Mudslide Brings Out

Cal State Volunteers

Students And Staff Aid Flood Victims

by Mike Smith

On Sunday, February 10, a group of 20 Cal State students and administrators volunteered to help clear away the mud and debris from the flood ravaged Hampshire Avenue neighborhood.

The Harrison Canyon flood basin filled with mud and spilled over into the residential area on January 9, 14, and 28 causing damage to 33 homes.

The crew was organized by Serrano Village Council President John Flathers and Assistant Housing Director Wayne Hutchins. The majority of those volunteering were Serrano Village Residents.

The first workers checked in at the Volunteer Headquarters at Wildwood Park at 8:30 a.m. The clean up supervisors kept all those from Cal State together on the same projects. The first task assigned to the group was the clearing of air conditioning units buried beneath the mud. During this operation, Cal State senior John Conboy, made a few of his coworkers nervous when he cut through a 220 volt line. Luckily no one was injured.

Following the air conditioning units, the sandbag detail. Both sides of Hampshire are lined with thousands of these bags, to say nothing of the ones closer in to the homes. Although Cal State does not offer any courses in sandbag filling, the students and staff managed to add several hundred more to the collection.

More of the afternoon saw the college crew removing mud from an inundated backyard on Hampshire Ave. Mud was shoveled in wheelbarrows which were coaxed up a hill and then dumped. A skip loader picked up the accumulated muck until it broke down late in the afternoon. Associate Dean of Students Doyle Stansel proved to be quite adept at handling his wheelbarrow. More than a foot of mud was cleared from the yard.

College President John M. Pfau visited the weary workers as they were putting the finishing touches on their landscaping work. President Pfau was informed of the work the volunteers had performed and was quite impressed. Wayne Hutchins announced to the group at the end of the day that President Pfau had contributed $100 from the President’s Club Fund to the Serrano Village Council for the efforts at disaster control in the Harrison Canyon area.

The President’s Club Fund was established by private citizens in the area to show their support for the college. Contributions are made on an annual basis and the fund is designed to allow the President of the College discretion in disbursement to promote the overall welfare of the campus community.

Some of the volunteers expressed dismay at the fact that not all those who signed up to work showed up. But according to the City workers in charge of volunteers, if Cal State had more people, they would have probably just gotten in the way. Co-sponsor John Flathers agreed.

"Take a look around. You don’t see anybody sitting down and watching you. What we’ve lacked in numbers we’ve made up with in effort. Everyone here today has put in a lot of work.”

Many from the Cal State crew had already done work in the stricken neighborhood and had seen it when it was much worse. But for those who were seeing the site for the first time, it made quite an impression. The barren landscape and sandbag walls reminded many of scenes from war movies. It also reinforced their commitment to help. "If more people saw what we have seen today, they’d have to turn volunteers away", one Cal State co-ed was heard to say.

Volunteers were shuttled back to the headquarters at Wildwood around 4:30 p.m. and turned in their shovels. Coupons for a free hamburger and fries from McDonald’s were given to all those who had worked during the day.

Tentative plans are being made for another group from Cal State to be formed to work on the inside of the homes. Interested persons should watch The PawPrint for further information.

Editor’s Note: Over the weekend, as The PawPrint goes to press, heavy rainfall has caused additional flooding which resulted in evacuation of the Hampshire Avenue and Sonora Avenue neighborhood.
The Students

Meg Greene is a freshman and a member of the Village Council. She voted for the helping-hand program because she felt it was a good idea for the school to get involved, and she knew the people really need help. Meg commented, "I just don't understand how they could build houses with the possibility of having floods like this."

Chris Barr is a sophomore at Cal State. He simply stated, "I came because people needed help."

Jay Norwell works full-time for Cal Trans and she knew the people really need help. It was a good idea for the school to get involved, commented. "I just don't understand how they could build houses with the possibility of having floods like this."

"I am happy to see that the whole dorm complex is doing something, not just a specific group." Jay has an empathy for the victims because he used to live in Yuba City and can remember the people talking about the flood of 1955. "The people always talked about the hardships they went through, and I guess it is the same thing here."

The Original Three

The Original Three, Russ Castle, Philip Tardy, and John Conboy, were the only students there at 8:15. Philip Tardy was one of the Original Three who arrived in the area at 8:15. Philip felt a duty to come out and help. He explained, "When my father was stationed in Mississippi, there was a hurricane. Everyone got together to help, even the people from the outside area, so I felt that I should help here."

Philip is a freshman at Cal State, majoring in Bio-chemical Engineering. Philip has hoped for a larger turnout from the college. He noted, "I think it's pretty sad that we have only 17 people from all of the dorms. We had a Casino night last night, so I guess with that and mid-terms, people just didn't make it." Philip is planning to encourage more people to come out in a couple of weeks to help clean the interior of the houses.

John Conboy, also of the original three, plans to help clean out the houses when the students come back again. He stated, "We might as well be out here; otherwise, we would just be sitting around the dorms watching television. If my house were here, I would want somebody to help me. At the college even though we aren't close to the community, we are still a part of it. If they (the community) need help, we should respond."

John is a senior, majoring in Economics.}

as a biologist and will start working on his masters degree at CSCSB in the spring. He graduated from UC Davis. Jay came out to help because he agreed with what the students were trying to do. He said, 'Heaven knows that these people have been through a lot here, and this is kind of a nice way for students to do something altruistic and service oriented.'

"I am happy to see that the whole dorm complex is doing something, not just a specific group." Jay has an empathy for the victims because he used to live in Yuba City and can remember the people talking about the flood of 1955. "The people always talked about the hardships they went through, and I guess it is the same thing here."

The Administrative Organizer

CSCSB's Assistant Director of Housing Wayne Hutchins, co-organizer of Sunday's program of community help stated, "I think this is a good opportunity for the college to make a contribution. There are a lot of people in the community who aren't even aware of the housing operation at Cal State. It is good to be able to make an impact on the community.

Hutchins noted that the Semiava Village Council has appropriated $25 to purchase a community service award plaque for 1980 which will stay with the residence hall that wins it. Hutchins is keeping a log of the names of students from each residence hall who have helped out in the mudslide area. It is Hutchins' hope that the council will be able to continue with the service award program each year.

Apparently the mudslide victims were not the only ones who were reaping benefits from Sunday's program. Hutchins noted, "The number of students today isn't that great, but the quality is. I stressed the fact that we stay together because this way we are getting to know one another. We have had a great time. It has been a lot of hard work, but we are making some good friends."

The disaster area made an impact on Hutchins. "The situation out here is overwhelming. I have never seen anything like this. It is kind of like a blizzard of snow. It's mud, and it doesn't melt away."

The Dean

Dean Stansel joined the workers early in the afternoon. He noted, "We have a lot of hard-working people here. Most of them have been working here since 9 a.m. That speaks very well of them. I have a feeling there are going to be a lot of tired muscles and blisters tomorrow."

Dean Stansel had been in the area earlier to help some friends. "When I came down after the second storm and saw how bad it was, I couldn't believe it. To be standing on top of the mud and looking down at the people in the street just blew my mind. The photographs in the paper only give you part of the picture."

Interviews by Marilyn Heavilin
The Student Organizer

John Flathers, a senior majoring in Administration is the chairperson of the Serrano Village Council. He and Wayne Hutchins were the organizers of Sunday's helping-hand program. John has helped out victims of disasters before. He is from the Twenty-Nine Palms area where flash floods are a common occurrence. John stated, "I feel really good about doing this. They (the city) needed volunteers, and since we have a ready source of manpower, we thought it would be a good idea to help out."

Wayne Hutchins fills in President Pfau on the clean up operation as workers continue to fill sandbags.

The President

President Pfau came into the area to cheer the students on. He stated, "I think it is just marvelous that the kids would come down like this. The people who live in this area are in desperate shape. They are very dependent on people to help them. I think it is just great that our students are willing to volunteer to help. I want to give them whatever encouragement that I can."

Dr. Pfau lives just a few blocks north of the disaster area. He noted, "My house is not in immediate danger. A couple of my neighbors are having problems though."

"Dr. Ross Ballard, the CSCSB Health Center physician, lives just two houses to the north of me. The ground is eroding away, and his driveway is just hanging out half way in mid-air."

Dr. Pfau felt that the city and the county were trying to deal with the problem adequately. He said, "Down here where there is mud right inside the houses, the authorities must take precedence. I don't know that the authorities have had much chance to think about what they are going to do up in the canyon."

"They're going to have to do something up there or otherwise we will just be getting more of these mud washes down here. The farther up the canyon you go, the more you realize the basic source of the problem."

The Residents

Carol Moore is a graduate student at CSCSB. She and her husband, Major Frank Moore, live on Hampshire Road. Fortunately, they did not receive too much damage to their home. However, they have moved out of their home and are living in a motel.

A Disaster Relief Committee of five people was formed right after the damage that occurred on January 14. The committee needed a spokesman, and Frank Moore volunteered to be the spokesman. The committee's activity has been to keep pressure initially on the city and now on the county to rectify the situation on Hampshire Road, help the residents clean up, and to solve the problem up in the watershed which is where the problem originates.

Moore feels that they have been very successful in the city as evidenced by all of the volunteers. The continuing emphasis that the city has placed on getting the neighborhood cleaned up, getting people back in their homes, and just restoring the area to its original condition.

However, Moore feels that work on the watershed area is quite a different story. He states, "Since the 9th when the overflow occurred, there has not been a single spade of dirt turned up there. It is a relatively small, but very steep watershed. It's a little over half a square mile, but it is mountainous."

"Back in the period of the forest fires, we could hardly pick up a newspaper without being told by someone that heavy rains, unusual runoff, and flooding would bring a reasonable expectation of something like this. But even with that being the case, nothing was done up there as a preventative basis to prevent or even reduce the effect we are seeing down here now."

The California Conservation Corps has suggested that blockages of pierced steel planking be erected in the watershed area. Others have suggested using helicopters to go up and place old car bodies in the area. Moore states, "That would be a very inexpensive approach to the problem. The county could probably buy 200 cars for $10,000 and helicopter them in. It is very steep terrain, and you need to think about how you could get equipment in there."

Moore's reaction to all of the volunteer help is very positive. He commented, "Many of the people in these homes are elderly. They just could not have done the work themselves." Moore was pleased that the Cal State students would come out to help the flood victims, "Tell the Cal State kids 'Thanks very much.' Cal State, the Boy Scouts, Norton Air Force Base — we couldn't have made it without them. We certainly hope that our continued pressure on the county and the Flood Control officials is going to be successful so that all of their hard work is not for naught."

Fire hydrant dug out at Sonora and Hampshire.
A Community Effort

I've spent almost my entire life in the city of San Bernardino, the past seventeen within four miles of the CSCSB campus. During those years, I heard little or nothing of Cal State. Even while I was a senior in high school I was surprised every time I found out one of my classmates was planning on attending classes out here at "Tumbleweed Tech". How then miles of the CSCSB campus. During those years I heard little or nothing of Cal State IS part of the local community and not an independent body floating on the outskirts.

The purpose of this editorial is not to reflect upon my educational highlights. No, I would like to give credit to a small group of people from Cal State who helped make the city of San Bernardino take notice of this institution of Higher Education nestled on the fringes of Mayor Bob's Kingdom.

The local community has been aware of the talents of the Cal State Art Community through theatre, music, and art presentations over the years, but they have had little contact with the rest of the school. Well, they got a good look when both students and administrators joined together and did a great service to both the campus and the residents of the flood ravaged neighborhood of north San Bernardino when they volunteered their efforts to help clean up the stricken area. By doing so, they showed the folks of San Bernardino that Cal State IS part of the local community and not an independent body floating on the outsiders.

I would like to extend my thanks in print to Wayne Hutchins and John Flathers for organizing the clean-up crew, to Dean Snow for showing us that administrators sweat and strain just like the rest of us, to President Pfau for taking time out to visit the workers and for donating $100 to the Serrano Village Council on behalf of the efforts of the students: and especially to all those who woke up Monday morning with sore muscles and blisters on their hands. Thanks.

Mike Smith

A Writer's Personal Narrative

Last Sunday afternoon, I donned my grubbies and set out to visit the mudslide area to interview the college students who were working there. My husband and I drove to Wildwood Park where we had to check in at the Disaster Area Command Post. While we were being checked in and getting our identification cards, one of the workers at the command post called in to the disaster area on her radio to find out where the Cal State students were working.

We were dropped off about a block east of the area. As we walked toward Hampshire we saw a mountain of dirt blocking the intersection. We had to skirt around the dirt and climb over several piles of sandbags to get down to the street level. Our entire visit was inundated with the roar of skiploaders and earthmovers. It sounded like an old war movie you might see on television, and the area looked like a war zone.

Each side of the street was lined with two or three rows of sandbags piled three or four feet high. The houses looked abandoned. Most of the windows were boarded up, and all of the doors were reinforced with a pile of sandbags. All of the landscaping was covered with mud except for a forlorn looking bush here and there.

I know six families who live on Hampshire and have visited them many times over the past thirteen years. But now I had trouble trying to recognize their houses. All of the familiar landmarks were gone.

Could something like this happen in such a seemingly quiet, stable neighborhood? It has not only happened once - this street has been flooded three times within a four week period. As I sit here typing this article, I occasionally stop to listen to a radio newscast because it is raining. And it has been predicted that Hampshire Road will flood again tonight.

Could something have been done to prevent the property loss to the residents which is now estimated to have gone over the three million dollar mark. The inconvenience of having to live with friends or in motels for an indefinite period, and the serious trauma that has been inflicted on these people?

I hope the city has learned its lesson well, so that others will not have to suffer as the residents of Hampshire Road have had to suffer. One trip through a mudslide area was enough for me.

Marilyn Heavilin

Volunteers Wanted

If you wish to join your fellow members of the CSCSB community in aiding San Bernardino flood victims contact John Flathers or Tim Hamre or call The PawPrint at 887-7497. You will be contacted when another relief expedition is planned.

Marilyn Heavilin
Dorm Residents Defend Rights

Dormitory residents are more actively demanding the same rights afforded other tenants.

A U. of Michigan sophomore is suing both the university and a roofing company because he claims repairs to the roof of his dormitory caused noxious fumes to enter his room and disturbed his sleep. A Hobart U. student has threatened to sue after an assistant director of maintenance confiscated a set of master padslocks and handcuffs from his room while conducting roach extermination. The student says he is a professional escape artist and used the keys for his act. The maintenance staff member claims he thought the keys were burglary tools. The keys have been returned, accompanied by a letter of apology, but the student says he will sue if he does not give some assurance that the university will not remove other articles from dorm rooms without prior notification.

The students of the State Board of Regents recently got involved in the issue of dorm residents rights by clarifying dormitory privacy regulations. The Board's involvement got down to such details as emphasizing that if one resident consents to a room search, the search may not extend to the belongings of his roommate.

Over 200 residents of a Ferris, Mich. State College dormitory signed a petition protesting a college plan to paint their room.

The students said the painting would disturb study habits, create a health hazard and possibly lead to harassment and damage of private property. The university proceeded with its plans, however.

"Science is the most perfect expression of scorn." — George Bernard Shaw

Student Consultation On Faculty Effectiveness

The policies of CSCSB provide for designated hours for students to consult with members of faculty personnel committees regarding faculty effectiveness. Students are invited to bring to the attention of these committees comments regarding their teachers. Scheduled times when the School Dean or committee representatives will be available are listed below. School office locations are listed. (For the Library, Room LC-128 and for Student Services, Room SS-114.)
EDUCATORSCOPEWITHSTRESS

"Educators need to learn how to avoid stress overload or to systematically confront its toxic effects," she continued.

"The workshop is designed to provide participants with interventions behaviors to control stress."

The class should be of special interest to special education teachers, classroom teachers, learning resources specialists, administrators, aides and parents.

Selected topics Dr. Nummela will cover include: a lifestyle inventory to help spot the stressors in an educator's professional and personal world; the adoption of an individual stress reduction program that one can live with; and how to take time out for you.

Nursing Scholarship Program Accepting Applications

Senior Robert Presley, ID (Riverside) announced that the State's Nursing Scholarship Program, administrated by the Office of Statewide Health Planning and Development (OSHPD), is accepting applications for the 1981-82 academic year.

The program provides for the award of $2,000 scholarships to nurses preparing for leadership positions in clinical practice or nursing education. Presley pointed out that the program has a focus on primary care and geriatric nursing are encouraged to apply since manpower studies have shown a special emphasis on these expanding nursing roles. The scholarships provide tuition and a $2,000-$2500 monthly stipend for registered nurses enrolled full-time in accredited baccalaureate or master's programs in nursing.

Applicants in baccalaureate programs are required to be in their junior or senior year and to have made established plans to enter graduate nursing education immediately after graduation. Those applicants seeking assistance for master's programs in nursing must be either accepted by or enrolled in a graduate nursing program. Nursing Scholarship Program Accepting Applications Applications Deadline is May 15. Registered nurses wishing to apply must submit an application form by Shirley Carlin, RN, MSN, Coordinator, Nursing Scholarship Program, OSHPD, Capitol Mall Suite 120 Sacramento California 95614 or by telephoning (916) 322-5566.

LaTimes Student Forum

Information regarding the LaTimes letter printed below will be printed later.

Attention: PR Director

On April 16 and again on October 15, 1980 the Display Advertising department of the Times is planning to publish a special feature called Student Forum. This section will be devoted to motivating students' thoughts on current political, economic and social issues.

Editorial copy will consist of articles which are the exclusive work of Southland college and university students. Submissions may be selected by the writer. The stories submitted to Student Forum will be reviewed and selected by a panel of judges.

The school will choose the most appropriate ones on the basis of originality, coherence, depth of thought and overall quality.

The articles selected will run as written by the students themselves. By-line, including name of school, age of student and major will run with each article. Special recognition will be given to winners.

Perhaps your school is interested in participating through its journalism classes, other classes or on a general basis. Would you please indicate your desire below and return your response promptly to me.

George Ciampi
Special Features Manager, LA Times

Law School Data Backlogged

Applicants to law schools are advised the delays in receipt of their course by mail or facsimile have resulted in a backlog of Law School Data Assembly Service (LSDAS) reports.

Law schools have been made aware of the problem through frequent updates of the status of the processed schedule.

Although law school admission office may be somewhat slowed in making the decisions, students can be assured the files will be reviewed and no individuals will be penalized for late reports delayed in the LSDAS database.

Because of the backlog, it is estimated that, at the current processing rate, there will be delays for about the next eight weeks. Staff have been greatly extended and are working long hours to meet these delays. Educational Testing Service (ETS), which administers the LSDAS, regrets any inconvenience to candidates.

The LSDAS was begun in 1970 at the request of law schools. Its purpose is to standardize information from candidate transcripts across the Law School Admission Test and other biographical information used for evaluation by the law school admission office.

If there are specific problems that cannot wait, please write to Law Programs, Newtow, Pa. 18940. Please do not telephone.

Charity Game Saturday

J C Perry vs. REN in a charity basketball game to be held at the Gym at 2 p.m. Saturday. February 23. Donations are fa with all proceeds going to United Way. Please come to watch the fun and help others.

Ceramics from the permanent collection. The exhibition of over 40 ceramic objects selected from the Museum's permanent collection dates from February 24 in the Creative Art Gallery on the first level of the Museum's Ahmanson Gallery. The exhibition illustrates the development of the ceramic art and porcelain from the 17th century in Europe and America.

Highlights of the exhibition are a pair of vases from the famous Swan of Boston created for Count Bruhl by the eminent sculptor Jean-Baptiste Collin, a pair of English Worcester "soft paste," and Cambodian, porcelain, baskets produced during the 1760s and to be one of the finest specimens of this difficult medium. Samples of the work of Gerda and Otto Natzer, the renowned husband and wife team of ceramic artists who spent the post-World War II home ceramic renaissance. Selections from the permanent collection at the John Wise Collection.

Twenty-three unusually shaped Pre-Columbian art, the discovery of porch, and culture objects in the Museum's John Wise collection are on view throughout April in the Secret Garden on the Plaza Level of the Museum's Ahmanson Gallery. The selection, representing each year pre-Columbian art ranging from 300 B.C. to 1470 A.D. reveals not only the diversity of a man's life, but its many beliefs about it. Many elaborate costumes were worn in mummification ceremonies such as the "Burial Mass," a 100 B.C., 300 A.D. ritual. By taxidermizing, a pair of these objects are in the text, an alfalfa fiber made from the ground for in-roads into the soil. The most of double-headed spears, with feathers and feathers, indistinguishable by their chin whiskers, symbols of both human fertility and fertility. In contrast to the human mummies. The Inca feather art is not only the offshoot of the highly specialized, esteem employed by the Inca, the Inca. The sun god, symbol of the culture, is rendered in a magnificent mosaic of brilliantly col-

Intramural Participants Of The Week

Erv Caver and Mary Bosley

Erv Caver and Mary Bosley are this week’s featured Intramural participants. Erv and Mary tied for the honors when they rejected a win by forfeit. Their opponents were so desperate to win, they accepted the forfeit. Instead of taking the forfeit, they agreed to reschedule the match.

The final score of their match was 0-2, but the true winners were Erv and Mary.

Your tickets, good for a free sandwich and drink at The Pub, can be picked up at Joe Long’s office.

Lemire And Hoover Win

Knockdown, Dragout Fight

by John Flathers

Much improved Julia Hoover and the hustle of Paul Lemire proved to be too much for John Flathers and Terry Calloway in this close match. Lemire and Hoover won the first game 7-5, but took about half an hour to do it.

Flathers and Calloway bounced back, due to the awakened shooting eye of Terry Calloway, to win the second game 7-5. Lemire and Hoover won the rubber match, 7-5.

There were real fun games filled with "woof! Ouch! Ha! Ha! Tee Hoo!" and "SHOOT HOOV!!"

A Day On The Slopes

by Laura Neumann

The old nursery rhyme "rain, rain go away come again another day" should be revised to "rain, rain come today." To the brave students of Cal State San Bernardino’s ski class joining meant learning to be hot doggers on the slopes. Instead they have learned to wedge through ice, and wade through slush.

Traffic started to pile up. Cars, trucks and people were everywhere on the road. Lo and behold, it was a Highway Patrolman blocking traffic. Chris Grenfeld and Glen Albert thought we could just drive through ice, and wade through slush.

The first time at Holiday Hill, the Monday, February 18th trip went well. Several of the freshmen became hot skiers. What a let down that rain was washing away all the snow. Our luck that the snow started to stick just as we were going down the mountain.

Our fearless teacher Chris Grenfeld felt really sorry that snow conditions were pretty bad so he suggested that a trip to Snow Summit was in order. So Friday, February 8 was the big day for those who went.

Living in Redlands I had to get up at 5 a.m. to be at the Gym by seven. Once I got to the gym morale was high. The reason, no classes, and a whole day of fine skiing. Loadin skills did not take long because everyone pitched in to help.

So eleven happy souls settled into a state van for a ride up the mountain. The ratio of male to female was pretty bad. 8 females to three males. One guy rode in the back enjoying the conversation of the females.

Traffic started to pile up. Cars and people were everywhere on the road. Lo and behold, it was a Highway Patrolman blocking traffic. Chris Grenfeld and Glen Albert thought we could just drive through ice, and wade through slush.

Getting lift tickets was no problem, but ski adjusting was. When all the skills were ready it was look out everyone here we come! First, we hit the beginner’s slope to warm up for the hard ones. By eleven, we were ready for the big times; so on to the top of the mountain.

With us was a fearless 18-year-old guy who had already conquered the mountain. The gentle man (who will remain nameless) was to be our guide at the top.

The ride on the lift was long, and the closer we got to the top the more we wanted to go down. Reaching the top at last we were ready to become hot skiers.

Believe it or not we made it down the mountain without falling once.

Our fearless guide was a little bewildered, for he had fallen going down for the first time.

The rest of the day it was great skiing. The wind had died down, and the sun had felt good on the aching muscles. Lunch was eaten and the rest of the afternoon was spent on the slopes. (None really saw how close, well played match, Lemire and the hustle of Paul Lemire were).

Intramural Volleyball action this week was exciting. A-Tokay beat Lethal Dose 2 out of 3 games. 16-14, 11-15 and 15-8. In the first game of the 7:00 league. A-Tokay staged an amazing comeback in the first game thanks to Jay Alverson’s save. A-Tokay went from 3-12 to 14-13 and Leslie Gilpin finished the Dose off, 16-14.

The other 7:00 game the 6-Packers swept the 3 game series from Tumbleweed Tech Turkeys (who were only playing with 5 people). 15-7, 15-7, and 15-10. Rob Wilson, Jeff Wawets and Greg Price were flawless with their sets and spikes to one another. Scott Burnett and Mike Smith’s play were responsible for his closing of the third game.

The Dog and Puppies did not play due to a bye, but will be back next week.

In the 8:00 league the screw up was dominated by the Best Team in all three games 15-1, 15-8 and 15-4. Steve Hensler and Rene Radzkewycz defeated Erv Caver and Mary Bosley 7-1, and 7-2. Current standings are:

**Intramural Sports**

**Team** | **Game 1** | **Game 2** | **Game 3** | **Final Score**
---|---|---|---|---
A-Tokay | 15-7 | 15-8 | 15-7 | 45-20
Lethal Dose | 10-15 | 14-13 | 16-14 | 40-42
Morongo | 15-10 | 15-7 | 15-7 | 45-24
Lethal Dose | 15-7 | 15-8 | 15-7 | 45-20
Tumbleweed Tech Turkeys | 15-7 | 15-7 | 15-10 | 45-24

In the closest game of this B-League Basketball season, Paul Esposito and the B-Bombers were nixed out by the B.Y.E. Clippers in overtime action 40-38 in an overtime game. Both team's shooting was cold in the first half as B.Y.E. managed only a 15-15 lead at halftime. But Esposito, the Bombers', and Johnson's, of B.Y.E., both switched on in the second half to sink four buckets each. This sparked both teams to 35-35 tie at the end of regulation time.

In the overtime period Ted Kueg scored 3 of his 5 points for the Bombers, but B.Y.E. went two better to win 40-38. Esposito led all scorers with 14 points and teammate John Heeren had seven. Oliver and Johnson both scored 10 for B.Y.E.

In a battle of iniquity, Shandin Crazymoac outlasted the Celtics 18-11. After Shandin figured out what caused the funny men in stripes to blow their whistles, they were able to get the ball down the court and score every now and then. The Celtics were able to get the ball down the court but either would miss their shots or have the ball stolen. Shandin's first figures: Price — 21. Placencia 14, Arner 14. and Alio with 12. Sanctified for Osmosis. Gary Stewart scored high for the Wallbangers with 10. and Jack McMahon had 7.

In the last 'B' league game, the Clippers slandered Morongo 67-30.
