CSUSB
Colleges nationwide announce tuition hikes

By Jeff Zelenski
Staff Writer

One by one, college administrations are announcing tuition hikes for next school year that, once again, promise to make the price of education rise faster than prices for any other kind of good or service.

While the general inflation rate hovers around 4.5 percent, officials at the universities of Miami, Chicago, Rutgers, Stanford, Central Michigan, Loyola and Duke, among others, announced in February that they were raising tuition by 5.5 percent to 11 percent next year.

Two-year college students might do a little better. Their tuition increased an average of 5 percent, to $845. Private two-year colleges raised their rates by 7 percent for the 1989-90 year.

Community and junior colleges "try real hard to stay at or below the rate of inflation," said Judy Tomczak of the American Association of Community and Junior Colleges. Many students, however, complain the price has gone up too far, too fast.

By the time she graduates, first-ear Wesleyan University student Susan Chun figures she'll be paying 25 percent more than she is now for tuition, room and board, books and personal expenses. Chun now pays about $820,000. If rates continue increasing by 7 percent every year, she will probably need $25,000 for her senior year in 1993.

"That's a hell of a lot of money," Chun said. "An education shouldn't be such a financial burden."

To protest $1,000 tuition hikes for out-of-staters, Arizona State University (ASU) students took over the Student Services building for 55 hours Feb. 21 through Feb. 23. In-state tuition at ASU, the University of Arizona and Northern Arizona University will go up $116.

"We aren't getting our money's worth," said John Kierman of ASU's student government, where in-state students now pay $1,644 and out-of-staters fork over $5,485 annually.

Despite tuition increases, the 45,000-student campus in Tempe suffers from overcrowded classes, underpaid faculty, and too many graduate students teaching, Kierman charges.

"I'm having to take actions that I didn't plan on," added Andy Monzago, a Northern Arizona student whose tuition will increase by $900, or 18.5 percent next year.

The California native said he now has a student loan, a Pell grant and a part-time job. Monzago is in the Marine Corps Reserve, so he is trying to get a GI Bill grant and is applying for "every aid" he can find.

Rape 101.
Sponsored by Greeks Against Rape

If you think rape can’t happen to you, you’re in for a real education. Because statistics show that rape happens more to women in your age group than any other. In fact this year, one of six college women will be the victim of rape or attempted rape. Very often by someone she knows. A fellow student. Even a date.

And that’s a crime. Because anytime a woman is forced to have sex against her will it’s a felony. Rape. It’s a subject no one should take lightly.

**Reserve Officers' Training Corps**

**START YOUR CLIMB TO CAREER SUCCESS THIS SUMMER.**

Apply now for six weeks of Army ROTC leadership training. With pay, without obligation.
You’ll develop the discipline, confidence and decisiveness it takes to succeed in any career. And you’ll qualify to earn Army officer credentials while you’re completing your college studies.
For more information, contact Maj Mike Robel, Student Services 128 or call 887-5545 (collect).

**ARMY ROTC TWO-YEAR PROGRAM**

**The Smarterest College Course You Can Take.**
Dr. Craig Henderson to speak on Gay and Lesbian Rights, Monday

One topic will be the changing values of churches and religions regarding homosexual members and clergy. The question of monogamy and marriage with same sex couples and personal issues regarding family, children, and child care of gay and lesbian individuals or couples will be discussed. Recent court cases concerning the government's position that gay and lesbian personnel demoralize and pose a risk to national security will be covered.

Dr. Henderson will examine the effects of institutional homophobia on society and individuals and what lies on the horizon as we enter the last decade of this century.

Everyone is invited to attend. The presentation will be on Monday, April 9, from 12 to 1 p.m., in the Symcoe Room of the Lower Commons.

For more information, contact Dr. Erik Grub- beman, Women's Studies Director, School of Social and Behavioral Science, FO 253, or ext. 5503.

CSUSB given '2+2+2' grant for minority students to pursue teaching career

A $30,000 grant, awarded through the chancellor's office of the California State University, will finance a minority student's college tuition at CSUSB.

The 2+2+2 San Bernardino Teachers Options Program, which focuses on a student's junior and senior years in high school, offers a two-year junior college and a two-year at a four-year university, is now recruiting minority students from Cajon High School, San Bernardino Valley College and CSUSB.

This is one of the rare times that the community colleges have combined such a program's articulation plans to a four-year institution, a job usually headed up by the community colleges.

"We're looking for students who are interested in becoming teachers, but don't know enough about the teaching profession to solidify their interests," said Dr. Kathryn Reilly, assistant professor of advanced studies at CSUSB.

She co-coordinates the program with the CSUSB College of Education.

Because many minority students are concerned about a community college and then transfer to a four-year university, Diaz said it is critical that they see a clear education path.

Education boards have been concerned that students are not being well-informed early enough in high school to plan a career in teaching, said Diaz.

The program will outline in detail the requirements students can meet through their junior and senior years in high school, course work at a community college or courses at the university level. It will be introduced this summer with a 'Careers in Teaching Education' class.

The course will give students the opportunity to become acquainted with each other, and advisors will conduct career interest inventories as well as group discussions.

Each student will receive $200 to $250 in tuition scholarship money. Counseling support throughout a student's schooling is a major and unusual feature of the program, said administrators.

Delta Sig, Sigma Chi raise funds for athletics

Recently, CSUSB made the decision to move from Division III to Division II. The move requires the school to give scholarships in order to draw competitive athletes, requiring an increased number of funds. To meet these needs, the athletic department received a $500 grant and a $2,500 NACAC grant.

Delta Sig and Sigma Chi have been working with the athletic department to raise money for scholarships and local campus events.

Delta Sig and Sigma Chi hope to raise money for scholarships and local campus events by hosting a basketball game, a benefit concert, and a football game.

Delta Sig and Sigma Chi hope to raise money for scholarships and local campus events by hosting a basketball game, a benefit concert, and a football game.

Students interested in participating in the basketball game should contact the athletic department at 714-245-3207.
WE PRINT OUR RESUME ON EVERY CAN.

If Budweiser is already your regular beer we'd like to say thanks for the business. If it's not, then we'd like to apply for the job.

Of course our resume can only tell you who we are. To discover just how good we taste, we suggest you set up a personal interview.

THIS BUD'S FOR YOU.
COVE provides a safe haven for weary computer users

By Kim Perkins
Staff Writer

Walking through the aisles of books in the library is usually an ordinary, everyday experience in the life of a college student. But for CSUSB students Diana Cordova, Bret Knight, and Ed Thomson it is quite a delightful experience.

Into the library, up the elevator, and through row upon row of deep, dark texts they go. Behind the back side of a monstrous wall of books a warm light glows from a tiny room. Within a few minutes sounds of laughter and mirth drift through the air as these three characters graciously attend to their duties.

The small room, previously known as the COVE (acronym: CO - for Communications Department, VE - for Vocational Education), is now officially known as the COVE (acronym: CO - for Vocationzd Education), which is located in PL 315. The COVE has been hidden from most students, and visitors are very grateful to them.

Their job is to minister to the poor, helpless creatures who try to use these advanced machines. They are often called upon and many students are very grateful to them.

Their jobs include helping users get into the programs they want to use, finding lost files, saving files, printing, as well as running the entire COVE network.

Located in PL 315, the COVE has been hidden from most students, and offers seclusion.

The COVE was originally founded by the Communication Science, Communication, and Vocational Education Departments for teaching journalism, advertising, and desktop publishing. The laboratory is open to communication students and all others during certain hours.

Cordova, Knight, and Thomson are the computer wizards. Their job is to minister to the poor, helpless creatures who try to make use of these advanced machines. They are often called upon and many students are very grateful to them.

Their jobs include helping users get into the programs they want to use, finding lost files, saving files, printing, as well as running the entire COVE network.

Thomson, one could say, is perhaps the captain of the crew and knows more about the ship and its voyager than anyone else. He has worked in the laboratory for over two years and is called upon whenever anything goes wrong with the computers in the COVE or elsewhere on campus.

He is currently a senior and will graduate in June with his Bachelor's Degree in Computer Science. Knight refers to Thomson as “the computer guru of the school – called upon to troubleshoot and consult.”

Knight is also a senior and has worked in the lab since Fall, 1989. He will graduate in June with a degree in Graphic Design.

He states, “Working in the lab is beyond description. It feels like liquid particles of the Big Bang traveling throughout the universe at light speed... besides I like helping the computer dilettantes and making the world a better place.”

The lovely Diana Cordova carries the feminine side to this bewitching little cove. She is presently a junior and working toward a degree in communications.

She has been working with computers for over five years. She plans to work in the COVE until she graduates in the spring of 1991.

She likes working in the COVE because “it is peaceful, organized, it's easy to concentrate and work in, and it's not boring.”

Cordova has arranged computer magazines throughout the room and decorated it with fashion magazines.

The enchanting COVE grows dark and tranquil as the night creeps in, patiently awaiting for those who dare enter.

Located in PL 315, the COVE has been hidden from most students, and offers seclusion.

Students have found the COVE to provide refuge from the flurry of finals.

Help.

You have every right to expect your partner to respect and protect your health. If you're having sex, be sure you're using a latex condom every time. For more information, call the AIDS hotline in Northern California at 1-800-367-2437, or in Southern California at 1-800-912-2437.

Have You Tried AUTOPHERESIS?
You'll be surprised how much you like it!

During your 35 to 60 minute plasma donation you'll be free to read, study or plan that next vacation. The money you save from your donations will help you make your dreams come true. And at the same time, you'll have the satisfaction of knowing your plasma donation can help patients in need and save lives.

As you race to the finish of the school year, be sure to enter our "RACE TO THE FINISH" Sweepstakes, where you could win one of these great prizes:

**GRAND PRIZE—ONE WINNER**
An all-expense-paid trip for two to Paris for the 1990 Tour de France.

**FIRST PRIZE—50 WINNERS**
A Raleigh Assault* or Finesse* All-Terrain Bike.

**SECOND PRIZE—500 WINNERS**
A go-anywhere Fanny Pack.

**THIRD PRIZE—100 WINNERS**
A sports water bottle.

To enter, just race over to the campus contact listed at right and ask to take a free test drive on one of our featured desktop PCs. It just might be the most rewarding test of your college career!

When you rent a home, you have every right to expect your landlord to respect and protect your health.

The continual presence of U.S. Marine Corps and U.S. Air Force recruiters on campus and the continuing existence of the CSUSB Army ROTC program directly violates the CSUSB non-discrimination policy that forbids discrimination on the basis of sexual orientation.

The military policy against recruiting homosexuals is documented in a 1982 Defense Department study that labels homosexuality as "incompatible with military service." It further states that excluding homosexuals from the military would help "maintain discipline, good order and morale...foster mutual trust and confidence among service members,...prevent breaches of security." In addition, the military may discharge homosexuals if they acknowledge a "propensity" to commit homosexual acts.

Several lawsuits challenging this policy have followed, but the Supreme Court, by allowing rulings in lower courts upholding discriminatory procedures to stand and by refusing to hear appeals from homosexuals in the military, has shown repeatedly that it does not consider discrimination based on sexual orientation to be a violation of the Constitution's guarantee of "equal protection of the laws" for all.

Here at CSUSB, the Student Rights and Responsibilities brochure, published by the Office of the Vice President for Student Services, asserts non-discrimination on the basis of "sex, age, race, ethnic origin, religion, national origin, marital status, physical handicap, sexual orientation, veteran's status, or pregnancy." It further states that "the California State University does not discriminate on the bases of that listed above. Title IX, Section 504 of the Rehabilitation Act, Title VI of the Civil Rights Act of 1964, statuses and executive orders from the Governor prohibit these forms of discrimination."

In addition, in a statement of opinion released on April 30, 1986, the Attorney General of the State of California, John K. Van De Kamp, states that according to California Labor Code sections 1101 and 1102, publicly disclosing oneself as homosexual is a political act, and "No employer shall make, adopt, or enforce any rule, regulation, or policy...prevent breaches of security." In addition, recruiters must comply with the University Policy Statements on Employer-Recruitment Activity, which states that "recruiters must agree to comply with all state and federal regulations which deal with antidiscrimination on pre-employment practices."

When asked why the military recruiters were allowed to recruit on campus, given their apparent violations of campus and state non-discrimination policies, Dr. Esposito stated, "We will not expose the students to..."

The Chronicle

ROTC

anything that is clearly discriminatory that we are aware of." He further asserted, "It is in the best interest of the institution to allow any employer who signs the form (agreeing to comply with University policy) to recruit on campus. I will not challenge an employer that tells me they will abide by our center's rules and regulations.

Dr. Esposito also stated that the military would continue to be permitted to recruit on campus until his office received "official notification from the Chancellor's Office [of the CSU system] or a government agency proving [that] the armed services have been discriminatory regardless of whether the form was signed.

Once a policy is handed down from either of these sources, Dr. Esposito asserted that he would not hesitate to enforce a new policy. But until then, to challenge the existing policy of allowing the military on campus would be "extremely atypical and problematic."

The CSUSB Army ROTC program also subscribes to the military's policy of non-recruitment of homosexuals. Major Mike Robel, Assistant Professor of Military Science, stated that the CSUSB Army ROTC program stipulates that persons enrolled must "be U.S. citizens, non-handicapped to pass the physical, have no major law violations, cannot be homosexual, have a GPA above 2.0, and be under 30 by the time of commission." He continued by stating that "federal law prohibits homosexuals from entering the program."

When asked which federal statute he was citing, Major Robel referred to a memorandum stating the Army ROTC policy on the issue of homosexual enrollment in ROTC. It states: "While not public law, the courts have upheld the right of the Department of Defense to allow in its ranks only those that the Department holds are compatible with military service."

Major Robel further contended that the CSUSB ROTC program does adhere to the campus non-discrimination policy by allowing any student to enroll in any of the Army ROTC military science courses for academic credit only, regardless of whether he or she meets the Army ROTC criteria for enrollment. Only students meeting the criteria, however, may enlist in the Army ROTC program itself to receive the ROTC benefits, including possible scholarships, a subsistence allowance of $100 per month, and a commission as a second lieutenant upon successful completion of the program and graduation. In justifying the exclusion of homosexuals, Major Robel said they are "problematical." He continued to state that "except within these guidelines, we don't discriminate."

In response to the military's policy of discrimination based on sexual orientation, any branch of the armed forces that recruits or operates here at CSUSB will violate the university's ROTC practice of discriminating against homosexuals. The year 1993 was chosen as the target date to allow current freshmen to graduate. Although this proposal, if accepted by the regents, would mean the loss of $2 million dollars a year in military funding, supportive faculty and students at the University of Wisconsin see the move as an "emphatic statement for the unacceptability of discrimination by any organization."

Until the military abandons its policy of allowing discrimination based on sexual orientation, any branch of the armed forces that recruits or operates here at CSUSB will violate the university's ROTC practice of discriminating against homosexuals. The year 1993 was chosen as the target date to allow current freshmen to graduate. Although this proposal, if accepted by the regents, would mean the loss of $2 million dollars a year in military funding, supportive faculty and students at the University of Wisconsin see the move as an "emphatic statement for the unacceptability of discrimination by any organization."

The CSSA took a bold and decisive step by passing a resolution calling for the CSU to "put a stop to the ROTC practice of discriminating against homosexuals" and further requested that if their practices are not halted that the CSU will "remove the ROTC's from campus until their discriminatory practices are stopped."

All of this came in response to the CSSA's concern that the Army ROTC practice of discriminating against homosexuals was directly conflicting with the CSU's strong stance against discrimination on our campuses. The fact is no other academic program in the CSU system has a requirement of sexual orientation for admission or retention and the CSSA feels that the ROTC should not be an exception.

This resolution is just one more step to making our universities free of racism and discrimination.

Student Association takes stand against ROTC's alleged discrimination

by Tom Capizzi

The CSSA took a bold and decisive step by passing a resolution calling for the CSU to "put a stop to the ROTC practice of discriminating against homosexuals" and further requested that if their practices are not halted that the CSU will "remove the ROTC's from campus until their discriminatory practices are stopped."

All of this came in response to the CSSA's concern that the Army ROTC practice of discriminating against homosexuals was directly conflicting with the CSU's strong stance against discrimination on our campuses. graduate students. The higher education process is designed to go in a logical procession from a general discussion of a subject to in-depth analysis of that subject. "Graduate students must have enough intellectual maturity to succeed in upper division course work and general education classes make this possible," said Dr. Lance Masters, Assistant Dean of Business Administration. Some doctors also noted that they have encountered many students whose position in this school has been put into jeopardy because they were not able to meet the expectations of their 300 and 400 level courses.

One of the requirements that the national groups agreed upon was to disallow undergraduates from taking upper level coursework.

Some students, however, don't agree with the administration's evaluation. "Being a student who decided for myself to get the general education courses out of the way, I find it extremely unfair of the administration to restrict freshmen and sophomores to only undergraduate courses," said Darin Sceens, a Political Science major who is currently a sophomore. "By the beginning of the Winter quarter I had completed all of my G.E. requirements and was supposedly two quarters early. In the Winter registration catalog they offered twenty Poly Sci courses, but only two of these classes were below the 300 level. In the recent Spring course catalog they offered twenty Poly Sci courses, and only one was in the undergraduate level."

"I would like to see the members of A.S.T. take this policy into serious consideration and I hope they might take action in the form of a petition to address the students, which are the people who are affected," Sceens said.

"I take upper level courses as an undergraduate because there is absolutely no major that I would most like to devote my life's work to. Through these more difficult courses I can become better acquainted with the specifics of a particular course of study. Right now I am an undeclared freshman hoping to find a major I want to declare through my 300 level courses," stated Jason Kelly.

A student who welcomes this event is Stacy Cerwyn, a sophomore majoring in Communications. "If a person goes to college they should expect to have restrictions placed on the courses they may take as an undergraduate because the school must differentiate between general education and upper division work," she said. "The needs of a student is something which is either met or not, if more intellectual stimulation should be more than fulfilled through undergraduate course work."
SHEARER

Continued from front page

when someone asked me to go and play, I always went with them,” said Shearer, “It seemed like I always had time to play sports.”

Shearer, who is a Physical Education major with a minor in Recreation and Biology, also holds down a job while playing. She works for a newspaper delivering papers.

“I have a paper route at three in the morning, after my route I go back home and sleep a while before going to school. I usually get 5-6 hours of sleep a night,” said Shearer.

In the classroom she holds a 2.80 GPA.

“I pull A’s and B’s, I don’t like C’s,” said Shearer.

With her tough schedule Shearer clearly shows her dedication to all her sports.

“Tammy Shearer has proven to everyone that it is right for her.”

Coach Ralph Perez, Women’s Soccer

“Her love is shown on the field and the court.

On the soccer field this past year she helped to lead the team with three goals and two assists.

“She is a very quiet, yet very intense leader on the field. She is one of those people who you believe can do anything if she puts her mind to it,” said Perez.

On the basketball field this past year she helped to lead the team with three goals and a third place finish in the Western Regionals.

“She is a very quiet, yet very intense leader on the field. She is one of those people who you believe can do anything if she puts her mind to it,” said Perez.

She was the fourth leading scorer on the basketball team with a 7.9 point per game average and was third in rebounding with a 5.4 average. She helped to lead the Coyotes the a 24-4 record and a third place finish in the Western Regionals.

“I thought that Tammy was a really key player in the second half of the season. She started out slow because of the overlap with soccer. She was a big reason why we got better throughout the season, she was a definite key in our Division III with a record of 16-6.

“As a quiet player she is often overlooked,” said Strain, “She is the most consistent player I've ever seen.”

Playing multiple sports isn't anything new for Shearer. She lettered in four sports at Norco High School; track, tennis, softball, and basketball.

“Tammy seems to strive on being active. Although it might not be for other athletes, it’s right for Tammy.”

said Schwartz.

Tammy Shearer has finished the basketball season as the fourth leading scorer (7.9 avg) and the third best rebounder (5.4 avg).

She is a very quiet, yet very intense leader on the field. She is one of those people who you believe can do anything if she puts her mind to it."

Sheen Shearer

mind to it," said Perez.

On the season so far Shearer is batting .383, with a fielding percentage of .984. The Lady Coyotes are currently ranked fifth in NCAA Division III with a record of 16-6.

“Tammy seems to strive on being active. Although it might not be for other athletes, it’s right for Tammy.”

said Schwartz.

Golf drives past top ranked UCSD

CSUSB's golf team, ranked second in the Western Region Division III, defeated region leader UCSD by 40 strokes in the CSU Stanislaus Tournament held on March 26-27. The Coyotes finished the tournament ninth overall and first among Division III teams.

Just prior to the tournament, CSUSB had been ranked second, behind UCSD, in the Western Region, and ninth in the nation, also behind UCSD (8th). The showing at the tournament improved CSUSB's ranking when the polls are released again.

The Coyotes are a perfect 9-0 in dual matches this season and are looking to extend their winning streak this weekend at the Grand Canyon Invitational.

CSUSB's sweep of the inaugural Rotary North/CSUSB Spring Baseball Classic lost some of its savour as the Coyotes lost two key players to injury.

Softball gains respect with national ranking

The CSUSB softball team, with its 16-6 record, has been listed among the top ten teams in the nation for the first time in its four year history.

"It shows that we've gotten the respect of the other teams," said first year head coach Sue Strain. "People are seeing what we are doing. It's important to get this kind of respect this early in the season."

The Lady Coyotes are ranked fifth in the nation in NCAA Division III. They were also ranked second in the Western Region, the first time the team has been ranked higher than seventh.

"We're not at our peak yet, continued Strain. "We can never be satisfied with our play, we are always looking to improve. We go into each game as the underdog, we can't relax, not yet."

The Lady Coyotes continued to improve with a sweep of visiting Claremont College last Thursday. Sophomore Tanna Cash (7-3) pitched the first game, which lasted only five innings due to the 10 run mercy rule, allowing only three hits in the 5-0 victory.

Senior center fielder, Anne Cordero, was three-for-three in the contest, including two triples, drove in three runs, and scored twice for the Lady Coyotes. Left fielder Marnie LaFleur was also three-for-three, including a home run. She also had three RBIs and scored twice.

In the nightcap, LaFleur (9-3) pitched four innings, allowed three hits and one unearned run. She continued with the hot bat, again going three-for-three, picking up two more RBIs, and scoring twice. Senior shortstop Lisa Hilbom picked up an RBI on a two-run home run, her second of the season. Melody Rumstead pitched the final three innings in relief to get the save.

The national ranking is proof of the team's talent. Cordero, twice named to the All-Western Region Team and a second team All-American in 1988, holds the highest batting average on the team at .539. She is also the team leader in RBIs (23) and stolen bases (7). LaFleur follows close behind with 21 RBIs and a .305 batting average.

Other leaders for the Lady Coyotes are second baseman Tammy Shearer, batting .383 with 15 RBIs, Hilbom, batting .318 with 15 RBIs, and first baseman Monica Reyes batting .308. Defensively, the Lady Coyotes have been strong all year.

"At the beginning of the season, the defense was winning our games for us," said Strain. "But lately the offense has picked up, and our pitching staff is doing a great job."

Both pitchers, Cash and LaFleur, have ERAs below 1.0 (1.330 and .866 respectively) and have been getting stronger throughout the season. The Lady Coyotes have given up a total of 31 runs in 22 games this season, an average of only 1.4 runs per game, including 10 shut-outs.

The Lady Coyotes play their final home game of the season on Tuesday versus Cal Baptist.
