degrading the injured vehicle and were unloading equipment from the rear of the car and in an attempt to locate some tools so they could be repaired. They didn't realize, however, nothing short of a portable, fully-equipped garage could solve their problem.

When the truck hit the curb, both front wheels flew off along with the brake drums, which shattered upon impact. Brake shoes were lacing at odd angles along the vehicle route and broken glass and twisted metal littered the law.

Still, attempts were made by the two men to pull the front of the truck and somehow replace the shattered drums and flat tires.

While the scenario continued to unfold, I squeezed off a few frames of the damage.

Finally, the campus police arrived and instead of apprehending the two persons involved in the accident, one

I looked down State College Parkway, from my vantage point on the East side of the Creative Arts Building, and saw a brown plax screaming toward the T at the street's end. It was about 7 p.m. on Tuesday, Sept. 30 and a pickup, traveling apparently over 50 mph hit the curb, somehow consuming the contents of a 20/20), was depleted, one of the passengers threw the container.

I looked down State College Parkway to my house to collect my camera flash. When I returned to the scene, the two men were still.

officer started questioning me about who I worked for and informed me that pictures of the occupants and the vehicle could not be published.

Then the three officers went to look at the truck and proceeded to question the two men.

After determining who the driver of the vehicle was, the suspect was given a sobriety test, which, in my opinion, he handily failed.

Additional questions were posed to the driver and then he was arrested. During the arrest, the suspect was searched and then the officer spent about 5 minutes trying to handcuff the man. The man apparently had difficulty getting both hands to the same spot in space at the same time. He finally succeeded and then transported the suspect to county jail.

The other man determined that repairs were futile and removed the equipment into the car. He was not arrested and the truck was later towed away.
Anti-Nuke the Foo-Birds

Movement

A new campus organization has been created to support a move on the part of anti-techno-logists to outlaw the legendary, prolific, monodaculous and cute Foo-Birds.

Such a move can only be achieved as part of an ongoing effort to remove nature’s gifts from the earth.

Such an action is inconsistent with history and tradition.

What would the world be without the Foo-Birds to continually insert their philosophical evaluation of human bigness?

Besides, the EPA would frown on the use of Nukes and the paper work generated would cause a great deal of work that could be accomplished by simply swallowing one’s own mistakes and wipping off what the Foo-Birds leave.

Penguins in Bondage

Reports have reached the PawPrint concerning an insidious turn of events whereby the ubiquitous, revolting Russian Plot to enslave and manipulate the important Emperor Penguin into weapons of destruction.

By JACK ANDERSON

WASHINGTON - The power of the presidency is the most potent force in American politics today. Here is how Jimmy Carter used this power a few days ago.

The Senate was about to reject the president’s appeal to send nuclear fuel to India. This would have been a personal defeat on the eve of the election and would have made him look bad.

So the president took a few minutes from his campaign to telephone several senators from aboard Air Force One. The call was impressive.

It was to get a call from the president of the United States from on high. It also helped to talk back to him.

Then Carter ordered the big guns in his administration to bombard Capitol Hill.

The most effective were Secretary of Defense Harold Brown and incoming Interior Secretary James Watt.

They turned on the pressure behind the scenes.

Brown got the credit for swaying the vote of Sen. Robert Stafford, R-Vt.

But Watt, with the help of former Interior Secretary-Elect Muskie and Secretary of Defense Harold Brown, who had spoken with the president, was able to get a call from the president of the United States from on high. It also helped to talk back to him.

The president then ordered the big guns in his administration to bombard Capitol Hill.

The three were then able to influence the senator to vote with the president.

The White House isn’t sure exactly who convinced Sen. Robert Stafford, R-Vt., to vote his way. But the president had made all the correct moves and was able to get a call from the president of the United States from on high. It also helped to talk back to him.

The president then ordered the big guns in his administration to bombard Capitol Hill.

The three were then able to influence the senator to vote with the president. But Watt, with the help of former Interior Secretary-Elect Muskie and Secretary of Defense Harold Brown, who had spoken with the president, was able to get a call from the president of the United States from on high. It also helped to talk back to him.

CSUC Saves Energy Costs Still Soar

LONG BEACH -- Strenuous conservation efforts by The California State University and Colleges resulted in a 16.7 percent energy consumption decrease in 1979-80, newly compiled figures showed today Chancellor Glenn S. Dumke said the energy cutback far exceeded a goal of 10 percent set for the fiscal year which ended June 30 and represents nearly $3.8 million in utility cost avoidance.

The long-term objective for the 18 campuses is a 40 percent drop in gas, oil and electrical consumption compared to 1973-74. This is set for 1983-84.

Chancellor Dumke praised CSUC Presidents, campus energy coordinators, students and staff for bringing about the reductions. But he noted that the energy savings, substantial as they are, still do not offset continuing rate hikes by utilities serving the campuses.

"I think this," he said, "is even more important toIntensity consumption.

S. N. Choudhuri, CSUC Energy Management Engineer, said a major program to replace about 750,000 standard 40-watt fluorescent lamps with 35-watt energy efficient tubes was virtually completed in 1979-80.

This program, coupled with such projects as time-clocking of exhaust fans, air handlers, compressors, pumps and other equipment, resulted in a 18.1 percent drop in electrical consumption during the year.

CSUC campuses achieved a 21.05 percent gas and oil consumption reduction, and heating improvements in boiler thermal efficiency, shortening preheating periods, and installing rigid thermal controls.

The California State University and Colleges has entered into a contractual arrangement with Control Data Corporation for what is believed to be the largest computer installation for instruction and administration ever undertaken by an academic institution.

The project will require two years to complete and will significantly increase the level of computer sophistication and the rate of computer technology in the educational process.

We project the number of students using computers, about 74,000 in 1976-77, will increase to 166,000 in 1981-82. Putting it another way, at least one out of every two of our students will be using computers for instructional purposes, according to our most conservative estimates.

Modernizing our computing resources, it will have a major positive effect on the approaches to learning within The California State University and Colleges, Computing, "power," an index of speed and memory capacity of which data can be electrically processed will multiply at least 15 times on every campus. Additionally, the campuses will benefit from the capabilities permitting the CSUC to share computer applications with over 40 institutions across the country having similar installations.

These range from the University of Arizona to the University of Wyoming and Colleges, which for several years has been a resource tool for courses in the physical sciences, including computer science and engineering.

The bishop, who is exceedingly important in instructional programs in business, management, agriculture and the social sciences, it is being used in such curricula as commercial art, architecture -- even philosophy, when the project is completed the number of terminals for student access to computers will be increased from 1,751 to 2,747.

New terminals for administrative use will provide rapid access to timely information on which to base decisions. Computing "power," an index of speed and memory capacity, at which data can be electrically processed will multiply at least 15 times on every campus. Additionally, the campuses will benefit from the capabilities permitting the CSUC to share computer applications with over 40 institutions across the country having similar installations.

The Counseling Center will be offering a group to veterans, students and their families. The group will focus on the practical question of how to cope with challenges posed by stress.

"You'll find constructive ways to change your thinking about stress and how you think about yourself," Dr. Phillip Zimbardo, professor of political science here, was recently honored as one of 20 "Citizens of Achievement" by the League of Women Voters and the National Coalition for Men.

The San Bernardino league chapter is currently celebrating its 25th anniversary.
Delt Yount, Resident Assistant for Shandin, comforts one of his horny residents.

**Cattle Step Up College FTE Drive**

Three prospective students were spotted on campus last Friday night by the Mid-Watch in the Pub.

The entire campus community sprang into action in an effort to increase the FTE and enrollment figures.

Admissions and Records officials immediately rushed to the scene to enroll the cattle. However, the cattle did not have the required application fee so A&R turned the matter over to Financial Aids who were arguing with the Placement Office Personnel whether the new students would be on Work Study or employed as Student Assistants. Work Study won out in an effort to increase the FTE and enrollment figures.

Cattle Police attempted to arrest the family for trespass, but the bull, who'd graduated from Hastings and the Police decided his points were better than theirs. They then attempted to issue a parking citation but had to give that up also when they could not find a windshield wiper.

The HoofPrint interviewed the cattle and discovered they were on their way North to Stanford's Research Farm to visit relatives and apply for their writing fellowship.

**Quality Homes For A Quality Life**

Children's Home Society of California has recently been awarded a grant to recruit and renovate 12 homes for Developmentally Disabled children. The purpose of the grant is to assist in the development of homes which would provide a normalizing experience for developmentally disabled children with special needs and who have no other alternative than State hospitalization.

Children's Home Society is looking for people who have experience, training, or are willing to receive training, which would provide them with the necessary skills to meet the needs of children with autism, multiple handicaps, and behavioral adjustment problems.

Children's Home Society is authorized to certify foster homes for children (0-21). The certification would be equivalent to a license allowing the foster home to become vendorized.

Financial assistance is available through the grant to assist potential foster homes in meeting specific licensing requirements.

Children's Home Society is working in cooperation with DDS staff to fulfill the objectives of the grant. For more information please feel free to contact us at (714) 686-7603.

**Back To School Nutrition**

"When Students are off at college, they often find keeping their weight down is as hard as keeping their grades up," says Gary Bart, Area Director of WEIGHT WATCHERS in Orange, San Diego, Riverside and San Bernardino Counties.

"For many young adults this is their first opportunity to exercise freedom of choice in their eating. Left to their own devices, they deprive themselves of the well balanced meals which were served at home. Breakfast is skipped. Lunch and dinner are taken on the run, consisting of fast-food which contains fats and refined sugar. Further, their physical activity level is often curtailed as they give up spare time for study time."

"This can lead to what is commonly called 'freshman 15', the 10 extra pounds that pile on during that crucial first year. Simply giving up meals is not the answer," Bart continues. "It's vital for the college-bound to maintain good eating habits so that they can function at their full potential, both physically and mentally."

Failure to eat properly can result in a self-made handicap affecting academic performance and, perhaps, leading to health problems in later years. The answer is to learn to make intelligent food choices. There's no reason for students to avoid joining the crowd for an occasional bite of fast-food each day. As long as they can make better than theirs, they won't have to find it difficult to keep their weight down."

"A hamburger or frankfurter broiled on a rack, a glass of milk and a salad are available at all of the fast-food places now, and makes a good meal. Fruit for dessert satisfies both the need for sweets and the need for fibre. Expansions of one's horizons, no matter what is ordered can make all the difference."

"Children with autism, multiple handicaps, and behavioral adjustment problems..."

"With full residency in the dorms, come the unpleasant spectre of long lunch lines. To avoid frustration and to help keep the line moving, the Commons reminds students that lunch lasts from 11:30-1:30 weekdays. Noon is the most crowded time. Come minutes early or later for your own convenience."

"..."
The team of Denise Gojerola and Mark Littlefield take off from the start/finish line.

The First Annual Budweiser Intramural Canoe Races were held at Glen Helen Park, on Friday, Oct. 3, with the team of Karen Kersey and Rob Wilson capturing first place with a time of 2:01.

Sherry Kiefer and Jerry Fay took second (2:11) and the team of Evelyn Garcia and Scott Burnett were a close third (2:12).

According to Joe Long, the campus intramural director, 16 teams participated in the event.

Two of the three arms (top) belong to Julie Hoover as a competitor passes her canoe in the head-to-head competition. During a lull in the action, a student catches up on some reading (right).
Everyone brought their frisbee, hamburger, steak and beer for a fun filled day of reminiscing about the “good-old-days” and updating each other on the events which had transpired during the past several years. There were many photograph collections which brought back vivid memories to all of us. We laughed with amazement at some of the stories behind the pictures. Those who had married and begun to raise a family were especially surprised with the changes in their life styles. Kevin Shaughnessy, who was one of the Village’s first residents, related how he trained to be a firefighter while in pursuit of his B.S. at Cal State and is now employed with the fire department in San Diego. Of his experiences as a firefighter, Kevin recalled, “My biggest fire occurred when our truck was first at the scene of a huge fire involving a jet airliner a few years ago”. The credit for the planning and organization of this festivity belongs to Cheryl and Pam Robson both former residents of Shandin house. Cheryl, who was the house resource RA, person in Shandin during her last two years (1975 and 1976 academic school years), said that even though only about half of those invited came, the event was a huge success and that once other people heard about the reunion they would be eager to attend the second annual reunion next year.

I’m anxious to look into the possibility of having someone (perhaps myself) coordinate this effort with Cheryl to invite those residents from the 1977 through the 1980 academic school years to the reunion because this is an excellent and convenient means of restoring and/or maintaining interpersonal relationships.

George Brown will speak here

Wednesday, Oct. 15
8:00 p.m. to Midnight
Student Union

A chance to lead.

A chance to fly.

These and many more opportunities for personal growth are available through training programs in the United States Army. Officer Candidate School (OCS) and the Warrant Officer Flight Training (WOFT) programs train leaders and pilots for assignments all over the world.

To enter OCS you must have a bachelor’s degree and meet other qualifications. WOFT applicants must possess a high school diploma. A couple of years of college are desired but not mandatory.

I have been appointed College Recruiter for this area. I will be working closely with local Army Recruiting Stations to help college students plan for their futures in the Army.

I look forward to talking with you about the Army and your opportunities. Please call for an appointment.

With Bank of America, you won’t have to stay up nights worrying about your checking account. We offer several checking plans and a variety of banking services that make checking easier.

**Check into our checking plans.**

Select Checking™ is economical if you only write a few checks a month. With the Option Plan™, the higher your balance, the less you pay in service charges. And with Initial™ Checking* if you qualify, you get a line of credit with your checking account. And a way to qualify faster for a BankAmericard® Visa® credit card.

**Study our services.**

Our Money Convenience System™ includes: Monthly Timesaver Statements* - an easy way to help balance your checkbook. Money Transfer Service - great if you’re getting money from home. Extended banking hours at many of our branches. Free Consumer Information Reports* - on everything from checkbook balancing to ways to finance your college education.

**Rest easy.**

We have people ready to help with your banking needs. Come on over. Find out more about checking or any other banking problem that’s been keeping you up late.

*If you’re a full-time student of sophomor standing or higher attending college in California, you may qualify for Initial Checking. Freshmen may qualify in some cases. See us for details.

**JOB OPPORTUNITIES**

**Babysitter needed urgent!** Must be a Christian Girl. To pick up 2 children, boy 5, girl 2, from Amherst Elementary at 4:45 p.m. Monday through Friday. The school is on 39th and Alva. Babysitting at my home from 4:45 p.m. to 9:45 p.m. Will pay $10 per week for yourself and $10 per week for the children. Please call 996-9960 if interested. The PawPrint October 8, 1980

**LET US SHOW YOU OUR STUFF**

Alpha Kappa Psi, The Marketing Club, the Business Management Club and the Accounting Association invite you to come out to meet the members, the advisors and the Dean of the School of Administration.

No speeches. Quite informal. Refreshments are served.

SUMP Room, Oct. 13, Monday between 2-4. Just stop in between those two hours for a little conversation or just a cool drink.

All majors invited

**NUKE THE FOO-BIRDS**

Contact the Committee for the Removal of Obstacles to Human Stupidity and Editorial Commentaries Featuring to Stop Human Nonsense as Prominently Occurs.

Contact: Ed Griga, PawPrint-Manila.

**SERVICES**

Experienced sport will be glad to help all your college papers, theses, resumes, manuscripts, etc., accurately and on time.

886-2500 between 10 and 2 or 886-6062

**Openings for Involvement**

There are currently openings for students on a wide variety of decision making and policy making bodies on this campus.

If you are interested in setting policies for the operation of the Student Union, there is one opening for a student position on the Student Union Board of Directors. Applications for appointment are available in the Dean of Students office (SS-114).

The Instructionally Related Programs (IRP) board also has one opening for a student position. If you are interested in the allocation of programs such as music, drama, arts, intramural athletics, Model U.N., etc., you should apply in the Associated Students office (SU-32).

The Publications Board, which oversees The PawPrint, is looking for two more student members. Applications are in the A.S. office (SU-32).

If you would like to have input into how Student Service Fee moneys are spent, you should join the Service Fee Advisory Panel. Applications are in the A.S. office (SU-32).

If you’re interested in the educational policies of the campus you should be on the faculty Senate Advisory Committee which formulates those policies. You can apply in the Dean of Students office.

Finally, if you’re interested in how your A.S. fee money is spent or A.S. policies, there are openings on the A.S. Board of Directors for undeclared Majors and from the School of Education. Applications are in the A.S. office.
