situation of recent Cal State graduates, when funds they earn and when little information is available on salaries.

Fox Succeeds in Success

by John Purcell

Michael J. Fox has succeeded again. His latest film, The Secret of My Success, is the latest in what promises to be a long string of fine films.

In Success, Fox plays Brantly Foster who leaves his family's small farm in Kansas and heads to New York City in search of a job as a top executive armed only with a collie and a round trip ticket home.

But Brantly Foster wants more than an office with a view of the New York Skyline. He tells his mother as he leaves, "I want to have a meaningful relationship with a beautiful woman."

The beautiful woman is Christie Wills played more than adequately by Helen Slater. Fox sees her just after being hired at the corporation that his distant uncle is president of.

The match seems obvious except for one problem. Foster has been given a job distributing interoffice mail. He is told he must not fraternize with "the suits."

Well, Brantly Foster is not one to worry about dumb traditions. "I'm a human being, he's a human being," he says. "Therefore I can talk to him."

Fox, who stars in NBC's Family Ties, does an excellent job in the film. He is funny and able to show real emotion in scenes that for the Secret of My Success runs true to a proven formula. Put Michael J. Fox in a movie that has a good script and a decent cast and the end result is always a good film.

VOTE ON APRIL 21-22, 1987
by Sonnie Bell

Hi and welcome to Spring Quarter! Now that finals are comfortably in the past and future, here is a test to keep you in shape. What? You say I never gave a warning that you would be tested on the material presented in the Health Corner columns this year? Well, that's true. But isn't life full of little shocks! And just as the purpose of your final exams is geared to assist you in your long process more than it is to satisfy the requirements of your instructor...those tests are to help me. I need your answers! Go ahead and check them against the key...but don't change any answers. This is to test portion of this paper and drop it by the Student Health Center. I have a mailbox there just ask anyone to deposit your tests. I'm going to use your responses to help me formulate my column for the next eight weeks. Why am I doing all this? It has been the goal of the Student Health Center to give you information on important health matters through this column. Those in the Health Corner are trying hard to increase your knowledge of prevention and of early treatment of material that has been presented during the last two quarters that has been geared to represent current scientific theory along with a caring, personal viewpoint that reflects the belief that good health promotes balance to everything that we humans do. So here is a variety of some of the subjects covered in previous Health Corner columns. I've finished, complete the question check your answers against the key...and deposit them by the Health Center soon as possible. Your responses will represent a lot of people who were wondering. This is why I need your answers!

1. Sexual assault is frequently a premeditated crime that is date rape. Forceful sex involves the two people who know, or were forced to have consensual relations against their will. One person is saying no, but not saying "no" or saying "yes". The progress of sexual encounters. College campuses are a frequent locations of date rape. Aspects of our culture especially the media have contributed to feelings among people that they must perform in a predictable style of aggression or non-aggression. While emotional intimacy is what most people are seeking, they often confuse this with sexual intimacy, sexual intimacy frequently has a reverse effect on the desired emotional intimacy.

2. Alcohol dependence is a hard to define term since usage varies so much between simple social enjoyment to absolute reliance upon it for social purposes. Many people who abuse alcohol are not in fact alcoholics. Because people are not commonly known problem with alcoholism is that of generational alcohol dependence or the tendency of alcoholics to recur in succeeding generations. Up to 90% of the children of alcoholics become alcoholics themselves. Alcohol use in families is also strongly related to adolescent suicides and disabilities to function. While emotional far as decision making and ability to express feelings. A support group for children is available on campus through the Counseling Center (877-7437).

3. Much is being said about AIDS currently, but it is probably not enough to stop the tide of an epidemic that is rapidly gaining public health authorities, has the potential of infecting and killing every American by the end of the next century. Recent reports indicate that incubation periods for Acquired Immunodeficiency Syndrome may be as long as 15 years. Information on AIDS is surfacing every hour. Unfortunate press increases the popular misconception that AIDS is only a gay disease. There are many different ways that AIDS is being transmitted. The infected host is the most frequent mode of spreading the disease, followed by drug abuse that only pulls you down. If you have it. You can probably control it. The best thing to if you think you have AIDS is to have a thorough medical exam. The infected host...that friend who won't stay home when he's sick. 2) The virus or agent and 3) A susceptible recipient, hopefully not you. As I write, I sit at my keyboard with a shot in the end. A friend of the family came to visit the other day and didn't inform anyone that he was sick until it was too late. I sit at my keyboard with a shot in the end. A friend of the family came to visit this week and didn't inform anyone that he was sick until it was too late. Things are sure nice in Japan where people with colds or the flu wear paper face masks when they are near others. Although it is overcrowded there, you hardly ever see a red nose or hear a cough. If you had the cold you would promontorily call in sick. It is being studied in relation to cancer prevention. It reduces stress. It helps people quit smoking. It prevents heart and blood vessel disease. It helps diabetes metabolism balance. Best of all, it helps you feel good about yourself. Try it.

4. In the spirit of maintaining control over their own bodies, women of college age should have regular gynecological examinations. Too frequently the patient cannot believe the physical and emotional effects of alcohol misuse are quite well known; however, one less commonly known problem with alcoholism is that of generational alcohol dependence or the tendency of alcoholics to recur in succeeding generations. Up to 90% of the children of alcoholics become alcoholics themselves. Alcohol use in families is also strongly related to adolescent suicides and disabilities to function. While emotional far as decision making and ability to express feelings. A support group for children is available on campus through the Counseling Center (877-7437).

5. Excessive body fat causes anxiety. Anxiety leads to accumulation of excessive body weight through overeating. That's depressing! All factual information in the world about the negative health effects of obesity is being studied in relation to cancer prevention. It reduces stress. It helps people quit smoking. It prevents heart and blood vessel disease. It helps diabetes metabolism balance. Best of all, it helps you feel good about yourself. Try it.

6. Hypertension is not a reaction to final exams. It simply means a blood pressure above normal; generally this means that the arteries may transmit the blood with greater force. Blood pressure is being studied in relation to cancer prevention. It reduces stress. It helps people quit smoking. It prevents heart and blood vessel disease. It helps diabetes metabolism balance. Best of all, it helps you feel good about yourself. Try it.

7. The three essentials in transmission of colds and flu are:

   1) The infected host...that friend who won't stay home when he's sick. 2) The virus or agent and 3) A susceptible recipient, hopefully not you. As I write, I sit at my keyboard with a shot in the end. A friend of the family came to visit this week and didn't inform anyone that he was sick until it was too late. Things are sure nice in Japan where people with colds or the flu wear paper face masks when they are near others. Although it is overcrowded there, you hardly ever see a red nose or hear a cough. If you had the cold you would promontorily call in sick. It is being studied in relation to cancer prevention. It reduces stress. It helps people quit smoking. It prevents heart and blood vessel disease. It helps diabetes metabolism balance. Best of all, it helps you feel good about yourself. Try it.

8. How would you go about submitting a concern to SHAC?

9. Name two lifestyle behaviors that may contribute to hypertension:

10. Name two practices to help prevent the spread of colds and flu:

11. What is the commonest age group affected by PMS?

12. How does exercise help control weight?

13. State the days and hours the Student Health Center is open:

14. Did you go to the Health Fair Expo on April 5th?

15. How do you think smoking in the hallways of CSUSB? (Yes) (No)

16. Please suggest any other topic that you would like to see addressed in the Health Corner.

Writers

We are running out of stuff to print. Do you have anything you'd like to see in the paper? If so, drop it off at the Chronicles office located in the Student Union. We accept poetry and short stories.

They

Each reached out for the other's hand at the same instant and when their hands met, each pulled instinctively away, then quickly rejoined in a tight clasp. Each slowly turned and looked into each other's eyes. The two remaining hands clasped as tightly, tighter than the other two. They moved closer and met in an embrace. They closed their eyes to better see a happiness which had been all but forgotten since their separation.

When they opened their eyes, the sky had darkened so there was just light enough for them to see the outlines of each other's faces. Yet no amount of darkness could extinguish the glow that each had always seen in the other, but which had never been so bright or so beautiful as it was now.

There were so many things that they had for the last forever found themselves wishing they had said to each other when they had the chance. There were so many things they had cursed themselves for having kept inside. Now it all came out and then each was aware that they had always known the other's feelings, had always known the other's heart, had always loved the other. Each knew and laughed about the misunderstandings and misinterpretations that had kept them from realizing this happiness sooner.

And as the sun behind them, its brilliant rays became an immense source of light that, for all its majesty, was overshadowed by the resplendent glow that shone in the faces of the two lovers. They were happy together and everything was as it always should have been. And, though they begrudged the wasted time that their separation had caused, they thought of it as a small price to pay for the infinite possibilities that their lives together held. They stood together, unmoving, enraptured in the knowledge that at last had the one thing they had searched endlessly for, the one thing they had always wanted and needed more than anything else in the world—each other.

Remember

Today at Midnight

Is last day to file your taxes
Hello CSUSB Students, my name is Rob Davis and I am running for the office of A.S. President. I am a Junior majoring in Political Science with a History minor. I transferred from Mt. San Jacinto College last year.

Our university enjoys a Student Government that is capable of being a real force for the people of this campus and community. My goals as your president would be centered around opportunity for students. I believe that every student has the right to voice his or her views with the knowledge that those views will not go unneeded. In a thriving and growing university such as ours, it is vital to have the participation of the whole student body, and not to let the school be run by an elite clique. This year our school experienced a record growth, and next year's increase is expected to be even bigger. We are at the forefront of this growth and the trends that we set in the next few years will determine our school's future, and the students standing in it. It is time now to establish a Government of the students, all the students, and I will do just that. Thank you.

Hi, my name is Steve Hekman. I am running for the office of A.S. President. I am currently A.S. Treasurer. My qualifications for this position include an extensive study of history and political science which provides me with an understanding of the governmental processes. I was elected as a representative of vocational technology on the Board of Directors at the Antelope Valley Junior College. My skills include organizing activities for a special olympics swim team which provided me with an understanding of leadership. During the spring quarter of 1986, I participated in CSUSB's attendance in the model United Nations program as Vice Ambassador which helped me to understand the many cultural and ideological diversifications that exist in our world today. My goal once in office is to create new student services and activities that will more adequately serve the needs of the expanding student population.

Our campus is the fastest growing campus in the CSU System. Along with that growth comes responsibility—making sure that A.S. is meeting the needs of the students and protecting their interests. While in office as Vice President I have worked toward ensuring those goals for our campus. A.S. this year has purchased a copier to enable the students to make copies for five cents instead of 10 cents. I think this next year will have great potential for CSUSB students. The Student Union is expanding and growing and I will continue to fight for the students interest on campus. I hope that you will vote for me to build a stronger and even more effective Associated Students. Thanks for your support. Steve Hekman A.S. VP.

My name is Louis Dudash IV, and I'm running for the office of Associated Students Treasurer. Former International Water Polo Player, and presently Committee Chairperson for Clubs Chairperson. If you see me on campus, don't be afraid to talk to me.

As you already know I am seeking the position of A.S. Treasurer. My class standing is a Junior and my major is Accounting with a minor on Language. Like many other Juniors I know exactly what my future plans and goals are I have held many important positions on and off campus, I am very much involved with the Community and with the Campus as well.

I am a Greek and proud to be a member of the Delta Sigma Phi Fraternity. I consider myself a leader and like many other leaders, I need your support. I believe that Cal State needs a lot of improvements regarding the way A.S. handles Students' fees which is your money. I have no intentions of cutting back funds but instead to increase funding for many Clubs and Organizations which will help Cal State Students. My other goals are to improve and bring many more Social activities to campus.

As a candidate I will not make any promises but one thing I guarantee is that I will do my very best to better serve you and Cal State. If you see me on Campus do
Hello! My name is Curtis Bayer and I am campaigning to become the Vice-President of Associated Students.

I have been at Cal State for three years now and I would like to talk to you first about what I have seen. When I first started Cal State, enrollment was about 4500 students. Now, we have about 7500 people on campus. I've watched a new building go up, and heard rumors of others to be built.

I've seen our school develop a good sports program for student athletes. I've seen fraternities and sororities come on this campus. I've seen quite a bit of growth.

I'd like to see our Associated Students grow. It must grow and develop with our students, recognizing and then acting upon student's needs. A.S. must be on the forefront of campus involvement to ensure the best service to students. In the past, I don't believe A.S. has been looked upon as a leadership challenge for our students. Now is the time to change that thinking.

I would consider it a privilege to represent our student population as Vice-President of Associated Students. I've been involved in NCAA sports, the founding of Sigma Chi Omicron, Young Republicans and the Associated Students as Activities Director. I am junior marketing major and have also been highlighted in CSUSB's Campus Candi, a program recognizing leaders. Off campus, I've taught water safety and CPR.

I would like to be allowed the opportunity to push A.S. into new areas of operation. Please vote for Curtis Bayer for A.S. Vice-President. If you have any questions, call me-886-5503.

Hello! My name is Kaycee Crouse, and I'm running for the office of A.S. Vice President. During High School, I was Vice President of the "Z" club, a woman's organization who's main purpose is to help charitable organizations. I was also a four year member of California Scholarship Federation. My last year of High School, I also worked for the School District in the Superintendent/Public Relations Office. I graduated with honors and I received recognition from the U.S. Presidential Office.

Currently, I am a sophomore majoring in Accounting. My on campus activities include membership of Cal State's Organization for College Women, treasurer of Alpha Delta Pi, and director of publicity for the Accounting Association. I also work for the Faculty Senate.

As a candidate for the office of Vice President, one of my main goals is to utilize the student fees in (Please See Below Left)

A.S. B.O.D.

Hi, I am Frank Novek. I'm a sophomore, majoring in Biology, and I'm running for re-election as A.S. Treasurer. I've always been strongly involved in A.S. As a freshman, I worked as student assistant and bookkeeper for last year's treasurer, and then became A.S. Activities Director. Last spring I was voted in as A.S. Treasurer, and have since worked hard to keep your student fees well-managed.

As Treasurer, I've sat on the A.S. Board of Directors, the Media Commission, and am chair of the Finance Board. I've been part of a special committee which is rearranging the Activities and Special Events Committees to allow for better events and better accessibility for club events. I've helped develop A.S.'s First Reserve Policy, set up the new A.S. investment committee, and have recently been to the state capital to help lobby for Child Care and other student concerns.

In the next year, I'd like to get A.S. incorporated, set up A.S.'s bookkeeping on its new computer, help implement the new Activities Programming Board, and keep your funds in order as A.S. keeps expanding.

I am very grateful to you for giving me the chance to be your A.S. Treasurer this year, and I promise to work even harder if re-elected. I strongly encourage you to vote in the A.S. elections on April 21 & 22, and would appreciate your vote.

-Frank Novek, A.S. Treasurer

Rick Pickering is a candidate for Representative of School of Education. It is my hope to continue serving and representing the interest of Cal State students for the coming school year.

-Representative, School of Education (Fall 1986-CSUSB)

Hi, I am Brian Fortner. I am running for the office of Business Administration Representative for A.S. Since no one is running against me, I'll just say I'm here to represent you, so if you have any questions on issues, please see me in the A.S. office.

Hi, I am Janine Brooks and I am running in the school of Dual Majors for the A.S. Board of Directors. I would like to serve you so please vote for me.

-Sincerely, Janine Brooks

Hi, I am Tina Mattison, running for A.S. B.O.D. Representative, and Janine Brooks were unavailable for photos.

Coach: Chuck Deagle
doubleheader

WINNERS INCLUDE 49 K'S

Dean Tanner is the tallest of the remaining 12 games. The Lady's on-base percentage of .550. Close behind Hilbom is Anne Caldwell. The 5-foot-6 Caldwell is the number 1 Cal State Men's player. Streck’s current record is 1-0.

Coach Ducey gets ready to smile big

With winning records of 9-3 and 8-3 for the CSUSB Women's and Men's Tennis teams, respectively, coach Jim Ducey has to realize that talent on the course.

Golfers named as 1 of 11 best teams in the nation

The NCAA Division III national ranking committee for golf is recognizing Cal State, San Bernardino Golf Team. The committee, acting on 12 straight dual and triangular match wins, placed the Cal State Coyotes as one of the 11 best teams in the entire nation as of April 1st. The Coyote's record includes a 1st place and a 2nd place finish among Division III schools in two prestigious So. Cal. tourneys. University of San Diego invitational. The Coyote's grab 1st place, defeating the nation's number 1 team- UC, San Diego.

Coyotes current record is 12-3. The CSUSB golfers have been playing so well that the first ever hole-in-one by a Coyote golfer in tournament play was recorded Friday, March 27. The CSUSB first came on the 9th hole (par 3) at Mountain Meadows against Pomona-Pitzer. CSUSB's Chip Haugen (Redlands/Redlands HS), a 5-foot-7 junior, nailed the ball 140 yards from the hole.

However, of the two chips on the squad, Chip Haugen was not the day's medalist. Chip Nelson (Encino/San Diego HS) shot a 71. Nelson also holds the Coyote record for best score, a 69. Nelson has accomplished the feat three times this season. Once the Coyotes home course, Arrowhead CC, at the Redlands CC, and at the Cottonwood CC in San Diego. Last season's success, in which the number 1 Coyote golfer, Gary Oschale, qualified and finished 26th in the national tournament is being enjoyed on a larger scale this year. Coyote Golf Coach Greg Price knew form the first day of practice that he had amassed some real golfing talent. Price's job was to realize that talent on the course. The 12 straight Coyote wins serve Coach Price's 2nd year program well. The May 1st updated Division III Golf rankings should move the Coyotes well into the nations top 10.
Walkers can still participate in WalkAmerica

Student volunteers are getting their run tan lotion and walking shoes ready for the March of Dimes' WalkAmerica which will be held on Saturday, April 25. This event raises money to help fight birth defects with the participation of 1.5 million walkers. Local goals, according to Ben Cisneros, Steering Committee Chairman for San Bernardino, are to raise $115,000 and have 1,400 walkers.

The walk, which will start and finish at the Uptown Family Branch YMCA, 808 East 21st Street, will begin at 7:00 am with registration of the participants. According to Cisneros, walkers can catch a ride to the finish line on a "Tired Tootsie Trolley" if they become too tired to complete the 32-kilometer walk. In addition to helping raise funds to combat birth defects, volunteers should have fun as they encourage each other on their way to the finish line.

Volunteers are welcome to join the walk by picking up a sponsor sheet at K-Mart, 7-Eleven, Chief Auto Parts or Miller's Outpost stores. For information, call Carol Olson at the March of Dimes, 889-0803 or 924-1203.

Along the route, walkers will be provided with refreshments at several checkpoints. The walk, which will start and finish at the Uptown Family Branch YMCA, 808 East 21st Street, will begin at 7:00 am with registration of the participants.

Undergrad/Graduate Award continued from front page

Selection Process
1. Nomination forms will be available in the office of the School Deans, A.S. Office, Student Union front desk, and Dean of Students Office. The nomination period will close April 30th, annually.
2. Selection of the recipient of the award will be by a committee comprised of the Dean of Students (chair), the Executive Dean, the Dean of Undergraduate Studies, two representatives of each school selected by the Executive Committee, Faculty Senate. Not eligible for committee membership are students who have been nominated for the award or faculty members who have provided endorsements for nominees.

Award Presentation
The presentation of the award will take place during the June Commencement ceremonies.

Selection Criteria
Eligibility will be based on the following:
1. Graduate standing with all degree requirements completed at the time of Commencement.
2. Demonstrated superior academic/scholastic performance as a graduate student at CSUSB.
3. Demonstrated service and leadership in campus and/or community organizations and activities and in professional development as a graduate student at CSUSB.
4. Submission of a complete resume/curriculum vita.
5. Submission of a personal statement by the nominee containing information which he/she feels would help the selection committee make its decision.

Application Process
1. Self-nomination or nomination by a member of the faculty, staff or fellow graduate student at CSUSB
2. Submission of three (3) confidential letters of reference supporting the nominee's candidacy. One of these letters must come from the nominee's major advisor or from the chair of the nominee's final project committee.
3. Submission of a complete resume/curriculum vita.

Stanley Ranch Camp

How to study for a breast exam:

1. If you're a woman, you could get breast cancer. But when detected at its earliest stage, breast cancer is highly curable. So examine your breasts once a month during the week following your period.
2. The object is to familiarize yourself with your breasts. If you notice any change, such as a lump, hard knot, or thickening, call your doctor. You breast changes are not breast cancer. But only your doctor can tell for sure.
   a. To examine your right breast, put a pillow or folded towel under your right shoulder.
   b. Place your right hand behind your head. With your left hand, fingers flat, start at the outermost top of your breast and press gently in a clockwise circular motion around your breast. Gradually move inward until you have examined all of your breast tissue. As you examine, notice the differences between your breast tissue. Gently squeeze your nipple between your thumb and forefinger. Any bloody discharge should be reported to your doctor immediately. Repeat the process on your left breast using your right hand.
   a. Inspect your breasts with your arms relaxed at your sides. Raise your arms and feel for any lump or thickening. Look for any change in the contour of each breast, including swelling, skin dimpling, or changes in the nipple. Then rest your palms on your hips and press down firmly.
   b. Keep testing yourself. There are two other tests you should know about:
      1. The clinical exam. It's a physical breast exam performed by a doctor. When you turn 30 you should have clinical breast exams every three years. The second test is called mammography. It's a low-dose x-ray that can find a lump the size of a pinpoint. It's simple and safe. When you turn 35 ask your doctor about mammography.
5. For more information, call your local American Cancer Society office. Because if you don't take care of your breasts, who will?

Woodcraft Ranger's
Stanley Ranch Camp offers Summer jobs

Summit Job opportunities that combine earning with learning are available at the Woodcraft Ranger's Stanley Ranch Camp. Accredited by the American Camping Association, Stanley Ranch Camp is located in Saugus, California, 15 minutes from Magic Mountain.

Stanley Ranch Camp needs counselors, lifeguards, program specialists, kitchen staff and maintenance help. One full week of high quality training is provided during the first week from consultants who are professionals in social work, recreation and safety.

A staff member can earn an American Red Cross First Aid and Lifesaving certificate. Plus, they will study outdoor living skills, learn to operate a ropes course, astronomy trail and orienteering (map/compass) trail. A social worker will teach group work techniques, child development and initiative games. A staff member will be better able to compete for jobs after the summer because they can demonstrate the have experience in the workplace and are safety conscious.

Of course, you can still have fun and earn money so a job at camp provides lots of benefits. And on your day off each week the beach, mountains, and attractions are less than an hour away.

To apply for a job, contact the Woodcraft Rangers at (213) 749-3031 Monday to Friday, 9:00 to 4:30pm.
Task Force Works to Balance G.E. Program

by Yvette Valley

A Faculty Senate ad hoc task force that was formed during the 1986 Fall Quarter is reviewing and revising the General Education (G.E.) program at Cal State. This represents the third G.E. program review/revision program which is a complex and potentially heated issue.

State regulations require each Cal State campus to provide "regular periodic reviews of general education objectives and procedures." Additionally, "the college is responding to criticism in the general education program..." explains Dr. Elliott Barkan, chair of the task force.

This criticism came, in part, from representatives of the two-person external review team that evaluated the G.E. program at CSUSB last April. Each team member noted the relative lack of specific philosophy and cohesion in the general education program as identified in other areas that are out of compliance or spirit with the state requirements. It seems that only the specific purpose or theme is that which is explained in the college bulletin.

The purpose of general education is to "provide students with a number of possible areas of specialization, than it is too make sure that all students will be able to write, speak, and know something about themselves and the world in which they live."

While each state school is entitled to design its own general education package, the school must still operate under broad agreements that are set under CSU's General Education Breadth Requirements and Executive Order 338. This order suggests that the campus plan and establish its G.E. program in such a way that "the objectives are seen as interrelated elements, not as isolated fragments."

It's up to us to define the kinds of courses (which adhere to the state requirements) and that we have some common theme which will hold the package together," Barkan explained.

Generating a common theme is one of the tasks of the task force. With the impending 5/4 unit conversion, the committee must determine its effect on the G.E. program. At the same time, the committee will be addressing portions of the program that were noted in the external review report. This includes the required courses and the implications of the state requirements.

Some noted areas of concern in Cal State's G.E. program were: students applying for financial aid; finance, a personal finance course, Dr. Robert Detweiler, vice chancellor of Academic Affairs, explained that G.E. program traditionally has been reserved for social and natural sciences. Professional schools have not normally been under the G.E. umbrella.

Critical Thinking/Oral Communication. The college offers two courses under the G.E. package that are designed to offer "critical thinking" or "oral communication." This is typical of many college programs. Barkan added that some of these state regulations specify that both areas are to be covered under the G.E. program...

"Women and Cultural Minorities. This element is supposed to be covered under the G.E. package either through specific courses or integration into current courses."

The purpose of the theme and program guidelines, G.E. packages from the other 18 campuses will be examined along with earlier CSU reports and the report from the Carnegie three-year study of numerous private and public institutions.

Barkan noted that, in the guideline proposal, some courses continued p.18

Credit Cards Are Made Easy to Obtain

by Christine Stanfill

Barbara Martinez acquired her first credit card at age 19, now five years later she has 12 cards, including two VISA.

Martinez, a junior business major at Cal State San Bernardino, is typical of many college students who have become the new targets for credit card companies.

Because these companies know that a student's education is a good indication of what his or her income will be in a few years, the companies use information as an indicator for soliciting customers. It is common practice for the companies to distribute applications to continuing and graduating students.

A 1981 report published by the Los Angeles Times, 74.6 percent of Southern California college students own at least one credit card.

Early marketing practices made it possible for people of middle to upper class to obtain a credit card with little or no effort.

As early as 1970 college students were obtaining credit cards, according to a University of Michigan study on credit card use in the nation. Companies such as Citibank and American Express strategical- ly place applications on campuses for credit card packages.

"We aim our campaign at college students because they have a promising future," said Carole Baker, a Citibank representative.

She also said that Citibank asks for a copy of either a student ID with a current enrollment sticker or a paid tuition bill for the current semester with a completed application.

In a brochure distributed by Citibank, it suggests that one of their cards be used towards buying course materials. Citibank accepts both VISA and MasterCard for payment of tuition.

American Express offers a $15 student discount on the annual membership fee.

The American Express company designed the card so students could live "responsibly within their own means." The card also has a $2,000 limit, according to Ms. Smith.

"Too many people get in too deep," Smith said.

College student Martinez said the cards are too convenient.

"Buy more things with credit because all my cash is tied up in payments," she said. "It's a vicious cycle," she said.

Ms. Martinez admitted that she recently paid off some bills and then went out and charged something else on credit.

"There are both good and bad reasons to use credit cards."

Ms. Baker pointed out that with a credit card you have the item wanted and the cash still in the pocketbook.

On the other hand, Ms. Smith said that they are bad because they tend to make people buy more than necessary.

Ms. Baker said that there were no figures available to determine whether students are more or less remedial course.

"They are a good risk," she said.

Are Cable Companies Controlling Our TVs?

by Matt Pollack

Technological advancement in television broadcasting during the past two decades has not only turned the television set into a source of all types of information, but also into another outlet for big business to make a few dollars.

National "seen-on-cable-only" (can't be received on antennas) programming is now available. In Los Angeles, ABC and NBC charge $5 to $10 per month, while Fox, HBO and other stations charge $15 or more per month for the privilege of watching their selection of television shows only via cable.

The monopolization of television by cable operators (and cable companies) didn't leak into full gear, though, until the war against satellite receiver owners heated up in 1985.

Satellite receivers had been in sparse in population and distribution until the early 1980s.

Commentary

This was due to the high price. But when companies found that they could purchase a home satellite system for $3,000 down to 1,500 a month, they offered "seen-on-cable-only" programming (and much more) that were paying cable companies for, and the satellite industry skyrocketed.

Consumers thought that a one-time purchase, they would have the world at their fingertips, literally. Satellite television offered over 200 channels. Movies, sports, superstations and major networks (ABC, CBS, NBC) and specialty type channels in all four time zones were available—unattended and undisturbed.

This was until HBO started testing the scrambling of signals in 1985. HBO stated that they were doing this to punish illegal receivers of their signals (hotels, and small cable companies) that did not pay for the service. The following year, HBO started scrambling full-time and soon many other companies followed.

HBO did say, however, that continued p.18

Task Force cont. from p.16

Barkan mentioned that the modifications in the G.E. may or may not be in place, and some courses may be added to the G.E. package. The committee has planned to submit its recommendations to the University Curriculum Committee and the Faculty Senate in April for approval.

If approved, all campus schools will be notified of the guidelines and that all G.E. courses will be reviewed in the Fall Quarter of 1987. At that time, the committee members will begin a course by course evaluation of each G.E. option.

A portion of the course evaluations will be comprised of standardized student tests that will evaluate how much an individual knows in six specific areas and the quality of student knowledge. 250 students will be randomly selected to evaluate how much an individual knows in six specific areas and the quality of student knowledge. 250 students will be randomly selected to evaluate how much an individual knows in six specific areas and the quality of student knowledge. 250 students will be randomly selected to evaluate how much an individual knows in six specific areas and the quality of student knowledge.

The task force has already faced complaints for its proposal to include a minority/gender class into the G.E. requirements. The controversy has lead to a heated exchange of controversial letters exchange of public letters between Barkan and a few students in the school newspaper, The Chronicle. In addition, disagreements may arise between the various departments regarding which courses should be added and which should be deleted. Detweiler explained that each department determines funding. Since it is the number of new faculty in the department, it is "economic self interest (that) creates squabbling."

With the variety of concerns and responsibilities of the task force, there is still a primary objective. Barkan explains that, "The objective is to create a program that is sufficiently flexible enough to undergo changes." Such changes may include shifts in social values and issues or simple changes in faculty. Either way, it is a large task to assume and an even larger one to complete effectively.

Cable cont. from p.16

consumer who wished to subscribe to their service could do so by purchasing a decoding from them for $395 and pay $10 per month for their service. The other companies that scrambled the line of tactics, though the costs varied.

While cable networks such as HBO are scrambling, public domain networks (those which can be received on antenna) want to get into the act as well. CBS has threatened to scramble many times, but their advertisers threatened to remove their ads if they did so. Knowing that advertising pays for most of their operational costs, CBS has backed down each time.

While all the flurry and confusion has been going on, the Federal Communications Commission (FCC) has been sitting quietly. They have stated that they will not get involved in the issue because the industry is too "too new to be understood" and thus, "let the market (cable companies and operators) control itself and we'll see what happens." Meanwhile, the consumers have had their satellite dishes taken over by big business quite like their television sets were years earlier. Those in remote areas of states like Texas, where there are no cable operators and a satellite receiver is a must, are watching helplessly as they are being deprived of reception. Luckily for satellite owners, there are some members in Congress that realize that the issue has gotten a little out-of-hand. These members have proposed bills limiting the amount of money that cable companies can charge consumers.

Though progress is being made, the legislative body of America should solve the problem without input from consumers. In order to stop the cable monopoly of the airwaves of the United States, consumers must write letters to their congressman or senator. Letters must also be sent to the FCC urging them to stop watching the problem grow and take action in regulating the use of the airwaves—that is their job, isn't it?

WHEN IS THE RIGHT TIME TO CALL YOUR PARENTS?

a) When you’re stuck in your room because someone “pennied” your door.

b) When you spent all your money playing video games and you still have to buy books for Developmental Psych.

c) When you just miss hearing their voices and telling them what you’ve been doing.

One thing about parents: they love to hear what you’ve been up to. But you should call them anyway. And when they ask where you were last night, tell them that you always call using AT&T Long Distance Service because of AT&T’s high quality service and exceptional value.

When they ask how your studies are going, remind them that AT&T gives you immediate credit if you dial a wrong number.

And when they ask about your plans for the weekend, note that you can count on AT&T for clear long distance connections.

And when, at last, they praise you for using AT&T, then—and only then—you might want to mention those Psych books.

AT&T
The right choice.
