Propositions effect CSUSB's growth

By William Lundquist
Staff Writer

On June 5, CSUSB students, and other voters, will have an opportunity to choose between quality education or cheap gas.

Proposition 111, or "The Traffic Congestion Relief and Spending Limitation Act of 1990" as it will be titled on June 5 California ballot, would modify the Gann spending limit, but also raise the gasoline tax.

While Proposition 111 is primarily a bill to raise money for highway and mass transit projects, it could also have a significant impact on student fees at CSUSB.

By amending the state spending limit to include growth in California's personal income, Proposition 111 passes and frees additional state funds.

If it fails, policy experts at the California Postsecondary Education Commission predict immediate and substantial fee increases, cutbacks in student services, and caps on campus enrollment for the CSU and UC systems.

However, if Proposition 111 passes, people will ultimately pay nine cents more for each gallon of gas they pump. They will have to decide if keeping fees down and educational quality up, in addition to highway improvements, is worth the price.

A second bill, Proposition 121, may have an even greater affected on CSUSB.

The measure, called the Higher Education Facilities Bond Act of 1990, would provide $450 million for construction at CSU, the University of California, and the California Community Colleges.

Passage of Proposition 121 would give CSUSB nearly $5.5 million to expand the Pfau Library and physical education facilities. It would also allow plans for a new Visual Arts Building to begin.

Half of the funds at CSUSB would be used to provide equipment for the new classroom and Student Services Building, which may start construction by June.

As a bond measure, Proposition 121 would not raise taxes, but would increase the state public debt.

A steering committee at CSUSB has organized many activities in support of Proposition 111 and 121 this Spring. The measures have been endorsed by club presidents, the Alumni Board, and the University Advisory Board.

Resolutions of support have been passed by the California State Student Association (CSSA), as well as Associated Students, Inc. (ASI). A voter registration drive was recently completed by ASI.

The only activity still to be completed is a mailing to 3,000 San Bernardino community leaders and CSUSB alumni.

Propositions 111 and 121 are now in the hands of the voters, who will have to choose between increased student fees, or increased gas prices.

Students who wish to vote by mail can pick up applications for vote-by-mail ballots from the information table in the lobby of the Student Union Building.

CSUSB earns World Series berth

By Jeff Zelenski
Staff Writer

This past weekend the CSUSB baseball team did its own version of spring cleaning.

The Coyotes swept the NCAA Division III Western Regional best-of-five series over host Claremont College.

It was the first time in school history that a CSUSB baseball team had been invited to the Regional Playoffs.

With the win, the Coyotes earn the right to travel to Battle Creek, MI to compete in the six-team NCAA Division III College World Series beginning May 25. The series will be double elimination.

"There's a hell of a lot of teams that would like to be in our position right now," said Head Coach Chuck Deagle after the sweep.

"This is what it's all about, this is why everyone plays the game of baseball."

Winning the Regional, the Coyotes don't seem to be satisfied just yet with their achievements.

"We won't be satisfied until we win it (World Series) all," said Coyote designated hitter Mike Main.

"We are on a roll right now, hell we should win it all if we play like we can," said Coyote first baseman Paul Gonzalez.

"We all feel very confident about it (Series)," said Miguel Salazar, the Coyotes third baseman.

Although the Coyotes swept the host Stags, it wasn't easy. In the first two games the Coyotes had to play catch up to pull out the victories.

"Up until the sixth inning of the first game the Coyotes were down 2-6. It took a seven-run seventh inning to help secure the 9-6 win. Besides the seventh inning flurry, CSUSB reliever Dave Seward pitched six scoreless innings and allowed only five hits to get the win. Salazar led the Coyotes at the plate in the first game going 2-for-3 with a solo homerun.

Forum will discuss malathion spraying

The controversial issue of malathion spraying will be explored at CSUSB at a free public forum slated for 7:30 p.m. until 10 p.m. this Thursday in the Upper Commons. The program is sponsored by the League of Women Voters of San Bernardino and CSUSB’s Biology Department.

Forum panelists will include Dr. Jorge Mancillas, human physiologist, UCLA School of Medicine; Dr. Peter Kurta, senior medical coordinator, California Department of Food and Agriculture; Joanne Wasbauer, entomologist, California Department of Food and Agriculture; and Dr. Dave Polson, assistant professor of biology and insect ecologist at CSUSB. The forum will be moderated by Gloria Anderson, natural resources director, League of Women Voters of San Bernardino.

According to Jennifer McMullen, President of the League of Women Voters of San Bernardino, “The forum is being presented to give a panel of experts the opportunity for an exciting and challenging discussion of this issue. We believe that facilitation of this discussion is an effective way for the League to educate and involve our citizens.”

“It will provide the public an opportunity to share their concerns and enable them to make informed decisions and take appropriate actions as individuals. The League is concerned with public health and the environment. Although we do not have a position on malathion spraying, we have studied pollution prevention, and this is an issue of great concern. We hope this forum will shed some light on the political and controversial subject.”

Program sponsors encourage all interested individuals to attend. “We hope that the public will be interested.”

Union sets expansion schedule

By Renee Staples
Staff Writer

Beginning in the fall of 1990, the Student Union will be expanding. A total of 2400 square feet will be added to the present structure.

Some of the features of the expansion will be a 1000 seat multi-purpose room, larger snack and pub area, more lounge space, and a new game room with pool tables, and several new games. A new reading room has been planned, and extra Associated Students office space will be added along with new meeting rooms. Portions of the expansion have not yet been allocated, therefore surveys are being conducted to see what students would like to have included in the extra space.

The expansion project is expected to take from 14 to 16 months to complete. The construction will bring the present Student Union as far north as the walkway six to eight feet to the right of the library. Some remodeling will go on along with demolishing, as the Student

Taking a bite out of crime

A padded suit cushions the bite of a German Shepherd in training to become a possible police dog.

The training demonstration was sponsored by ASI in conjunction with a public safety survey.

CSU directs pro-education rap video

In a pioneering effort to establish communication with hard-to-reach youth, the California State University (CSU) system in conjunction with the American Association of State Colleges and Universities (AASCU) has produced a rap video promoting the benefits of education. Written and performed by Geffen Records’ rap group S.E.L.L. (the song, “Let the Bells Ring”),—schools bells, that is—is part of a continuing CSU-inspired drive to attract young people, especially underrepresented minority youth, to higher education.

The video is specifically targeted at 7th and 11th grade African-American males. Recent studies, including a newly released report by the U.S. Department of Education, point toward declining black male college enrollment.

According to CSU Chancellor W. Ann Reynolds, “The time is right for the video. We believe it is important to use every tool available to let young people know that, as the song’s lyrics say, ‘Education is the key to life.’ We hope this video will motivate young people. We want them to know that education helps people control their destiny.”

The video shows 7A3 singing and dancing in the foreground while a rapid-fire series of mostly black-and-white images and video collages is seen in the background. As the group delivers its pro-education message against rap’s now-familiar scratchy, booming soundtrack, famous and celebrated African-American icons including the late Dr. Martin Luther King, Jr., athletes Bo Jackson and Kareem Abdul-Jabbar, several astronauts, former Congresswoman (and the first black to run for president) Shirley Chisholm and gospel singer Mahalia Jackson flash across the screen.

CSU Special Programs Director Diane Vines, who served as Executive Producer, sees it as “an effective, timely means of communication with black youth.” As Vines put it, “Rap speaks to them. We believe that this video will speak to our target group as well as to other young people.”

CSU Los Angeles, directed the rap video. The director of Bobby McFerrin’s first music video, Bloom was the creative force behind the use of advanced computer

Arter gains national recognition

Nancy Arter, senior marketing student and president of the CSUSB American Marketing Association, brought national recognition to CSUSB by placing third in the 1989-90 National AMA Marketing Strategy Case Competition. Accompanied by her advisor, Dr. Mary P. Smith, associate professor, Arter made her presentation in New Orleans during the annual AMA International Collegiate Conference.

The Advertising Council sponsored the case competition. Since 1942, The Advertising Council has helped “Take a Bite Out of Crime,” as the song’s lyrics say, “It’s magic...it can kill a friendship” and that “A Mind is a Terrible Thing to Waste.”

On the eve of its 50th anniversary, the Council invited AMA collegiate chapters from across the nation to develop a marketing plan to help re-position it for the 1990s and the 21st century.

Eight teams of finalists were invited to the conference to present their writ-

ROTC closes campus programs

Even as anti-ROTC sentiment has erupted at a number of campuses, the Pentagon apparently is considering eliminating 20 to 100 of its 400 ROTC units nationwide.

The U.S. Department of Defense, which administers the Reserve Officer Training Corps, says it may close the units as part of impending cuts in federal military spending, the Army Times reported.

"If the army gets smaller, the ROTC will too," said Lt. Col. Cal Blake, public affairs officer for the Army Cadet Command in Virginia. "The number of officer and lieutenants will decrease accordingly."

Blake said he won't know how many or what ROTC programs and students will be affected until mid-June.

"They want to make sure whatever reductions occur that we'll have a manageable system six or seven years from now," Blake said. Nationwide, 86,000 students are in Army, Navy, and Air Force programs. Of the 51,845 students in the Army ROTC, 8,000 will become commissioned officers this spring, Blake said.

Campus sentiment against the ROTC for its policy of refusing to commission gays and lesbians as officers has grown increasingly strong in recent weeks.

The issue has sparked political activity at DePauw, Northwestern, Northern Illinois, Harvard and Yale universities, the universities of Wisconsin and Illinois, CSU-Northridge, Massachusetts Institute of Technology and Washington University in St. Louis.

In late April, MIT Provost John Deutch warned Secretary of Defense Richard Cheney that "many universities will withdraw from the ROTC program" if the anti-homosexual policy isn't changed.

CFA awards two Spring scholarships

The California Faculty Association, San Bernardino Chapter, awarded two spring 1990 quarter scholarships. Gina Lindblom, a Business Administration Information Sciences major from San Bernardino, won the undergraduate category with her essay "Cultural Diversity and Higher Education."

Each winner received a scholarship covering fees and $50 toward books for the spring 1990 quarter. The CFA San Bernardino Chapter congratulates these students for their outstanding essay submissions.

Hills ready to face new challenge

By William Lundquist

"We can't fight any fire without the fumes," is how Forrest Hills, Vice President-elect of Associated Students, Inc. (ASI) summed up the challenge of his new administration.

Hills listed student involvement as his number one priority for next year. He urged students to apply for positions on the various ASI committees. After his first meeting with ASI President elect Patrick Cooney, Hills said "hey are "really looking forward to improving ASI."

He felt that the new administration will be "the most productive in ASI history."

Japanese education buys up American land

On April 19, a long-closed former Catholic college in Denver began a new life, with a new name and even new students. The first wave of 377 Japanese students arrived to start moving into what has suddenly become Teikyo-Loretto Heights University.

The day before, 196 Japanese students arrived in Teikyo-Westmar College, another small college in Denver, assumed the school's debts and assets, and subsequently sold the campus to Teikyo.

Campus to Teikyo.

Teikyo stepped into the picture.

For Japanese students, however, studying in the U.S. or attending a Japanese college is a good advance in education, he said.

Stevenson speculated.

Faculty profile:

Professor Stuart R. Ellins

By Kim Perkins
Staff Writer

Walking down the hall, in the early afternoon, he nonchalantly reaches deep in his pockets for the office key. His long, dark hair brushes the shoulders of his black leather jacket as he turns his head. A deep, resounding voice summons, "Come in."

A hesitance came from the visitor as she had just seen the picture on his door of a grumpy, dirty old man saying "complaints." His mannerism, however, reassures her as she steps in.

A glance around the room suggests a researcher has made his home there. An old typewriter and a new computer are neatly set at different sides of his desk. A stunning rock collection emanates from the back of the room.

Waiting for him to get settled, the student looks around.

Another quick glance reveals a gorilla statue and a stuffed toy coyote. To the right of the room are shelves filled with books. A human brain and coyote skull lie beside them. To the left a billboard filled with pictures of family, coyotes, and friends.

Leaning back in his chair he motions for her to sit down and waits for a word from his visitor.

Just as she began to speak, his son Wesley rides in on his bicycle and makes himself at home.

Dr. Stuart R. Ellins is a tenured professor of psychology at CSUSB. He is the MA coordinator of the psychology department and has taught experimental psychology at CSUSB for 17 years.

Ellins grew up on the east coast and obtained his PhD at the University of Delaware.

When asked why he came to CSUSB he replied, "I love the outdoors and I think my coming here had a lot to do with that."

Ellins was hired as a comparative psychologist to research the behavior of certain animals in order to understand humans better.

"I study the behavior of simpler organisms that are easier to understand than humans," Ellins said.

"People are too complicated to understand."

Ellins has done research on a variety of animals, including bats and coyotes, and has written various articles.

Ellins research forte is the coyote.

"I love 'em. I like them better than people," Ellins said.

"He likes being with them more than me and my brother and sister," Wesley chimed in.

Ellins just shrugged his shoulders.

"I like coyotes for three reasons: 1) they are very simple animals, they live to eat; 2) they are very interesting, they are predators (hunters) and will eat anything; 3) they are very adaptive, they adapt to their environment and are equipped with mechanisms which allow them to do so," Ellins states.

Ellins does scientific research on the feeding habits of coyotes. He has several coyotes on campus that he keeps in dog runs and kennels. These coyotes are studied by Ellins with graduate students. Even Wesley knows all about them.

Ellins is married, lives in Yucaipa, and has three children.

"Our family loves animals," Ellins said, "We have six dogs, and cats, and hamsters."

A moment of silence fell as a feeling of warmth passed between Ellins and his visitor. The kind that is experienced in a developing friendship.

Ellins rose to his feet, they shook hands in respect, and said "Goodbye."

"Oh, goodbye Wesley," she said. A few steps later...

The door closed and the unknown student was gone.

The World Ends One Week From Tonight!
Tickets now available for CSUSB's 'Tartuffe'

That classic comedy with a contemporary ring, "Tartuffe," will open Friday, June 1 at CSUSB, winding up the university's 1989/90 theatre season.

Set in Paris in the 17th century and written by the French playwright Moliere, the story is of Tartuffe, a man whose religious ostentations suggest that he is as proud of his humility as he is confident of his charms.

"It's not an anti-religious play," says the show's director, Dr. Ron Barnes, a professor of theatre arts at CSUSB. Rather, he adds, the play is "about people who take principles to their own advantage."

Mesmerized by Tartuffe's amazing piety, Orgon, played by Jim Skousen, insists in one scene that Tartuffe accept the deed to his home. After manufacturing a few objections, Tartuffe complies and then "generously" promises to give half the financial returns to the poor.

"The play does have a contemporary theme," says Skousen. Skousen has a bachelor's degree in philosophy from CSUSB and will begin work on his master's in fine arts at CSU, Fullerton this fall.

"There's some sense to what he (Tartuffe) preaches," says Matt Webster, who plays the lead role. "But it all comes down to intentions," adds Webster, now in his senior year. "It's not (Tartuffe's) 'show' that's the piety, it's the real, quiet reflection, someone who really gives until it hurts."

Moliere himself led a less than saintly life, says Barnes. He married the younger sister of a woman who helped him form an acting troupe and who lived for years as his mistress. Moliere, who wrote many successful comedies, had always dreamed of becoming a great writer of tragedies. He wrote only one, however. It failed miserably.

Performances of Tartuffe* will be held June 1, 2 and 6-9 at 8:15 and a June 10 Sunday matinee at 2 p.m. at the theatre located in the Creative Arts Building. General admission is $6 for adults and $3 for students with I.D. and senior citizens. For more information, call the CSUSB Theatre Department at 714/880-5876.

It took Freud 38 years to understand it.

You have one night.

The psych exam is in 12 hours. And your id wants to party. Your ego wants to conk out. But your superego knows you need to stay awake tonight to cram.

Fortunately, you've got Vivarin. It helps keep you awake and mentally alert for hours. Safely and conveniently. So all your brainpower can focus on understanding the brain.

If Freud had used Vivarin, maybe he could have understood the brain faster, too.
Letter to the Editor
Response in defense of SOAR's presence

Dear Editor,

In a May 16 Letter to the Editor, William Gillette characterized animal rights groups and Others for Animal Rights (SOAR) as an extremist group, and the animal rights movement in general as extremist and violent. Mr. Gillette has never attended a meeting of SOAR and knows nothing about us. SOAR is an organization dedicated to education, and we provide literature films, and discussion to all interested persons, regardless of their views.

As it gains in momentum and success, the animal rights movement is coming under attack by vested interests who fear that their power to exploit animals for profit will be undermined. To take just one example, Leon Hirsh, head of U.S. Surgical, paid a hefty sum to agent provocateurs to have a bomb placed under his own car, and to blame it on Fran Trutt, an animal activist. (Leon’s company was receiving some bad press for the hundreds of dogs his company kills each year in order to train salespeople how to use surgical staples.) Mr. Gillette, in telling his urban fable about violent tactics on the part of the unnamed “extremists,” has (perhaps unwittingly) become part of this smear campaign characterizing animal rights activists as violent. But no cases of violence on the part of animal activists have been documented.

On the other hand, here is something which is documented: licensed hunter Donald Rogerson of Bangor, Maine shot Karen Wood to death in her own backyard, and made in the U.S., saying he mistook her for a deer. Hunters wrote in to local papers saying she had it coming for interfering with their sport. Mr. Gillette asks us to believe that it is hunters who protect our wilderness and wildlife, and that legal hunting has never contributed to the extinction of any species. Yet legal hunting has not only caused extinction of species such as the red wolf and ivory billed woodpecker directly, but has indirectly contributed to destruction of habitat and extinction of many more species, such as the California Condor (poisoned by lead-shot left by hunters). Wildlife “management” means that habitat is manipulated to maximize “game” species (such as deer), and the expense of “nongame” species, with often disastrous results. (For those who wish to learn more, read The Great American Hunting Myth by Ron Baker, Vantage Press.)

Meanwhile, animal rights and wildlife organizations are fighting an uphill battle to protect wilderness against human destruction and predation. For example, we support Proposition 117, the Wildlife Protection Initiative, which would set aside habitat for wildlife and protect the one large predator California has left: the mountain lion. Because this measure would prevent the trophy hunting of mountain lions, many hunters oppose Prop. 117. In other words, what we asked to choose between preserving wilderness and preserving the right to hunt dogs packs to chase cougar up trees and shoot them, these hunters will choose the latter. Mr. Gillette asks us to consider what constitutes violence. I think we have here a pretty good example.

When does a date become a crime?

It happens when a man forces a woman to have sex against her will. And even when it involves college students, it's still considered a criminal offense. A felony. Punishable by prison. 
So if you want to keep a good time from turning into a bad one, try to keep this in mind.
When does a date become a crime? When she says "No." And he refuses to listen.
Against her will is against the law.

HILLS — Continued from page 3

Hillis would like to tackle the public safety issue first. He thinks that camera surveillance of the parking lots may be one way to fight the increasing number of car thefts.

He also envisions a spring community carnival held at CSUSB, something like the Mardi gras at UCLA.

Among Hillis' new duties will be to chair the ASI Board of Directors. He intends to take a very active role on the board, and plans to spend this summer working on the ASI bylaws and budget.

Hillis will be a senior next year, and will continue to major in liberal studies. After graduation, he wants to continue working towards an education certificate, and a master's degree in public administration at CSUSB.

Continued from page 3

it's causing some bitter feelings among students. One says they're being treated as "second-class" students. "We're still being told that we're going to have 'better students'" because of the merger, complained Salem student government President Thad Davis.

Students, he said, were kept in the dark about the merger until last summer, leaving no time for students who weren't interested to transfer.

They found many changes when they returned in the fall. Officials had dropped football, softball and volleyball sports programs. In academics, the psychology, art, nursing and museum studies programs were scrapped.

And with the injection of Teikyo money, Salem officials started sprucing up the campus, repairing roofs, putting up new signs and making repairs in two of the three dormitories, the two where the Japanese students will be housed, Davis added.

Officials also dropped burgers and all fried food from the menu in favor of healthier food. For a recent lunch, students had a choice of chicken salad in pita bread or spinach casserole.

"They're making all these improvements that we've been asking for, but it had to take this to do it," Davis charged.

Davis also noted the new governance system, composed of both Americans and Japanese kept in touch by phone and by fax, means a student no longer will sit on Salem's board.

"We just don't have that personal touch anymore," Davis lamented.

"All institutions change," said Salem's new Vice President for Academic Affairs Mary Jane Barreitta, although she admits in this instance it's a "dramatic, catalytic change."

"I'm certain we're going to lose some students," added Salem spokesman Percy Aschraft, "but I think it will attract a whole new class of students."

Teikyo's merger with Westmar has caused fewer resentments. "Once they got answers to all their questions, there's been a very positive attitude among students and faculty," reported Lisa Hollgrew, Westmar's student government President.

The American officials joining the Japanese in running the U.S. campuses see the Japanese influx as a way to internationalize American higher education.

"We have a strong leg up on what the future (of higher education) will be," says Tom Langevin, President of Teikyo's Loretto Heights branch.

Internationalizing the curriculum, Langevin says, "is something this country is facing for the first time."

WISL

Wooo weee, it's playoff time in the old town tonight. No more foolin; we ain't playing around no more-this is the big stuff. We've weeded out all the lesser teams and only the strong are surviving. The first match up pitted DSP & Power against the Buttheads. Boy was it close one, but DSP prevailed 9-8 despite the lackluster outfielding by the box office queen, Kelly Miller. It was shutdown time as Longball scored only twice in the first, but failed to come up with any more as Demolition countered with 9 runs to take the win and advance to the semis. In a surprise win, the Siammers super duperly narrowly inched by the Pack 9-8 (what a game, what a game). Greg should not have left. Maybe next time he'll stay on base and not get thrown out by that girl. Buy your world series tickets now as they are going fast. But hey, aren't the umps doing a great job?

FISL

The Creatures were magnifico in defeating the Doughboys. The flags around the campus are now at half mast as those tennis dudes scored many times in the bottom of the sixth to take the eternal 15-10 lead and progress to the FISL semis. It just was not meant to be, for good ole Rex and his Banshees. Delta Sig, congrats for being the only first team to make the playoff semis (let's talk about campus dominance now). Delta Sig scored 9 to the Buttheads' cinco. Lars Shevlin's prediction may come true as again they were; this time the Weasels were eaten by the soccer dudes of the Pedestrians, 11-5. It has never been done before, but Demolition can be the first team to win both the WISL and FISL. Demolition defeated the Sigma Nu Kids on the Block 10-2 to move along in their pursuit of greatness. Hats off to the Sigma Nu Kids; welcome to CSUSB.

THIVL

DSP won all three games against the team that they played. TKE played Sigma Chi, but I don't know what happened there. Tammy P., where are you. More of my indepth report on volleyball next week.

Miller Golf Results

Actually I won, but my boss would not believe the score that I fired. Oh well, I already have an intramural t-shirt (I have access to the t-shirt locker, ha ha). The supposed winner of the men's division was Matt Arnold Hunt with an impressive 24 over nine holes. Trish Emerson, Tammy Paltridge and Sue Strain all shot 35 and will square off for a tie breaker later. Jeff C., Jeff Z., Carol something, Tammy L., and Paul L.; you all won something, see the intramural board for more details.

Car Rallye cometh

The Car Rallye is tonight! Get a navigator and a car and meet us out in front of the Tokay dorm at 6:30. Tons of fun, believe me.

The Recreational Sports Department is part of the Student Life Organization but are not responsible for the killing of innocent trees and wildlife sacrificed for that new building. These trees are not being replanted, they're being murdered! Only you can help.
Purple reign falls

By Jeff Kabel
Staff Writer

Nothing lasts forever. Not even the Purple Reign. Almost every Lakers fan expected the team to post another championship banner at the Forum this year. The Phoenix Suns extinguished that dream. It is hard to swallow but it is true. The Suns advanced to the NBA Western Conference Finals by out hustling, outsmarting and plain out shooting the Western champs.

The Suns burned the nets. The Lakers uncharacteristically chipped the rims. That was it.

As I watched the Lakers' season come to an abrupt halt last week, I realized that this L.A. steamroller had run out of gas.

During the past decade, the Lakers have dominated their opponents. Yet, I still heard proclamations of "Lakers choked" and "Worthy strikes." Well, those weren't the exact words. But it just goes to show you how much pressure the Lakers shouldered from the press and the fans.

Lakers fans are demanding. They want an NBA title every year like kids crave a new Nintendo game every month.

We are spoiled! Admit it, Lakers fans.

I'm one of those spoiled fans. But consider the Lakers' dominance in the 1980s: they have won five championships and made eight Finals appearances.

Most fans in other areas would be happy to see their team post a winning record. But we should not take for granted the Lakers accomplishments.

However, the Lakers' decline was inevitable. Most of the Lakers' starters have played in the league over five years, while Magic Johnson and Michael Cooper have played 10 and 11 years, respectively.

The Phoenix Suns deserve some well earned praise. They beat a team that owned the NBA. But true Lakers fans should refrain from purchasing a Phoenix Suns cap. There is always next year.

Paul Gonzales strokes a home run in game one. Gonzales also increased his team-leading stolen base total to 18 of 19.

The second game of the series took much of the same catch-up format. Only this time the Coyotes jumped to a 5-0 lead after falling behind in the third, 5-8. In the later innings CSUSB fought back to win, 11-8.

"We were all confident we were going to come back and win," said CSUSB second baseman Ryan Love.

Main and Salazar each pounded out their third hits at the plate in the second game for CSUSB. Darren Kay came in and pitched six and a third innings, allowing only four hits and no runs, to get the victory.

In the third and final game the Coyotes jumped out to a early lead and never looked back behind the pitching of Brooks Peters, who improved his record on the mound to 7-1. The highlight of the game was when catcher Bret Parrek, who didn't play in the second game due to back spams, hit a solo homer in the sixth inning to widen the Coyotes lead to 6-1.

The final score of the third game was 6-4.

"Brooks really pitched a good game, he had to really dig deep down for this one," Deagle said.

Numerous players were selected to the All-Tournament team. Gonzales (first base), Love (second base), Salazar (third base), Aaron Marcarrelli (shortstop), Jeff Bremner (outfield), Patrick (catcher), Main (designated hitter), Peters and Seward (pitchers) were all named to the team.

Salazar was named the tournament MVP. During the series he went 5-for-11 with four RBIs, three runs, and two homeruns.

"Throughout this series everyone out there was playing good baseball," Gonzales said.

This will be Deagle's second trip to the Series. Having taken the University of Redlands in 1985. Also Love, who transferred from William Penn College in Iowa, has 'been to the series and knows what it's like.

"I don't care how many times you go (to the series) you never get used to it," said Love.

With the high level of confidence on the field, the Coyotes seem to be peaking at the right time.

"This group is unique, they have really come together as a team," Deagle said.

Gonzales put it into perspective after the third game of the series. "Hey, right now we are a good team. Maybe good enough to beat a clean path to a Division III National Championship.

Golf expects a storm at Nationals

By Jeff Kabel
Staff Writer

While the CSUSB golf squad competes this week in the Division III National Golf Championships at Jackyll Island, Ga., the Coyotes might have to contend with mother nature as well as 21 other opponents.

"We're taking our umbrellas with us," said CSUSB Head Coach Dr. Greg Price.

Price and five players will sport rain gear for this week's competition: senior Chris Astorga and juniors Steve Lynch, Brad Kadoserph, Wade McMullen, and Charles Delorey.

While only one round of play has been rained out in the previous four years of the tournament, Price contends that the players reactions to a long layoff will determine the team's fate.

"We've played well in bad weather conditions before, but we've been inactive for three weeks," Price said. "It depends on how they react to it (layoff)."

"We've got to get our competitiveness going but we've been playing well," Price said. "They've all improved since April."

The Coyotes have posted a 30-1 record against Division III opponents and compiled a 15-0 mark in match play.

"We're concentrating more on the team effort this year," Price said.
