CSUSB
Mudslide Brings Out

Cal State Volunteers

Students And Staff Aid Flood Victims

by Mike Smith

On Sunday, February 10, a group of 20 Cal State students and administrators volunteered to help clear away the mud and debris from the flood ravaged Hampshire Avenue neighborhood.

The Harrison Canyon flood basin filled with mud and spilled over into the residential area on January 9, 14, and 28 causing damage to 33 homes.

The crew was organized by Serrano Village Council President John Flathers and Assistant Housing Director Wayne Hutchins. The majority of those volunteering were Serrano Village Residents.

The first workers checked in at the Volunteer Headquarters at Wildwood Park at 8:30 a.m. The clean up supervisors kept all those from Cal State together on the same projects. The first task assigned to the group was the clearing of air conditioning units buried beneath the mud. During this operation, Cal State senior John Conboy, made a few of his coworkers nervous when he cut through a 220 volt line. Luckily no one was injured.

Following the air conditioning units, the sandbag detail. Both sides of Hampshire are lined with thousands of these bags, to say nothing of the ones closer in to the homes. Although Cal State does not offer any courses in sandbag filling, the students and staff managed to add several hundred more to the collection.

More of the afternoon saw the college crew removing mud from an inundated backyard on Hampshire Ave. Mud was shoveled in wheelbarrows which were coaxed up a hill and then dumped. A skip loader picked up the accumulated muck until it broke down late in the afternoon. Associate Dean of Students Doyle Stansel proved to be quite adept at handling his wheelbarrow. More than a foot of mud was cleared from the yard.

College President John M. Pfau visited the weary workers as they were putting the finishing touches on their landscaping work. President Pfau was informed of the work the volunteers had performed and was quite impressed. Wayne Hutchins announced to the group at the end of the day that President Pfau had contributed $100 from the President’s Club Fund to the Serrano Village Council for the efforts at disaster control in the Harrison Canyon area.

The President’s Club Fund was established by private citizens in the area to show their support for the college. Contributions are made on an annual basis and the fund is designed to allow the President of the College discretion in disbursement to promote the overall welfare of the campus community.

Some of the volunteers expressed dismay at the fact that not all those who signed up to work showed up. But according to the city workers in charge of volunteers, if Cal State had more people, they would have probably just gotten in the way. Co-sponsor John Flathers agreed.

"Take a look around. You don’t see anybody sitting down and watching to join us. What we’re lacking in numbers we’ve made up with in effort. Everyone here today has put in a lot of work.

Many from the Cal State crew had already done work in the stricken neighborhood and had seen it when it was much worse. But for those who were seeing the site for the first time, it made quite an impression. The barren landscape and sandbag walls reminded many of scenes from war movies. It also reinforced their commitment to help.

"If more people saw what we have seen today, they’d have to turn volunteers away," one Cal State co-ed was heard to say. Volunteers were shuttled back to the headquarters at Wildwood around 4:30 p.m. and turned in their shovels Coupons for a free hamburger and fries from McDonalds were given to all those who had worked during the day.

Tentative plans are being made for another group from Cal State to be formed to work on the inside of the homes. Interested persons should watch The PawPrint for further information.

Editor’s Note: Over the weekend, as The PawPrint goes to press, heavy rainfall has caused additional flooding which resulted in evacuation of the Hampshire Avenue and Sonora Avenue neighborhood.
The Students

Meg Greene is a freshman and a member of the Village Council. She voted for the helping-hand program because she felt it was a good idea for the school to get involved, and she knew the people really need help. Meg commented, "I just don’t understand how they could build houses with the possibility of having floods like this."

Chris Barr is a sophomore at Cal State. He simply stated, "I came because people needed help."

Jay Norrell works full-time for Cal Trans.

The Original Three

The Original Three, Russ Castle, Philip Tardy, and John Conboy, were the only students there at 8:15.

Russ Castle is a freshman at Cal State from the San Francisco area. Why did he come to CSCSB? "Because it was away from home, and they accepted me!"

Russ took me around and showed me the various areas where the group had worked that morning. "We had to dig trenches around several air-conditioning units so that other workers could hose them all down today. We threw away all of the debris that wasn’t really worth anything. When we found stuff of value, we put it on the back patios. We filled lots of sandbags."

"When I call home tonight, I know my folks are going to say, 'What’s sand-hogging?' I guess I’ve learned a new trade," Russ said. Russ tried to take me into a back yard to see the swimming pool, but I couldn’t climb over the sandbags. Russ explained, "The pool has about two inches of water in it, and the rest is all mud."

Philip Tardy was one of the Original Three who arrived in the area at 8:15. Philip felt a duty to come out and help. He explained, "When my father was stationed in Mississippi, there was a hurricane. Everyone got together to help, even the people from the outside area, so I felt that I should help here."

Philip is a freshman at Cal State, majoring in Bio-chemical Engineering. Philip had hoped for a larger turnout from the college. He noted, "I think it’s pretty sad that we have only 17 people from all of the dorms. We had a Casino night last night, so I guess with that and mid-terms, people just didn’t make it."

Philip is planning to encourage more people to come out in a couple of weeks to help clean the interior of the houses.

John Conboy, also of the original three, plans to help clean out the houses when the students come back again. He stated, "We might as well be out here; otherwise, we would just be sitting around the dorms watching television. If my house were here, I would want somebody to help me. At the college even though we aren’t close to the community, we are still a part of it. If they (the community) need help, we should respond."

John is a senior, majoring in Economics.

as a biologist and will start working on his masters degree at CSCSB in the spring. He graduated from UC Davis. Jay came out to help because he agreed with what the students were trying to do. He said, "Heaven knows that these people have been through a lot here, and this is kind of a nice way for students to do something altruistic and service oriented."

"I am happy to see that the whole dorm complex is doing something, not just a specific group." Jay has an empathy for the victims because he used to live in Yuba City and can remember the people talking about the flood of 1955. "The people always talked about the hardships they went through, and I guess it is the same thing here."

The Administrative Organizer

CSCSB’s Assistant Director of Housing, Wayne Hutchins, co-organizer of Sunday’s program of community help stated, "I think this is a good opportunity for the college to make a contribution. There are a lot of people in the community who aren’t even aware of the housing operation at Cal State. It is good to be able to make an impact on the community."

Hutchins noted that the Semano Village Council has appropriated $25 to purchase a community service award plaque for 1980 which will stay with the residence hall that wins it. Hutchins is keeping a log of the names of students from each residence hall who have helped out in the mudslide area. It is Hutchins’ hope that the council will be able to continue with the service award program each year.

Apparently the mudslide victims were not the only ones who were reaping benefits from Sunday’s program. Hutchins noted, "The number of students today isn’t that great, but the quality is. I stressed the fact that we stay together because this way we are getting to know one another. We have had a great time. It has been a lot of hard work, but we are making some good friends here."

The disaster area made an impact on Hutchins. "The situation out here is overwhelming. I have never seen anything like this. It is kind of like a blizzard of snow only, it’s mud, and it doesn’t melt away."

The Dean

Dean Stansel joined the workers early in the afternoon. He noted, "We have a lot of hard-working people here. Most of them have been working here since 9 a.m. That speaks very well of them. I have found there are going to be a lot of tired muscles and blisters tomorrow."

Dean Stansel had been in the area earlier to help some friends. "When I came down after the second storm and saw how bad it was, I couldn’t believe it. To be standing on top of the mud and looking down at the people in the street just blew my mind. The photographs in the paper only give you a part of the picture."
**The Student Organizer**

John Flathers, a senior majoring in Administration, is the chairperson of the Serrano Village Council. He and Wayne Hutchins were the organizers of Sunday’s helping-hand program. John has helped out victims of disasters before.

He is from the Twenty-Nine Palms area where flash floods are a common occurrence. John stated, “I feel really good about doing this. They (the city) needed volunteers, and since we have a ready source of manpower, we thought it would be a good idea to help out.”

**The President**

President Pfau came into the area to cheer the students on. He stated, “I think it is just marvelous that the kids would come down like this. The people who live in this area are in desperate shape. They are very dependent on people to help them. I think it is just great that our students are willing to volunteer to help. I want to give them whatever encouragement that I can.”

Dr. Pfau felt that the city and the county were trying to deal with the problem adequately. He said, “Down here where there is mud right inside the houses, the city has been working hard. We have had a good response from the city, and they have been very cooperative.”

**The Residents**

Carol Moore is a graduate student at CSCSB. She and her husband, Major Frank Moore, live on Hampshire Road. Fortunately they did not receive too much damage to their home. However, they have moved out of their home and are living in a motel.

A Disaster Relief Committee of five people was formed right after the disaster that occurred on January 14. The committee needed a spokesman, and Frank Moore volunteered to be the spokesman.

The committee’s activity has been to keep pressure on the city and now on the county to rectify the situation on Hampshire Road, help the residents clean up, and to solve the problem up in the watershed which is where the problem originated.

Moore feels that they have been very successful in the city as evidenced by all of the volunteers. The continuing emphasis that the city has placed on getting the neighborhood cleaned up, getting people back in their homes, and just restoring the area to its original condition.

However, Moore feels that work on the watershed area is quite a different story. He states, “Since the 9th when the overflow occurred, there has not been a single spade of dirt turned up there. It is a relatively small, but very steep watershed. It’s a little over half a square mile, but it is mountainous.”

“Back in the period of the forest fires, we could hardly pick up a newspaper without being told by someone that heavy rains, unusual runoff, and flooding would bring a reasonable expectation of something like this. But even with that being the case, nothing was done up there as a preventative basis to preclude or even reduce the effect; we are seeing down here now.”

“The California Conservation Corps has suggested that blockages of pierced steel planking be erected in the watershed area. Others have suggested using helicopters to go up and place old car bodies in the area. Moore states, “That would be a very inexpensive approach to the problem. The county could probably buy 200 cars for $10,000 and helicopter them in. It is very steep terrain, and you need to think about how you could get equipment in there.”

Moore’s reaction to all of the volunteer help is very positive. He commented, “Many of the people in these homes are elderly. They just could not have done the work themselves.”

Moore was pleased that the Cal State students would come out to help the flood victims. “Tell the Cal State kids, ‘Thanks very much.’ Cal State, the Boy Scouts, Norton Air Force Base — we couldn’t have made it without them. We certainly hope that our continued pressure on the county and the Flood Control officials is going to be successful so that all of their hard work is not for naught.”

**Residents of this home were forced to knock holes in the walls to drain out the mud.**

A Community Effort

I've spent almost my entire life in the city of San Bernardino, the past seventeen within four miles of the CSCSB campus. During those years, I heard little or nothing of Cal State—

Even while I was a senior in high school, I was surprised every time I found out one of my classmates was planning on attending classes out here at "Tumbleweed Tech." How then to go to. I was going to go to Valley College until I saw an ad in the Sun Telegram about CSCSB and decided I may as well try it. It was simple. I throw away a full scholarship to a small private school three days before classes were to start and needed a

Three years have passed by, and by no means am I sorry I ended up here. I lose the proximity to the hills, the natural surroundings and the small classes. Besides, where else could someone with a C in Freshmen Composition get a job as News Editor on the school newspaper?

The purpose of this editorial is not to reflect upon my educational highlights. No. I would like to give credit to a small group of people from Cal State who helped make the city of San Bernardino rise to the occasion of the local community and not an independent body floating on the outskirts. They showed the people of San Bernardino that Cal State IS part of the local community and not an independent body floating on the outskirts.

The local community has been aware of the talents of the Cal State Art Community through theatre, music and art presentations over the years, but those have had little contact with the rest of the school. When the flooding arrived, they got a good look when both students and administrators joined together and did a great service to both the campus and the residents of the flood ravaged neighborhood of north San Bernardino when they volunteered their efforts to help clean up the stricken area. By doing so, they showed the folks of San Bernardino that Cal State IS part of the local community and not an independent body floating on the outsiders.

I would like to extend my thanks in print to Wayne Hutchins and John Flathers for organizing the clean-up crew. To Dean Signud for showing us that administrators sweat and strain just like the rest of us; to President Pfau for taking time out to visit the workers and for donating $100 to the Serrano Village Council on behalf of the efforts of the students; and especially to all those who woke up Monday morning with sore muscles and blisters on their hands. Thanks.

— Mike Smith

A Writer's Personal Narrative

Last Sunday afternoon, I donned my grubbies and set out to visit the mudslide area to interview the college students who were working there. My husband and I drove to Wildwood Park where we had to check in at the Disaster Area Command Post. While we were being checked in and getting our identification cards, one of the workers at the command post called in to the disaster area on her radio to find out where the Cal State students were working.

Once we were all registered, we boarded a city bus that was being used to shuttle people into and from the area. We were dropped off about a block east of the area. As we walked toward Hampshire, we saw a mountain of dirt blocking the intersection. We had to skirt around the din and climb over several piles of sandbags to get down to the street level. Our entire visit was inundated with the roar of skiploaders and earthmovers.

It sounded like an old war movie you might see on television, and the area looked like a war zone.

Each side of the street was lined with two or three rows of sandbags piled three or four feet high. The houses looked abandoned. Most of the windows were boarded up, and all of the doors were reinforced with a pile of sandbags.

All of the landscaping was covered with mud except for a forlorn looking bush here and there.

I know six families who live on Hampshire and have visited them many times over the past thirteen years. But now I had trouble trying to recognize their houses. All of the familiar landmarks were gone.

Could something like this happen in such a seemingly quiet, stable neighborhood? It has not only happened once — this street has been flooded three times within a four week period.

Could something like this happen in such a seemingly quiet, stable neighborhood? It has not only happened once — this street has been flooded three times within a four week period.

As I sit here typing this article, I occasionally stop to listen to a radio newscast because it is raining, and it has been predicted that Hampshire Road will flood again tonight.

Could something have been done to prevent the property loss to the residents which is now estimated to have gone over the three million dollar mark? The inconvenience of having to leave with friends or in motels for an indefinite period, and the serious trauma that has been inflicted on these people?

Most of the residents seem to feel that the city has been very cooperative in helping them get relocated, clean up their property, and apply for federally funded loans. But all of that help is after the fact.

Could something have been done to prevent this whole scene of devastation that we witnessed on Sunday? Certainly the preventative measures that the city and the county are suggesting now should have been implemented as soon as possible after the fall fires denuded that area.

But more than that, that area should never have been approved for residential housing when the city government knew that it had been designed to be a flood control area.

I hope the city has learned its lesson; and that others will not have to suffer as the residents of Hampshire Road have had to suffer. One trip through a mudslide area was enough for me.

— Marilyn Heavilin

Volunteers Wanted

If you wish to join your fellow members of the CSCSB community in aiding San Bernardino flood victims contact John Flathers or Tim Hampé or call The PawPrint at 887-7497. You will be contacted when another relief expedition is planned.
Dorm Residents Defend Rights

Dormitory residents are more actively demanding the same rights afforded other tenants.

A U. of Michigan sophomore is suing both the university and a roofing company because he claims repairs to the roof of his dormitory caused noxious fumes to enter his room and disturbed his sleep. A Hofstra U. student has threatened to sue after an assistant director of maintenance confiscated a set of master padlocks and handcuff keys from his dorm while conducting roach extermination. The student says he is a professional escape artist and used the keys for his act. The maintenance staff member claims he thought the keys were burglary tools. The keys have been returned, accompanied by a letter of apology, but the student says he will sue if he gets no assurance that the university will not remove other articles from dorm rooms without prior notification.

The governing Board of Regents recently got involved in the issue of dorm residents rights by challenging dorm privacy regulations. The university's involvement got down to such details as emphasizing that if one resident consents to a room search, the search may not extend to the belongings of his roommate.

Over 200 residents of a Ferris, Mich. State College dormitory signed a petition protesting the college plan to paint their dorm. The students said the painting would disturb study habits, create a health hazard and possibly lead to larceny and damage of private property. The university proceeded with its plans, however.

"Silence is the most perfect expression of scorn." — George Bernard Shaw

MARIJUANA PETITION CIRCULATES

An initiative being circulated on campus is designed to place the matter before the people in the next election. The "Marijuana Initiative Statutory Amendment" provides that adults possessing, transporting or cultivating marijuana for personal use shall not be punished criminally by State commission established to study potential agricultural, economic and tax benefits of regulating marijuana. Measure does not affect existing state laws or federal laws regarding marijuana. Under the influence of marijuana from operating motor vehicles or engaging in conduct which may endanger others. Fiscal impact. Undetermined.

This is a chance to be directly involved in the legislative process. Signatures of registered voters must be submitted by February 27, 1980. The petition is being circulated in the Pub and Student Union area from 12 to 1 p.m. MTWTh and MWTh 4-5.

STUDENT CONSULTATION ON FACULTY EFFECTIVENESS

The policies of CSICSB provide for designated hours for students to consult with members of faculty personnel committees regarding faculty effectiveness. Students are invited to bring to the attention of these committees comments regarding their teachers. Scheduled times when the School Dean or committee members will be available are listed below. School office locations are listed. (For the Library, Room LC-128 and for Student Services, Room SS-114.)

**The Village Idiot**

Sadie Hawkins Dance — is the 29th of this month in Turlock Centennial Foundation for the book-length manuscript on California history received by December 31, 1980. The award is to encourage new writers. The author must be a resident of California and shall not have previously published a book. Minimum length of the manuscript must be 30,000 words.

It must include footnotes and bibliography and be in a form suitable for publication. The manuscript will be judged primarily on quality of research, logical development of the thesis, and literary skill.

There will be a panel of three judges: Oscar Lewis, well-known California historical writer; Gary Kurutz, head of the Sutro Library, San Francisco, and John E. Causin, professor of history at California State College, Stanislaus, and head of the Foundation. The University of California Press has agreed to consider the winning manuscript for publication.

The manuscript must be mailed to the Turlock Centennial Foundation, P.O. Box 1694, Turlock, CA 95380, no later than December 31, 1980. Inquiries regarding the award may be sent to the same address.

**The Shameless Old Lady**

"The Shameless Old Lady," a 1966 French film which is a major award winner of the National Society of Film Critics, will be shown here on Saturday, Feb. 23. The film will be presented at 7 p.m. in the Lecture Hall of the Physical Sciences Building.

Students and community members are invited to attend at no charge.

This French dialog picture with English subtitles is part of the 1980 Foreign Film Festival at Cal State, sponsored by the Department of Foreign Languages.

Based on the short story by Berthol Brecht, "The Shameless Old Lady," is a film which takes an amusing look at an 81-year-old grandmother who has decided to steal what is left of her life.

As far back as she can remember, she had given herself selflessly to her children and in later years to her husband. Now that he is gone, she becomes insatiably curious about the world around her.

She insists on living on her own, buys a new car, new clothes, and begins her "shameless assertion of life" much to her own delight and the shock and dismay of her family.

"The Shameless Old Lady" won the grand prix: Undetermined."
Workshop To Help

A two-weekend workshop designed to help educators cope with stress will be offered here beginning Friday, Feb. 22.

Titled "Stress in the Schools — Survival Skills for the Educator," the workshop is offered through the College's extension program.

It will meet Feb. 22-23 and March 7-8. The Friday sessions will be from 6:30-9:30 p.m. The Saturday morning meetings will be from 9 a.m.-4 p.m. Both will be held in Room 19 of the Library.

"Stress can be beneficial to an individual, but distress or stress overload is psychologically and physically very damaging," explained the course instructor, Dr. Renee Nummela, lecturer in Education.

CFA Demands Relief For Department Chairs

The Congress of Faculty Associations (CFA) has filed two actions with the Public Employee Relations Board against the Trustees because they participate in the affairs of employee organizations.

The first of these is a demand for injunctive relief which would force the Trustees to discontinue their assessment of Department Chairs because they participate in the affairs of employee organizations.

The second action is the filing of an Unfair Practices Charge against the Trustees because CSUC Presidents have threatened retaliation against Department Chairs who participate in organizational activities.

The employer's flagrant violation of the rights of Departmental Chairpersons is readily apparent upon suspension of Government Code Section 3580.3, which provides that Departmental Chairpersons shall not be deemed supervisory employees simply because they perform the duties of chairpersons.

CFA President Bill Crist underscored when CFA's actions were filed with PERB in Los Angeles.

Solo/Ensemble Festival

California School Band and Orchestra Assn. and Cal State Coordinators for the program are Keating Johnson, band director at the college, and Robert Sperry, band director at Capon High.

150 students from 11 area schools will participate in a solo and ensemble festival Friday, Feb. 22 at Cal State, San Bernar.indo.

The event is sponsored by the Southern Educators Cope With Stress

"Educators need to learn how to avoid or at least control stress. They should be able to plan their time and carry out their duties in a more organized way," the author continued.

"The workshop is designed to provide participants with interventions behaviors to control stress."

The class should be of special interest to special education teachers, regular education teachers, learning resource specialists, administrators, aides and parents.

Selected topics Dr. Nummela will cover include a lifestyle inventory to help spot the stressors in an educator's professional and personal world, the adoption of an individual stress reduction program that one can use with; and how to take time out for you.

Nursing Scholarship Program Accepting

Applications

Senator Robert Peasley (D-Riverside) announced that the state's Nursing Scholarship Program, administered by the Office of Statewide Health Planning and Development (OSHPD), is accepting applications for the 1980-81 academic year.

The program provides for the award of 10 scholarships annually to nurses preparing for leadership positions in clinical practice or nursing education.

Peasley pointed out:

"With a focus on primary care and geriatric nursing are encouraged to apply since manpower shortages have shown a special emphasis on these expand
ged nursing roles."

The scholarship provides tuition and a $200-$250 monthly stipend for registered nurses enrolled full-time in accredited bac
calorate or master's programs in nursing.

Applications in baccalaureate programs required to be in their junior or senior year and to have established plans to proceed with graduate nursing education for graduation.

Those applicants seeking assistance for their education may also be accepted by or enrolled in a general nursing program.

Application deadline is May 15. Registered nurses wishing to apply must submit an application form by the deadline.

The LSDAS was begun in 1970 at the request of law schools. Its purpose is to summarize information from college transcripts and other sources of the Law School Admission Test and other biographical information useful for evaluation by the law school admissions office.

If there are specific problems that cannot be resolved, write to the Law Program, New York Law School, 18940. Please do not telephone.

Charity Game Saturday

J. C. Penny vs. REMEN in a charity basketball game to be held in the Gym at 3 p.m. Saturday, February 23. Donations are $5 with all proceeds going to United Way. Come out to watch the fun and help others.

Why? Why don't we talk today?

I pass you in the hall
A nervous click as our eyes meet
Yesterday we sat and talked
An hour, perhaps, or less.
But today there isn't even a "Hello."
I know you think of me
I'm no longer in sight.
I think of you, too
Especially late at night.

Next week we'll share our
Thoughts again; only for an hour.
And explore each other
In a concrete way.
Perhaps; or less.

Hoping
I know I'm not the first —
Nor will I be the last.
To have my heart broken in two.

Reflections of your face
And the sound of your voice
Will be in my dreams forever.
For your place is secure
In the literature.

Yesterday we sat and talked
And the body becomes hot.

Love by named
The intimacies of man, love by name,
Must be in a continual game.

With a certain, set, tho' varied plot.
And with a certain, set, tho' varied plot.

The human heart is strange
Even while it can love
It can also be filled with hate.

T.H.

Law School Data

Backlogged

Applicants to law schools are advised that delays in enrollment in any of the new computer systems have resulted in a backlog of Law School Data Assembly Service (LSDAS) reports.

Law schools have been made aware of the problem through frequent updates on the status of the processing schedule.

Although law school administration may be somewhat slowed in making decisions, students can be assured that law schools will be prompt, and no individual will be penalized for late reports submitted by the LSDAS.

Because of the backlog, it is estimated that at the current processing rate, there will be delays for about the next eight weeks.

Staff have been greatly expanded and are working long hours to meet these problems.

Educational Testing Service (ETS), which administers the LSDAS, regrets any inconvenience to candidates.

The LSDAS was begun in 1970 at the request of law schools. Its purpose is to summarize information from college transcripts and other sources of the Law School Admission Test and other biographical information useful for evaluation by the law school admissions office.

If there are specific problems that cannot be resolved, write to the Law Program, New York Law School, 18940. Please do not telephone.

Assumption is the extreme form of censorship. — George Bernard Shaw

Poetry Column

Hoping
I know I'm not the first —
Nor will I be the last.
To have my heart broken in two.

But in spite of it all,
I must give up a call
I'm hopefully in love with you.

Was it something I said
Or something I forgot
That caused you to secretly part.
But whatever you do,
I just want you to know
You will forever own my heart.

For your place is secure
In the literature.

Written by my heart's endeavor.

Though you tore me apart
I bear you no ill will
For I refuse to see
All of the agony
I just block it out of my mind.

The heart is strange
Even while it can love
It can also be filled with hate.

Love is still very sure
Hoping, hoping it's not too late.

Love by named
The intimacies of man, love by name,
Must be in a continual game.

With a certain, set, tho' varied plot.
And with a certain, set, tho' varied plot.

The human heart is strange
Even while it can love
It can also be filled with hate.

Noon Concert

Vocal and instrumental music from the late 16th and early 17th centuries will be performed here in a noon concert Wednesday.

The guest artists will be the Collegium Musicum at the University of California, Riverside, under the direction of Dr. Fred Gable, professor of music.

The program is presented to the free, hour-long concert to be held in the Rectangular Hall of the Cal State Creative Arts Building.

The Collegium Musicum, founded in 1965, uses instruments which are replicas of late Renaissance instruments including the lute, viol, krummhorns, viola da gamba, recorder, racket and virginal. The sound projected is different than that of modern symphony orchestra.

"The Collegium Musicum attempts to recreate the original performance conditions of the earlier music: so that it sounds more like what was exactly in the Renaissance composers' envisioned," Dr. Gable explained.

The 18-member student group will be presenting a full-evening concert early in March in Riverside.

FRANKLY SPEAKING

WELL, MY DAUGHTER TELLS ME YOU'RE QUITE A JERK.

Friday—Movie
Intramural Participants Of The Week

Erv Caver and Mary Bosley

Erv Caver and Mary Bosley are this week’s entitled intramural participants. Erv and Mary tied for the honor when they rejected a win by forfeit. Their opponents were not available to play, due to illness. Instead of taking the forfeit win, they agreed to reschedule the match.

The final score of their match was 0-2, but the true winners were Erv and Mary.

Your tickets, good for a free sandwich and drink at The Pub, can be picked up at Joe Long’s office. Congrats!!

Lemire And Hoover Win

Knockdown, Dragout Fight

by John Flathers

Much improved Julia Hoover and the hustle of Paul Lemire proved to be too much for John Flathers and Terry Calloway in this close match. Lemire and Hoover won the first game 7-5, but took about half an hour to do it.

Flathers and Calloway bounced back, due to the awakened shooting eye of Terry Calloway, to win the second game 7-5. Lemire and Hoover won the rubber match, 7-5.

These were real fun games filled with “owp! Ouch! Ha! Ha! Too Hool!” and “SHOOT HOOV!!!”

A Day On The Slopes

by Laura Neumann

The old nursery rhyme “rain, rain go away come again another day” should be revised to “rain, rain come today.” To the brave students of Cal State San Bernardino’s ski class joining meant learning to be hot doggers on the slopes. Instead they have learned to wedge through ice, and wade through slush.

The first time at Holiday Hill, the Monday of this week, the females became hot skiers. What a let down that rain was washing away all the snow. Our luck that the snow started to stick just as we were going down the mountain.

Our fearless teacher Chris Grenfeld felt really sorry that snow conditions were pretty bad so he suggested that a trip to Snow Summit was in order. So Friday, February 8 was the big day for those who went.

Living in Redlands I had to get up at 5 a.m. to be at the Gym by 6. Once I got to the gym morale was high. The reason, no classes, and a whole day of fun skiing. Loading skis did not take long because everyone pitched in to help.

So eleven happy souls setled into a state van for a ride up the mountain. The ratio of male to female was pretty bad. 8 females to three males. One guy rode in the back enjoying the conversation of the females.

Traffic started to pile up. Cars and people were everywhere on the road. Lo and behold, it was a Highway Patrolman blocking traffic. Chris Grenfeld and Glen Albert thought we could just drive through since we were in a state van. We had to turn around and put on chains.

Plans changed as we got under way. We were now on our way to Snow Valley. Spirits were up and the snow looked great, although the wind was blowing.

Getting lift tickets was no problem, but ski adjusting was. When all the skis were ready it was look out everyone here we come!

First, we hit the beginner’s slope to warm up for the hard ones. By eleven, we were ready for the big times; so on to the top of the mountain.

With us was a fearless 18-year-old guy who had already conquered the mountain. The gentle man who will remain nameless was to be our guide at the top.

The ride on the lift was long, and the closer we got to the top the more we wanted to go down. Reaching the top at last we were ready to become hot skiers.

Believe it or not we made it down the mountain without falling once.

Our fearless guide was a little bewildered, for he had fallen going down for the first time.

The rest of the day it was great skiing. The wind had died down, and the sun felt good on the aching muscles.

Lunch was eaten and the rest of the afternoon was spent on the slopes. (None really saw how great the skiing was.)

Later on Thursday, Al Abidin and Rene Radapkiewicz defeated Erv Caver and Mary Bosley 7-1, and 7-2. Current standings are:

TEAM | W | L
---|---|---
A-Tokay and Mildred | 5 | 4
Hulrhins and Marks | 4 | 5
Lemire and Hoover | 6 | 3
Flathers and Calloway | 6 | 4
Caver and Bosley | 4 | 6

Intramural Volleyball action this week was exciting. A-Tokay beat Lethal Dose 2 out of 3 games. 16-14, 11-15 and 15-8. in the first game of the 7:00 league. A-Tokay staged an amazing comeback in the first game thanks to Jay Alvernson’s serve. A-Tokay went from 3-12 to 14-13 and Leslie Gilpin finished the Dose off, 16-14.

The other 7:00 game the 6-Packers swept the 3 game series from Tumbleweed Tech Turks (who were only playing with 5 people). 15-7, 15-7, and 15-12. Rob Wilson, Jeff Wawers and Greg Price were flawless with their sets and spikes to one another. Scott Burnett and Mike Smith’s play was responsible for his closeness of the third game.

The Dog and Puppies did not play due to a bye, but will be back next week.

All of us really enjoyed ourselves even if not many people showed up. The most of the ski classes that showed up was Tuesday and one Monday. So next time you other ski classes had better go for you will never know the fun you missed.

Another ski trip is planned for Friday in a few weeks.

Thanks to our ski instructor Chris Grenfeld for a really great day on the slopes.

We all became semi hot skiers.

A-Tokay Comes Back

by Russ Castle and Kirt Melvin

In other 8:00 games All in the Family swept three from Shandirt Crazyhouse 15-14, 15-9, and 15-7. Shandin watched a 14-3 lead completely disappear in the first game as All in the Family engineered a spectacular comeback with the help of Byron Wagoner’s serve.

In game two, Shandin tried to make a comeback of their own. Losing 10-3, Shandin with Dana Brimingham’s sterling play, pulled up to a 14-8 score. But after a long volley, All in the Family’s superiority took over enabling them to win, 15-8. Even with two losses, Shandin didn’t give up hope in the third game. But Jeff Healtch’s play helped All in the Family score a 15-7 sound victory.

Morongo was idle this week with a bye.

Charlesworth Makes Finals
by John Flathers

Scott Charlesworth beat Mike Ruvolo 21-8, 11-21, and 21-14 to win this two out of three semi-final match in racquetball singles. This advances Scott to the finals.

Mike Ruvolo, due to the double elimination arrangement, will play the winner of the Byron Waggoner-Mike Borshinski match for the right to avenge himself against Scott in the finals.

Rhodes Scores 22 In Losing Cause
by John Flathers

Tim Rhodes scored 22 of 27 points in his loss to Lloyd's Army, 53-27. The Rabbles, with 21 fouls, just never were able to zero in on the basket. At halftime the score was only 26-16 in the Army's favor but the Rabbles fell apart and allowed 23 second half points.

Rhodes was high scorer with 22 points and the Rabbles' Steve Bullington had 3 and 2 free throws respectively. Yes, Rhodes was the only Rabbles member to throw in a basket.

Bill Bain had 19 points for the Army, while Barry Richardson scored 14. Teammates Steve Hensley and Reise Taliaus both had seven points. Current standings are:

Friday 'A' League

Blacks Knights 2

Blacks Knights

3 points

The Rabble

2 points

Answers To Sports Quiz

1. What is the NBA record for most points scored by one team in a game?
2. What athletic conference did Arizona and Arizona St. come to the Pacific 10 from?
4. In 1970, Monday Night Football started. Howard Cosell and Don Meredith were commentators. Who was the third? (Hint: it’s not Frank Gifford.)
5. Who is the only American to win the Olympic Marathon since 1908?
6. Who is the only American to win the world chess championship?
7. Which NBA arena has the largest capacity?
8. What year was the designated hitter rule introduced in the American League?
9. Which team holds the NCAA team rushing record?
10. Who won the heavyweight Olympic title and gold medal in 1972 and 1976?

Aches & Pains Win, 48-44
by John Flathers

In Wednesday, open league action the Wounded Knees edged Aches and Pains 48-44. The Pains, unbelievably, were down 30-9 at halftime! But in the second half, a persistent offensive effort by Caffe and Fulton enabled the Pains to almost pull ahead. The Knees only scored eight second half points but threw in 10 free throws on 16 second half Paul.

Intramural events soon to come are Jacks on March 4, and Sports Trivia on March 12. See you there!!
**Bank of America**

**THE FINANCE MAJOR**

At Bank of America, we study student banking needs. And we've designed our Money Convenience System to help meet them.

**What's the Money Convenience System?**

It's easy services. For example, our free Money Transfer Service is great if you're getting money from home. With it, funds can be automatically transferred on a regular basis from one Bank of America checking or savings account to another, anywhere in California.

It's easy savings, checking and credit. We have a wide variety of plans to fit most needs. Including College Plan checking, which gives you unlimited check writing for just $1.50 a month for the nine-month school year. And no service charge at all for June, July or August.

We also offer Instant Cash to help you establish credit while you're still in school. It's available to students of sophomore standing or better. It's easy savings, checking and credit.
